American Railroad Journal.

Saturday, April 29, 1865.

Stock Exchange and Money Market.

The stability of our institutions in the eyes of foreigners will have been thoroughly demonstrated by the occurrences of the last few weeks. An event which might have easily overthrown the credit of many an European State has not in the least impaired our own. To a spasmodic rise in the price of gold has succeeded a fall to the previous rates, and in the National and local securities there has been a regular advance. The attempt by an importation of 5-20s from abroad by a few parties for the sake of disturbing the public confidence has failed, and the operators have justly met with disappointment and loss.

The subscriptions to the 7-30s diminished for a few days by the interruption of business, have recommenced on the largest scale. Our foreign transactions in imports and exports for the week ending the 22d, were as follows:

Imports $1,120,560, against $7,458,933 the same week last year. The exports were exclusive of specie $2,114,312, against $3,369,907 the same time last year. The exports of specie were but $83,922, against $2,859,000 the same week in 1864. The customs' receipts were $1,421,861. The receipts of cotton coastwise and by rail were given at 4,397 bales, worth at present rates between $600,000 and $700,000.

The decrease in the exports of specie up to April 22, from July last is $46,451,403, having been in the total but $123,084,965.

The total increase of our exports during the same period has been $56,271,211 over the amount exported the same period of the preceding year when it was but $127,913,304.

The receipts of specie at the Custom House for the same time were $43,273,383, out of which have been paid as interest as it fell due $22,564,825. And the receipts of gold from California during the same period have been $13,976,761, or $5,419,811, more than they were the same time last year. All these statements are highly encouraging, indeed they could scarcely be better. We notice in the foreign correspondence of the London *Daily News*, that Mr. McCulloch is spoken highly of, and as being familiar with the subject of finance.

There is no doubt that under his practical management American credit will stand high abroad, and indeed we notice in the latest accounts from Amsterdam, that dealing in American securities has become so favorite an employment there, that almost all other kinds of Governments have been neglected. The favorites of former years are forgotten, and even the cautious Bank of Amsterdam has changed its policy, and now advances 65 per cent. on American Nationals without hesitation, that is 65 per cent. on their market value. This will give them still higher popularity and character abroad, and reminds us of those early days in our history when the Dutch bankers had the same confidence in the future of our then struggling republic.

A cotemporary in its financial article has ventured upon an estimate of the future of our financial receipts and expenditures, somewhat in contradiction of its previous opinions. We record it, however, for the benefit of our readers.

Receipts:

Internal revenue 1865–'66	$400,000,000
Customs	100,000,000
Lands	2,000,000
Miscellaneous	50,000,000
Total	$552,000,000

Expenses:

Civil service	$50,000,000
Pensions and Indians	15,000,000
War Department	25,000,000
Navy "	26,000,000
Interest on debt	150,000,000
Total	$246,000,000

This would leave says the Editor, 306 millions for the discharge of the debt.

While we think the amount allowed for the army is much too small, for with 17,000 men in 1858 it was upwards of 31 millions, we think that for the navy is too large. In 1860 with about 100 vessels of all sizes, the amount of money expend-

ed by the navy department was including the sum allowed for steam mail service about fourteen millions of dollars, and we imagine that that number selected from our present large fleet, of our best and staunchest vessels would be quite enough for a peace establishment. Nay more that if our surplus wooden steamers were formed into mail lines, they would not only answer as efficient cruisers but in part support themselves in the service. The estimate quoted is evidently founded on the belief that our funded debt will be about 3,000 millions, which we deem incorrect. With a surplus of three hundred millions the floating and unfunded debt would be materially lessened, and if necessary a considerable reduction be effected in the amount of legal tenders outstanding.

It is the opinion of Mr. Gallatin, certainly not of the school of paper currency financiers, that a resumption of specie payments is practicable in a very short period of time, and the more rapidly paper appreciates and gold declines, the easier the resumption will be made. At the same time we may observe that the appreciation of paper will be constantly adding to its purchasing power, and of course to the actual wealth of the holders.

We must not forget that the return of the seceded States to the Union will materially add to its financial power in the shape of production and revenue from taxation by so much increased, while an excise duty on cotton not considered in the foregoing estimate would largely swell the total of surplus.

What the country wants to help it forward in its career of resumption, and the payment of the National debt, is the establishment of mail lines in something of the following shape:

A line to the Mediterranean from Boston touching at the Spanish and Italian ports. We do not want a squadron lying month after month at Port Mahon, or in the Bay of Naples for mere show.

A line from New York to Liverpool and Havre.

A line from Philadelphia to Brazil, the imports from that country not requiring speed in transmission, from their very nature.

A line from Baltimore to certain of the West Indies.

A line from Savannah or Charleston to Cuba.

A line from New Orleans to Vera Cruz.

The next requirement is the early construction of the Pacific Railroad, in the manner we have previously suggested, by which the correspondence of Europe would become tributary to our post office department, while also the more valuable freight from China and the Indies, which would contribute to the customs receipts of the Treasury.

We are surprised that the press in the interests of our commerce do not join at once in these propositions. We have reason to believe they are favorably considered by our Government. The commerce of Great Britain has been enormously increased by its ocean mail service, and its great railway lines in India, at present the longest in the world.

We have little to report of the Money Market and Stock Exchange for the last week. The celebration of the obsequies of our late President, was conducted on a vast scale and in the most imposing manner. Nothing more grand was ever witnessed in this country, or probably in any other. The public mind ever since the fated day when he was stricken down. has been almost entirely engrossed with the contemplation of the subject.

Nevertheless the operators in gold with a devotion to their idol which nothing can lessen, managed on Tuesday evening last to get the price up to 151½, notwithstanding the fact that many millions are to be disbursed as interest before and after the first of May now close at hand, and the certainty, that the Government will very shortly cease to be a borrower in the market, and will soon, under the effect of the existing reductions in expenditure have a surplus applicable not only to the reduction of the legal tender currency, but of the principal of the debt itself. We notice that the Government securities are all appreciating; at the last foreign dates they were advancing, and we confidently expect advices in the course of a few days of a still further rise.

We notice by a leading Trade Circular published at Birmingham on the 8th of April, that a letter from T. W. Olcott, Esq., President of the Mechanics' and Farmers' Bank, Albany, recently published in this JOURNAL, on the subject of our future possible commercial and financial relations with England, has attracted its attention. It does not like Mr. Olcott's suggestions, and rather tartly remarks, "the worthy banker like too many of his countrymen, seems to have forgotten that England contrived to live for several years before the States were born." To which we might reply with the question. How? Certainly not always very creditably as its own historians inform us. Still Mr. Olcott's remarks seem to have made an impression, for the article alluded to goes on to say. "For all that the supposition alone is a sufficient caution; Mr. T. W. Olcott is a highly respectable person, and the bank over which he presides is a substantial and creditable concern; he is not likely to put forward such a statement at a venture." And in this we fully agree with the Birmingham Editor. He adds "All American connections are now extremely dangerous, as failures are every day *re*curring from the wholesale decline in the prices of produce and the rapid fall in the *value* of gold." If the writer alludes to this side of the water he is very much mistaken; if to his own, we admit his accuracy, since our last advices inform us of enormous failures in his own country, with the prospect of many more, just as Mr. Olcott has predicted.

The arrival on Wednesday night of the Liverpool steamer brings us the rebound of the news of the fall of Richmond. This has produced the most prodigious effect on public feeling in England. A large advance in our National securities immediately took place, and has probably checked any further return of them to this Country for speculative purposes. It is curious enough to observe that the Continental Bankers are finding a ready sale in England for the bonds they purchased at the original low prices, in exchange for railway iron and other materials for the construction of their works of internal improvements.

On Wednesday the market here resumed its former activity with an increased feeling of cheerfulness. An attempt to check it was made by the concoction of rumors from abroad of an unfavorable character, but as these were promptly disproved, a story that General Grant w assassinated was set afloat, as the last card in hand. This too proved to be a miserable falsehood, and the market stood firmer than ever. Railway shares took an advance, and are beginning to assume their former good repute. Our quotations appened show the fact that they are all rapidly improving, and their increased earnings give additional assurance of their stability. Erie has sold up to 85, and if this road is well and carefully managed its own intrinsic value increased by its connection with the Atlantic and Great Western, should never again allow it to range much lower, If there is a railway in this Country which should stand at par, and above par it is the Erie. Money is plenty and cheap, and commercial paper is more in request. Exchange is firmer under the necessity of further importations to supply the demand for goods, as the purchasing power of our currency is rapidly improving. It is understood that the expenditures of the Government have already been reduced a million of dollars per day.

The aggregate amount of exports from this port for the week ending 28th April, exclusive of specie was $2,008,843. We notice that by the Persia and Palestine there arrived a few days since several boxes and packages of specie, the value not stated. We should however like some one to explain why specie is coming from Liverpool to New York at this time, if but for the circumstance that a change in the direction of the current is foreshadowed.

The balance in the Sub-Treasury on Tuesday was $35,674,157 53.

The last returns both of the Banks of England and France are pronounced unsatisfactory.

The subscriptions to the 7-30s are continuing on the largest scale, averaging from three to three and a half millions per day.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon bonds, 95; do., War Loan, 95; North Carolina 6s, 72; Mississippi and Missouri Land Grant bonds, 88; At. and Gt. Western (Ohio div.) 1st mort., 76; Brooklyn City R. R., 130; Central Coal, 55; Wyoming Valley Coal, 46; Nicaragua Transit, 6; Atlantic Mail S. S. Co., 125; Bank of Commerce, 105; 4th National Bank, 96; Mechanics' Bank, 112; Metropolitan Bank, 121; Continental Bank, 99.

Philadelphia.—Allegheny Coupon 5s, 71; Huntingdon and Broad Top Mt. R. R., 20; do., 1st mort., 96; Phil. and Reading bonds, 1880, 94; Second and Third streets R. R., 1st mort., 100; Union Passenger R. R., 15; West Philadelphia R. R., 64; City 5s, 86; Spring Garden 6s, 89; Clinton Coal, 5/8; Commercial Bank, 58; Girard Bank, 49; Union Bank, 62; Atlas Oil, 1⅛; Big Tank, 2¾; Bull Creek, 2; Briggs, 1¾; Corn Pl., 4; Cherry Run, 8; Caldwell, 4⅜; Curtin, 10½; Duncard, 1⅜; Dalzell, 5⅝; Densmore, 4⅝; Egbert, 2⅞; Eldorado, ⅞; Excelsior, ¾; Eureka, ⅞; Franklin, 1¾; Forest County, 1; Feeder Dam, ¾; Howe's Eddy, 1½; Junction, 4; Jersey Well, 8; McCrea and C. R., 1¾; Mingo, 3½; Maple Shade, 17⅛; McKean and Elk Land, 10; McClintock, 4; McElheny, 4⅜; Oil Creek, 5⅛; Oil Creek and C. R., 3¾; Organic, ⅝; Oil Run, 2; Olmstead, 2; Petroleum Centre, 2¼; Royal, 1⅛; Sherman, 94c.; St. Nicholas, 8⅜; Sugar Creek, 8⅞; Seneca, 4; Sugar Dale, 8¼;

Union, 1; Wm. Penn., 2⅞; Walnut Island, 1⅛; The latest quotations are: City 6s, 91@91⅛; do., new, 93@93¼; State 5s, 89@90; do., coupon, 90@93½; do., 6s, W. L., 100@101; Phila., Wil. and Balt., 61¾; Reading, 54⅝@54¾; do., 6s, 1870, 91@91½; do., bonds, 94@95; Camden and Amboy, 129@129; Penn. R. R., 57¾@58; do., 1st mort., 102@103; do., 2d mort., 97@100; Little Schuylkill R. R., 32½@34; Morris Canal, 82@60; do., pref., 120@123; do., bonds, 90@96; Wyoming Valley Canal, 53@56; do., 6s, 90@94; Susquehanna Canal, 9¼@9½; do., 6s, 50@50½; Sch. Nav., 25@25½; do., pref., 82@32¼; do., 6s, 1882, 78@79; Union Canal bonds, 18½@20; Delaware Div. Canal 32¾@33; do., bonds, 95@95; Elmira and Williamsport, 29@30; do., pref., 44@46; do., 7s, 1873, 95@100; do., Chattle 5s, 70@74; Long Island R. R. 6s, 90@95; Lehigh Coal and Navigation, 56@60; North Pennsylvania, 22@27; do., 6s, 85@87; do., 10s, 104@106; Philadelphia and Erie, 19@19¼; do., 6s, 93¾@94; Minehill, 57@57¼; Catawissa, 9¼@9½; do., pref., 23½@24; Lehigh Valley, 62½@63; do., bonds, 96@100; Fifth and Sixth streets, (horse,) 40@45; Second and Third, 67@69; Race and Vine, 8¾@8⅞; West Philadelphia, 60@65½; Spruce and Pine, 22@25; Green and Coates, 27@28; Chestnut and Walnut, 40@45; Arch, 13@13⅛; Thirteenth and Fifteenth, 17¼@19; Girard College, 22@24; Tenth and Eleventh, 44@45; Norristown, 56@58.

Boston.—Northern (Ogdensburg) 1st mort., 94; do., 2d mort., 23¼; Michigan Central 8s, 1882, 110½; Boston, Hartford and Erie 7s, 68; Rutland and Burlington 1st mort., 58; do., 2d mort., 15; Boston and New York Air Line 6s, 47; Vermont and Massachusetts 6s, 1865, 98½; Cheshire R. R. 6s, 91½; Vermont Central 1st mort., 70; Nashua and Lowell R. R., 129; Conn. and Pass. Riv. R. R. pref., 66; New Hampshire 6s, 1877, 93; Maine 6s, 1883, 92¼; Massachusetts 5s, 1874, 106; Vermont 6s, 1871, 92; Lee county Iowa bonds, 1877, 20; Chicago 7s, sewerage, 1888, 100; Albany 6s, 1870, (Western R. R.) 100; Boston 6s, 1874, 100; Portland 6s, 1877, 91¾; Short Mt. Coal, 35¼; Belmont Coal, 8; Locust Dale Coal, 25; Bear Valley, etc., Coal, 19; East Boston Co., 12¼; Boston Water Power Co., 44; Cary Imp. Co., 13; East Boston Ferry, 56; Union Steamship Co., 120; Boston Gas, 755; Rocky Mt. Gold, 18⅞; Fuller Farm Oil, 1¾; 1st National Bank, 125; Merchants Bank 110; Atlantic Bank, 99; Safety Fund Bank, 125½; Bank of Commerce, 105½; 2d National Bank, 128; Suffolk Bank, 116; Bank of the Republic, 105¾; Bank of North America, 100; Atlas Bank, 5; Revere Bank, 115⅞; North Bank, 67; Western Bank, 106; Boston National Bank, 100; Shawmut Bank, 99¾; Washington Bank, 117; New England Bank, 116; 1st National Bank, Lowell, 103¾; Market Bank, 101¼; Boston Bank, 76; State Bank, 72; Blackstone Bank, 107¼; Shoe and Leather Dealers Bank, 125¾; Continental Bank, 103; Pawners Bank, 95½; Acton Mining Co., 1; Allouez, 3; Boston, 2¾; Bay State, 15½; Bedford, 37½c.; Copper Falls, 23⅛; Dana, 1¼; Eagle River, 3; French Creek, 1; Gt. Western, 3; Hancock, 9½; Huron, 43⅛; Hanover, 15⅝; Highland, 5¼; Humboldt, 4¼; Madison, 3½; Mesnard, 4; Native, 1½; New England, 87½c.; Phœnix, 20; Pontiac, 1¾; South Side, 3¾; St. Clair, 4½; Star, 5¾; Toltec, 2¾; Winthrop, 3.

Baltimore.—Marietta and Cincinnati bonds, 88⅛; Canton Co., 37; Springfield Mining Co., 60c.; Rensell, 65c.; Maryland Copper, 50c.; Penn. Oil, 1.00; Laurel Cannel Coal and Oil Co., 4.85; Atlantic Coal, 1.35; Lake Chrome, 20c.; Baltimore Chrome, 2.05; Bank of Commerce, 24¾. The latest quotations are: Balt. and Ohio, 103@103¾; do., 6s, 1867, 92@99; do., 1875, 100@105; do., 1890, 100@105; do., 1885, 100@105; Northern Central, 45@50; do., bonds, 1885, 90½@94; N. W. R., 17½@18; Canton Co. 35½@36; Gardner, 0.60@1.00, Gas Coal, 1.25@1.70; Maryland, 0.45@0.50; North State, 0.30@0.30; Springfield, 0.60@0.60; George's Creek, 100@110; Santa Clara, 12@15½; Balt. Chrome, 1.50@90; Bare Hill, 2.25@2.50; Atlantic Coal, 1.30@1.50; Mineral Hill, 1.00@1.50; Baltimore Coal, 1.30@2.00; Laurel Cannel Coal and Oil Co., 4.20@4.90.

Norway and Swedes Iron.

Our readers will perceive in another column a a curious display of Trademarks or brands by which the celebrated Norwegian and Swedish iron is designated as the manufacture of an English house, and imported into the United States by Wm. Jessop & Sons, 91 John street, a connection of the former. Knowing the reputation of these firms long established in both Countries, we recommend their iron to all who deal or work in the article.

The Rachette Iron Furnace.

One of the great objects at the present time among Iron Masters and all connected with this important interest, is to reduce and economize in the cost of making. The improvement of General Lachette of Russia, so successful among the conservative manufacturers of the old world, is now being rapidly brought into use in this country We learn that arrangements are now being made for the establishment of several Furnaces upon this plan, and that it is anticipated that a saving of 40 per cent. will be effected in the first cost and running expenses, and a much superior quality of iron secured. We would call attention to the advertisement in this number of the R. R. Journal.

Bessemer Cast Steel.

We have received a circular from the House of Winslow, Griswold & Holley, (the latter the eminent engineer and author of the best work on locomotives, &c., of our day,) who are established at Troy, and having adopted the well known processes of Bessemer, are prepared to furnish of this almost imperishable material, tyres without welds, rails, axles, piston and connecting rods, pins, boiler and ship plates, shafting, cannon bars and rods, spring steel and machinery castings. We might occupy a column in mere allusions to the advantages of Bessemer steel, but presume our readers are already acquainted with its value.

Chicago and Northwestern R. R.

The earnings of this road in March, 1865, were $506,290; in March, 1864, $390,355—an increase of $115,935. For ten months ending March, 1865, they were $5,772,768, against $3,793,614 in the corresponding period of the previous year—an increase of $1,980,149, or 52 per cent. The earnings for the first year of the consolidation will probably amount to $7,000,000, yielding a net income over operating expenses of say $2,800,000. The capital stock and bonded debt of the consolidated Company is as follows:

Common stock		$11,990,500
Preferred "		8,430,500
Total capital stock		$20,421,000
Bonds of Galena and Chicago Railroad Co.	$3,558,000	
Bonds of Chicago and Northwestern R. R. Co.	6,535,000	10,093,000
Total capital stock and bonded debt.		$30,514,000

The preferred stock of the Chicago and Northwestern Railroad Company, prior to the consolidation was $2,400,000; and the stockholders in the Galena and Chicago Union Railroad have or are to receive $6,035,500—making the preferred stocks of the consolidated company $8,430,500. The aggregate of bonds and preferred stock is $18,523,500. To pay 7 per cent. upon this amount will require $1,296,645 per annum—leaving a balance of $1,503,355, or nearly 13 per cent. on the common capital stock of the company.

☞ Railroad Contractors will find notices of interest to them in another column.

The Product of the Pewabic Copper Vein.

The annual report of the Pewabic Mining Company of Lake Superior for 1864, in reference to the Pewabic vein, remarks:

"The extent of the lateral openings on the Quincy, Pewabic and Franklin properties is only about one mile, and the extreme depth 900 feet (average probably not over 600 feet). Of this area of ground opened, not over one-half or two-thirds of which has been removed, the yield of copper, since work on the vein was first commenced in 1855, has been 37,830,015 pounds, or 18,915 tons, and the actual gross sales of the same have amounted to $8,258,793 54."

This enormous value realized in a few years was derived from three mines, situated side by side, in these proportions, to wit:

	Pounds Mineral.	Value Realized.
Quincy	15,471,675	$3,514,072 21
Pewabic	14,255,861	2,888,905 83
Franklin	8,102,479	1,855,815 50
	37,830,015	$8,258,793 54

It is on such facts and results as the above that the mining interest in the Lake Superior copper region is based. The three mines named are in the Portage Lake district, but the Keweenaw district is at least equally full of profit and of promise.

Grand Rapids and Indiana Railroad.

At its last session the Michigan Legislature passed an act conferring an additional grant of lands upon the above named road, in pursuance of a late act of Congress donating lands to this State for railroad purposes. On the 18th of April a meeting of the Board of Directors was to have been held at Kalamazoo, when matters of great importance to the proposed road, and to the people of the Western and Northern portion of the State, and especially along the line of the road,

were to have been presented and discussed. The facts with regard to this road, as we understand them, are substantially these:

The line of the proposed road extends from Fort Wayne, Indiana, to the Straits of Mackinaw—a distance of 353 miles—passing through naturally one of the best agricultural districts in the State. It strikes the immense pineries of the North, and when completed, over it will be transported in a great measure the wealth of copper and iron and other mineral upon our northern borders. South of Grand Rapids there are four natural divisions of the line:

	Miles.
1. From Fort Wayne to the Air Line R. R.	28.00
2. From the Air Line Railroad to Sturgis..	26.00
3. From Sturgis to Kalamazoo.....	35.98
4. From Kalamazoo to Grand Rapids	48.35
Total.....	138.33

The whole cost of building the road at $20,000 per mile (it could have been built at $15,000 per mile before the rebellion broke out) would amount to $7,060,000. But should the lands ceded the company, amounting to about 1,000,000 of acres, realize $10 per acre, they would exceed by one million of dollars the whole cost of building the road. The work which has already been done on the road bed has cost the company $260,000, and is equal to the grading of fifty miles. The time limited by the land grant laws for the construction of the road is as follows:

1. The first twenty miles north of Grand Rapids must be completed on or before January 1, 1866; and twenty miles each year thereafter, or the grants will be forfeited by the company and revert to the State of Michigan—for so much as shall not be so completed.

2. The whole road from Fort Wayne to Little Traverse Bay must be completed on or before June 3, 1874—else the grants will be forfeited by the State and revert to the United States—for so much as shall not then be completed.

Railroad Earnings--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 2d week in April:

	1865.	1864.
Passengers	$10,152 51	$6,653 10
Freight	7,500 05	10,183 59
Mail, express & telegraph	1,200 00	1,054 58
Total	$18,852 56	$17,891 27
Total this month to date.	$38,331 99	$34,074 05
Total for the fiscal year, commencing 1st Jan...	316,574 84	267,608 96

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending April 14, were:

	1865.	1864.
Passengers.....	$2,822 00	$2,776 05
Freight	4,099 07	5,072 33
Express	162 80	104 16
Mails.....	296 58	296 58
Total	$7,380 45	$8,249 12

Receipts from January 1 to April 14:

1865	$128,935 21
1864	122,571 39
Increase.....	$6,363 82

The earnings of the Grand Trunk Railway for the week ending April 15, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers.....	$41,553 00
Express, freight, mails and sundries .	3,124 00
Freight and live stock	93,299 00
Total	$137,976 00
Corresponding week, 1864	107,277 00
Increase	$30,699 00

Interest and Dividends.

The St. Louis, Alton and Terre Haute Railroad Company, will pay on the 5th of May at their new rooms on the 3d floor of No. 12 Wall street, a dividend of seven per cent. on their preferred stock, less the Government tax. The transfer books will be closed until the 6th of May.

The Toledo and Wabash Railway Company, will pay on the 2d of May a semi-annual dividend of 3½ per cent on their preferred stock.

The Northern Central Railway Company has declared a dividend of 2 per cent. for the quarter ending March 31st, clear of National and State taxes.

The Pennsylvania Coal Company will pay a dividend of 7½ per cent. on the 1st of May.

The Nashua and Lowell Railraad has declared a dividend of $4 per share, payable May 1.

The Cincinnati, Hamiltan and Dayton Railroad Company have declared a semi-annual dividend of 4 per cent., payable at the Bank of America on the 15th inst.

Liability of R. R. Company for Accidents.

A common carrier of passengers for hire is not liable to the peculiar common law rules which regulate the liability of carriers of goods, for, by the common law, as we have stated in a former article, the latter is answerable at all events; whereas a carrier of passengers does not warrant their safety, but merely undertakes that as far as human care and foresight can go, he will provide for their safe conveyance.

A carrier of passengers is only liable for any personal injuries which the latter may sustain whilst being carried by him, where such injuries have been occasioned by the carrier's negligence and unskilfulness.

The rule laid down by Justice Story has been pretty generally recognized in this country as well as in England, and seems to be the best calculated to secure the safety of the public, as well as fix and ascertain the duties and rights of the carrier.

That learned commentator says: "As they undertake for the carriage of human beings, whose lives, and limbs, and health are of great importance as well to the public as to themselves, the ordinary principle in criminal cases, where persons are now liable for personal wrongs and injuries arising from slight neglect, would seem to furnish the true analogy and rule. It has been held accordingly that passenger carriers bind themselves to carry safely those whom they take into their coaches as far as human care and foresight will go, that is for the utmost care and diligence of very cautious persons, and of course they are responsible for any, the slightest neglect." (Stokes *vs.* Salstonhall 13 Peters 181.)

Acts of Servants.

Railway companies are in general liable for the acts of their servants. From the very nature of the duty which they undertake to perform in carrying passengers, railway companies have cast upon them the duty of engaging as their servants, persons not only skilful but careful, and in all respects competent to perform the work for which they are employed, and this duty becomes as it has been well said, a "necessity," inasmuch as they, as carriers, are as responsible for their servant's negligence and unskilfulness as for their own, and upon the same principle they are not liable for an injury which happens to a passenger from some unforeseen accident or misfortune, and not in consequence of the negligence, default or blame imputable to them or their servants. (Craft *vs.* Waterhouse, 3 Bing., 321; Roe *vs.* Birkenhead, L. & C. Railway Co., 7 Exch., 36.)

And a company is responsible only for the act of its servant, if negligently done without skill and care, when done within the scope of his employment. In the English case of Sharood *vs.* The London and North Western Railway Company. (4 Exch., 580.) Parke, B. in delivering judgment, said:—"The principle is, that the master is not liable for the tortious act of the servant, unless he has given him express directions or implied authority to do the act. If the act, indeed, had been one which the company were legally authorized to do, it might have been put as having been done by the authority of the company. And in the same case Anderson, B., said, "The plaintiff was bound to show an authority express or implied given by the defendants, or a ratification by them of the act done."

Plaintiff's Negligence.

In a late article we discussed this subject pretty fully; but the consideration of it is of so much importance that we shall put the subject briefly in another point of view. After much doubt and many conflicting decisions, it is now well settled that where the immediate and approximate cause of the injury is the negligence of the plaintiff himself, he will not be entitled to recover. So also, if by the exercise of ordinary care he might have avoided the consequences of the defendant's negligence. (7 Exch., 36.) But it will not be sufficient to excuse the defendant, if the plaintiff's negligence did not immediately contribute, but merely occasioned, some portion of it. Baron Parke said, in one case, "There may have been negligence on both parts, and yet the plaintiff be entitled to recover. The rule of law is laid down with perfect correctness in the case of Butterfield *vs.* Forrester 11 East, 601; and that rule is, that although there may have been negligence on the part of the plaintiff, yet unless he might by the exercise of ordinary care have avoided the consequence of the defendant's negligence, he is entitled to recover. If by ordinary care, he might have avoided them, then he is the author of his own wrong." (Bridge *vs.* Grand Junction Canal Co., 5 Exch., 248; Greenland *vs.* Chaplin, 19 Law J., Exch., 293.)

Therefore the carrier will not be liable, if he can show that the immediate and proximate cause of the accident was the negligence and unskilfulness of the plaintiff himself. But still, although the latter may have been negligent himself, yet unless he might by the exercise of ordinary care have avoided the consequence of the defendant's negligence, he will be entitled to recover. (3 M. and U., 248.)

Nor do these rules merely apply to a case where the plaintiff himself has been negligent. It has been held that a person who takes his place as a passenger in a public conveyance is so far identified with the owner, that the negligence of the owner is the negligence of the passenger himself. Thus a passenger in a public conveyance cannot maintain his action where he is injured by the negligent management of another conveyance, if the party who had the management of the convey-

ance in which the plaintiff was riding, might by the exercise of proper care and skill have avoided the accident which caused the injury (Therogood *vs.* Bryan 18 Law ch. 336).

UNAVOIDABLE ACCIDENTS—SPARKS FROM LOCOMOTIVES.

It would indeed be hard if for every accident which may happen upon their line, the railroad company should be held liable; and where they have done all that science and prudence can suggest for the safety of their passengers, they will have performed their duty; and there must be some reasonable evidence of negligence on their party before the particular case can be submitted to the jury, and the decision of that point rests with the judge who tries the case. (Cornman *vs.* The Eastern Counties R. Co., 4 H. & N. 781; 29 Law J. (Exch.) 94.) In the case cited, the plaintiff being at a railroad station in the daylight, with a crowd of persons awaiting the arrival of a train caught his foot against the edge of a weighing machine, the base of which was raised a few inches above the level of the platform and falling, broke his knee cap. The machine was of a description in use at railroad stations, and was in its usual place adjoining the end of a counter, on which passengers' luggage was placed on the arrival of trains, and was used for weighing luggage; it was held that, under the circumstances, there was no evidence of negligence. In like manner, and upon the principle that negligence cannot be implied from the use of that which is authorized by law, it was held that where a railroad company empowered to use locomotive engines along their line, have taken every possible precaution, and are guilty of no negligence, they are not responsible, though a spark fly out from the funnels of the steam boilers and set fire to some grass on the side of the line, and eventually causes a wood or plantation to be burned down. (Vaughan *vs.* The Taff Vale R. R. Co., 5 H. and N. 679; 6 Jur. (N. S.) 899.) Where, however, there is evidence of negligence, the company will be liable; thus, in an action against a railroad company for so negligently managing and conducting an engine, that premises of the plaintiff adjoining the line were destroyed by fire emitted from the engine, it was decided that the fact of the premises being fired by sparks from a passing engine, is *prima facie* evidence of negligence on the part of the company, rendering it incumbent on them to show that some precaution had been adopted by them, reasonably calculated to prevent such accidents. It was also ruled that evidence was admissible for the purpose of showing that other engines belonging to the company, upon other occasions, in passing along the line, threw sparks of ignited matter to a sufficient distance to reach the building in question, without showing the precise cases under which this occurred. (Piggot *vs.* The Eastern Counties R. R. Co., 3 C. B. 229; 10 Jur. 571.) The late Lord Chief Justice Tindal in this case said, "The defendants are a company entrusted by the Legislature with an agent of an extremely dangerous and unruly character, for their own private and particular advantage; and the law requires of them that they shall, in the exercise of the rights and powers so conferred upon them, adopt such precautions as may reasonably prevent damage to the property of third persons through or near which their railway passes."

So, in another English case, where B. took a ticket from Workington to Carlisle, from the Whitehaven Junction Railway Company. In order to arrive at the platform at Maryport, the trains, pass over the line of the Maryport and Carlisle Railroad. On that line is a self-acting switch, used for shunting carriages into a siding. The switch and siding were the property of the Maryport and Carlisle Railroad Company, but was used exclusively by the Whitehaven Junction Railroad Company. The switch was about four yards from a gate which was on the line of the Whitehaven Junction Railroad Company, a servant of which company was in the habit of occasionally looking over the gate to see that the switch was in proper order. It was proven that all switches were liable to get out of order. A train of the Whitehaven Junction Railroad Company coming up slowly to the station, in consequence of the points being turned the wrong way, ran into the siding, and came into collision with some coal trucks, whereby B. was killed. The judge left it to the jury to say whether there was negligence on the part of the Whitehaven Junction Railroad Company. The jury found that there was; and upon motion it was held that the question had been properly left to the jury, that there was evidence of such negligence, and that upon such finding, the defendants were liable. (Birkett *vs.* The Whitehaven Junction R. R. Co., 4 B. & N. 730.)

Another case, was where from an imperfect weld in the formation of a driving-wheel used to one of the carriages on the defendants' line of railroad the wheel gave way, and caused serious injury to the plaintiff, who was a passenger. When the wheel was new and before using it, it had been properly and regularly tested by hammering it all around and all over, being the best known and most usual test adopted. The wheel was afterwards much used, and thereby reduced in thickness and considerably worn; after this, and after the tire had been re-turned, it was not again tested as before; if it had been, probably the defect would have been discovered. It was held that the question of negligence was properly left to the jury, and that the defendants were liable. The liability of the company would, it seems, attach, although the passenger who is injured is traveling by means of a ticket which he possessed as one of a staff of reporters for a newspaper, who were allowed to travel free. Great Western R. R. Co. *vs.* Harrison, Weekly Rep. 1853, 5, p. 626, Exch.

In Carpire *vs.* The London and Brighton Railway Company, 5 Q. B. 747, the happening of an accident to a passenger while traveling on the defendants' railroad was held to be *prima facie* evidence of negligence on the part of the company, for which they were bound to account, but such evidence would be entirely rebutted by proof that the accident arose from the wilful and wrongful act of a stranger. And where the plaintiff employed the defendant to remove her goods in his cart, for hire, and without the consent of the defendants' carman, the plaintiff got on the cart with her goods, and on the way the cart broke down, and the plaintiff and her goods were injured; it was held that she was not entitled to recover for her personal damages, for the contract was to carry her goods and not herself, and the fact of her getting into the cart made her a trespasser.

INJURY TO COMPANY'S SERVANT.

Generally speaking, when the injury arises from the misconduct of another, the party who is injured has a right to recover from the injuring party for all the consequences of that injury; whether for all possible consequences may be questionable, but every body who does a wrong, is, at least, responsible for all the mischevious consequences that may reasonably be expected to result from such misconduct. And this would seem to be the right rule as between the carrier and his passenger but the same rule does not extend to a servant of the carrier. He must judge for himself whether there is any probability of injury arising to himself, and he is not bound to incur risk in the service. He has the same, and oftentimes, better opportunities of judging of the probability of injury than his master, and is in a position to decline the service, and he cannot sue his master. Skip *vs.* The Eastern Counties R. R. Co., 9 Exch. 293, and other cases cited Chitty and T. on Carriers, 261.)

Northern Central Railway Depot.

The Northern Central Railway Company, which since the commencement of the National difficulties has been greatly extending its business and making many improvements upon the line of its road, may now pride itself upon having the largest and probably best railway depot building in the United States. This immense and imposing structure occupies an entire square in the city of Baltimore, bounded by Centre, Davis, North and Monument streets. The building in length measures 382 feet, with a width of 150, and nearly one million of bricks were used in its construction. The height of the structure from the foundation to the apex of the roof is 75 feet, and whilst the interior has a light appearance, it is quite apparent that it possesses unusual strength, and will stand the wear and tear of years. The foundation and part of the superstructure is of rough stone work. The first story or basement occupies the entire space of the lot, and will be used for the storage of freight either for the reception or delivery of goods. The floors on each side of the wagon way will be laid with concrete so as to render them perfectly dry.

The gas fixtures are upon the most approved plan. In addition to a large number of burners, there are fourteen large patent reflectors, which diffuse a broad and brilliant glare of light throughout the vast building. These have been tested in the presence of several officers of the company, who pronounce them a perfect success. The roof is well covered with slate as a protection against fire, and light is admitted from each side section by two rows of sash casements 112 in number. These are so arranged as to work upon pivots, and by an ingenious contrivance they are either opened or closed instantaneously by rope pulleys. This is a great desideratum in buildings of the kind where the dense smoke of locomotives proves so exceedingly disagreeable to travelers.

☞ A new iron mill and rolling factory has been established at Erie, Pa., under the name of the "Liberty Mills," with a capital of one hundred thousand dollars. It is the purpose of the company to manufacture from twenty to thirty tons of merchantable bar and hoop per day, in which scrap iron and Lake Superior pig will be consumed.

Internal Revenue Decisions.

The Commissioner of Internal Revenue has decided that, where any transportation company receives goods at a port in Canada for transportation to a point in the United States, whether by land or water, and itself transport the same thither, no tax can be levied under the law. But as soon as such company delivers the goods to some other transportation company in the United States the exemption will cease, it being considered in such case that the new company transports the goods from that point in the United States where it receives the same to any other point in the United States where said company shall deliver the same.

The Commissioner of Internal Revenue has decided that brokers and bankers, doing the business of brokers, are not to be subjected to the tax upon the sales of the 7-30 notes, when the same are the property of the government. The brokers, in such sales, are regarded as agents.

At the late session of Congress the Internal Revenue law was so amended as to prohibit the manufacturers of all articles enumerated in schedule C from *exposing for sale*, as well as selling, any such articles on which the proper stamp is not affixed. In other words, the old law only prohibited the sale of the articles referred to, without a stamp, but now they must not even be exposed for sale if not bearing the required stamp. This amendment went into effect on the 1st of April.

The Perkiomen Railroad.

The charter of the Norristown and Allentown Railroad Company was amended in several respects by a supplement passed at the last session of the Legislature; and the probabilities now are that the Perkiomen Valley will ere long be occupied by a railroad beginning at a point on the Philadelphia and Reading Railroad, several miles above Norristown, and terminating in a connection with the East Pennsylvania Railroad, at least six miles from Allentown.

If so built, the Perkiomen Railroad will of course be operated by the Philadelphia and Reading Railroad Company. The Perkiomen Railroad will establish a short and direct communication between Norristown and Allentown, two important county towns, and between the Schuylkill and the Lehigh Valleys, two populous and prosperous sections of the Commonwealth. To Philadelphia, too, it opens a rail line to Allentown, with but a single interposing summit.

To the North Pennsylvania Railroad there is nothing antagonistic in the Perkiomen Railroad, for the coal tonnage of the North Pennsylvania Railroad is distributed in yards along their own track, whilst their way trade, with all its present and prospective development, is a customer business which cannot be diverted—cannot get away to any other road. The North Pennsylvania Railroad has shown enough to demonstrate that it will soon pay dividends, and the Perkiomen Railroad is a local and public necessity which cannot much longer be postponed.—*U. S. R. R. & Mining Register.*

Atchison and Pike's Railroad.

As spring approaches arrangements for hastentening the work on this road are being perfected. The first division of twenty miles has been subdivided into one mile sections, and contracts for the grading and masonry let, except the last three sections.

Work is now being done on several contracts, and on all of them, ample preparations are being made, by engaging hands and procuring machinery and implements, and by the erection of boarding houses, &c., to cause the work to be pushed forward with the greatest energy so soon as the frost gets out of the ground. The ground is now frozen to a depth of fifteen inches, yet several forces of hands, as many as 150 in all, are at work at grading, and in quarrying rock for masonry. There will be at least 500 hands at work by early spring. The contractors are all obligated to have their sections completed by the first of June next.

A contract has been made with John Penton for 25,000 ties, and with other parties for 10,000 more. The company has also recently purchased 800 acres of timber land in Missouri, on the Platte County Railroad, from which ties are to be procured. This land is within four miles of Atchison, and cost the company ten dollars per acre.

Iron for the road is expected to be brought on early in the spring. Two locomotives have been purchased, and will also be on the ground to assist in the construction early in the spring.

The general direction of the road is due west from Atchison. Ample means have been secured for its rapid construction. The Government endowment for this road, under the provisions of the Pacific Railroad bill and the Kickapoo treaty, is a munificent one—so ample that the company cannot lack the ability to comply with all the requirements made. It is believed that the road will be completed to the Republican river long before the Kansas Valley Branch, with which it is to connect, reaches the point of intersection.—*Atchison Press.*

Notice to Contractors.

OFFICE OF THE NEW YORK, HOUSATONIC AND NORTHERN R. R. Co., 137 Broadway (Room 4), New York City, April 21st, 1865.

SEALED PROPOSALS will be received at this office until 11 o'clock A. M. of May 5th, 1865, for the Grading, Masonry and Bridging (of a part or the whole) of the New York, Housatonic and Northern Railroad, extending from White Plains, N. Y., to Brookfield, Conn., a distance of 39 miles.

Maps, Profiles, Plans and Specifications will be ready for examination at this office on and after April 24, 1865.

G. S. AVERY, Engineer.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITORY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 5 NASSAU ST., Feb. 17, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents.

New York, Saturday, May 6, 1865.

The Cotton Crisis in England.

The readers of this JOURNAL for the last two years may have noticed that we have frequently expressed the opinion, that cotton was to play an important part in the final scenes of the drama of the rebellion; that while it was to give a large amount of financial strength to our own government, it was also to avenge to some extent the unfair treatment we have received throughout the contest, from commercial classes in England. The past year has been marked with symptoms of this crisis, for as the cause of the South has grown more doubtful, many a penny per pound has been marked off the quotations of the article, whether bought in Egypt for gold, or obtained for munitions of war run into the blockaded ports. From time to time heavy failures have occurred among the speculative houses which preferred a trade under the ban of the Queen's proclamation, to a more legitimate one with their former friends. But now we may venture to assert that a crisis is at hand which is to shake the foundations of that commercial system which has been the work of four years constant efforts at our expense. Our last advices from England are to the effect, to use the precise words of a leading commercial journal of Liverpool the great cotton port of the Empire, that "universal distress reigns in the cotton market." There is, it continues, "an utter prostration of confidence amongst all classes of operators, and an almost universal anxiety amongst holders to get out of the staple. The succession of disappointed hopes and gigantic losses which have week after week, and month after month followed each other in grim array, will cause the first quarter of '65 to be remembered for years to come. Prices have fallen quite 50 per cent. within the space of three months, and *the decline* is still going on without any immediate prospect of a reaction. *Millions of money have been swept away by this unparalleled depreciation. The bubble has burst, and a mighty collapse has followed.*"

Nor is this collapse confined to the mercantile classes only, for the same journal states this remarkable fact, that *all England* has been engaged in speculation. It affirms that "thousands of people of *every social grade*, lay and clerical, naval and military, legal and medical, male and female are now repenting in sackcloth and ashes, that they yielded to the blandishments of the imperial fibre." We confess we had not suspected quite so much as this. But the truth however unwillingly confessed, is out at last, and a financial catastrophe is evidently at hand in England. It is a subject worthy of reflection, that this misfortune is clearly traceable to an unwise and unjustifiable policy on the part of the commercial community of England towards the United States. The Government there claims to have acted towards this country with a perfect neutrality. Let time and history decide this point. But it is evident that in furnishing powder, ball, cannon, and all the military requirements of the rebel states, the contest was greatly prolonged at our expense both of blood and treasure. These supplies exchanged for cotton, produced large profits, both to the people engaged in the unlawful traffic, and the ship builders who furnished the vessels in which the illegal traffic was carried on. But as these profits became apparent, the culture of the staple was at the same time stimulated in Egypt and the East Indies, by the natural course of events, and as the people of those countries are semi-barbarians and indifferent to European fabrics, which suited neither their climate, their tastes nor their habits, an enormous drain of specie has been going on to these countries in return for their increased products of the staple, and the merchants and borrowers of money generally in England have had to pay double and treble interest for the use of it. Nevertheless the stock on hand, and due at Liverpool and London without equivalent consumption, has gone on accumulating until it has assumed the following proportions.

We quote from the same journal of the 15th ult., the following statement:

Stock in Liverpool bales.....	309,000	606,000
" London "	90,000	127,000
Afloat from the East "	469,000	335,000
	868,000	1,068,000

The same authority affirms that the decline in price is not however owing to the augmented supplies, but takes precisely the same view of the causes for it, which we do ourselves. It says, "General Sherman has done infinitely more damage to the market than surplus Egyptians and Surats." "The general opinion is (continues our authority) that peace will let loose at least a million of bales upon us," while others talk "of two or three millions." "If *a million only* was received the total supply of 1865 would be 4,000,000 bales and it is absurd to suppose that under such circumstances long staples would find buyers at 14d per lb. Even half a million bales would *stagger the present currency.*"

Now then the event is at hand which is here so frankly foretold. Beyond all question a million of bales if not much more will find their way abroad during the present year, and if so, we may look for a collapse carried into almost the final stage. The ruinous disorder will pervade all classes of English society, if we may believe what has been already stated by one of their own best informed journals, and therefore it must beyond all question reach the mass of persons who have sympathised with the rebellion and have predicted our ruin.

Strange and just enough too, that whatever cotton hereafter reaches Liverpool from the United States must go there under the old flag which though tempest tost and riven, yet floats supreme over the nation, and will resume untarnished its

place on the high seas, from which it was hoped by its enemies it would be driven. Long staple or short staple, no British spindle will ever again twirl any American cotton but with our consent. And by this time, the British manufacturers have found this out, notwithstanding what they have been told in the *Times* or Morning *Post*. The decline in price the last three months having been 50 per cent., and the last quotations of middling American at Liverpool being about 29 cents, it is easy to calculate what the loss must now be to the present holders of the stocks on hand or constructed for at previous rates. Allowing that the total imports of the stock have been largely reduced by consumption we have still a total on hand in England of about a million of bales, and the loss at 50 per cent from the prices of only three months since as estimated by the journal already quoted, will have been already $134,500,000 or thereabout. A further fall which is anticipated on the arrival of a million or two bales suddenly thrown into the British market, and the fact that the supply from India will also be double what it was last year, in the price from 29 cents to 14, which is highly probable lead us to the conclusion that the total loss is likely to be $200,000,000! We may readily perceive therefore how not only the currency of England is to be "staggered," but how a wide spread bankruptcy may occur there within the present year. For the actual loss in the hands of the holders will not only affect them specially but all the other interests connected with them throughout their whole ramifications.

Trade interests may be compared to a row of bricks which are tumbled down by the fall of a single one.

We do not allude to these things with any feeling of gratified resentment; far from it. But we see in the probability of this financial crisis, such as we find predicted even in the English papers themselves, an instructive lesson, and a reproof of that spirit which while contemplating with evident satisfaction the political misfortunes of a friendly nation, did not perceive there was retribution rather than advantage in the troubles of the American Union.

Railway Bridge over the Severn.

The proposed high level bridge which is to carry the South Wales and Great Western direct Railway across the River Severn near to Chepstow, is, according to the design of Messrs. Fowler and Fulton, the engineers, to be two miles and a quarter in length, and is to have sufficient headway to permit masts of ships of 122 feet in length to pass under when the surface of the river is at the main tide level, so as in no way to impede the navigation. The principal opening, which is to cross the low water channel is to be 600 feet span, being the total width of the Thames at Southwark Bridge, or 150 feet wider than the opening of the Menai Bridge. Messrs. Fowler and Fulton estimate the probable cost of this bridge at 980,000*l.*, for which sum the eminent firm of Messrs. Cochrane, Grove & Co., bridge contractors, have undertaken to complete the work. The gradients upon this new route will be such as to make the line between London and South Wales coal fields better adapted to a large coal and mineral traffic than any other line of the same length in the kingdom. The shortening of distance and securing the better gradients will practically diminish the journey between Milford Haven, the South Wales coal fields, and London by about 40 miles.

Toledo and Wabash Railway.

The gross earnings of this road for the years ending December 31, 1863 and 1864, have been as follows:

	1863.	1864.
From freight	$1,021,650 07	$1,355,444 25
" passengers	349,339 91	546,954 69
" mails	24,300 00	24,300 00
" express	21,155 06	29,408 87
" other sources	23,352 85	94,214 12
	$1,439,797 89	$2,050,321 93
Expenses, viz:		
Repairs of road bed	$242,018 03	$250,741 36
" bridges	3,837 82	8,705 86
" build'gs, etc.	11,734 75	13,650 95
" engines	87,758 69	88,480 12
" cars	101,362 78	148,923 98
" tools, etc.	12,310 16	8,932 30
Fuel	98,981 41	135,524 88
Oil and waste	29,551 59	33,561 28
Loss and damage	20,153 85	22,398 21
Agents and clerks	32,113 28	38,629 76
Conductors, etc.	109,770 66	141,306 67
Handling freight	26,819 00	32,361 12
Rent of depots, etc.	2,277 00	7,318 34
Other transp. expenses	47,715 91	61,214 16
Taxes, rents, insurance etc.	67,471 42	112,580 85
	$898,876 35	$1,104,829 84
Net income	$540,921 54	$945,492 09
Balance of income account of 1863		147,755 09
Stock sold in 1863, realized		70,000 00
Total		$1,163,247 18
Appropiated as follows:		
Renewal of bridges, iron, spike and ties		$251,684 84
Construction and equipment		118,923 43
Interest, etc		493,686 83
Dividends, preferred stock		69,754 21
" general stock		80,305 75
Stebbens & Co., old contract assumed		650 00
Balance carried to 1865		148,242 12
Total		$1,163,247 18
Of the foregoing balance, $98,401 04 is available, viz:		
United States military		$21,964 68
General freight items		303 46
Toledo Bounty Fund bond		500 00
Deposited in bank at New York		2,188 13
" " Toledo		87,300 23
		$112,256 50
Less amount due on coupons, etc		13,855 46
Actual net available surplus		$98,401 04

Compared with the previous year, the gross earnings show an increase of $610,524 04, with an increase in expenses of $205,953 49—making the increase in net earnings $404,570 55.

The capital of the company, which represents the cost of its roadway, equipment and other property, is thus compared:

	1863.	1864.
General stock	$2,331,878 00	$2,442,350 00
Preferred stock	982,900 00	984,700 00
First mort. bonds	3,400,000 00	3,400,000 00
Second "	2,500,000 00	2,500,000 00
Sinking Fund bonds.	151,830 00	152,355 00
Equipment "	600,000 00	600,000 00
First mort. coupons funded	27,164 38	1,512 76
Do., unfunded	1,866 81	
	$9,995,636 19	$10,080,917 76

The Company has increased its capital during the year by issuing its general and preferred stock, to holders of the stock and floating debt of the late Toledo, Wabash and Western Railroad Company, according to the conditions of the original agreement made with that Company, for the redemption of the same. Although this original agreement contained no positive stipulation as to when this privilege of redemption should finally cease, yet the right has continued to be recognized from time to time upon the grounds of equity, and, also, because it has been the obvious policy of the Company to continue it. The further issue of the inconsiderable sum of 300 shares of general stock, and 306 shares of preferred stock, will absorb the whole amount of stock and floating debt of that Company, now outstanding.

The proposal heretofore made to the holders of the First Mortgage Bonds of the Company, to extend the time of the maturity of the principal of that liability for a term of years, and receive the proper coupons therefor, has been so favorably received and so generally acquiesced in by them, that the extension may now be considered as substantially accomplished.

There remains outstanding of the Sinking Fund Bonds of the Company $152,355; the original issue of which amounted to $249,112 50. During the past two years there have been purchased and canceled $95,970 of these bonds, and it is proposed to continue purchasing them until they are all extinguished.

The Funded Coupon Bonds or notes issued in payment of Coupons of First Mortgage Bonds, maturing prior to the purchase of the road, and amounting to $147,689 37, have all been returned, paid and canceled, with the exception of $1,512 76, which are in the hands of unknown persons. The report says:

The most prominent feature in the transactions of the past year, and doubtless, that which will afford the largest measure of satisfaction to all parties in interest, is the marked and unprecedented increase in all branches of the traffic of the road, and consequent flattering increase of earnings. The revenue account, as compared with that of the previous year, shows an increase of $197,614 78 on passenger service, and $333,794 18 on freight service, and an aggregate increase of $610,524 04.

The rapid growth and development of the passenger traffic of the road, as evidenced in the successful results of the past year, is a matter of especial encouragement and satisfaction. From comparatively small beginnings, and without any material expenditures abroad, this branch of our business has already attained great importance, and promises soon to become the most stable and productive source of our current revenues.

The freight traffic has likewise been exceedingly large and prosperous during the entire year, especially during the latter portion of it, when the amount of freight offering for transportation was largely in excess of the capacity of the Company to move. The compensation received for this class of service has been more remunerative than at any former period, and a maintenance of the present favorable rates is greatly to be desired. However the prosperity and success of this branch of our business will be more than doubly assured when we shall have overcome the injuries and losses sustained by reason of the unfortunate blockade of freight which occurs with unfailing regularity immediately upon the close of lake navigation, and also from the temporary diversion from the line, of a large amount of freight for the requirements of the army. To the first of these evils, our easterly connections should apply a complete and immediate remedy, and the happy solution of the other is found in the early prospects of peace and consequent return of labor to the

soil, and restoration of business to its natural channels.

During the year the business requirements of the road have been such as to have imposed upon the company the unavoidable necessity of making important outlays for additional depot buildings, freight houses, car shops, and other permanent structures. Among the most costly of these improvements may be mentioned the new and extensive car shops just erected upon the company's grounds, in the City of Toledo. These shops are designed not only for the manufacturing of all kinds of cars, but also, for repairing and rebuilding those now in use, and to this end they will be furnished with superior machinery and all other necessary appliances, so as to render them amply available to supply any demand that may be required. A large and commodious passenger depot has also been built at Fort Wayne, besides several other buildings at other points on the line, and where they were absolutely indispensable. To meet these important and necessary expenditures, the sum of $118,923 43 has been withdrawn directly from the current earnings of the road, although the whole of that amount was properly chargeable to the capital of the company.

Much care and attention has been bestowed upon the road bed and superstructure during the period under review, and liberal expenditures have been made towards putting the track in a superior condition of efficiency. In addition to the usual or ordinary repairs upon the road, which have amounted to $250,741 36, there have been large expenditures made on account of general renewals, included among which are $161,816 91 for new and re-rolled iron and chairs, $39,097 75 for ties, and $27,279 61 for ballasting.

The following are some of the statistics of these improvements, viz:

Number of miles ballasted	20
" new iron	26
" repaired iron	30
" new wrought iron chairs	17,475
" ties	140,000

In further improvement of the general roadway, several of the most important bridges upon the line have been entirely rebuilt, and from others a large portion of the old timber has been removed and new substituted. There have been built 1,200 feet of truss bridge, and 150 feet of stringer bridge, and 611 feet of pile bridge, involving an outlay of $50,770 18 irrespective of the sum of $8,705 56 expended for ordinary repairs.

Other and extensive improvements have also been made in the rolling stock and equipment of the road. Six first class passenger coaches, with raised roofs and other modern improvements, have been manufactured at the shops of the company, and several other coaches partially renewed. Two long mail and express cars and two baggage cars, together with thirty-five box and stock cars, have also been built entirely new, and a considerable portion of the oldest of the equipment has undergone a thorough overhauling and put into effective condition.

The motive power of the road, originally from the most celebrated manufactories in the country, and unsurpassed in strength and quality, has been kept in superior working order, and seems to have suffered no apparent deterioration, since first placed upon the road.

The elevator facilities have been materially enlarged during the past year by the completion of elevator designated as "No. 3." With this valuable addition, the present capacity for the storage of grain is equal to 1,452,000 bushels, which is supposed will be sufficient for the immediate requirements of that branch of business.

In pursuance of arrangements heretofore made, the Western Union Telegraph Company is now engaged in putting up a superior telegraph line upon our route, with two new galvanized wires, besides the old wire. The completion of this undertaking will necessarily greatly facilitate all business operations upon the road.

Throughout the year our trains have been operated with remarkable exemption from casualties. No accident has occurred involving serious personal injury to any passenger, or any material loss or destruction of property.

Our business relations with connecting roads have continued harmonious and friendly, and it is a matter of especial satisfaction that we now number among our strongest and most valuable allies, several lines of road that in former years have been either our most formidable competitors or have otherwise pursued a general policy inimical to our interests. In forming these alliances, we shall secure important accessions to our business, and consequent material and pecuniary strength to the line.

Reference was made in a former annual report to the great importance and general advantages to be secured to our road by establishing a railway connection with Terre Haute and the Ohio River, by the way of Attica. This subject is now invested with, perhaps, greater significance, from the fact that rival and hostile interests are now seeking to occupy this territory, and endeavoring to divert the people from their original purpose of building a road to Attica, to other and no doubt, impracticable schemes. The natural outlet for the productions of this rich and prosperous section of country is by our route, and it is hoped that some plan may be devised, by which, with some assistance from this and other companies interested, this important link of railway connection can be completed at an early day.

In reviewing the history of our financial operations for the year, we find that the operating expenses proper, have been about fifty-three per cent. of the gross earnings. From various causes these expenses have been larger in proportion than in preceding years; but a large per centage of this excess is, of course, attributable to the greatly increased cost of labor and materials required in operating the road, and also, to the important increase of the tonnage moved during the year, which has necessarily required extraordinary service to be performed by the equipment, thereby materially augmenting the general repairs of the machinery, as well as that of the track. But notwithstanding the aggregate expenditures of this department of the road may appear somewhat formidable, yet the efforts of those in immediate charge have, throughout the year, been constantly and assiduously addressed to the strictest economy and prudence in its management, and it is believed that no expense of any serious moment has been incurred, that was not absolutely necessary and indispensable.

In conclusion, the shareholders have not only abundant cause for congratulation upon the highly flattering and successful results of the past year, but substantial grounds for anticipating a corresponding degree of success and prosperity during the incoming year. The agricultural resources of the country tributary to our road are immense, and these productions are increasing with amazing rapidity. The cereals harvested in this region during the season just closed have been unprecedently large, and were all safely secured, and prove of superior quality. The corn crop which was unusually abundant still remains in the hands of the producers comparatively untouched, and in addition to this, fully one-half of the large wheat crop is yet to come forward, promising us an amount of freight fully equal to our capacity to move. A large portion of the beef and pork product, besides a heavy tonnage of rolling freight is still back and to come forward, and a variety of other circumstances combine to make our future prospects highly hopeful and encouraging.

The road is 242.4 miles in length, of which 75.5 miles are in Ohio, and 166.9 miles in Indiana. Gauge of track 4 ft. 8½ in. Average weight of rail, 59 lbs. No. of stations, 42. No. of engine houses, 4.

The equipment consists of 48 locomotives; 18 passenger, 14 mail and baggage, 667 box, 158 stock, and 150 platform cars.

Miles run by locomotives with passenger trains 343,501; with freight trains, 733,505; with wood and gravel trains, 167,352—total, 1,244,358.

There were carried eastward over the road during the year, 4,504,653 bushels of grain, 2,965 car loads of cattle, 1,065 do. of hogs, 2,425,241 feet of lumber, and 172,008,626 lbs. sundries, netting $1,017,243 10. Westward, 20,058 bushels of grain, 109 cars of cattle, 722 do. of hogs, 10,787,078 feet of lumber, and 132,212,405 lbs. sundries, netting $338,201 15.

Number of passengers carried east, 174,351; do., west, 181,993—total, 356,344, equivalent to 58,562 carried over the whole road. Equivalent number of passengers carried one mile, 14,230,728.

GENERAL BALANCE, DECEMBER 31, 1864.

Road bed and equipment	$10,080,917 76
U. S. military service	21,964 68
Bills receivable	2,200 00
Toledo, Logansport & Bur. R.R. Co.	10,787 17
Quincy and Toledo R. R. bonds	3,000 00
Illinois and Southern R. R. Co	3,841 26

Vice President.—WARREN COLBURN.

Secretary and Treasurer.—J. N. DRUMMOND.

General Sup't.—GEORGE H. BURROUGHS.

Iron Trade of Lake Superior.

Less than ten years ago the first shipment of iron ore from Lake Superior to the lower lake ports was made by the Cleveland Iron Company. The business of iron mining in Upper Michigan previous to this time had been carried on rather as an experiment than as an industrial pursuit. The completion of the Sault Ste. Marie Canal in that year, and of a railroad from Marquette to the mines in 1858, gave a great impetus to the business, by giving access to the markets, and since then the mining and manufacture of iron have increased with wondersul rapidity and with little interruption, except during the first year of the rebellion.

The exportation of ore and metal in 1864 was as follows:

SHIPMENTS OF IRON ORE.

	Tons.
By Lake Superior Iron Co	83,848
" Jackson Iron Co	70,937
" Cleveland Iron Mining Co	58,838
" Pittsburg and Lake Angeline Co	19,000
" Miscellaneous Parties	2,500
Total for 1864	285,123

SHIPMENTS OF CHARCOAL PIG IRON.

	Tons.
By Morgan Iron Co	4,060
" Pioneer Iron Co	3,716
" Northern Iron Co	3,026
" Bancroft Iron Co	555
" Forestville and Collinsville Furnace	2,475
Total for 1864	13,832

The following table shows the annual shipment of ore since the commencement of the business to the end of 1864:

	Cleveland Iron Co.	Jackson Iron Co.	L. Superior Iron Co.	Total. gross t'ns.
1855	1,447	.....	.....	1,447
1856	7,100	4,497	.....	11,597
1857	12,272	13,912	.....	26,184
1858	19,931	11,104	.....	31,035
1859	30,344	10,662	24,668	65,674
1860	42,696	41,286	38,016	116,998
1861	7,311	12,919	25,200	45,430
1862	35,244	42,767	37,710	115,721
1863	47,612	63,588	74,057	185,257
1864	58,838	70,937	83,848	*235,123
Total	262,795	271,672	278,499	834,466

* Including product of the Pittsburg and Lake Angeline Co., 19,000 tons, and of miscellaneous parties, 2,500 tons.

The year 1858 witnessed the first attempts at reducing the ores at the seat of production. In that year the Pioneer Iron Company commenced business. Since then five other companies have established themselves, and others are about to commence operations. The products of the furnaces of the district yearly from the commencement have been as follows:

	Pioneer Iron Co.	Collins Iron Co.	Northern Iron Co.	Forrest Iron Co.	Morgan Iron Co.	Bancroft Iron Co.	Total Tons.
1858.	1,627	....	....	....	...	...	1,627
1859.	4,683	2,575	....	....	....	...	7,258
1860.	3,500	1,950	150	....	....	...	5,600
1861.	2,580	2,060	900	2,430	....	...	7,970
1862.	1,438	2,207	2,143	2,802	....	...	8,590
1863.	2,237	2,141	1,904	2,626	405	...	9,313
1864.	3,716	†	3,026	†	4,060	555	13,832
Total.	19,781	....	8,123	....	4,465	555	54,190

† The Collins and Forrest Companies are set down in 1864 in an aggregate of 2,475 tons.

The value of the total production at the prices prevailing each year has been as follows:

	Total Product.	Price per ton.	Value.
1858	1,627	$25	$40,675
1859	7,258	25	181,450
1860	5,600	25	140,000
1861	7,970	23	183,310
1862	8,590	35	300,650
1863	9,313	45	419,085
1864	13,832	65	899,080
Total	54,190 tons valued at		$2,164,150

The aggregate value of shipments at Marquette in 1864 may be estimated thus:

Value of 235,128 tons of ore @$8	$1,881,024
Value of 13,832 tons of pig-iron @$65	899,080
Total	$2,780,104

—a sum representing the value of the iron business of the Lake Superior district in the year 1864. Assuming the average price of ore at $5 per ton since the commencement of operations, there has already been produced ore to the value of $4,174,355, or a total, including pig, of $6,388,505.

From the above figures it will be seen that the iron business in this region has become a most important one. The iron is of the best quality and the demand for it is increasing. Especially since the war-demand commenced has this source of supply become popular, and preparations are being made for larger operations than have hitherto been attempted. The attention of capitalists, indeed, has been turned to the region more than ever before, and railroads are being extended in land from Marquette, on Lake Superior, and from Little Bay de Noquette, on Lake Michigan, to accommodate the growing trade of the region. With this increase of working means, and avenues of transportation, may we not augur well for the future of this branch of national industry, as yet in its infancy, but which in a few years will become developed to a vast commercial interest.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING DECEMBER 31ST, 1864.

Gross receipts of the half-year		£618,238
Deduct ordinary working expenses		369,002
Net balance over ordinary working exp.		£249,236
Deduct renewals of permanent Way chargeable to Revenue during half-year, viz:		
Grand Trunk Railway [proport'n]	£40,000	
Buffalo and Lake Huron & Montreal and Champlain [actual]	10,718	
		50,718
		£198,518
Deduct extra amount for renewals specially charged in this half year, as per report		30,822
Balance		£167,696
Deduct loss on American currency		78,413
Balance		£89,283

This amount, added to the balance from last year, viz., £6,470 14s 3d, making a total of £95,754 2s 1d, is dealt with as follows:

To nominal amount of Postal and Military Revenue carried to seperate account		£9 943
Interest, &c. paid on land		2,303
Do. mortgage to Bank of Upper Canda		4,424
Do. on Loans, Bankers', Balances, Promissory Notes, European Exchanges, &c.		6,446
Do. British American Land Company's Debentures		617
Do. Montreal Seminary Debentures		616
Do. Island Pond Debentures		2,700
Half-yearly instalment on Portland Sinking Fund		2,312
		£28,361
Atlantic and St. Lawrence Lease [in full]	30,526	
Detroit Line Lease [in full]	11,250	
Montreal and Champlain Company under working arrangement]	10,274	
Estimated amount due Buffalo and Lake Huron Company	7,241	
		59,291
Equipment Bond Interest		7,084
Balance carried to next account		18
		£95,754

The gross receipts from traffic and all other sources for the half-year have been 618,238*l.*, as against 561,428*l.*, or an increase of 56,810*l.*, or equal to about 10 per cent., the American currency being, in each period, taken at par.

The passenger traffic again shows a considerable improvement, the number carried, of all classes, being 822,446, against 714,983, or an increase of 107,463, or 15 per cent. The amount received was 235,419*l.*, against 204,762*l.* The average receipt per passenger was 5s 8d in both periods. The total tonnage of freight was 443,934 tons, against 507,447 tons; but while there is a falling off of about 12 per cent. in quantities, the nominal rates realised show a considerable improvement, viz., 356,319*l.* for 1864, against 328,936*l.* for 1863, or about 8-32 per cent increase. The average receipt per ton for 1864 was 16s, as compared with 12s 11d for 1863, but a larger proportion of through freight paid for in American currency has been conveyed.

Much of the past half-year has been marked by extreme difficulty. The consequences of the depreciation and fluctuation of the American currency have been aggravated by a serious rise in the price of labor and materials on the Company's lines in the United States; all commercial affairs have been injuriously influenced by the long period of dear money in England; and, more recently, the restrictions on intercourse, viz., passports, consular certificates for goods in transit, etc., adopted by the Government of Washington, have added a new and more serious cause of embarrassment. This latter difficulty has especially affected credit. Thus all Canadian securities have largely and unduly declined in price. Payments due to the Company have been less promptly made, and banking accommodation in like manner has been restricted. At the same time the proportion of the Company's receipts in American funds has considerably augmented—the rates charged to the public remaining in a great measure stationary.

It is true that these causes of embarrassment are temporary; but, in the face of them, the Directors have been compelled to suspend the operation of making use of the American funds for the purchase of Portland Bonds, and to restrict the "Renewal suspense account," debiting 30,821*l.*, chargeable to suspense, direct to Revenue in these accounts. It would have been impossible even at a great sacrifice in price, to dispose of securities held by the Company sufficient to enable them to provide money for these operations; and the Directors have determined to recommend the holders of Preference Bonds to exercise a forbearance necessary under the circumstances, and to make use of the powers of the Act of 1862, under which Bonds for the amount of the interest due are given instead of cash.

The bond and shareholders will remember that the Board approved in 1862 Mr. Watkin's report, recommending that the renewals of permanent way should be charged to revenue as they accrued, in order to avoid raising more capital until the relations between the Company and the Government and the people of Canada became more satisfactory. Subsequently the Company's traffic having largely increased, and its credit having improved, it was decided to anticipate the period for the renewal and improvement of considerable sections of the line, and after charging 70,000*l* a year to revenue, to debit the remainder to a suspense account, to be gradually paid out of working expenses over a short period of years.

This operation required the temporary provision of so much capital. Capital also was required for the increase of the company's stock of engines and cars, for improvement of stations, and for the other necessities of an increasing business. Then, again, as the company's business augmented, so must the working capital, absorbed in credits to customers and in stores on hand. As has been often observed, the company has never had the advantage of a real working capital.

This question of the issue of more capital, and the other question of the American currency, have been invariably reported to the bond and shareholders as matters beyond the control of the Board, and depending upon those political events by which the credit of the company has been and must, while they continue, be injuriously affected. If the securities held by the company be not now realized, net revenue must for the time, as far as may be, supply the deficiency. And if in consequence, the surplus American funds cannot be absorbed as proposed in the purchase of Portland bonds, an enlarged and otherwise needless loss on American currency must for the time be borne. The Board therefore would be merely inviting future derangement if they failed to recommend a firm and prudent course at the present moment.

That course, as it seems to them, involves, 1st, the retention of all securities held by the company, beyond those already pledged for advances, till the political horizon is more clear; 2d, the temporary suspension, as far as possible, of all outlay on capital account, and of debits to suspense account for relaying; and 3d, the capitalization, in lieu of the cash payment, of the preference bonds and stock interest. With a full conviction of the responsibility, the directors recommend this prudent policy.

It is gratifying to know that the special outlay made at the cost of capital and of income since 1861 has resulted in a large and decided improvement in the property of the company. The road is greatly improved, and the capacity of the line for earning money has been much augmented. There has been expended out of revenue and capital, between the 31st December, 1861, and 31st Dec., 1864, no less than—

On renewals	£355,642
On improvement of the road	35,122
On new engines, cars, and other plant	150,849
On new sidings, stations, and other expenditure on capital account	98,062
	£639,675
The value of the stock of stores on the 30th June, 1861, was	£177,584
And on the 31st December, '64.	270,221
Giving an excess (which is simply so much more added to the property of the company) of	£92,637
Making a general total of	£732,312

During the same period of four years the total net earnings have been £743,419, or after deducting loss on American currency charged in the accounts, £624,713. Of this net revenue, £333,647 has been paid for interest on that part of the capital represented by lands on rent, or on mortgage, and by the leased lines; £7,084 for interest on the equipment mortgage bonds; and £206,994 to the 1st, 2d, and 3d preference bond and stockholders.

The cost of renewals on the United States sections of the railways of the company (210 miles) has much increased, and the scarcity of labor and materials has again been severely felt: in fact, Canadian labor and English material have had to be largely used. The following certificate shows that the executive have been able, nevertheless, to maintain the Atlantic and St. Lawrence section (150 miles) in satisfactory condition:

OFFICE OF THE R. R. COMMISSIONERS,
Portland, Dec. 10, 1864.

The undersigned, Railroad Commissioners for the State of Maine, hereby certify that they have made the annual examination of that portion of the Atlantic and St. Lawrence Railroad, which lies within their jurisdiction, and find the same in good condition, and safe for the running of trains.

(Signed) A. W. WILDES.
ALLAN HAINES.

The Atlantic and St. Lawrence and Detroit and Port Huron (leased lines,) interest and dividend, and the interest on the equipment mortgage bonds will be paid in cash in regular course.

The bills for arrangements with the Buffalo and Lake Huron, and Ottawa and Prescott Companies, are still before the Canadian Parliament, but by the day of meeting the Board will probably be able to report the result. These bills contain clauses under which they are to be submitted to the bond and shareholders for final sanction. Acting on the advice of their colleagues in Canada, the Board have sanctioned the purchase of the materials and property of the Preston and Berlin Railway at an agreed sum, payable by instalments, out of revenue.

The proposed confederation of the British North American Provinces, now under discussion, is a measure of the deepest moment, and if carried out successfully, must tend to increase the security and value of all Canadian investments. There is good ground of hope also, that friendly negotiations between the Governments of England and the United States, which it is officially stated will be set on foot by Her Majesty's Government, will end in a renewal of the Reciprocity Treaty. Again, if the confederation proceeds, the Intercolonial Railway will be at once commenced. Thus it is, that in the midst of temporary discouragement, there are features of hope in the early future, which may, even sooner than at present appears possible, restore the progress of the Grand Trunk Railway.

The Directors who retire by rotation are Messrs. Baring, Glyn, Brydges, and Young; and the retiring Auditors in Canada are Messrs. Morland and Taylor, and in England Mr. Newmarch. These gentlemen are eligible, and offer themselves for re-election.

On behalf of the Board,
EDWARD W. WATKIN,
President.

Since the above report was in type, the Board have learned that the question of the payment for postal services is about to be decided by the Government Commission appointed to assess the compensation due. A considerable fall in the price of gold has taken place. The system of passports has been abolished, and there appears some probability of an early cessation of hostilities in the United States. It is to be hoped, therefore, that some of the apprehensions heretofore entertained may be soon removed.

London, April 5th, 1865.

The following statement shows the progress of the gross revenue of the company (American currency being taken at par) since 1859:

Year.	Miles open. No.	Receipts. £
1859..June	880	233,930
" ..Dec.	880	282,939
1860..June	978	314,811
" ..Dec.	978	367,847
1861..June	1,090	347,110
" ..Dec.	1,090	419,469
1862..June	1,090	382,992
" ..Dec.	1,090	439,361
1863..June	*1,174	456,222
" ..Dec.	*1,174	510,580
1864..June	*1,174	528,301
" ..Dec.	*1,335	618,238

* Including the Champlain Railway and Buffalo and Lake Huron Railway from August last.

Railroads of Missouri.

It is an interesting and most significant fact, that there is more railroad building going on in Missouri at the present time than in any other State in the Union. The following summary of railroad enterprises now in progress in that State is from the St. Louis *Dispatch*:

The Pacific road is being extended to Kansas City, and will be wholly completed and in full operation by the first of August next. The North Missouri is being extended to the Iowa line; the Western Branch of the North Missouri, formerly called the Missouri Valley road, is being built from Allen, in Randolph County, through the fertile and productive counties of Charlton, Carrol, Ray, Clay, and Platte, to Leavenworth. The Platte County road is being extended from St. Joseph northward to the Iowa boundary. In addition to these roads now being actually built, there are in contemplation the Chillicothe and Brunswick Railroad, leading from Brunswick on the Missouri River to the Chillicothe on the Hannibal and St. Joseph road; and the Kansas City and Cameron Railroad leading from Kansas City at the mouth of Paw River to Cameron on the Hannibal and St. Joseph road. Outside the State, but still destined to be feeders of its railroad system, are the Kansas City and Fort Scott road, the Leavenworth and Pawnee road, and a road leading from Kansas City through Leavenworth up the west bank of the Missouri to Omaha. Nor must we overlook the Southwest Branch of the Pacific road the work on which is for the time suspended but destined to be resumed and prosecuted till this important road shall be carried into the Indian country.

Finances of Sacramento County, Cal.

The following figures represent the funded debt of the County of Sacramento, Cal., January 1, 1865:

	Amount of Principal.	Interest to Jan. 1, '65.	Total Amount.
Bonds of 1854	$6,000	$4,200	$10,200
" of 1855	6,000	4,200	10,200
" of 1857	2,905	2,033	4,938
" of 1859	446,800	28,740	475,540
Railroad bonds	300,000	13,580	313,580
Total	$761,705	$52,753	$814,458

The receipts and expenditures in 1864 are shown in the following statement:

Funds—	Receipts.	Expenditures.
State Fund	$133,826 08	$133,898 20
Sinking & interest funds	37,698 28	43,164 50
School fund	31,064 25	31,244 03
Hospital fund	13,831 57	13,967 41
Redemption fund	43,683 79	33,692 72
General fund	41,466 37	38,181 52

Estray fund	.....	70 00
Yolo fund	23 92	86 42
Old County warrants 1851–'58	.....	4,168 76
Total	$93,588 77	$117,920 42

Nova Scotia Railway.

We learn from the Halifax *Colonist* that the Nova Scotia Government have secured the passage through their Legislature of an Act to authorize the extension of the trunk line of railway from Truro to the New Brunswick frontier, and of the branch line from Windsor to Annapolis. The former is provided for by a subsidy of 4 per cent. for twenty years on a capital of £10,600 per mile, and the latter of 4 per cent. on a capital of £6,000 per mile for the same period. The trunk line will, on the terms proposed, cost the Province £30,000 per annum for 20 years, and the 85 miles to Annapolis will cost £23,600 a year for the same period. Embraced in the scheme is provision for bridging the Avon River.

☞ The Carleton (N. B.) *Sentinel* states that the people of Woodstock "have subscribed the necessary stock to meet the requirements of law, preliminary to the formation of a company to build the Branch Railroad under the Facility Bill of last session.

MINING STOCKS—GOLD, SILVER, COPPER, IRON, LEAD, ETC.

American Railroad Journal.

Saturday, May 6, 1865.

Stock Exchange and Money Market.

One short month has changed the whole aspect of our public affairs. War has been exiled, and peace has returned with healing in its wings to all those who are ready to welcome her. The change is so sudden, so vast, so exhilarating, that we can scarce realize its entire consequences. We know this, however, that the Union is to be firmer, the Nation stronger, its advance more rapid and its future more glorious than ever. We have found out of what stuff we are made, and we accept the responsibility in the sight of the whole world, of maintaining a Republican Government, popular institutions; the triumphant advocates of freedom, justice, truth, religion, toleration, industry and equality, in all their perfection. We have proved that we appreciate our system which protects all these, and we leave to the Governments of the old world their antiquarian task of fettering progress and keeping their shackles on mankind.

But having unavoidably incurred enormous obligations for the payment of money in order to preserve our beloved country, our next anxiety, now that success has attended our efforts, is to meet and discharge these obligations promptly, and while doing so, to lessen the pressure of taxation on the people who have so cheerfully submitted to it. It is to their honor they have never repined at the burden of the last four years; on the contrary they have welcomed the tax gatherer, and not content with paying their legal assessments, have contributed voluntarily on the grandest scale to every institution directly or indirectly which sustained our cause. More than two hundred and twelve millions of dollars have been raised by voluntary efforts for the health and comfort of our soldiers. Twice hitherto we have paid off our National debt, a third now remains for liquidation and payment; and there is not a doubt in the minds of those who have given attention to the subject that it will be readily and certainly discharged. We speak confidently. The Americans are remarkable for one peculiarity, and that is the study of their own statistics. It is our habit to enumerate, calculate, estimate, reckon, and to watch from year to year the progress of every interest. All our commercial boards, all our societies, all our States officially and habitually tabulate their information. Figures are natural to us; with them we indicate the advance from day to day of every industry of this country. No so complete and accurate a system exists in any other, or is so thoroughly practised. It is this precision of information which gives such value to our financial estimates, and assures us of the certainty of our future. It would be utterly impossible to find in any county of England, or any department of France any such perfect local information as may be arrived at in any of our own geographical or political divisions.

When therefore we proclaim the extent and value of our resources we literally speak by the card. When we promise for the future, we have the security of the past.

We know therefore in this manner where we stand to-day, and we can affirm that while we have a large National debt to provide for, we are stronger in means than before we entered upon our expenditures. The enormous sums disbursed by the Government have gone directly into the hands of the people; those hands have not been idle. Enterprise and industry produce enormously in this country. They are not rewarded with the meagre profits of 2 and 3 per cent. per annum, such as foreign capitalists are content with, but by enormous and immediate returns of value that at once become capital. This fact is not understood abroad, but it is nevertheless a fact. The rise of property in a large range of operations is equivalent to a doubling of capital in very brief periods of time. The profits on land, mill sites, mines, city and town lots are marvelously great throughout the free States, and in the new, the same opportunities are constantly occurring, where very small investments quickly become fortunes. This rapid capitalization of profits is peculiar to the United States.

In order to understand the force of this truth

we may take even minute portions of time and perceive how this principle is constantly at work, and how certain is its progress.

We might naturally expect that production would have received a check during the present struggle. Yet strange to say we find it otherwise. Take a few examples: the amount of tonnage over our principal railways and canals from the interior to the Atlantic Coast, through two States only, New York and Pennsylvania, which in 1859 was 3,613,362 tons, was in 1863 6,290,424 tons, and the merchandize moved west in return which was in the former year 6,239,430, was in 1863 10,595,218 tons. The amounts in either case are more than double what they were *before* the war in 1859.

So much for transportation alone in two of the principal States. Now as to production. English writers always place great stress on the value of their coal mines and their enormous yields. Now it is well known to scientific men if not to others, that the largest coal fields in the world are to be found in the United States. Indeed the whole island of Great Britain might be placed inside of even a section of our coal fields. In Pennsylvania alone has this particular industry been developed with precision, or employed organized capital to much extent. The product of its regions in anthracite and semi-bituminous in 1859, was 7,992,632 tons, in 1863 10,226,124, and 1864 10,564,926, while its soft or bituminous coal, and that of Ohio, Illinois and Iowa, was doubled in production. This product in Pennsylvania was 3,000,000 tons in 1864. The quantity of pig iron manufactured in the same State the past year was 700,000 tons, or nearly double what it was in 1863. Now these special examples of increased values might be further given in the case of lumber, grain, petroleum, tobacco, sorghum, wool, hemp, and many other staples. We have not room in this place to go into a more particular statement. But we have taken two of the loyal States alone as fitting illustrations of the fact of our large increase of production in the face of all the drawbacks of a gigantic war. We cannot be accused of exaggeration when we assert that this capacity of our people, equalled only by the greatness of their natural advantages is without rivalship or even comparison in any other portion of the globe.

And in this view of the subject it is not to be wondered at, that the latest loans of the Government have been the most successful. The more the subject has been examined and discussed the stronger have been the convictions of the people of their own strength and that of their agents the Government.

Subscriptions to the 7-30s, probably the last loan the Government will have to offer the public for many years, are made daily in enormous sums, over seven millions being taken in a single day. Indeed we may conclude that in the course of two months there will not be a dollar left. There is also evidently a great plethora of money in the market. Our city banks are reported as having 75 millions of legal tenders on hand, and the gold in their vault, and the Sub-Treasury after it had parted with three millions for the payment of the May dividends at Boston and Philadelphia, and the city banks together had still on hand at the close of the last week $41,000,000.

Nor is this the only favorable indication of the condition of the market. Money has been in great abundance at 4 and 5 per cent., and foreign exchange has been dull and inactive. It is also stated on good authority that the May dividends due to foreign holders of the National securities will most of them be reinvested here. Nor is this improbable, since the recent rapid rise abroad will make it advantageous to invest in this country before we feel here the corresponding advance movement.

Gold has had a continuous fall since our last. It was as low as 140 on Tuesday last, and the speculators in the article seem to have abandoned all further hope of getting it back to the rate to which they drove it by rumors, combinations, and misrepresentations. Still we see in some quarters, forlorn attempts to shake the public confidence so far as to give gold one more chance. Thus it is maintained that our expenditures must go on; that our revenue will not be equal to our expectations, and in others that it will take years to come back to specie payments no matter what Mr. McCulloch or any other person thinks, while others console themselves by promising, that though gold is declining now, in a few years it will rise again! No doubt there is a class, that of bankers, who while they can issue notes which they are not called on to redeem, would prefer that a resumption of specie should never take place, but the great interests of the Nation demand that it should. And as to the numerous opinions put forth by certain interested writers on this subject, we can only say that most of them proceed from the same persons who sixty days ago stultified themselves and their readers, by attempting to prove beyond a doubt that the price of gold could not possibly fall below 200! One per cent fall a day since then, shows the entire shallowness of such political economists and thinkers, if they can be considered worthy of the name.

All these absurd statements may be directly attributed to particular interests, supposed or feared to be endangered by the rapid appreciation of our paper currency, one of the most gratifying and welcome facts of the day. The nearer a gold and paper dollar approach equality in value, the easier will the resumption of specie payments be. If gold should fall to say 5 per cent, specie payments could be resumed in a few weeks. Again a surplus of Government revenue of a million and a half a day which would accrue from the reduction of our military and naval expenditure now begun, would bring nearly the whole of the legal tenders back into the Treasury in a very short time, and thus the resumption of specie payments would fall on the Banking institutions of the Country exclusively to bring about. We reject therefore the theory so studiously put forward that we must continue to have a large inflation of currency for many years to come. "The wish is father to the thought" no doubt, but that does not convince us, nor will it in the least stop the course of events, which at present is all we could wish, and much more favorable than we could have expected.

As we anticipated in our last issue a further rise in our National securities, and a very large one has taken place in the London market. Our good friends on the continent who were not afraid of them have come out splendidly in their calculations, and they are making their profits out of the very persons who ridiculed them for their confidence. Many millions have been made by these Continental Bankers on the London Exchange against its will.

We are glad to notice in a late foreign circular which is the representative of large Birmingham interests, and also apprehensions, that our remarks a few weeks since on the probable future relations between this Country and England have been republished there, as good authority on the subject to repress any rising fears.

There is nothing at all likely to lead to any rupture between the two nations. Whatever claims we may have for injuries inflicted upon as by such piratical vessels as the Alabama are easy of friendly adjustment. And we hope the press of that Country contented with their own system of orders, castes, prerogatives and exclusiveness will let us alone hereafter.

Abuse of the United States will pay no longer. We have our mission, let England perform hers. This continent of ours is dedicated to liberty, equality, and progress henceforth and forever. There should be at least one country on the globe where men can rule themselves.

Some difference of opinion existing as to the quantity of cotton remaining in the South, an attempt is making to refute what are called exaggerated statements of the quantity on hand. We have in another part of this day's JOURNAL considered the effect its being thrown on the foreign market will have upon prices in England, taking English estimates as the basis of our calculations. It seems to us that the products of the cotton states for the last four years must in the aggregate be very considerable, for the quantity reported abroad as having run the blockade is small in comparison with even a single year's ordinary production, and we still hold to the opinion that the quantity will be large enough not only to bring down prices in Europe, but operate most favorably on our foreign exchanges. Nor do we believe what is asserted in similar quarters, that our internal revenue will fall short of the estimates, nor that our system of collecting the revenue is "ridiculously inefficient" and not "free from the suspicion of corruption." There seems to be some contradiction in the statements which come to us in this direction, since but a few days ago we had the same authority for expecting a surplus of more than three hundred millions on the basis of our present revenue, and a rapid liquidation of the National debt.

The lowest estimate for the closing fiscal year, of gold receipts at the customs founded on the actual receipts thus far is 78 millions, which gives a large surplus over the amount to be paid in coin as dividends, which last is 58 millions. It is believed that the customs revenue will be all of 100 millions. So that it is evident this branch of our finance is perfectly sound.

In other securities than National there is not so much firmness nor as much interest. There have been fluctuations but not with a large variation in the railway shares from day to day. Money is plentiful and the condition of our Banks is better than at any previous return for a long time. They hold about 70 millions of legal tenders and their deposits are on the increase.

The exports for the week ending May 2d exclusive of specie were $1,810,802. The balance in

the Sub-Treasury on Tuesday was $29,518,907 63. The small amount of specie received from California by the last steamer from Aspinwall, only about $70,000 was undoubtedly owing to the apprehension of the San Francisco shippers, of the early appearance on the coast, of the Confederate pirate from Australia where she was last heard from.

Pittsburg, Ft. Wayne and Chicago Railway.

We learn from an official source that the Board of Directors of this company has decided upon the class of improvements, and the extent of expenditure for construction and equipment to be made between this date and the next annual meeting of stock and bondholders. The whole amount thus to be expended, including payments on work done since January 1, 1865, will in no event exceed $1,000,000.

All of the stock necessary to be sold, in aid of earnings of the road, to meet liabilities incurred and to be incurred, has already been disposed of, and no further issue of new stock will be made for any purpose, until after an account has been rendered of the operations of the year to the stock and bondholders, at their annual meeting in March 1866.

It is now quite certain that the traffic of the road will yield, after paying operating expenses, interest, sinking fund and dividends, a large sum, to be devoted to paying for construction and additional equipment.

☞ A new banking house has been established at No. 12 Wall street. Mr. Birch and son, and Mr. Wm. Spear, all from Missouri, associated with Mr. Byron Murray, Jr., of the American Exchange Bank, under the firm of Birch, Murray & Co. Mr. Birch is known in St. Louis, and other Western cities, as a gentleman of first class business talents, and of the most unscrupulous integrity. Mr. Murray as cashier of one of the large and well managed banks is also well and favorably known in the business circles of the city.

Norway and Swedes Iron.

Our readers will perceive in another column a curious display of trademarks or brands by which the celebrated Norwegian and Swedish irons are designated. These particular brands rank the highest for horse-nail rods, for the finest numbers of wire and for scythe purposes, and are now imported solely by the long established firm of Wm. Jessop & Sons, Steel Manufacturers, No. 91 and 93 John street, New York, and No. 147 Milk street, Boston.

☞ The Chicago and Northwestern, Milwaukee and St. Paul, Milwaukee and Praire du Chien, and Chicago and Milwaukee Railways have made an arrangement for running trains by which outside agencies are dispensed with, as in the case of the Cleveland and Pittsburg, and Pittsburg, Fort Wayne and Chicago Railways. It is estimated that a saving of at least $800,000 per annum will be thus made in the expenses of these roads.

☞ Mr. James Robb and Mr. John S. Sauzade have been admitted to the firm of Winslow, Lanier & Co.

Railroad Earnings--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 3d week in April:

	1865.	1864.
Passengers	$7,637 22	$6,096 85
Freight	8,012 57	9,302 68
Mail, express & telegraph	1,200 00	1,054 58
Total	$16,849 79	$16,454 11
Total this month to date	$55,181 78	$50,528 16
Total for the fiscal year, commencing 1st Jan...	333,424 63	284,063 07

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending April 21, were:

	1865.	1864.
Passengers	$2,706 22	$2,778 28
Freight	4,551 07	6,856 73
Express	162 80	104 16
Mails	296 58	296 58
Total	$7,715 67	$10,035 75

Receipts from January 1 to April 21:

1865	$136,650 88
1864	132,607 14
Increase	$4,043 74

The earnings of the Grand Trunk Railway for the week ending April 22, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$41,547 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	79,539 00
Total	$124,210 00
Corresponding week, 1864	121,517 00
Increase	$2,693 00

The Income on Dividends, &c.

We call the special attention of our readers to the following important letter from Commissioner Lewis. It is upon a subject which will be specially interesting to our moneyed men, while it must be of vital importance to that section of the community whose small fortunes are invested in the modes to which it particularly refers:

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
WASHINGTON, APRIL 11, 1865.

Sir: —I deem it proper, in view of the pending assessment of the income tax, to call your especial attention to those changes in the 116th and 117th sections of the Revenue law which relate to the tax upon income derived from bank dividends, interest upon railroad bonds, &c.

Under former laws you will remember that income derived from these sources, upon which a tax had been paid directly to this office, was deducted from the gross income of the tax payer, while by the act of March 3, 1865, it is provided that, in ascertaining the income of any person liable to an income tax, the amount received from institutions whose officers, as required by law, withhold a per centum of the dividends made by such institutions, and pay the same to the Commissioner of Internal Revenue, or other officer authorised to receive the same, shall be included; *and the amount so withheld shall be deducted from the tax which otherwise would be assessed upon such person.*

Although section 120 and 122 clearly contemplate that the Government shall receive five per cent. of the whole amount paid out by any of the companies enumerated on account of dividends or interest upon bonds, it has been contended by some companies as they were merely authorised and not required to withhold the tax from such dividends or interest, it was competent for them to pay the tax and charge the same to their expense account, and make the payment to the stockholder or bondholder free of tax. The result of this construction is to give the Government five dollars for every hundred dollars paid to the stockholder or bondholder, instead of five dollars for every ninety-five dollars thus paid.

This view has been insisted upon by some companies, and they have consequently refused to withhold the tax from their dividends, and have paid to the office but 5-105ths of the amount actually appropriated to their dividends, instead of 5-100ths, as is plainly intended by the law.

Where any company has thus refused to withhold the tax from its dividends, it is clear that the provision quoted above from section 116 has no application, and you will therefore be particular to inquire as to this point whenever any tax-payer claims a deduction from his income tax upon this account. If it appears that the tax has not been withheld the deduction should not be allowed.

It should be borne in mind, however, that it has been the practice with some companies to declare their dividends nominally free of tax, while in reality the tax has been withheld and fully paid to this office; that is to say, if the stockholder has received ninety-five dollars and the Government five dollars, or if the stockholder has received one hundred dollars and the Government five dollars and twenty six cents, the tax has been practically withheld, whatever name may have been given to the transaction. If on the other hand, the stockholder has received one hundred dollars and the Government but five dollars, the tax has not been withheld, and no deduction should be allowed.

The same principles will apply to the case of dividends paid prior to the passage of the act of June 30, 1864.

If you are unable to ascertain the manner in which payment has been made by any institution to any of its stockholders resident in your district, you can obtain full information by communicating with this office. Very respectfully,

JOSEPH J. LEWIS, Commissioner.

Journal of Railroad Law.

COMMON CARRIERS.—THEIR RIGHTS AND LIABILITIES AS INSURERS.—CONSTRUCTION OF INSURANCE POLICY.

The late case of The London and Northwestern Railway Company against Glyn, was an action by plaintiffs against defendant, as Treasurer of The Globe Insurance Company. The complaint set out at length a policy of insurance against loss and damage by fire, effected with the said insurance company, dated 11th December, 1854, by which the sum of 15,000*l.* was insured on goods, plaintiffs' own and in trust as carriers, in a certain warehouse in the policy named.

The complaint then stated that certain goods of plaintiffs, in trust as carriers, in the said warehouse, had been burnt and destroyed by fire, whereby plaintiffs sustained a loss on the said goods to the amount of 15,000*l.*, and that the said insurance company had not paid or made good the said loss.

The answer averred that plaintiffs did not, by reason of the said burning and destroying by fire, suffer any damage or loss upon the said goods.

Upon these pleadings issue was joined.

At the trial, a verdict was entered for the plaintiffs for the full amount claimed, subject to the opinion of the Court upon a special case, which was substantially as follows:

By the policy of insurance, upon which the action was brought, (a copy of which formed part of the case,) an insurance was, on 11th December, 1854, effected by plaintiffs with The Globe Insurance Company for the sum of 35,000*l.*, 15,000*l.* of which was declared to be "on goods their (plaintiffs') own and in trust as carriers," in a warehouse belonging to plaintiffs, situated at the Camden Town Station of the plaintiffs.

The second condition indorsed on the policy was as follows:

"Goods held in trust or in commission, are to be insured as such, otherwise the policy will not extend to cover such property." It was declared in and by the policy that during the continuance of the policy, "the capital stock or fund of the 'insurance' company shall be subject and liable to pay, reinstate or make good at their option, to the 'assured' all damage and loss which the 'assured' shall suffer by fire on the property herein particularized, not exceeding on each item the sum hereinbefore declared to be insured thereon."

And the twelfth condition indorsed was as follows:

"In every case of loss, duly proved, the company will either reinstate the property, or the assured shall receive satisfaction to the amount thereof, without discount or deduction."

The policy continued in force up to and on the 9th of June, 1857, when the warehouse and nearly all the goods then contained in it, were consumed and wholly destroyed by an accidental fire. All claims upon the policy were settled and adjusted, except those in respect of the 15,000*l.* insured on goods, their own and in trust as carriers, in warehouse as before mentioned.

At the time of the happening of the fire, the warehouse contained a large quantity of goods which for the purpose of this case, are to be taken to be goods of plaintiffs, in trust as carriers, within the meaning of the policy. These goods were wholly burnt and destroyed by the fire.

Plaintiffs sought to recover in this action the value of the last mentioned goods. It was agreed that the rights and liabilities of plaintiffs and The Globe Insurance Company should be raised and determined upon two selected items of the said goods, representing two classes into which the whole of the said goods are divisible. And that the claims of plaintiffs against the said insurance company, in respect of the rest of the said goods, shall be adjusted out of Court, on the principles which may be applied by the Court to the said two selected items, respectively.

The argument afterwards turned on one only of the two selected items, the claim as to the other being conceded by the defendant.

Plaintiffs were, from a time prior to 1847, and have ever since continued to be, common carriers of goods by railroad, and as such, have during all that time carried goods over their railroad (among other places,) from London to Edinburgh. The Camden Town Station before mentioned is the terminal goods station of plaintiffs in London. On 9th June, 1857, a package of silk, of the value of 10*l.* and upwards, was received in London by plaintiffs' agents, to be carried by plaintiffs from London to Edinburgh. These silks were contained in one package, and the value and nature thereof were not at the time of the delivery thereof to plaintiffs' agents, declared by the person sending or delivering the same, nor was any increased charge, or agreement to pay the same, accepted by the person receiving such package.

This parcel was deposited by plaintiffs' agents in warehouse preparatory to its being despatched to its destination, and remained there until it was burnt and destroyed by the fire.

Plaintiffs agents, after the fire and before this action, with the authority and on behalf of plain-

tiffs, paid to the consignee of the said silks part of the value thereof, which was accepted by the latter in discharge of his claim against plaintiffs in respect of the said silks.

The Court was to have power to draw all inferences of fact.

The only question raised upon the argument was, whether having regard to the provisions of the carriers' act, plaintiffs were entitled to recover the value of the silks, or the amount so paid in respect of them as aforesaid.

If the Court should be of opinion that plaintiffs were entitled to recover in respect of one of the selected items, being the one in which the claim was not conceded by the defendant, the verdict for plaintiffs was to stand, subject to the adjustment of the amount, as before mentioned in accordance with the principles laid down by the Court.

If the Court should be of opinion that plaintiffs were not entitled to recover in respect of the one of said selected items, (the claim of which was not conceded by the defendant,) the verdict entered for plaintiffs was to be vacated, and a verdict entered for defendant.

WIGHTMAN, J.—The question in this case is, whether the plaintiffs are entitled under this policy, to recover more than their own particular interest in the goods which they, as carriers, had in the warehouse when it was burnt? I think that they are, and that they ought to recover the full value of the goods. They must, in my opinion, be considered as having insured the goods, which they held in trust as carriers for the benefit of the owners, for whom they will hold the amount recovered, as trustees after deducting what is due in respect of their own charges upon the goods. It is not contended that there is anything illegal in this policy. The plaintiffs are clearly entitled to recover something, the only question is, how much. Now, when the terms of the policy are looked at, it appears that the plaintiffs thereby insure "goods their own and in trust as carriers" in the warehouse. Thus a distinction is drawn between their own goods and goods which, as carriers, they hold for other people; and it appears to me that both classes of goods were meant to be fully covered by the insurance, and that the description of some of the goods as "goods in trust as carriers" was inserted, in compliance with the second condition indorsed on the policy, for the express purpose of protecting the interest of the owners of such goods, as well as the more limited interest of the plaintiffs. It is true that this insurance is in the nature of a voluntary trust undertaken by the plaintiffs, without the knowledge of the *cestui que trust*, the owners of the goods; but it is a trust clearly binding on the plaintiffs in equity, who will hold the amount which they now recover, in the first place for the satisfaction of their own claims, and in the next, as to the residue in trust for the owners. If a different construction was put on such a policy as this, it would be necessary, as my brother Crompton has observed, that several policies should be effected on the same goods, and thus insurance companies would obtain several premiums instead of one in respect of what, to them, is the same risk.

The question is, certainly one of intention; but I have no doubt that the intention was as I have stated. The circumstance that the plaintiffs, in consequence of the non-compliance with the carriers' act, are not liable as carriers, to the owners for the loss of the goods, is not, as it seems to me very material to the present question. In Waters *vs.* The Monarch Insurance Company, (5 E. & B., 870,) the plaintiffs, being warehousemen, and therefore not insurers, were not liable to the owners of the goods which were burnt; but the Court held that that fact did not prevent the insurance company from being liable to the plaintiffs to the amount of the full value of the goods, although the utmost interest that the plaintiffs themselves had in the goods was to the extent of their warehouse charges, for which they had a lien upon them. That case is, in principle, undistinguishable from the present, and is conclusive in favor of the plaintiffs.

Judgment for the plaintiffs.

Commerce of the United States.

The imports and exports of the United States for the fiscal year ending June 30, 1864, were as follows:

Dutiable merchandise		$275,329,951
Free merchandise		41,126,332
Specie and bullion		13,115,612
Total imports		$329,562,895
The exports were—		
Domestic produce other than specie		$220,073,106
Foreign mdse.—dutiable	$12,457,437	
" —free	3,009,287	
		15,466,724
Domestic specie & bullion	100,219,065	
Foreign " "	4,906,685	
		105,125,750
Total exports		$340,665,580

The total imports and exports for the ten years ending June 30, were as follows:

	Total	Exports.		
	Imports.	Domestic.	Foreign.	Total.
1855.	$261,468,520	246,708,553	28,448,293	275,156,846
1856.	314,639,942	310,586,330	16,378,578	326,964,908
1857.	360,890,141	338,985,065	23,975,617	362,960,682
1858.	282,613,150	293,758,279	30,886,142	324,644,421
1859.	338,768,130	235,894,385	20,895,077	356,789,462
1860.	362,162,541	373,189,274	26,933,022	400,122,296
1861.	352,075,535	389,711,391	21,145,427	410,856,818
1862.	205,819,823	213,069,519	16,869,466	229,938,975
1863.	252,187,587	424,092,877	25,959,248	350,052,125
1864.	329,562,895	320,292,171	20,373,409	349,665,580

Of which amounts the following were in specie and bullion:

1855 -	$3,659,812	53,957,418	2,289,925	56,247,343
1856 -	4,207,632	44,148,279	1,597,206	45,745,485
1857 -	12,461,799	60,078,352	9,055,570	69,136,922
1885 -	19,274,496	42,406,246	10,225,901	52,633,147
1859 -	7,434,789	57,502,305	6,385,106	63,887,411
1860 -	8,550,135	56,496,851	9,599,388	66,546,239
1861 -	46,339,611	23,798,870	5,991,310	29,791,180
1862 -	18,415,052	31,044,651	5,842,989	36,887,640
1863 -	9,584,105	74,201,433	8,163,049	32,364,482
1864 -	15,466,724	100,219,065	4,906,685	105,125,750

The reports of exports for 1863 and 1864 embrace a large unusual shipment of treasure from California to England, on account of New York and other eastern holders, taking that direction for safety. The sums were—in 1862–'63, $18,207,879, and in 1863–'64, $35,735,265.

☞ The Vermont Valley Railroad has been leased for ten years from May 1, by the Rutland and Burlington Railroad Company. This road is 24 miles in length, extending from Brattleboro' to Bellows Falls, Vt. At Bellows Falls it connects with the Rutland and Burlington, the Cheshire, the Vermont Valley, and Sullivan Railroads; and at Brattleboro' with the Vermont and Massachusetts and the Connecticut River Railroads.

Railroads of Minnesota.

The following are the several lines of railroad in course of construction in this State:

Minnesota Central, from Minneapolis to Iowa line	112 miles.
Minnesota Valley, from St. Paul to Iowa line	180 "
St. Paul and Lake Superior, from St. Paul to Dunluth	145 "
St. Paul and Pacific, from St. Paul to Pembina	375 "
Southern Minnesota, from La Crescent to Great Bend of the Missouri River.	420 "
Winona and St. Peter, from Winona to St. Peter	150 "
Total length constructing	1,382 "

The portions of the above already completed and in operation are as follows:

Minnesota Central, from Minneapolis to Mendota	7 miles.
Minnesota Valley, from St. Paul to Shakopee	30 "
St. Paul and Lake Superior, from St. Paul to White Bear Lake	10 "
St. Paul and Pacific, from St. Paul to Elk River	50 "
Southern Minnesota, from La Crescent to Houston	20 "
Winona and St. Peter, from Winona to Rochester	50 "
Total length in operation	167 "

Pacific Railroad.

A dispatch dated San Francisco, April 28, states that "the California end of the Pacific Railroad now employs twenty-three hundred laborers, eight hundred of whom are whites and the remainder Chinese. Cars will be running thirty-six miles from Sacramento next week; fifty-four miles of the track will be laid by September. One year from July next it is believed the road will be in operation a distance of eighty-six miles, carrying it well towards the summit of the Sierra Nevada."

☞ To show the quantity of shipping which the trade to the territories will give to the Pacific Railway from St. Louis to Kansas City, the St. Louis *Democrat* says that "the returns of the amount of freight forwarded from Kansas City, Leavenworth, Atchison, Nebraska City, St. Joseph and Omaha, was 36,074,149 pounds in 1860, and the number of wagons was nearly 7,000; and that this record for 1860 may be trebled for 1864, as last year's emigration across the plains was the largest ever known, and the prospect is that a still heavier rush will be made this season."

☞ The first meeting of the stockholders of the Parkersburg Branch Railroad Company will be held at Parkersburg, W. Va., on the 10th inst., at which an election for a President and ten directors to serve for the ensuing year will be had. At this meeting a by-law or resolution providing for the issue of preferred stock of the said company under the provisions of an Act of the Legislature of West Virginia, passed March 3, 1864, entitled "An Act to allow corporations to issue preferred stock," will be offered for their adoption.

Eastern Shore Railway.

A vigorous effort is being made to secure the completion, at an early day, of the branch railway extending from Oxford, in Talbot County, to Smyrna, on the Delaware Railway, about fifty miles distant, thus affording to the Eastern Shore of Maryland a direct railway communication with Philadelphia. General Tench Tilghman is the President of the company.—*Baltimore Sun.*

Pittsburgh and Steubenville Railroad.

This road has been completed to within five miles of this city, and it is expected that a train will be run from the borough of Temperanceville to Burgettstown, Washington county, within six weeks. This train will connect with another at Burgettstown, which will run to the Ohio river opposite Steubenville. Arrangements have been entered into by the company with the Excelsior Omnibus Line to convey passengers and baggage to and from Temperanceville. The opening of this road will be of great advantage to the business prosperity of the city, as it will bring it into close connection with one of the finest agricultural districts in the State.—*Pittsburg Chronicle.*

Philadelphia and Erie Railroad.

The Board of Directors of the Philadelphia and Erie Railroad Company, we learn, have unanimously rejected so much of an act passed last winter, as authorized the company to issue a preferred stock. The amount of freight on this road between Erie and the junction of the Oil Creek road, at Corry, is increasing largely. A third rail in the Oil Creek road, which is a six feet gauge, is nearly completed, and when finished, will admit the trains of the Philadelphia and Erie road to run direct with freight to the oil regions.—*Phila. Ledger.*

Cedar Valley Railroad.

The project of connecting Cedar Rapids and Cedar Falls by railroad is again being agitated in the latter place. That a connection will at no distant day be made between the road running north from Cedar Falls and the Cedar Rapids and Missouri River Railroad, either at Cedar Rapids or some point further west, there is not the least shadow of a doubt, and our neighbors at Cedar Rapids are certainly not awake to their interests, or they would also be stirring in the matter. —*Vinton Eagle.*

☞ It is stated that the Delaware and Hudson Canal Company are making surveys in contemplation of a line of railroad between Rondout and Port Jervis, N. Y., for their coal business, as well as for the transportation of passengers and miscellaneous freight.

Steel Locomotives.

The Maryport and Carlisle Company have for some time past employed steel to a great extent in substitution of ordinary iron for the working parts of locomotives, and as we are informed, with the most satisfactory results. The traffic on the line is principally coal and mineral. It has been found that with the ordinary iron tyres on the engine wheels, the distance run was not more than 90,000 miles—in many cases not more than 60,000 miles—and the wheels require to be taken from under the engine for every 20,000 or 30,000 miles run, for repairs and "turning up." In the case of the steel tyers, however, the wheels will run 100,000 miles before they require "turning-up" or repairing. The result of a very careful examination of the effects of wear leads to the opinion that these wheels will run from 350,000 to 500,000 miles, or equal to some twelve or fifteen years' work of a daily average of about 100 miles. The difference of cost as between the two metals is not great; in the one case it ranges from £40 to £45 per ton, while the steel is about £55, the cost of labor in placing the tyres on the wheel being nearly the same in each case. The company have a number of boilers, axles, cranks, and eccentrics made of steel in constant use on the line, and they have given the greatest satisfaction. These have not, however, been sufficiently long in operation to enable a comparison to be drawn between them and the ordinary iron portions of the locomotives; but there is reason to believe that the saving in point of wear will be equal to that effected by the substitution of steel for ordinary iron tyres. The ordinary eccentrics are expensive to keep up, but those which are made of hardened steel do not require any looking after for ten years, not even to the slackening of a bolt, so far as regards repairs. The experience obtained on this, and we believe upon some other railways, point to a very important mode of saving in one of the largest items of cost in the working expenses of railways. The subject will, we have no doubt, receive careful consideration from the managers of railways. —*London Railway News.*

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITORY of the UNITED STATES

AND AUTHORIZED AGENT OF THE TREASURY.

No. 5 NASSAU ST., Feb. 17, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.

The National Debt.—How to Pay it.

The following paper is issued by JAY COOKE, Esq., agent for the sale of the seven-thirty bonds; it has been prepared by Dr. WILLIAM ELDER, a well known author, under the auspices of the Treasury Department:

If the war for the re-establishment of the Union is not absolutely ended, the issue of the great struggle now, is neither doubtful nor distant. We are quite near enough to the end of the conflict to take an account of stock, look over our resources, estimate the amount of our liabilities, and arrange the means and terms of liquidation.

AMOUNT OF DEBT AND RATE OF GROWTH.

We have contracted a debt of enormous amount as expressed in arithmetical figures. We cannot state the precise aggregate, for it is not definitely ascertained, but is known to be something more than half as large as the British debt, and may, when all footed up, reach to three-quarters of that brag montrosity of national burdens. On the 31st of March, 1865, our debt was officially reported by the Secretary of the Treasury at the sum of $2,367,000,000. The end is not yet, indeed, but it is fairly in view, and we have the data for an approximate estimate.

The public debt on the 25th of April, 1862, was officially stated at $523,299,945; and on the 10th of April, 1863, at $939,497,359—an increase in 350 days of $1,189,135 per diem. On the 26th of April, 1864, it was $1,656,815,105—an increase in 381 days of $1,882,723 per diem. On the 31st of March, 1865, it stood at $2,366,955,077, increasing in 339 days at the average rate of $2,094,808 per diem.

ESTIMATED AGGREGATE AT THE CLOSE OF THE WAR.

If we take the highest, as well as the latest, of these average rates, as the probable daily accumulation for the remaining term of actual war expenditure, and fix the limit of such maintained expenditure on the 1st of July next, ninety-one days after the last report, we have the additional sum of $190,627,528, which will bring the debt up to a total of $2,557,582,605 at the date assumed. And let it be noticed that the statements from which these figures are taken, embrace every item of debt known to the Treasury Department—all bonds, notes, temporary loans, certificates of indebtedness, fractional currency outstanding, and all requisitions of the War, Navy, State, and Interior Departments, lying unpaid upon the Secretary's table. In a word, all the liabilities of the Government of every kind, except claims not presented, arising upon running contracts and services, unsettled or not matured—claims to become debts when ascertained and ready for payment. Those who have the least acquaintance with these unknown prospective claims, will put them at the highest figure that fancy can represent as possible; those who have the best means of forming a judgment hesitate most to name a sum; but we think that the wildest will be satisfied with the addition of the conjectured $442,417,395, which are required to bring the total probable debt to the round sum of $3,000,000,000, when all is settled, known, and provided for.

Here, then, we have firm foothold, and we think, a very liberal margin allowed for contingencies, damages, pensions and benevolences; and we can from this basis of reckoning help ourselves, with a comfortable assurance of safety, to a clear insight into the ways and means of meeting the round total of our engagements in such way as shall at once comport with the welfare of the people who owe this debt, and the just rights of the parties who hold it.

AMERICAN AND BRITISH EXPERIENCE OF NATIONAL DEBTS.

Nothing in our own past experience helps much to an adequate comprehension of our present situation, except by the measurement of proportions rendered difficult by a vast difference of conditions. In 1816, we had a debt of $127,000,000, which was an average of charge of $14.67 per head upon the entire population of the Union, and 7 per cent. upon the estimated value of all the property of the people; but our assumed debt of $3,000,000,000 would be 15 per cent. of the present wealth of the loyal States, and $98.62 per head of their population. The debt of the Revolution, and the war of 1812, was wholly discharged in nineteen years from the ordinary sources of revenue; and though within a fraction of half as great a burden upon the capital wealth of the people, was never felt by anybody; and at the end of the term of payment, the first trouble and alarm was from a surplus of revenue of $40,000,000, or one-third of the whole sum which had so long incumbered the Treasury.

DIFFERENCE OF CONDITIONS.

In the first ten years of that debt-paying period, the wealth of the country grew at the slow rate of 25 per cent.; and in the next decade, which closed the term, at no more than 41 per cent.; while the wealth of the loyal States increased between the years 1850 and 1860 just 126 per cent.—in amount no less a sum than $6,000,000,000 or quite double the debt we are now concerned to provide for. The increase of the wealth of the entire Union between 1820 and 1830 did not reach above $800,000,000, so that here there is no parallelism of conditions, and no measure of resources and burdens to be had except by contrast.

In 1816, at the close of her twenty-two years' war with the French Republic and Empire, the British debt was $4,205,000,000. The entire wealth of the United Kingdom was then, according to the received estimates, $300,000,000 less than that of the loyal States in 1860; the charge per head upon her total population was $218.20, and the incumbrance upon the total wealth of the

ration 40 4-10 per cent. In the fifty years since the Battle of Waterloo, her wealth has grown at a slow but steadily increasing rate from 20 per cent. in the first to 41 per cent. in the last ten years, that is, increasing in the first decade about $2,100,000,000, and in the last quite $9,000,000,000.

Here we encounter a similar unlikeness of conditions, and a similar change in the rate of progress, as that which we find in the past and present periods of our own fiscal experience. At the rate of increase in the United States between 1820 and 1830, it would have required twenty years to double our wealth, and it now requires twenty years to double the wealth of Great Britain at the rate of her increase in the last ten years; but the loyal States doubled their wealth in eight years and a half of the last decade, and the Rebel States even exceeded this ratio, increasing in the same time at the rate of 9 per cent. and a fraction per annum, and doubling in a little less than eight years.

Still the state of the British debt teaches us this—that whereas it was a burden of 40 4-10 per cent. upon the wealth of the kingdom in 1816, it has fallen, by the increase of the wealth of the nation, to be but 12 per cent. now, although the total debt of that date has been reduced but $250,000,000, or less than 5 per cent.

DIFFERENCE BETWEEN PRINCIPAL AND INTEREST IN RELATION TO RESOURCES.

The *burden* of a public debt is not at all understood merely by the figures which express its amount, nor by the *per capita* average to population, nor yet by its proportion to the capital wealth upon which it is charged. The payment of the principal is, by the terms of the contract, postponed for a longer or a shorter period, and to a Government in good credit, the reimbursement may be further protracted at will, and while thus not demandable by the public creditor, may be treated as a burden in expectancy only, or as though during the interval it did not exist. The annual interest accruing is the form which its actual pressure takes, and until the time of reimbursement it has no other. For all practical purposes, therefore, the aspect which the problem presents is not the proportion of debt to property, but the proportion of the current interest to the current annual product of wealth.

The great bulk of the British debt is in the form of perpetual annuities, having only a *capitalized* principal, which the Government is under no contract to pay at all. The holders of these stocks have no right to demand the principal at any time, and the Treasury may consult its own policy and convenience as to the extinguishment. In effect, our American loans, for fixed terms of years, if the Government chooses at maturity to substitute new stocks for them, are to all purposes rendered into annuities while they run; and the inquiry now in hand is only confused by considering the burden of the principal while that principal is not due or payable.

INTEREST ON OUR DEBT.

On the 31st of March, 1865, the total amount of the interest bearing debt was $1,851,416,370, the annual interest amounting to $102,836,581—an average of 5.55 per cent. per annum. Of the bonds and notes which make the aggregate of the interest bearing debt, 276½ millions are at 5 per cent.; 1,117 millions at 6 per cent.; 156½ millions at 6.46 per cent. (the compound interest notes,) and 301 millions at 7-30 per cent. The compound interest notes will be due in June, 1867, and the 7-30s are payable or convertible into 6 per cents in August, 1867 and 1868. It must be recollected, also, that the 510 millions of 5-20 bonds, issued under the act of February, 1862, will be payable, at the option of the Government, on the 1st of May, 1867; and the 5-20s, into which the present running loan of 7-30 notes are convertible, will in like manner, be payable in August, 1872 and 1873. It is entirely probable that all these stocks will, at the period designated for their optional payment by the Government, be changed, if not discharged, into 5 per cent. loans. We are, therefore, entirely safe in putting the average rate of interest upon our permanent debt at 5½ per cent. per annum, payable half yearly. The average interest upon the total debt, including 515½ millions in greenbacks and fractional currency, is now but 4.35 per cent. per annum. Here, again, allowance is made for the possible funding of this large sum, now bearing no interest, thus overcharging the account of the Government by the amount added for interest on the Government currency, which will most probably be kept in circulation until such time as the revenue shall exceed expenditures.

The actually accruing interest upon the total debt for the current year is, as before stated, a fraction under 103 millions per annum; but to cover the possible additions of the loan now on the market we put it at 126 millions. For the year 1866, we assume the principal at 2,700 millions, and the interest at 148 millions; thereafter the debt is taken at 3,000 millions, interest 165 millions. We are now ready for the question of the

BURDEN OF THE INTEREST UPON OUR RESOURCES.

The census of 1860 gives us the data for stating the wealth of the loyal States (slaves excluded) at 10,716 millions, and the products of the year at 2,870 millions, or 26.8 per cent. of the capital. We know, also, that the wealth of the loyal States increased in the ten years, 1850–'60, at the rate of 126 per cent. or 8½ per cent. per annum.

Assuming these amounts and rates as a basis, we have, for June, 1865, a wealth of 16,112 millions, and an annual product of 4,318 millions, on which sum the 126 millions of interest would be 2.91 per cent. The like calculation for the period to which the longest of our outstanding 6 per cent. bonds run before they can be converted to lower rates of interest, would stand thus:

	——Millions of Dollars.——				An. int. to ann.
	Int. bearing debt.	Ann. interest.	Wealth.	Annual product.	prod'ct per ct.
1865	2,290	126	16,112	4,318	2.91
1866	2,700	148	17,428	4,685	3.17
1867	3,000	165	18,909	5,067	3.25
1870	3,000	165	24,218	6,490	2.54
1880	3,000	165	48,236	12,059	1.36
1881	3,000	165	51,693	12,923	1.27

The increase of the wealth of the loyal States, it will be perceived, is reduced, after 1870, from 8½ per cent. to 7 1-6 per cent. per annum, and the annual product from 26.8 per cent. to 25 per cent. per annum upon the capital.

These rates of production and accumulation will, perhaps, astound European statisticians, and may challenge the wonder of those among us who borrow all their economic doctrines and ideas from transatlantic authorities; but we can say with absolute assurance that they are proved by the most conclusive evidence, in the last ten years of our national progress, and if so, we are fully warranted in taking them as a basis for our estimates of the immediate future. In 1833, Pablo Pebrer estimated the wealth of Great Britain and Ireland at 17,200 millions of dollars; and there is not a respectable authority in the realm that will question the statement that it has quite doubled since that date. But our own figures depend in no degree or respect upon the estimates of exports. A decennial appraisement of the property and products of the nation, with no other suspicions of error than omissions and undervaluations, in the years 1850 and 1860 respectively, give us the facts of our situation and rate of progress, and we can rely upon them confidently as a minimum exhibit of our economic condition. The census of 1840 was much less complete; but it shows that our advance in wealth in the last decade very exactly doubled upon that of the immediately preceding one. The best, and the best disciplined, ability of the Census Bureau gives us these results.

PROSPECTIVE RESOURCES.

The burden of interest upon the public debt is here calculated down to the rate of the increase of wealth in the last decade, immediately before the Rebellion commenced. Is this the measure of enhancement for the next 16 years? Let us see: In that last decade nine of our Northwestern States and Territories grew upon the valuation of 1850 full 411½ per cent.—from 452½ to 1,862 millions. Four new territories, which had not been reported in 1850, were valued in 1860 at 98 millions; and the still newer ones, Dakota, Nevada, Colorado, Arizona and Idaho, are not valued at all. These last are among the richest in the precious metals, and are rapidly rising into equality of product with California itself, but have no report in our estimates. The Government still holds, in the great West and Northwest, 950 millions of acres of land undisposed of, which are now, at the conclusion of the war, to come rapidly into market, and, what is much more to the purpose, though worth a thousand millions to the Treasury in purchase money, will, after the example of those settled and improved since 1850, rise in taxable value, at an average rate of 455 per cent., and in 20 years increase about thirty times the cash value of the property of their occupants; and if every dollar received from the sale of the public domain shall be bestowed upon these new States by the Federal Government in donations to their internal improvement and educational enterprises, the taxable wealth and the resulting revenue in these new States will be thereby only increased in manifold proportion to the investment.

THE MINERAL REGIONS

which invite our disbanded armies, and the still larger hosts of European immigration to open up their treasures, extend through 17 degrees of latitude, and a longitude of nearly equal measure, making an area of more than a million of square miles. They are literally stocked with gold, silver, precious stones, marble, gypsum, salt, tin, quicksilver, asphaltum, coal, iron, copper and lead; asking only an amount of labor relatively equal to that expended on California to yield $400,000,000

per annum in gold and silver alone; and in the other minerals, which will be mined as soon as transportation is provided, at least half that sum. And these things are not merely in the possible of the far future; they are near enough to answer the exigencies of our condition. A population now of 30,000,000, which, during the last half century, has doubled its numbers every 23½ years, with all the industrial enginery and apparatus of the age at command, animated by the spirit of adventure, and spurred by the faith and hope which works wonders, will be found sufficient for the achievement of greater things than we shall need or dare predict.

But great as the promise is in these exhaustless sources of national wealth, our reliance is not alone, nor even chiefly, in the wilderness of our new world. The States called the older of the sisterhood did, in the last census decade, increase their wealth vastly more in amount, and but little less in per centage, than the comparatively new ones. Ohio, first settled 77 years ago, appreciated 136 per cent, but New Jersey and Connecticut, both two centuries under culture, enhanced their wealth in as great proportion in the same time; and Pennsylvania made an increase of 96 per cent, upon her large capital of $722,000,000.

PETROLEUM.

From present developments made and making, it would seem that this new found tributary of our national wealth is practically inexhaustible. The States of Ohio and Western Virginia are yielding it as freely as Pennsylvania, which has already reached an annual product of 30,000,000 of gallons. The promise of Kentucky is very large, and Southern California gives assuring indications of equal abundance, and even finer quality, at less cost of labor and capital. This oil, already in universal demand, is rapidly being utilized more and more by the improvements made in its manufacture which are bringing even the residuum of the earliest processes into service, and fitting all forms of the product for employment in new uses. As for the breadth of the country which holds the supply, it is safe to say that it extends within our own territory from the Allegheny Mountains on the east to the Pacific Ocean on the west; and that throughout an area of 2,000,000 of square miles of our domain, it may be found anywhere, and made available in proportion to the enterprise employed in its development. In measure of use, quantity, and value, it may be classed with our iron mines and mountains, our coal-measures, our salt, lime, marble, and all the known varieties of useful minerals; each and all laid up in reserve, without any other limit of enriching products than the demand we shall make upon them.

Such, briefly, are our mineral resources, the chief material of manufacture. The supplies of which the surface of our territory is capable are, in like manner, unlimited in quantity and variety. Put but 60,000,000 of population upon the soil, and divide their industries in due and co-operative proportion, and it is entirely within limits to say that we can furnish to foreign commerce, from our surplus, the manufactures and provisions required by the wants of four times our own numbers. And are we not sure of these conditions of such enlarged production in the 20 years before our present debt, under the terms of the contract, becomes payable? In each of the last three scores of years we have doubled our population, and the new epoch just opening in our history promises, on the safest grounds of estimation, to exceed this proportion within the like period.

REVENUE.

The sufficiency of the wealth, existing and expectant, to support, without detriment to the progressive prosperity of the country, the required revenue, is thus unquestionable. Let us now glance at the ways and means of raising it.

Under our present system of internal taxes, the actual yield is at the rate of $260,000,000 for the current calender year. The cessation of hostilities, which is now to be looked for at an early day, will diminish the receipts from the manufacturers of army supplies while they are changing into new forms of production, but any such temporary reduction in the crisis will still leave a sum which, with the receipts from customs and lands, will certainly afford for the present year an aggregate revenue of $325,000,000. Now, the interest of the debt on the 31st of March last was $103,000,000; and if in the remaining 9 months this form of debt should be increased $400,000,000 at 7.30 per cent. per annum, the total interest will be a fraction less than $126,000,000, leaving of the treasury receipts $200,000,000 for ordinary expenditures.

With peace restored, the civil, military and naval expenditures will not exceed this sum, and the growth of the permanent debt will cease within the conjectural limit we have assigned it. The interest for 1866 will not exceed $148,000,000, if $300,000,000 of the total debt shall so long remain in the form of United States notes. For these and the following years, for which we have assumed $165,000,000 as the maximum annual interest, we have provision in the well-assured increase of the revenue from taxes, customs, and land sales, as will presently appear.

ADDITIONAL SOURCES OF REVENUE—EXPORT DUTIES.

An export duty upon the cotton, tobacco and other staples of the reconstructed Union, for which we have the command of the world's market, is not only an ultimate reliance but a near probability, and can be made to pay from $60,000,000 to $100,000,000 a year, without detriment to any American interest.

REVENUE FROM THE SOUTHERN STATES.

Nothing of this has entered into any of the preceding statements or estimates; but a duly proportioned amount of excise and assessed taxes from the restored insurgent States must not be overlooked. Their wealth, in 1860, was $3,467,000,000 nearly 25 per cent. of the wealth of the entire United States. That they shall contribute in something like that proportion in relief of the public burdens, is clear as matter of right, and is, indeed, a constitutional obligation of all the members of the Union; nor is there ability in any wise doubtful. Whatever of enhanced cost or diminished quantity of production may occur in the earliest year of the restoration, will be borne by the consumers of their staples; a state of things, however, that can last for only a very brief period; for there is no product of agriculture that expands so rapidly as that of cotton. In the five years from 1855 to 1860, they doubled their product. It can be restored now in less time, and then advanced upon at the like rate; for they are soon to set forward in a career of prosperity unparalleled in all past experiences. The Rebellion has disburdened them of an incubus. They have at command all that the temperate climate affords, with the semi-tropical added. They lack nothing but the population, enterprise, and diversified industry of free institutions, and these are brought to them by the new order of things.

We say again, give us but 20 years to realize the promise of our means and conditions, and the United States will stand ready, with a population of 60 millions, and a wealth of not less than 60,000 millions to meet the current burden, and discharge the total debt of the nation. England, with half this amount of wealth, now feels that her still larger debt has dwindled from 40 to 12 per cent. of her property. Ours then would stand at but 5 per cent. of our capital, though undiminished in amount in all that period.

INTEREST OF THE DEBT AND ORDINARY EXPENSES FOR THE NEXT SIX YEARS.

The following tabular statement shows the result of our inquiry as to the ability of the Loyal States to provide for the interest of the public debt, and the ordinary peace expenditure until the year 1870:

	——Millions of Dollars.——					
	Wealth.	Annual product.	Ann. interest.	An. rev. required.	An. peace expenditures.	P.ct. of an.rev. to an. product.
1865	16,112	4,318	126	325	199	7.55
1866	17,428	4,685	148	348	200	7.42
1867	18,909	5,067	165	365	200	7.23
1868	20,516	5,498	165	365	200	6.63
1869	22,240	5,965	165	365	200	6.11
1870	24,226	6,492	165	365	200	5.62

Note.—The revenue for the calendar year 1865 is an estimate made upon data well ascertained. The peace, or ordinary expenses of the year, is the balance left for such use after payment of the accruing interest.

PAYMENT OF THE DEBT IN 20 YEARS FROM 1870.

It is assumed that, by the year 1870, the insurrectionary States will be fairly under the Federal Government, and in condition to contribute their due distributive share to the revenue of the Union, and that in that year the reduction of the Public Debt may be commenced. The following table, issued by JAY COOKE, the General Subscription Agent of Government Loans, shows the wealth of the restored Union; its annual product; the annual interest upon the debt while in progress of extinguishment, the percentage of annual product which may be applied in payment of the debt; the percentage of annual product required for ordinary peace expenditures (the amount of which is taken at 200 millions from 1870 to 1880, and thereafter at 250 millions, per annum); and the total charge per cent. of all disbursements until the debt ot 3,000 millions shall be reimbursed.

RESOURCES OF THE RESTORED UNION—ANNUAL CHARGE REQUIRED FOR EXTINGUISHMENT OF THE DEBT IN TWENTY YEARS.

The wealth of the Union in 1870, is obtained by aking that of the loyal States, according to the rate of increase for the ten years before the Rebellion, and adding thereto 25 per cent. for the wealth of the Rebellious States, instead of 33⅓ per cent, which was their proportion in past times. The rate of increase for the ensuing years is calculated at 7 1-6 per cent. per annum, or 100 per cent. in 10 years. (It will be recollected that the rate before the Rebellion was 6¼ per cent per annum, or 126 per cent in 10 years. The annual product is

also reduced from 26.8 to 25 per cent. of the capital wealth of the year.)

Year.	Millions of Dollars—Wealth.	Annual. Product.	An. Interest.	Charge p. c. upon an. product of the Union. Of annual interest.	Of payment of principl.	Of peace expenses.	Of total required rev.
1870.	30,282	7,570	165	2.18	1	2.64	5.82
1871.	32,452	8,113	160.1	1.97	1	2.46	5.43

One per cent on 300,000 millions pay $3,000,000,000 the principal of the debt.

It must be noted, however, that the figures representing the per centage of the annual product of the nation's industry required to carry on the Government, pay the accruing interest, and repay the whole principal of the debt, do not express an actual taxation upon the annual products, but upon a sum equal to such product. Much of this expenditure may be borne by export duties, if adopted; some considerable share by the proceeds of the public lands, and a very considerable amount will be raised from miscellaneous sources, which are not taxes.

BURDEN OF BRITISH TAXATION UPON THE ANNUAL PRODUCT OF THE UNITED KINGDOM.

Compare the following statement of the charge of the annual interest and ordinary expenses of the United Kinkdom upon its industry, by which her debt has been reduced less than $250,000,000 in 50 years, with the burden upon our growing wealth in the demonstrably practical scheme for extinguishing ours in 25 years from the close of the Rebellion. The British revenue pressing with an average weight of about 10 per cent. per annum for above 30 years, ours declining from less than 6 to less than 2 per cent.

In the four years 1811–14, the average amount of annual revenue raised by taxes in Great Britain, was—

$327,489,291	equal to	21	p.ct. of an. product.
1823..279,714,100	"	16.4	" "
1833..224,415,931	"	9.8	" "
1841..233,209,146	"	10.65	" "
1850..258,326,707	"	10.54	" "
1859..344,784,895	"	11.15	" "
1860..340,875,829	"	10.8	" "

It will be observed that in the scheme submitted for the payment of the national debt, and exhibiting the charge to be incurred in the process, we have allowed the relative percentage of the revenue to wealth to decline regularly to the end. This is done to allow for any possible new debt that may be incurred in the interval. The statement shows that as early as 1877, the productive industry of the Union, would bear an additional 50 millions of interest, and in 1885, no less than 333 millions, without carrying the annual charge of the total of such a debt and ordinary expenses above four per cent. upon the annual yield of the nation's capital and labor.

The faith of the nation is pledged for the discharge of all its obligations, its people have passed through a wonderful experience of their financial ability from hope to confidence, and the cautious moderation of our calculations show that, early and easily, THE NATIONAL DEBT CAN BE PAID.

Railroad Earnings--Monthly.

The business of the Illinois Central Railroad for the month of April, 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold	9,243.06 for	$104,020 38
Acres Int. Fund Lands sold	480.00 for	8,918 80
Acres Free Lands sold	2,801.82 for	34,041 14
Total sales during month of March, 1865	12,524.88 for	$146,980 32
To which add Town Lot Sales		1,662 00
Total of all		$148,642 32

Increase $33,000 00

The earnings of the Chicago and Rock Island Railroad Company for the month of April, 1865, were $186,172 00
Corresponding month of previous year 175,838 00

Increase $10,334 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of April, 1865, were $366,245 00
Corresponding month of previous year 330,651 00

Increase $35,594 00

The earnings of the New York Central Railroad for the month of April 1865, were $1,300,000
Corresponding month of previous year. 1,105,663

Increase $194,337

A Ship Canal to Lake Champlain.

Hon. ALEX. BARCLAY, member of Assembly from Washington county, by most indomitable energy and perseverance, and against much opposition, carried through the last Legislature an act for the survey of the Hudson river from Waterford to Fort Edward, and appropriating $5,000 for the purpose. Mr. Barclay is a practical engineer and surveyor, and having examined the matter thoroughly, he is confident that by improving the channel of the river somewhat, and then either opening a short canal on some low land into Lake Champlain, by widening and deepening the Champlain canal a short distance, a channel can be obtained that will float large vessels from the lake into the river.

This survey is soon to be made under the proper State authorities. If found feasible, it will prove of great value to the farmers of that section, and open another source of supply for our markets.——*Albany Journal.*

Bellefontaine Railroad Line.

This line is composed of the *Bellefontaine and Indiana Railroad*, extending from Indianapolis to Union, 84 miles; and the *Indianapolis, Pittsburg and Cleveland Railroad*, thence to Crestline, 122 miles. We have been favored with a copy of the Joint Annual Report of these companies—being the Fifteenth Annual Report of the former, and the Sixteenth of the latter. The following is a statement of the transactions of these roads during the fiscal years ending December 31, 1863 and 1864:

BELLEFONTAINE AND INDIANA RAILROAD.

Redemption of 1st mort. bonds		1,000 00
Deposit for 2d mort. bonds		50,000 00
Payment of old car loan		12,764 30
Surplus		4,802 06
Total		$230,624 70

Compared with 1863, the gross earnings of 1864 show an increase of $225,659 40; with an increase in expenses of $308,124 64—making the decrease in net earnings, $82,465 24. The increase in expenses is principally in track and equipment departments; in both of which there have been material improvements. A considerable portion of the increase is due, of course, to the large advance in prices of labor and materials.

The capital stock remains the same as last year. In 1st mortgage bonds, one bond of $1,000 has been redeemed and cancelled in adjustment of accounts. Of the old bonds $422,000 have been converted into the new extension bonds—leaving $368,000 of the original issue outstanding. In 2d mortgage bonds, the trustee has redeemed $14,000. A deposit has been made for the whole of this issue outstanding, now amounting to $116,000. This fund has increased during the year by

accumulations of interest, about $8,000. The old real estate bond of $1,000 has been presented and redeemed. Of the extension real estate bonds $450 have been redeemed; leaving $47,550 outstanding, due Jan. 1, 1866. The real estate fund is sufficient for their payment. The extension income bonds, amounting to $87,000, due in 1870, remain unchanged. A sinking fund has been provided in the hands of a trustee amply sufficient for their protection.

Total	$195,599 90	
January and July dividends	108,328 39	
Surplus	$87,271 51	

Compared with 1863, the gross earnings of 1864 show an increase of $173,670 91; with an increase in expenses of $216,868 52—making the decrease in net earnings $42,692 61. The same remarks apply in this case, as in that of the B. and I. R.R.

The capital stock has been increased during the year $572,428 74, in order to equalize the two roads in the process of consolidation. Of the 1st mortgage bonds, $78,000 have been absorbed by the sinking fund—making the amount now held by the trustee of that fund $196,000. The outstanding income bond of $1,000 has been redeemed and cancelled. A domestic bond of $100 shown in the last report, has been cancelled.

By legal action of the directors and stockholders during the past year, a consolidation of the two roads was perfected. The measure, it is confidently believed, will be found one of mutual interest and advantage. The consolidated roads are now worked under the new organization as the *Bellefontaine Railway Company.*

The office of the company is at Indianapolis, Ind. The officers and directors for 1865, are as follows:

President.—JOHN BROUGH.

Directors.—John Brough, L. M. Hubby, Stillman Witt, T. P. Handy, H. B. Hurlbut, Wm. Collins, Henry Wick, J. H. Godman, E. J. Peck, M. G. Walker, David Kilgore.

Vice President.—E. J. PECK.

Sec'y and Treasurer.—EDWARD KING.

Gen'l Superintendent.—R. N. BROWN.

Milwaukee and St. Paul Railway.

The sale of that portion of the old La Crosse railroad lying west of Portage City, under the land grant mortgage, and the formation of the Milwaukee and St. Paul Company by the purchasers, has given rise to considerable discussion as to whether the public policy of the state would allow the new company to disconnect the western division from the eastern and to connect it with the Milwaukee and Western, and operate the new line by way of Columbus and Watertown, to La Crosse, as one through line, as the Milwaukee and St. Paul company are now doing. Certain parties claiming an interest in the eastern division, applied to the Legislature at its last session, for the passage of an act substantially ignoring the rights of the Milwaukee and St. Paul Company, and compelling the owners of the western and eastern divisions of the old La Crosse railroad to operate the same, as one continuous through line from Milwaukee to La Crosse, and giving the owners of the eastern division full authority to run their trains over the west division to the Mississippi river. This bill was defeated—the Senate, by a vote of seventeen to eight, postponing it indefinitely, after a full discussion.

On the other hand, the Legislature, by a vote of three to one, passed an act fully ratifying and confirming the organization of the Milwaukee and St. Paul Company as made—consolidating the Milwaukee and Western and the Milwaukee and Horicon road with the Western division of the La Crosse, and making it all one road, with all the powers of the road consolidated under the name of the Milwaukee and St. Paul Railway Company.

The following is a copy of the act, received from the office of the Secretary of State.

The People of the State of Wisconsin, represented in Senate and Assembly, do enact as follows:

Section 1. The organization of the Milwaukee and St. Paul Railway Company as provided by its article of association, filed with the Secretary of State on the fifth day of May, 1863, is hereby ratified and confirmed; and said company is hereby declared to be a corporation with the rights, power, privileges, and franchises, which were of the Milwaukee and Western Railroad Company, Milwaukee and Horicon Railroad Company, and all that part of the La Crosse and Milwaukee Railroad Company pertaining to its road lying west of Portage City.

Sec. 2. This act shall take effect and be in force from and after its passage and publication.

(Signed) W. W. FIELD,
Speaker of the Assembly.
W. W. CHANDLER,
President of the Senate, pro tem.

Approved April 10, 1865.

(Signed) JAMES T. LEWIS,
Governor of Wisconsin.

Cape Cod Central Railroad.

A meeting of the Cape Cod Central Railroad Company was held in Brewster, 6th inst., to ascertain what instructions the stockholders thought proper to give the Directors for issuing bonds on behalf of the company, for the purpose of completing and equipping the road. A statement was made by the President giving the condition of the road, which was shown to be very satisfactory, the grading now being nearly completed. For the ironing and equipping of the road, it appeared that about $100,000 was required, whereupon it was voted to authorize the Board of Directors to issue bonds, on behalf of the company, to an amount not exceeding one hunded thousand dollars, for the purpose of completing and equipping the road.

Cary Improvement Co.

From the annual report of this company we learn that the original property consisted of 414 acres; laid out in streets, squares, etc., about 80 acres; set off in land dividend, May 8, 1855, 29 acres; sold to present time, 28 acres; original cost, one cent per foot; average price per foot for land already sold, 22 cents; remaining unsold, 12,000,000 feet of land valued at nearly $2,500,000; number of houses on the estate, 125, ranging in cost, exclusive of land, from $1,500 to $8,000.

The amount on hand at date of last report was $25,635 67; receipts—notes receivable, $15,316 20, payments on account of land and houses sold, $12,975, other sources, $13,695 57—total, $41,986 77; expenditures—cash dividend No. 3, 50 cents per share, $30,000, on grading streets, contracts for building, salaries, taxes, and miscellaneous, $34,993 36; total, $64,993 36; balance of cash on hand this date, $2,629 08.

American Railroad Journal.

Saturday, May 13, 1865.

Stock Exchange and Money Market.

Our reports from the interior in regard to the agricultural products of the coming season are of the most cheering character. The fall sown crops, wheat, rye and barley, promise well; the winter and spring seedings are said to be doing as well as could be desired. The large and small fruits also are likely to be abundant, and everywhere a kind Providence appears to smile on the labors of our husbandmen. We have every reason to expect an unprecedented yield of all the earth can return for industry and intelligent cultivation. These expectations in connection with the successful termination of the rebellion give the most profound satisfaction to all true Americans. Such favorable circumstances act directly upon the financial power of the country, and afford further evidence of its ability to meet all the engagements we were unwillingly but resolutely forced to assume to save the life of the Nation. Entering again on a career of peace, with renewed confidence, we may expect fully to realize every hope which even in our darkest hours, we patriotically encouraged. We see no end to our advance in all material interests. Soil, climate, health, and an industrious and never-faltering population must work together for great results.

We give a large portion of our paper to the publication of a valuable essay from the pen of Dr. Elder, issued under the supervision of Jay Cooke, the well-known and successful Government agent, which, addressing itself to the financial problem, demonstrates without the risk of contradiction, that even if our public debt should finally amount in all shapes to 3,000 millions, it is sure to be paid. In the most clear and positive manner it shows, that as a burden it will continually be growing lighter by the effect of our increasing population and production, and that the percentage per capita will be rapidly diminished with each future decade. It also shows by comparison with the British National debt how easily it may be carried, with this difference in our favor, that while the former is never expected to be discharged, ours can be, as all our previous public debts have been. There is but one point about which we do not agree with the author. If we understand him, he assumes that the portion of our debt known to exist in the form of legal tenders is to be or must be funded with the rest. We object to this view of the subject. These legal tenders have been a remarkable and successful instrument in carrying us through our difficulties, and we are indebted to Mr. Chase for his courage and sagacity in adopting the policy of their creation against the remonstrances of our most capable and clever bankers and capitalists. These persons believed that the war should have been carried on upon a specie basis; and that the Government should have placed its loans on the market at whatever price in order to do so. But in our judgment this would soon have been found impracticable. There could not have been obtained even for an ordinary military chest an adequate supply. The banks instead of giving up their specie to the Government, would soon have suspended specie payments to save themselves. The proceeds of the loans would then have been mostly realized in suspending paper, everywhere at a discount, and looked upon with doubt and suspicion by the creditors of the Government. The National securities would not have been negotiable except at an enormous discount, since the actual holders of coin would have demanded their own price. On the other hand, for two years legal tenders were circulated at a small discount from gold, and the early and heavy outlays of the departments were made almost for full value received. Again, it is the opinion of some of our ablest bankers that their institutions but for these legal tenders would have been wound up and gone into bankruptcy, and that wide spread ruin would have overtaken the commercial classes, certainly all those who borrow money. Then again their issue gave us a uniform currency through out the loyal States and saved millions of dollars in exchanges between the different sections, and

finally we have had the use of between four and five hundred millions of dollars for several years without interest.

Now we think the redemption of these notes either in whole or in part may be secured without funding them. There is not a calculation made by any of our financial writers which does not contemplate and admit a positive and a large surplus the coming year, of receipts over expenditures. Many place this surplus at upwards of 300 millions. If so this must come into the Treasury directly or indirectly in the shape of legal tenders; directly from the taxes or indirectly by being demanded in redemption of the National and other bank issues. By cancelling them at least in part as they come in, the value of those outstanding will be appreciated, approach par in gold, until they are either wholly redeemed, or become so scarce and valuable as to be at par in gold. On the other hand, if they are funded, we shall add at 5 per cent. interest, say twenty-three millions of dollars to our present annual interest, and if they should be funded in long securities, say 20 years, at the end of that time we shall have paid four hundred and sixty millions of dollars in interest, and still have the principal to pay. Meanwhile we should have a surplus of revenue lying idle, and offering dangerous temptations to hasty and improvident legislation. We therefore come to the conclusion that the real policy of the Secretary of the Treasury, next to paying off the the floating debts of the Government, is to redeem as fast as possible from his surplus these legal tenders. And we venture to believe that this will be his policy, as a sound, successful and experienced financier. We therefore look at the future of our funded debt as likely to be by some hundreds of millions less than is predicted in the theory of Dr. Elder.

The customs receipts for the last week amounted to the large sum of $2,315,815, a considerable difference from the estimates of those who have been predicting a large decline. We find too that the total receipts of gold from California for the 11 months ending 5th of May have been $14,710,715 or $5,703,121 more than during the same period the previous year. And we may add that the attention which for the last few months has been paid to the subject of new mines, and their scientific development assures us that we are to have an unexampled yield the present and ensuing year. New companies are rapidly going into operation, and it is ascertained that in the new territories especially in Colorado, where the mineral ranges appear more particularly rich and auriferous, we are to see results that the most enthusiastic have not fully anticipated. We commend this view of the subject, first to our good continental friends, and next to that prejudiced, unjust and silly authority of the London *Times*, who has continually maintained our inability to pay our interest, and even disputed the existence of coin enough in our Treasury to do it, if we would. We would also recommend the latter to notice the large shipment by the Treasury last week of American coin, out of its surplus to meet our diplomatic expenses abroad. We also would point him to the fact that of the gold dividends payable in the beginning of this month, a large portion had not been drawn out by the Government creditors, as late as last week, which they certainly would have been in haste to do if they believe done word of what the *Times* has said, or what the assailants of the national credit here at home take so many opportunities of saying. And in connection with this, it is remarked that the large subscriptions to the 7-30s in a single week, more than forty millions, were not allowed to pass without some words of disparagement by certain evil disposed persons, who explained the reason of these subscriptions, by alleging they were made by Government contractors, thereby insidiously assuming that they could not get their money in any other way. A flat contradiction has been given to this untruthful explanation by Jay Cooke, the agent of the Government, but we doubt whether it will produce any retraction from the authors of the untruth. It is really astounding to see how pertinaciously, misrepresentation is studied in some of these journals. We cannot comprehend the motives of these writers. Now that their esteemed friend Jefferson Davis is a fugitive, and his confederacy crushed, we do not see what they can hope to gain by a continued system of detraction from the country's financial ability.

Gold fell on Wednesday to 131 and a fraction, in the face of an undiminished paper currency. Those who have argued that this alone keeps up the price, ought to keep up and must keep up, should give some explanation for its decline, not yet familiar to them. The voluminous historical critics who have for the last four years been pointing to the French assignats as examples of our own currency and its fate, must be rather chagrined to find their illustrations utterly unfounded and worthless.

The pamphlets, essays and money articles written to prove that gold would continue to rise, and our currency be worth no more than the paper it was printed on seem to have been produced in vain. The bullionists are non-plussed, and what is still more strange, those who have been most clamorous against paper money, now show the greatest alarm at the very idea of an early return to specie payments! Among the curiosities of this war is the inconsistency or rather the folly of a large number of our financial writers. There being a very limited demand for gold, and the Country being now in possession of large balances by the sale and absorption of its stock abroad, and its imports of goods being small, while exchange is dull and in little demand, we do not see how gold can stand even at its present prices very long.

Our last advices from England are to the effect that Egyptian cotton was selling at 24 cents. We find our speculations as to large probable losses abroad in the article, are confirmed even to the very amount, by the calculations of a writer versed in the subject addressing Mr. Bright, and published on Tuesday in a cotemporary, while a discussion has arisen as to the quantity yet remaining in the United States, and likely to be thrown on the market. Two and a half millions of bales are mentioned as being the probable amount in some quarters, but even a million will be enough to produce the effects abroad on which we commented last week.

As we have already observed further and very vigorous movements are being made to enlarge the mining operations in our gold and silver bearing regions, and as there is likely to be a large withdrawal of capital from many employments and manufactures indispensable to war, so there will be a fresh impulse given to mining, which properly conducted is nearer a certainty of profit than almost any other business. Although the product of California from 1848 to 1862 inclusive, is according to the received authorities as much as $734,000,000, it is believed by the geologists from the present yield, and palpable evidences of the gold region in other states and territories, that California is yet to be surpassed and that for example the territory of Colorado contains as much gold as half a dozen Californias, and the configuration of the mountains there seem to indicate its aggregate as if in heaps, of which the more northern mines are as but drops squeezed from a sponge. We therefore look for an extraordinary product of gold from these sources in the next ten years, and so thinking, we also think that the Government should in some way be benefitted by this production.

The subscriptions to the 7-30s amounted on a single day, on Tuesday to the enormous and unprecedented sum of $15,165,300, and on Wednesday to $17,410,000, and money was so plentiful that it was offered at 3 per cent.

It is stated that American balances abroad in specie, will be at once returned to this country to obtain the advantage of the present premium in gold before the opportunity of realising it is gone. The holders would have made a much greater profit if they had sold it at an earlier day. Their want of confidence in their own country has justly subjected them to a heavy loss.

The market for railway shares is reported as being firmer. Governments are rapidly improving, and the rise abroad will carry them up considerably higher than their present quotations.

The exports other than specie from this port for the last week were of the value of $1,757,151 against $3,900,520 for the same week last year, and the balance in the Tub-Treasurer's office on Tuesday was $38,381,078 12.

Galvanized Iron.

This form of prepared iron is one of the most valuable in which this metal is now employed. Oxydation is entirely prevented from taking place by the galvanic process so called. Our telegraph system has by this means been made perfect. Charles Washburn & Son, one of the oldest houses in the business, advertise in another column, that they not only manufacture wire of this description, for all purposes, but furnish rivet and wire rods, and bar iron and blooms also, rolled to order. Their manufactory is at Worcester, Mass., and their office in this city, No. 45 Cliff street.

☞ The celebrated Washington Iron Works, located at Newburgh, N. Y., of which Homer Ramsdell, Esq., is President, Geo. M. Clapp, Treasurer, and Joseph Belknap, Superintendent, advertise their readiness to furnish all descriptions of railroad cars--passenger, baggage, freight, coal and ore cars—as well as a great variety of other manufactures in iron, from a Railway Bridge to a Circular Saw; from Steam Engines to Sugar Pans. For particulars see advertisement.

☞ The late Cashier of the First National Bank, James Curphey, Esq., has left his position there to do business on his own account as Banker and Broker at No. 1 Pine street. His great financial experience will give him many advantages in conducting his business, in which his clients will necessarily participate.

☞ The Central National Bank, H. A. Smythe, Esq., President, is now paying its second annual dividend of 7 per cent., free from the Government tax. This institution is so prosperous, that it has been determined to increase its capital to three millions, and we recommend parties desirous of investing in a good institution to take advantage of the present opportunity to subscribe before it is too late to do so.

☞ We call the attention of our readers to the advertisement of Morris & Wheelright, general Bankers and Brokers, 72 Beaver street. This house does business strictly on commission, and therefore their advice may be taken without hesitation by those seeking for investments, or desirous of realizing.

☞ Mr. James Robb and Mr. John S. Sauzade have been admitted to the firm of Winslow, Lanier & Co.

Allegheny and Freeport Railroad.

The prospects of the new road from Allegheny City to Freeport, along the bed of the Pennsylvania canal, are highly flattering. The distance is short—less than thirty miles—and by following the canal but little grading will be required.

Interest and Dividends.

Interest due 15th inst., on bonds of the Detroit and Milwaukee Railroad Company, as well as any interest due and unpaid prior to that date will be paid by the Agents of the company, Mr. K. Jesup & Co., 59 Exchange Place, N. Y.

☞ The Albany and Susquehanna Railroad Company are now engaged in putting down the rails on that portion of their line between Cobleskill and Richmondville. The work is nearly completed, and it is thought the road will be opened to the latter point by the 15th of May.

☞ The Baltimore and Ohio Railroad Company has begun the survey of the Metropolitan Railroad, for which a charter was given at the last session of the Maryland Legislature. This initiatory proceeding is under the guidance of Mr. J. H. B. Latrobe. The work is in the way of early completion.

☞ The following gentlemen have been elected officers of the New York Stock Exchange for the ensuing year: For President, Mr. Robert L. Cutting; first Vice President, M. A. Wheelock; second Vice President, A. H. Dyett; Treasurer, W. A. Smith; Secretary, G. H. Brodhead; Assistant Secretary, John W. Munro; Roll Keeper, E. A. Shipman. For Committee on Securities, A. Campbell, W. H. Neilson, J. W. Underhill, R. L. Cutting and C. R. Marvin.

☞ The West branch of the North Missouri road extends from Moberly City to Weston, 151 miles. The cost of construction and equipment is estimated at $30,000 per mile, to defray which the company is authorized to borrow $4,000,000 on first mortgage bonds on the whole road, besides the county subscriptions, which make a total of $5,025,000, giving $495,000 above the estimated cost.

☞ The extension of the Tyrone and Clearfield Railroad to Franklin is being agitated with much earnestness. The route is said to be a favorable one.

Finances of Sacramento City, California.

The funded debt of the City of Sacramento, Cal., January 1, 1865, was as follows:

Old outstanding scrip and bonds not surrendered for refunding under the Act of 1859, or amended Act of March 22, 1864.

1850–'51—Old scrip	$2,088 99
1850–'51—Old city bonds	7,458 35
1851 —Funded debt loans	604 25
1852–'53—Levee loan bonds	24,750 00
1852 —City Hall and prison bonds	2,000 00
1853–'54—New levee bonds	1,000 00
1853–'54–'55—Fire department bonds	2,300 00
1853–'54–'55—Water loan bonds	14,000 00
1855–'56—Funded loan bonds	22,983 53
Total	$77,185 12

Interest past due and unpaid on the above will exceed six per cent. per annum for over nine years—exceeding $38,592.

The new six per cent. bonds of 1859 and 1864, stand as follows:

Bonds of 1859	$1,474,800
Bonds of 1864	21,300
Total new funded debt	$1,496,100

Interest due on the above January 1, 1865, is $96,156.

Six years interest is computed in the first coupon of the $21,300 issued during 1864.

Interest past due and unpaid being on the years 1862–'63, $27,000.

The floating debt of the city when the new city charter (Act of April 25, 1863,) commenced was $115,000. Scrip has been issued by the Board of Trustees to the amount of $109,182 34, and $77,-777 16 redeemed as follows: On the Salary Redemption Fund, $46,804 16, redeemed for $34,-219 25 in cash; average bids, 73 1-10 cents on the dollar. On the General Redemption Fund, $30,973, redeemed for $21,236 69 in cash; average bids, 68 8-10 cents on the dollar. Balance unredeemed, $31,405 48.

The receipts and disbursements of the city Treasury on account of special funds for the year 1864, were as follows:

Funds—	Receipts.	Disb'sem'ts.
Sinking and interest fund	$40,632 48	$62,318 00
Fire department fund	16,731 80	15,085 32
School fund	29,163 86	32,087 75
Salary redemption fund	19,634 33	20,167 59
General fund	30,637 25	28,878 70
General redemption fund	11,437 76	11,909 65
Levee fund	2,473 14	4,419 93
Water works fund	38,970 92	40,255 23
Cemetery fund	1,888 50	1,887 31
Street improvement fund	34,395 40	34,071 48
Dog fund	525 40	506 20
County Indian fund	45 00	.. ....
Total	$226,535 79	$251,587 16

The balances standing to the credit of the several funds January 1, 1864 and 1865, were as follows:

	Balances—	
Funds—	Jan 1, '64.	Jan. 1, '65.
Sinking and interest fund	$24,354 80	$2,669 23
Fire department fund	1,177 89	2,824 37
School fund	3,979 32	55 43
General fund	5,224 31	6,982 86
Levee fund	11,286 43	9,339 64
Water works fund	3,301 52	2,017 21
Cemetery fund	542 40	543 59
Salary redemption fund	784 44	251 18
Street improvement fund	388 96	712 92
General redemption fund	542 83	70 94
Dog fund	.. ....	19 20
County Indian fund	.. ....	45 00
Total	$51,582 90	$26,531 62

The following is a recapitulation of the operations of the City Treasury for the year ending Dec. 31, 1864:

On hand, January 1, 1864	$51,582 90
City tax of 1864	68,701 76
City license, 1864	24,541 89
Harbor dues	22,075 11
Water Works, 1864	38,970 92
Fines in Police Court, 1864	4,117 65
City Cemetery dues, 1864	1,888 50
Delinquent tax prior to 1864	7,278 95
County prison rent, 1864	1,700 00
City pound, 1864	81 50
Rent of swamp land office, 1864	60 00
State school money, 1864	4,343 04
County school money, 1864	10,543 36
Street improvement tax, 1864	34,395 44
Total	$270,281 02
Total disbursements to Dec. 31, 1864.	233,749 70
Amount on hand, January 1, 1864	$26,531 32

Journal of Railroad Law.

DAMAGES FOR LOCATION AND CONSTRUCTION OF RAILWAY.—TITLE OF OWNER, WHEN TO BE OBJECTED TO.

The late case of Church against The Northern Central Railway, on *certiorari* to the Common Pleas of Cumberland County Pennsylvania, was a proceeding by one Juliann Church, in her own right, and as administratrix of one Mary V. Church, deceased, against The Northern Central Railroad Company, under certain act of the legislature of that State, passed February 19th 1849, and providing for the assessment of damages occasioned to the owners of lands, by reason of the opening and construction of certain railroads.

In her petition she set forth: "That before and at the time of committing the acts and trespasses thereinafter mentioned, she was the owner of one-third part of the estate descended to her, at and on the decease of her daughter, the said Mary, V. Church, deceased, of and in the two tracts of land situate in the township of East Pennsborough, in the County aforesaid, a particular description of which is set forth in her petition. That her daughter Mary V. Church, who did intestate, was in her life, and at the time of committing such trespass, the owner of one-fifth part of the same two tracts of land; and that letters of administration on her estate had issued in due form to the petitioner. That the Northern Central Railway Company, by its superintendent, engineers, agents, and workmen, entered on the same two tracts of land, and surveyed and marked the route of a railway, and constructed the same upon and through the said two tracts of land, whereby great injury, loss, and damage had been done to the petitioner, and to the said Mary V. Church in her lifetime; and that the petitioner, in her own right, and as administratrix aforesaid, could not agree with the said company for the proper compensasion for the damage aforesaid done to the petitioner, and to the said Mary V. in her lifetime; and therefore prayed the court to appoint viewers," etc.

Thereupon the court appointed viewers and issued the usual order according to said act of the 19th February 1849, appointing therein the 22d day of September 1859, for the meeting of the viewers, on the premises, notice of which was given to the defendant and viewers. The viewers met at the time mentioned, and, without entering on the view adjourned to the 27th day of October following, on which day they viewed the premises injured, etc., made their report in favor of the petitioner, and filed it the 14th day of November succeeding. On the 22d day of said November, the defendant filed twelve exceptions to the report; but as the court only decided or passed upon the 3d, 4th, 6th, and 11th, complaint of its action or decision was made only as to them.

The court considered the 3d, 4th, and 6th together, and the sum of them was that "the petitioner had no such title to the premises as set out in her petition; she was not the owner of the one-third part of the land, and that Mary V. Church was not, and had not been in her lifetime, the owner of one-fifth part of the land described." In the 11th exception the defendant alleged that there was a former recovery of damages for injury to the premises—(which were paid) by the guardians of the minor children of Henry R. Church, deceased.

The court below, on a hearing, set aside the proceedings, whereupon an appeal was taken to the Supreme Court of that State, after which the following opinion of that Court was delivered by

THOMPSON, J.—It is contended by the counsel for the plaintiff in error, that the action of the court below was erroneous, and that the only remedy for errors not appearing on the face of the proceedings, was by appeal under the act of 27th of April 1855, which provides for an appeal in proceedings thereafter instituted under the act of 19th February 1849, and that the *quantum* of title in the petitioner could only appear by evidence *dehors* the record. It is difficult to see how this can be successfully gainsayed. The Act of Assembly and the practice under it, requires only that the petitioner set forth that he or she is the owner of the premises alleged to be injured, as was done here. We think that if the party against whom the application is made, does not, at the time of the application for the appointment of viewers, object to the *quantum* of interest or title set forth by the petitioner, he is concluded as to that matter, unless there is a special right of inquiry into it given by statute, or he takes an appeal, when the trial being according to the forms of the common law, the whole case will be passed upon *de novo*, and can be fully brought up for review, if deemed expedient.

When a court acts summarily, and sets aside proceedings on evidence *dehors* the record, the ground of decision cannot be legally known to an appellate court, for no bill of exceptions is allowable in such a case. Harris, 363, 9 id. 105. In such circumstances it cannot be known whether the judgment pronounced was sound or otherwise, judicial or arbitary. The maxim "*omnia presumuntur rite esse acta*" is applicable to the judgments of courts, but it ordinarily applies to matters of form and order, which often are, if not always, the guardian of rights as well as principles.

Here there is no presumption of law sufficient in itself to sustain the court in setting aside these proceedings, and no exhibition of evidence of which we can legally take notice, authorizing it. The proceedings including the report, being regular on their face, and there being nothing legally impeaching them, it was error to set them aside. The remedy in such a case was and perhaps is, by appeal.

The plaintiff in error denies that there is any-

thing in the petition, or in any other part of the record, to show that Mrs. Church was only entitled to dower, and not an "owner" of the interest described in the petition, or that if she had but a life estate, that the damages were not predicated of the exact extent of interest. There is certainly nothing to overthrow this position on the record. Indeed, even if it had appeared that it was only as widow she was claiming, it does not appear in any way that the lands out of which she was claiming dower, her husband had died seized of. If he did not die so seized, then her interest would be realty, 2 Jones, 154. So that, granting that the estate which she claimed damages for injury to, was dower, still her proceeding may possibly have been strictly right. It doubtless, however, appeared to the court, by admissions or evidence *dehors* the record, that her interest was in some way different from what it was set out to be, but we have nothing of this before us on which to support the decision below.

The proceedings of the court in this case were like arresting a judgment, where the *narr.* sets forth a good cause of action, on evidence to the court, to show that the facts alleged were not true. To the decision of a court arresting judgment, a writ of error lies. 4 Yeates, 375; 2 S. & R. 392; and if arrested in any such way, the action of the court would certainly be reversed.

The proceedings set aside being regular, we must for the reasons given reverse the order of the Court of Common Pleas setting them aside, so that they may be reinstated and proceeded in according to law.

Order setting aside proceedings, reversed.

Panama Railroad.

The last steamer from Aspinwall brings us advices of the renewal of the Panama Railroad Company's contract with the Government of Colombia. It is well known that for several years past all attempts for this object have been fruitless, and fears have been entertained that finally the road would pass out of American hands. This is now no longer to be feared. The present Company has become the perpetual owner of the road with various new privileges, for which it has agreed to pay half a million of dollars down, and to issue 18,000 shares of stock not transferable at $100 per share, which at present dividends will produce between 4 and 500,000 to the Government per annum. The Government is to have one Director. Under this arrangement the stock will stand as follows:

Present issue	$5,000,000
Bonus to Colombian Government	1,800,000
Total cost	$6,800,000

The following are the principal points in the contract between the Panama Railroad Company and T. Cuenda, Secretary of the Treasury of the United States of Colombia, as approved by President Murillo, on the 22d of March, and to be afterward laid before Congress for its sanction; the contract entirely supersedes that of April 15th, 1850:

Art. 1. The Government concedes to the Company the entire and perpetual ownership of the railroad and all its appurtenances.

Art. 2. No persons or company shall have the right to construct a railroad or canal within 150,000 metres on either side of the Panama Railroad.

Art. 3. The Company agrees, 1st, to pay to the Government the sum of $500,000. 2d. to issue in addition to the 50,000 shares that now form the capital of the Company, 18,000 shares of $100 each in favor of the Government. These shares are not to be transferable, and give no right to the Government to vote as a shareholder. The Government is to receive 26 8-17 per cent of the dividends as its proportion, and to have the right of appointing one of the directors. 3d, to prolong the line on the Pacific side to the islands of Naos, Culebra, Perico and Flamenco, or to some other point where there are at least 8 metres of water at low tide.

Art. 4. The Company has to permit the opening of a canal between the Gulf of Caledonia and San Miguel, notwithstanding Art 2.

Art. 5. The Company has the right to construct any kind of road within the limits named in Art. 2.

Art. 8. The Company may give to the existing line of railroad any direction that may be decided more favorable than the present.

Art. 9. The Government concedes to the Company the necessary lands required for the line, ports, buildings, wharves, &c., if they belong to the Government.

Art. 10. Also, 64,000 hectares of Government land in the state of Panama, gratis and forever, which may be extended to 96,000 hectares, with liberty to select them wherever the Company pleases.

Art. 13. The Company may get all the land belonging to private persons which they want for a prolongation or alteration of the line, or for a double track, after a valuation has been made and an indemnification been paid to the owner.

Art. 19. The Company agrees to transport the Government mail gratis, as also

Art. 21. The troops, armaments, &c., for the Government's service, and its employes; also to charge for the transportation of the products of the Republic, 10 per cent less than for the same from other countries, in exchange for which agreement the Company shall not be required to pay any Government, State, or Municipal taxes.

Art. 32. The Company renounces all right to make claims for the damages on account of the outbreak of the 15th April, 1856.

☞ The county of Allegheny has just recovered a verdict against the Pittsburg and Steubenville Railroad Company for $242,458, being the amount of coupons paid on certain coupons on bonds issued to the railroad company by the County. The county owned ten thousand shares of the capital stock of the company, for which bonds amounting to $500,000 were issued, with interest coupons attached, payable semi-annually. A contract was made between the county and railroad company, by which the latter agreed to pay the interest accruing on the coupons at maturity, which agreement was complied with during the years 1854–'55 and 1856, after which, the company failing to comply with its contract, the county was compelled to meet the coupons as they became due. The verdict was for the sum thus paid.

☞ The Alton *Telegraph*, speaking of the importance of constructing a railroad between that place and Edwardsville, Ills., says it believes the work will be commenced this season, and adds:

A road can be very cheaply constructed on this route, as most of the grading has already been done by the old Alton and Mount Carmel Railroad Company, which has long since been disbanded. But whether the stock will pay a good dividend or not, we leave for those better versed in financial matters than ourselves to decide, but owing to the enhanced value of the property on the route and at Edwardsville, which would result from its construction, no better investment could be made by the owners of this property than to take stock in this road.

Railroad Earnings--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 4th week in April:

	1865.	1864.
Passengers	$13,960 38	$7,840 33
Freight	11,159 18	13,788 34
Mail, express & telegraph	1,884 50	1,058 18
Total	$27,004 06	$22,686 85
Total this month to date.	$82,185 84	$73,215 01
Total for the fiscal year, commencing 1st Jan...	360,428 69	306,479 92

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending April 30, were:

	1865.	1864.
Passengers	$3,037 79	$3,468 84
Freight	7,058 00	10,480 63
Express	287 80	104 16
Mails	296 58	296 58
Total	$10,680 17	$14,350 21

Receipts from January 1 to April 30:

1865	$147,331 05
1864	146,957 35
Increase	$273 70

The earnings of the Grand Trunk Railway for the week ending April 29, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$45,411 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	80,010 00
Total	$124,545 00
Corresponding week, 1864	125,873 00
Increase	$2,672 00

The earnings of the Chicago and Northwestern Railway for the last week of April, are $149,637 48
Corresponding week of 1864 134,773 84
Increase $14,863 64

Railroad from Albany to Coeymans.

It is in contemplation to extend the Schenectady and Athens Railroad down the Hudson to Hoboken. A connection with this road can be made by building a line from Albany to Coeymans. This would make the distance from Schenectady to Athens, *via* Albany, forty-five miles, while it is forty-two by the direct road. A correspondent of the *Argus*, speaking of the road to Coeymans, says:

"The proposed road would cost, with depot, buildings, and rolling stock all complete, about $30,000 per mile.

"The principal expense in grading would be the first two miles out of Albany. After that the grading of the road bed will not cost much more than a common public road. The road would run very near the present stage road to Coeymans, which is very direct, with few curves, and of fine materials, gravel, and land. There would be very little, if any, rock excavation on the whole line.

"There would be three bridges on the route. One across the Norman's kill, which is the principal one, one small bridge at Cedar Hill, and one small bridge at the Coeyman's Creek at Coeyman's."

☞ The Oil Creek Railroad Company are laying the third rail on the track of their road in order that narrow gauge cars may be run over it. This will avoid the reshipment of freight by the Philadelphia and Erie road, and be a great saving in time and money to the patrons of the road. The work on the third rail is nearly completed, and will soon be ready for the narrow gauge cars

☞ A new railroad and steamboat connection between the New York and New Haven steamboats and the New Haven, Hartford & Springfield R. R. commenced on Monday, May 1st, the trains running to and from the steamboat wharf at New Haven. The steamers of this line leave New York daily (Sundays excepted) at 3. 15 and 11 P. M., from Peck Slip, East River.

Boston Water Power Co.

The receipts of this company for the year ending March 31, 1865, were $754,568 16; expenditures, $635,808 04; balance on hand in cash and notes receivable, $118,760 12. The total property of the company is estimated at $2,789,051 50; liabilities, $103,592 66; net amount of company's property, $2,685,458 84. The business of the past year has been small, owing to the unsettled state of affairs in the country and the high price of labor and materials. There have been sold during the year, 190 374 feet of land for the sum of $124,734 25. There are 883,400 feet of made land ready for market. It is hoped that within the ensuing year Columbus avenue will be completed to Park square. This will be an avenue one hundred feet in width, leading in a straight line from the Common to Roxbury, and most of the company's made land is in its immediate vicinity.

Superior Mining Co.

The receipts of this company for the year 1864 were as follows:

Balance on hand from last report.....	$444 52
Assessments and interest thereon collected.....	59,465 71
Sales of copper	27,530 87
	$87,441 10

And the disbursements were:

Debts payable of 1863.....	$9,266 38	
Purchase of real estate	10,808 56	
Agents drafts and payments on sundry accounts	45,765 66	
		65,840 60
Cash balance on hand Jan. 1, 1865....		$21,600 50

Passenger Railways.

The project of passenger railways between Pottsville, Minersville and St. Clair, is on foot, and the needed improvement will be made at once. A bill granting the privilege, was passed at the last session of the Legislature; the requisite stock has been subscribed, and the routes will be immediately surveyed. The route for the railway to Minersville will be from Morris' Addition up Centre to Market street, and out Market to Minersville. The route to St. Clair will be through Palo Alto and Port Carbon. It is to be hoped that the roads will be pushed through at once. Senator Ridgway, ex-Treasurer McGrath, Senator Randall, and other gentlemen are interested in the project.—*Pottsville Miners' Journal.*

☞ The West Troy *Democrat* says that the tracks of the Rensselaer and Saratoga Railroad Company have been removed from the depot on Canal street to the Y. It supposes this action settles the question that the cars are not to run into West Troy.

THE CENTRAL NATIONAL BANK,

318 BROADWAY,

Is now paying its Second Annual Dividend of 7 per cent., free of Government tax. The Capital of the Bank is to be increased to three millions, the new subscriptions to which are now nearly completed. The deposits of the Bank on the morning of May 2, were nearly fifteen million dollars.

3m-19 HENRY A. SMYTHE, Esq., is the President.

JAMES CURPHEY,

(Late Cashier of First National Bank,)

No. 1 Pine Street, New York.

C. N. JORDAN, Cashier.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.... ....$1,000,000.

DESIGNATED DEPOSITORY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 5 NASSAU ST., Feb. 17, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.

C. N. JORDAN, Cashier. 3m-8

CHICAGO AND NORTHWESTERN RAILWAY CO., April 27, 1865.

THE ANNUAL MEETING of the Bondholders and Stockholders of the Chicago and Northwestern Railway Company for the election of a Board of Directors for the year ensuing, and for the transaction of such other business af may be brought before them, will be held at the office of the Company, in the city of Chicago, on THURSDAY, the 1st day of June, 1865, at 11 o'clock, A. M.

3t-19 JAMES R. YOUNG, Secretary.

NEW YORK, May 1, 1865.

MR. JAMES ROBB and Mr. JOHN SAUZADE have this day been admitted as partners in our firm.

WINSLOW, LANIER & CO.

The undersigned, comprising the firm of Winslow, Lanier & Co., will continue the banking business at the same place. No. 52 Wall street.

A Mixed Currency for California.

A letter lately written by the present Secretary of the Treasury has found its way into print, expressing the opinion that California would be greatly benefitted by the adoption of a mixed currency of paper and gold, in place of its present purely metallic one. Of the truth of this assertion we have not the slightest doubt, and we venture to predict that at no distant day the constitution of that state will be so altered as to insure the introduction there of the National Banking system. To insist that gold and silver shall be in exclusive use in the current transactions of a commercial people is as much a departure from common sense, as it would be to abolish the post office and letter writing system, and to require every one to make a journey in person to transact his business at a distance. In nothing has civilization shown its progress more than in the substitution of bank notes and credits available for drafts and bills of exchange, and the substitution of them for the actual transportation of what they represent. All writers on political economy and commerce acknowledge this fact. J. R. McCulloch, a well-known and eminent British writer, in his treatise on "the principles, practice and history of commerce," remarks that "notwithstanding the precious metals are in many respects admirably fitted to serve as a medium of exchange, they have two very serious drawbacks—their cost, and the difficulty and expense of carrying them from place to place. If the currency of Great Britain consisted only of gold it would amount to at least sixty millions of sovereigns (about 300 millions of our money), and the expense attending such a currency allowing only ¼ per cent. for wear and tear, and loss of coins could not be reckoned at less than £3,500,000 per annum (or $17,500,000). It is obvious, too, that were there nothing but coins in circulation, the conveyance of large sums from place to place, to discharge accounts would be a very laborious process; and that even small sums could not be conveyed without considerable difficulty; and hence it is that most commercial and highly civilized nations have endeavored to fabricate a portion of their money of less costly materials, and have resorted to various devices for encouraging the use of coin. Of the substitutes for coin hitherto suggested, paper is by far the most important and is in all respects the least objectionable. Instead of discharging their debts by a payment of the precious metals, individuals, on whose solvency the public may rely, pass them by giving a bill or draft for the sum payable in coin at sight, or so many days after date; and as this bill or draft passes currently from hand to hand as cash it performs all the functions of coin, while it saves its expense to the public."

This clear and simple statement gives the *rationale* of the process. California, which adopted the theories of Mr. Benton, commonly known by the sobriquet of old Bullion, provided by her constitution that there should be no banks or bank currency, and the policy has prevailed there accordingly of not recognizing anything as money but gold and silver. Here then the principle has been not only established but carried out, which if any where should show its success. But we can prove that it has not been a success. On the contrary experience shows that it has really worked an injury to the Californians. To keep their golden gate in good condition it has cost large sums of money, and though of a bright and pleasant color, it has shut out large industrial and commercial interests. The exclusive use of gold has been a most costly experiment, and its effects have by no means added to the stability of property or the commercial transactions founded on its exchanges. It has cheapened nothing, it has made everything dearer. Labor has always been dear, and this has limited its employment. California has not increased as rapidly as several of our North Western States. Property has always been held at enormous prices, rents have been extravagant, and food high. Nowhere has there been such a recurrence of mercantile bankruptcies and private losses. Nowhere has speculation been so rife or profits so uncertain. Perhaps there is no city in the world where there has been more uncertainty in trade than San Francisco. The exclusive use of precious metals has been attended with an exorbitant price for that use. Two to five per cent. a month have been usually paid for money; the former being the usual rate for many years, while where banks exist the rate is only 6 and 7 per cent. per annum. Yet the commercial profits which the merchants of California enjoy in their foreign transactions, are and must be regulated by the use and prices of other money elsewhere. As for example if a merchant in San Francisco purchases a cargo for shipment to New York, and pays 24 per cent. per annum for the use of the capital employed, the price he is to receive at the latter port is no more nor less than the current rates of the article shipped, where money is cheaper, interest less, and prices by so much lower accordingly. If he adds the 24 per cent to the cost he will find himself a loser by the competition of a cheaper article. And this is precisely the principal reason that so much gold is exported from California, for if it was possible to export other products at a profit to much extent it would be done. While the value of the imports in 1860 was but $9,580,868, and in 1863 $12,877,399, the exports of gold, as officially known were in 1860 $42,325,916, and in 1863 $46,071,920. This evidently shows that there is something financially wrong in its commercial system, for the increase of values in California as represented in property and products that are fixed, bear no proportion whatever to the differences here perceptible. Nor

does its population increase as rapidly as that of some of our new agricultural states. Minnesota in 1850 had 6,077 inhabitants, and in 1860 172,126, nearly 30 times increased, while California in 1850 had 85,850, and in 1860 278,337 or not quite four times as many as in the former years. And it is even claimed that the population has within the last year or two actually declined.

It is evident from these facts, that with all the mineral wealth of the state, and its being the grand commercial mart of the Pacific, it has not yet taken the position it might. And we attribute this to the restricted character of its currency. It is not plentiful enough nor cheap enough to foster general enterprise and industry. If the fifteen or sixteen millions of coin in daily use as it is supposed in California was made the basis of a Bank currency to a reasonable extent, the rapidity of its circulation, and the more commercial use of it would change the whole character of the business of the Californians. And if the State permitted an issue of two for one of specie capital, or if under the National Banking system currency could be issued on deposit of national stocks, there is no doubt that a vast impulse would be given to its material forces. Why California should ignore the usages and advantages of commercial nations, we cannot understand. From the day its currency consisted of nuggets or gold dust in quills to the present, when it is in bars or gold pieces from the mint, it has been standing in its own light. With all its natural advantages it is falling behind the young states who have wisely used their credit to develope their industry and their commerce. The growth of the whole Union has been produced by this principle, while nations that have known no other means of exchange than the sands of their rivers, and the ingots of there mines lie still under the ban of ignorance and poverty. The Californians may very well study the writings of both the McCullochs we have alluded to.

Milwaukee and Prairie du Chien Railway.

The earnings and expenses of this road for the years ending December 31, 1863 and 1864, were as follows:

Earnings:	1863.	1864.
From freight	$904,157 52	$1,149,958 27
" passengers	297,885 04	509,712 78
" mails, etc	48,215 27	51,609 83
	$1,247,257 83	$1,711,280 88
Expenses, viz:		
Repairs of track	$191,698 86	$227,001 92

Bal. from previous year	211,057 14	278,581 69
Interest received on loans, and discount on pre-paid coupons.	5,169 30	6,620 14
	$670,736 79	$789,532 04
Disbursed as follows:		
Improvements at Prairie du Chien	$26,180 89	$91,429 62
Surveys of Monroe and Dubuque R. R. routes	.....	4,370 31
Account of Mil. & Miss. R. R. Co., under liens on property	5,384 21	788 25
Real estate	50 00	8,875 85
Interest on bonded debt.	170,485 00	106,400 00
Instalments of sinking fund—		
Due April 1	16,700 00	31,768 50
" October 1	17,295 00	66,312 50
Dividends on pref. stock.	155,060 00	249,650 00
Balance to new account.	278,581 69	229,938 01
	$670,736 79	$789,522 04

Compared with the year 1863, the gross earnings of 1864 show an increase of $464,023 05, with an increase in expenses of $413,203 19—making the increase in net earnings $50,819 86.

The earnings of the Southern Wisconsin Branch, (included in the above) were as follows:

	1863.	1864.
From freight	$31,684 75	$41,598 20
" passengers	14,418 12	26,559 43
" mails, etc	2,953 11	2,953 11
	$49,055 98	$71,210 74
Expenses	21,888 87	29,650 52
Net earnings	$27,667 61	$41,560 22

The business of the road from which the above earnings were realized is shown in the following recapitulation:

Freight traffic:	1863.	1864.
Tons of local freight	179,498	143,670
Do. carried eastward	129,296	89,645
Do. carried westward	50,202	54,025
Tons of through freight	98,674	135,060
Do. carried eastward	79,159	111,762
Do. carried westward	19,515	23,298
Tons of local & through	278,172	278,730
Do. carried eastward	208,455	201,407
Do. carried westward	69,717	77,323
Income from local freight	$536,174 53	$535,507 90
" from thro. freight	355,012 59	611,772 37
" fr. local & thro.	891,187 12	1,147,280 27

The movement of freight as shown by the above statement shows a decrease in tonnage of local freight, and an increase in tonnage of through freight, as compared with previous year. The increase in the one instance more than balancing the loss in the other.

The almost total failure of the wheat crop in this State last year, following so closely upon that of 1862, shows the uncertainty of such crop in this State, and the precariousness of our earnings if dependent mainly upon the same, furnishing as it does the greater bulk of our local freight.

The steady increase in our through business, the tonnage of which the past year almost equalled the tonnage of our local freight, shows the greater reliability and productiveness of the country tributary to your road lying west of the river and the importance to this road of proper extension into Iowa and Minnesota. The latter State, probably the surest wheat growing State in the Northwest, depends entirely upon the Mississippi River for an outlet. The extreme low water of the past two years evidences the uncertainty of this feeder, besides the greater expense to the roads in handling the entire shipments of the year from that State in the few months that boats can navigate the river. The McGregor Western road when extended to Minnesota will have the effect, by draining a larger section of country, of making the freight business of your road each year more equal besides distributing the transportation over the entire year.

The Beloit and Madison road extended to Madison the past year adds another competitor for the local business of the Southern Wisconsin Branch and Eastern Division of the main line of your road, furnishing another incentive for exertion on the part of this company to foster extensions west of the river.

The above statement shows that we carried 35,828 tons less of local freight than in preceding year, while the income from it was but $666.63 less. Our rates were advanced to as high a point as in view of competition could safely be done, without diverting or estranging business. In proportion as western feeders are developed freight will seek their more convenient stations, and be less subject to the river competition, which, for St. Louis even, extended to our terminal point.

Passenger traffic:	1863.	1864.
Local passengers	163,708	241,145
Through	12,976	16,233
Income from local	$197,691 35	$313,870 97
" from through	53,075 47	81,066 89
" from military	44,116 62	115,274 92

The passenger traffic shows increase in number and income in both local and through passengers, also large increase for transportation of military, in which item is included soldiers traveling on furlough. The increase in through travel is encouraging in view of the fact that the extreme low water in the Mississippi River lessened the usually large pleasure travel to Minnesota, and shows the steady improvement of Northern Iowa.

The increase in local travel is accounted for in measure by the establishment by Government of Military Camps and Hospitals at Milwaukee, Madison and Prairie du Chien, which produced more than the usual travel between these points.

A disadvantage we have labored under heretofore in having no accommodations near the depot at Prairie du Chien for passengers, in case connections were missed at that point, has been obviated by the erection of a combined hotel and passenger house. The house will be opened in the spring and must have its influence on such travel as was diverted from this line by better hotel accommodations at terminal points of other competing lines.

The mileage of trains in the years named was as follows:

	1863.	1864.
Passenger trains	292,944	303,331
Freight trains	434,069	551,155
Wood and repair trains	76,739	83,697
Total miles run	803,752	938,183

The expenses per mile (cents) run, including extraordinary renewals were as follows:

	1863.	1864.
Repairs of road and bridges	27.45	28.62
Repairs of locomotives	7.00	13.42
Repairs of cars	9.42	19.46
Engineers, firemen and wipers	5.98	7.07
Conductors, baggagemen, &c	4.21	6.03
Fuel	7.93	12.75
Oil and waste	1.80	2.65
Other expenses	34.41	39.66
Total per mile	98.20	128.65

The mileage of freight cars and the average load per car are shown in the annexed statement:

	1863.	1864.
Going east	3,068,342	2,976,894
Going west	1,619,988	1,829,450
Total	4,688,330	4,806,344
Average load east	8.25 tons.	9.16 tons.
" west	4.13 "	4.25 "
" east and west	6.82 "	7.28 "

and the mileage of empty freight cars was—

Going east	891,855	717,064
Going west	1,844,967	1,635,093
Total	2,236,822	2,352,157

The mileage of passengers or the equivalent of passengers carried one mile in 1863 and 1864, compares as follows:

	1863.	1864.
Eastward	3,771,080	5,323,371
Westward	3,942,585	5,483,282
East and west	7,723,665	10,806,653

—the average rate per mile having been in 1863, 3.25 cents, and in 1864, 3.65 cents.

The total movement of freight and passengers for each month of the years named was as follows:

	East		West		Total	
	Fgt.	Pass.	Fgt.	Pass.	Fgt.	Pass.

Total	$8,092,303 41	$8,452,350 99

The principal statistics relating to the operations of the company, since its re-organization are embraced in the following statements:

Statement showing the amount of each description of stock—

	Common.	1st Pref.	2d Pref.	Total.
	$	$	$	$
As re-organ'd	2,761,800	1,095,400	1,086,800	4,944,000
Less returned by trustees and cancelled	.....	314,600	66,800	101,400
1861	2,761,800	1,060,800	1,020,000	4,842,600
1862	2,761,800	1,041,000	1,014,000	4,816,800
1863	2,761,800	1,061,000	1,014,000	4,836,800
1864	2,988,073	2,414,500	1,014,000	6,416,573

The movements in the funded debt (convertible into 1st Preferred stock) have been as follows:

On re-organization of company	$2,556,000
Less return by trustees and cancelled	30,000

	Purchased by Sk'g. Fd.	Converted into 1st Pref.	Outstanding Dec. 31.
1861	.....	.....	2,526,000
1862	72,000	.....	2,454,000
1863	34,000	10,000	2,410,000
1864	90,500	1,353,500	966,000

The following exhibits the total stock and debt as re-organized and at the end of each subsequent fiscal year:

	Stock.	Funded Debt.	Floating Debt.	Total
	$	$	$	$
As re-organised	4,944,000	2,556,000	.....	7,500,000
Dec. 31, 1861	4,842,600	2,526,000	199,810	7,568,410
" 1862	4,816,800	2,454,000	221,282	7,492,082
" 1863	4,836,800	2,410,000	228,429	7,475,229
" 1864	6,416,573	966,000	455,179	7,837,752

The floating debt, includes $141,266 59 which stands in the general account as "Convertible property and old debts account," and bills payable, pay-rolls, dues to other companies, etc., against which the company held at all times cash and credits sufficient to discharge them.

The sources of the gross earnings of the first 4 years operations have been as follows:

Year.	Passenger.	Freight.	Mail, etc.
1861	$211,250	$835,178	$61,931
1862	357,027	855,902	50,805
1863	294,885	904,157	48,215
1864	509,713	1,149,958	51,610
Total	$1,272,875	$3,745,190	$212,561

And the profits from earnings are deduced as follows:

Year.	Aggregate Gross Earnings.	Operating and Taxes.	Profits from Earnings.
1861	$1,108,354	$672,315	$436,039
1862	1,163,734	748,993	414,741
1863	1,247,257	793,747	453,510
1864	1,711,281	1,206,951	504,330
Total	$5,230,626	$3,422,006	$1,808,620

The taxes in 1861 were $11,143; in 1862, $26,612; in 1863, $51,030; and in 1864, $72,230.

The Income account shows the total earnings (less cost of operations) to have been as follows:

	Profits.	Int. &c.	Total.	T'l incl. bal.
1861	$436,039	$.....	$436,039	$436,039
1862	414,741	5,623	420,364	713,238
1863	453,510	5,169	458,679	669,736
1864	504,330	6,620	510,950	789,532
Total	$1,808,620	$17,412	$1,826,032	$2,608,545

And the disbursements as follows:

	Interest.	Sink'g Fund.	Dividends.
1861	$118,405	$9,150	$.....
1862	172,900	13,000	156,264
1863	170,485	33,995	155,060
1864	106,400	98,080	249,650
Total	$568,190	$154,225	$560,974

	Improvements.	Other disbursements.	Total.	Balances to credit.
1861	$.....	$15,610	$143,165	$292,874
1862	67,852	92,165*	502,181	211,057
1863	26,181	5,484	391,155	278,581
1864	91,430	14,084	559,594	229,938
Total	$185,463	$127,343	$1,596,093	$1,012,450

* Including purchases viz: 1st mortgage bonds (59 bonds) $51,738 75, 1st pref. stock (98 shares) $7,763 74, and 2d pref. stock (60 shares) $3,420—tal $62,922 49.

Since the publication of the annual report the president of the company has issued the following circular for the use of the stock and bondholders:

The payment of dividend on 1st Preferred Stock, 10th February, again gave Bondholders an opportunity to convert.

372 Bonds were surrendered for conversion, in amount $359,000.

Of these, four bonds are not complete, so that as yet only $355,000 1s Preferred Stock issued in exchange for or conversion of 368 Bonds, viz:

342 Bonds of $1,000 each	$342,000
26 " 500 "	13,000
368	$355,000
4 Bonds in suspense until the transfer is made complete and valid	4,000
372	$359,000

Assuming, as there is no reason to doubt it, that the four Bonds in suspense will be validly complete, then the position of this Company stands changed as follows:

Bonds out 1st January, 1865	$966,000
Converted 10-20 February, 1865	359,000
Outstanding bonds 21st of Feb. 1865	$607,000
First Preferred Stock, 1st January 1865.	$2,414,500
Bonds converted 10-20, February "	359,000
Amount 1st Pref. Stock, 21st Feb. 1865.	$2,773,500

The payments for 1865 on this basis will be:

On Mortgage Debt, Interest and Sinking Fund	$204,480
8 per cent. on $2,773,500 1st Pref. Stock.	221,880
7 per cent. on $1,014,000.	70,980
	$497,304

The yearly interest on Bonds yet outstanding:

$607,000 at 7 per cent. amounts to	$42,490
The half-yearly payment for Interest and Sinking Fund remains	$102,240
Deduct half-year's Interest on Bonds out	21,245
Gives first half-year's Sinking Fund.	$80,995

Assuming Trustees to designate and pay $78,000 Bonds, and no conversion to take place this year, the debt would, by first half-year's Sinking Fund, be reduced to $529,000, and the second half-year's Sinking Fund would be as follows:

Half-year's Interest and Sinking Fund...	$102,240
Off half-year's Interest at 7 per cent. on $529,000 Bonds out	18,515
Second half-year's Sinking Fund	$83,725

We may assume, thus, that after making full allowance for Trustees' commissions, $160,000 Bonds will be in 1865 cancelled by operation of the Sinking Fund, reducing the debt by 31st December, 1865, to about $447,000.

The percentage of Sinking Fund to outstanding Bonds is about as follows:

For first half-year	12 5-6 per ct.
For second half-year	15½ "

on the amount of Bonds outstanding each Sinking Fund term, and for the whole year will be about 26 1-3 per cent. of the Bonds outstanding 21st February inst.

Even without further conversion the Sinking Fund for 1866 will cancel about $177,000 Bonds, and reduce the debt by 31st December, 1866, to $270,000. It thus becomes apparent that without further conversion the present system of Sinking Fund continued to the fall of 1868, must cancel all the Bonds yet outstanding.

Baltimore and Ohio Railroad.

The regular monthly meeting of the Directors of this company was held in Baltimore on the 10th inst., J. W. Garrett, Esq., President, in the chair.

The following gentlemen qualified and took their seats as directors on the part of the State, under their recent election by the Board of Public Works: Messrs. J. Summerfield Berry, Wm. Callow, J. K. Calwell, Chapman Harwood, Wm. Keyser, Wm. H. Purnell, W. W. Watkins and Samuel Wilhelm. Messrs. Barry, Callow and Watkins were re-elected.

Mr. John V. L. Findlay qualified and took his seat as City Director, in place of Mr. Wm. E. Woodyear, recently resigned.

The Committee of Finance reported the following resolutions:

Resolved, That a dividend of four per cent. be declared on the stock of the main stem of the Baltimore and Ohio Railroad Company, payable on and after the 22d May instant, at the Merchants' Bank of Baltimore, and that the transfer books be closed on the 12th instant, and remain closed until the 22d inst.

Resolved, That the United States tax be paid by the company.

Resolved, That a dividend of five per cent. be declared on the stock of the Washington Branch Railroad for the half year ending the 31st March last, payable on and after the 15th May at the Merchants' Bank of Baltimore.

Resolved, That the United States tax be paid by the company.

In connection with the financial condition of the company, the President stated that under the policy heretofore adopted by the Board, it would be necessary now to make very large expenditures. The war had ceased, and the entire territory betwixt the Chesapeake and the Ohio River was permanently restored to the authority of the Government, without danger of interference or interruption. It was proper for the company immediately to proceed to the erection of extensive machine shops and engine houses at Martinsburg and Piedmont, and to add to the facilities of the company at Grafton, Wheeling and Parkersburg, and other points upon the line, and to fully supply these shops with machinery, so as to effect the greatest economies in the management of the equipment and transportation of the company.

It is also the design of the company to erect, at the earliest practicable period, first class iron bridges, to replace every trestled structure upon the road. Already four extensive iron bridges have been prepared at Mount Clare, as well as one span for the great bridge over the Monongahela River, near Fairmount. At the earliest moment the condition of the streams will permit, these structures will be permanently erected.

A large force is already engaged in the construction of double track, and the company's programme was not only to restore all the double track destroyed during the war, but also to perfect the line from Baltimore to Harper's Ferry, all of which, it is trusted, will be accomplished within the current year.

Work for the great bridges over the Ohio River, connecting the main stem and the Central Ohio road, and the Parkersburg Branch with the Marietta and Cincinnati road, has been vigorously commenced, and large quantities of stone have been prepared, with the design of erecting a portion of these structures during the coming season.

The large amount of work necessary to make the Parkersburg road reliable and effective, has also been commenced. One thousand four hundred tons of new iron have been forwarded for the improvement of that line, and as early as the cost of labor is reduced to the ordinary standard, in a normal condition, it is designed to arch its tunnels, improve the cuts and widen the embankments.

The President congratulated the Board that the resources of the company had been carefully husbanded during the war, so that the enormous expenditures now requisite to restore the works and improve and perfect the route, could be made without the embarrassments usually attending such enterprises.

After further explanations regarding the condition of the company and plans for the development of its interests, the question was taken upon the adoption of the resolutions proposed by the committee, which were unanimously approved.

The report of the Committee of Transportation was then presented, in which were embraced resolutions making very large reductions in the rates for transportation of coal. The President stated to the Board that although the expenses of the company had increased rapidly and very largely during the past year, yet the company had not advanced the rates during the fall and winter, until the 15th of February last.

The advance then made had worked most advantageously for the interests of the community, as the company at that time decided, in order to increase the supplies of coal, to diminish largely the through business, which then pressed heavily upon it, at most remunerative rates. Whilst the latter trade was more profitable to the company, than the former at the advanced tariff, yet the necessities of the country urgently required an increased supply of coal. As the demands for both could not be fully met, the decided preference was thus given to the coal trade. Under this policy, such additional quantities of coal were brought to market as, notwithstanding the advance in the freight materially reduced the market prices of coal to the consumer and shipper. Prior to that period the parties interested in the coal trade secured the extraordinary and unprecedented profits of more than five dollars per ton, because the demand far exceeded the supply; but upon the increase of the supplies thus furnished under this change of system by the company a decline of several dollars per ton followed at an early period. The business of the company has continued to this time up to its fullest capacity, the varied and extensive trade pressing upon the route occupying its entire equipment.

Having conferred, however, during the past month with parties interested in the coal trade, regarding its condition and prospects and having in view the rapid decline in the price of gold, and consequent reduction in the cost of the necessaries of life which will follow, the President deemed it proper to recommend to the Committee of Transportation the adoption of the resolutions before the Board, by which a deduction of $1.50 per ton on coal from Cumberland and Piedmont to Baltimore, and $2 per ton from Newburg, Fairmount and Clarksburg, on gas coals shall be made. The freight will thus be reduced from $5.25 from Cumberland to $3.75, and from Piedmont from $5.60 to $4.10, respectively, to Locust Point wharves.

It is true that the company, except in the purchase of materials, has not yet realized any decrease of expenses, not having reduced its rates for labor, which are yet unchanged, and its pay rolls still nearly triple their aggregate prior to to the war; yet this radical change in the tariff is recommended to secure a continuous and full business in this highly important and valuable trade. A quarter of a million of men will, in a short time, be relieved from service in the armies, and as labor is becoming daily more abundant, and the great employment and manufactures and preparation of material connected with the war will cease, it is deemed proper, relying upon an early decrease of expenses, to anticipate the change for the benefit of the coal trade. As with the reduced cost of the necessaries of life, the net reward to the parties employed will thus prove equal to the recent high rates, with their accompanying high cost of living, no difficulty is to be apprehended in such change of prices for labor

as will be just and equitable to all the interests involved.

The President felt confident that, with the comprehensive appreciation of the mining, manufacturing and marine interests, and of the interests of the States of West Virginia and Maryland, and of this community, which has uniformly marked the policy of this Board, that the resolutions of the Committee of Transportation would meet approval.

Reductions were also recommended upon the way rates for coal corresponding with the changes that had been made in the tariff on this article.

After further explanations, the resolutions (by which the reduction takes place on all coal loaded on and after the 11th instant) were unanimously adopted.

A number of nominations were submitted from the Master of Transportation and approved for agents at various stations upon the line, at which it had been impossible to maintain agencies during the continuance of the war.

A gratifying evidence of the restoration of law and order, and of the indisputed and full authority of the Government, and of the absence of all risk in the regions bordering upon the line, has been given in the number of applications which have recently been made for appointments at numerous exposed points at which agencies had been maintained prior to the war.

The recent removal of all restrictions from the trade and travel upon the entire line of the road, and the territory through which it passes, has added largely to the passenger and freight business of the company. The requirements of transportation for local purposes, especially upon the central and western portions of the route, are extraordinary, and afford very satisfactory evidences of the returning prosperity of that region, resulting from the rapid pacification of the country.

The meeting was very fully attended, and the entire proceedings of the Board were characterized by the greatest harmony.

Agricultural Department.

The Report of the Agricultural Department for March is devoted mainly to farm stock, and in connection therewith contains an instructive essay on grasses. From this report it appears that during the year 1864 there was a general decrease in farm stock, except in sheep, which have largely increased, owing to the high prices obtained for wool. The causes for this state of things are attributed to the heavy demands of the war and the increased cost of raising stock.

The total decrease in horses during the last year was 308,209, more than one-third of which is chargeable to Kentucky and Missouri, which States have suffered from regular and guerilla warfare. Ohio has suffered the most of any of the States in this respect, its decrease being 68,745.

Mules have decreased by 33,295, of which Kentucky and Missouri have last 32,326.

There were on the 1st of January last 892,866 less cattle in the loyal States than on the 1st of January preceding. The decrease is general, Kansas and Nebraska Territory being the only places that exhibit an increase.

The total decrease of cows was 280,198, a matter of sincere regret in view of the foreign demand for butter and cheese, and the increased home demand for butter. As a substantiation of this we may state that the export of cheese from January 1, 1865, to March 7, reached 7,850,155 pounds, against 6,620,035 pounds for the same time last year; and of butter the comparative quantity exported during the same period were respectively 4,868,115, and 4,644,558 pounds.

The total number of sheep in the loyal States is estimated at 28,647,269, which shows an increase of 4,300,878 within the past year. Estimating the average yield of wool at four pounds per head, the wool clip for 1865 will reach 114,589,607 pounds.

The decrease in hogs deserves particular attention. It is 3,078,150. The returns for the last packing season are not all in, but the decrease as compared with the returns of the previous season is estimated at 902,968.

The whole number of horses in these loyal States in 1864 was 4,049,162; in 1865, 3,740,933. Of mules, in 1864, 280,848; in 1865, 247,553. Of cattle and oxen, in 1864, 7,965,439; in 1865, 7,072,573. Of cows, in 1864, 6,066,298; in 1865, 5,768,130. Of sheep, in 1864, 24,346,391; in 1865, 28,647,269. Of hogs, in 1864, 16,148,712; in 1865, 13,070,562.

Casting Ingots.

Letters patent have been granted to Mr. William Weild, of Manchester, consulting engineer, for "improvements in the casting of ingots from metal prepared by Bessemer's process." Hitherto, in casting ingots from metal prepared by Bessemer's process, (patents dated 17th October, 1855, No. 2,321; 7th December, 1855, No. 2,768; 15th March, 1856, No. 630, and 1st March, 1860, No. 578,) the molten metal has been received in a vessel having a valve at its bottom, which is opened to allow the metal to pass out directly into the ingot mould that is placed in a vertical position below it, and when the ingot mould is sufficiently filled the valve is closed to prevent any further escape of the metal till the vessel is brought over the next mould to be filled. This system has not been found satisfactory, as there are difficulties in the working of the valve, and in discharging the molten metal into the ingot mould, owing to obstructions in the valve orifice; and besides this the pressure of the molten metal, and the distance it has to fall into the ingot mould causes the metal to become greatly agitated and mixed with air to such an extent as to make the ingots spongy and defective, so that flaws appear in articles afterwards formed of such ingots.

It is the object of this invention to remove the above mentioned objections, and it consists in the following arrangements: a horizontal flue is formed in a circle, or in a straight line, and this flue is covered with slabs of metal closely jointed together, and with an even upper surface in which a continuous groove is formed, and upon these metal slabs another series of metal slabs are laid so as to be closely jointed with each other and the slabs below, and through each of the upper slabs a hole is formed, and upon each upper slab an ingot mould is placed over the hole through the slab, so that by this arrangement all the ingot moulds are brought into communication with the groove, and thus with each other, each end of the groove being stopped up. When the molten metal is to be cast, the vessel containing it is brought over one of the ingot moulds (say the middle one), and close to its orifice, material being applied to exclude the air, then the valve is opened and the metal passes down the ingot mould, then along the groove formed in the slabs above the flue, and then is rises simultaneously and without agitation into all the ingot moulds till they are filled. The flue under the grooved metal slabs is heated by any convenient means (say the waste heat from furnaces) for the purpose of heating the slabs so that the metal may not be cooled in passing along the groove, and all the surfaces coming in contact with the molten metal are coated with lampblack, clay, or charcoal in the usual manner. When the metal in the ingot moulds has cooled, those parts of the metal in the groove and in the hole through the upper slab upon which the mould rests, are broken away, and then the upper slabs can be replaced over the grooved slabs ready for the casting of the next set of ingots. The ingot moulds may be arranged upon the metal slabs in a circle with one mould or "gateway" in the centre, "gates" being formed in the metal slabs radiating from the centre mould or "gateway" to each of the moulds surrounding it. The upper slab having the hole through it by which the metal rises into the mould, may be bushed with burnt fire-clay, so that the metal will be effectively protected against "chill," in passing through the small orifice into the mould. —*London Colliery Guardian, April* 1.

Condition of the Southern Railroads.

All the railroads leading out of Richmond are in an exceedingly damaged condition, and will need large expenditures to put them in working order. The Government is running the Petersburg road, and from thence to City Point. The Danville Railroad has also been opened to Danville, but the track will need extensive repairs before any large amount of travel can go over it. The Southside Railroad to Lynchburg will require the building of about two thousand feet of bridging before it can be used. The track also needs repair. The Fredericksburg and Aquia Creek road has considerable rolling stock and motive power in good order, but the track is out of repair, and several extensive bridges will have to be rebuilt before it can be used.

None of these railroads can run into Richmond until the bridge over the James river is rebuilt. It is seven-eighths of a mile long. The piers are still standing and but little damaged. The Seaboard and Roanoke R. R. from Portsmouth to Weldon might have been put in repair at an early day, and communication with the South thus re-opened, had it not been for the wicked and wanton act of General Baker in destroying the bridge over the Roanoke river after Johnson's surrender. All these roads were partly owned in the Northern States, and it will require a fresh infusion of Northern capital to put them again in working order. Some interesting questions of law will arise as to the rights of loyal bond and stockholders whose property has suffered through the rebellion.

Interest and Dividends.

The Pennsylvania Railroad Company had declared a semi-annual dividend of 5 per cent., free of National and State taxes, payable on the 30th instant.

The Northern (N. H.) Railroad Company has declared a dividend of $3 per share net, payable June 2.

The Chicago and Northwestern Railway Company have declared a semi-annual dividend of 3½ per cent. on the preferred capital stock of the company, payable June 20.

The Flint and Holly Railroad has declared an interest dividend to stockholders from dates of actual payments for stock to April 1, 1865.

The Louisville and Nashville Railroad Company have declared a dividend of 4 per cent.

The Manchester and Lawrence Railroad Company $4 per share.

The Pacific Mail Steamship Company have declared a dividend of five per cent. out of the net earnings for the three months, preceding April 30, payable on the 23d inst.

☞ It is thought the cars will be running on the Albany and Susquehanna Railroad by the 1st of June. It is proposed to lay a track from Central Bridge to Schoharie Court House.

American Railroad Journal.

Saturday, May 20, 1865.

Stock Exchange and Money Market.

The success of the late Government loans is extraordinary, indeed without precedent in the history of loans. The amount daily subscribed to the 7-30s, and the character of the subscribers give it a peculiar interest. The following is a history of this loan:

Congress, in July, 1864, authorized the Secretary of the Treasury to borrow $400,000,000, in such form as he deemed best. Of this amount $100,000,000 was issued as ten-forties, $70,000,000 as five-twenties, and the balance, $230,000,000 as seven-thirties. On the 3d of March last, Congress authorized a further loan of $600,000,000; $70,000,000 of this was taken and added to the $230,000,000 of seven-thirties issued under act of July, 1864, to round it up to $300,000,000. This made the first series of the seven-thirty loan. This left $530,000,000 unissued of the amount authorized by the last act. The issue of $300,000,000 of it as seven-thirties was directed by the Secretary of the Treasury. The sale commenced on the 1st of April last. This was the second series of the seven-thirty loan. Its sale averaged between $8,000,000 and $9,000,000 a day. Only about $85,000,000 of it remained on the 12th day of May There was then still left at the disposal of the Secretary of the Treasury, under the act of March 3, 1865, $230,000,000.

The subscriptions on Saturday 13th inst., amounted to $40,451,950. and for the whole week were $98,384,650. In the two previous weeks the amount subscribed inclusive of voucher conversions was $145,000,000. The Secretary of the Treasury wisely acknowledging the patriotism and confidence of the people has decided to issue the balance of the loan authorized by the act of March, 1865, amounting to $230,000,000, in 7-30s, precisely similar in tenor, form and privileges to those already sold, payable three years from the 15th of July, with the reservation however of the right of paying interest in gold coin at the rate of six per cent. instead of seven and three-tenths in currency. Subscribers previous to the 15th will deduct the interest up to the last named date The deliveries of the notes are to commence on the 1st of June. This option of paying in gold is the only change in the character and privileges of this third series of the loan. Up to Tuesday last the new subscriptions have been about six millions.

Whether this option of the Government will check the popularity of the loan remains to be seen. As the public have the utmost confidence in the legal tender currency, perhaps they may prefer 7-30 in that to 6 in gold, especially as this currecy is rapidly appreciating, and is more convenient to use in commercial transactions. Capitalists are proverbially sharp witted in the investment of their funds, and we shall soon be able to see what is their opinion. It is very evident from the action of the Secretary of the Treasury in making the reservation, that he expects to see the currency so near to gold if not at par with it, as to make it an object to save the excess of 1.3 per cent. on the issue of this third series, which will be a handsome gain to the country. He shows a confidence in the future by this arrangement which is worthy of notice and doubtless will be justified by events.

We cannot help contrasting the large operations of our Secretary with those of the Chancellor of the Exchequer in England, Mr. Gladstone, whose budget is now the subject of great gratulation in that country. Introducing his statements to the attention of the House of Commons, he avowed that it was a source of great satisfaction that the expenditure of 1864–'5 was about three millions less than had been anticipated, though compared with that of 1858–'9 it was greater by about fifteen millions, and the total increase of charges on the country since the Crimean war, had been about sixty two millions of dollars. So that it is only the last year's experience which is made the particular subject of congratulation. In French finance it is the custom with the Treasury there to take an average of 5 or 7 preceding years as a basis of calculation for taxation and revenue, but in England one year seems to be enough for the

purposes of a Chancellor of the Exchequer, when he wishes to talk encouragingly. The greatest source of his satisfaction appears to arise from the increased consumption of malt and spirits, a very doubtful advantage we should think in a moral point of view. Nay, he supports his boast of financial prosperity by the calculation that the regular allowance of malt liquor to each adult male in England during the year is *six hundred quarts*. Two hundred millions of dollars per year are expended on the article called "the National drink," and as he rejoicingly adds, "there is no symptoms of a taste for it dying out." These six hundred gallons per head for each male adult reckoned in another way, is a barrel per head per annum in the gross. We confess this is a picture not so pleasant to look upon, and shows on what a curious basis the revenue of the kingdom rests. Should the people give up their beverage and have "no more cakes and ale," it is evidently doubtful whether even the interest on the National debt could be much longer paid.

This small surplus of receipts over expenditures the last year, however enabled the Chancellor to throw off here and there a few pennies on tea, something on stamps, and the income and fire insurance tax, for which there is evidently deep gratitude, but fearful of the consequences of this amazing generosity he deprecated any "invasion of his modest (and unusual) surplus."

All this appears to us to be ludicrously in contrast with the American system of finance. Although quite unused to debt and taxation we have not feared to meet both without flinching and without complaint. We have in four years actually welcomed a National debt in our great cause, of more than half that of Great Britain, have demanded taxation, have met dollars instead of pence as the imposition on most things taxable, and have not relied on our beer drinkers to help us through. The truth, is everything with us has been done on a scale entirely different from that of England. We have met the great emergency of National life or death with larger armies, larger navies, larger outgoes and larger income than would have been possible with any Nation in Europe during the last four years, and the country is not only saved, but more prosperous than ever in its internal affairs, and more confident than ever in its now tried ability and increasing resources. When will foreign critics and foreign economists understand this country? They have resembled the barbarians, who when they saw a serpent fasten on the hand of the Apostle Paul at Melita, and expected, perhaps hoped, that he would fall a victim to its fangs, were astonished to see him shake off the reptile into the fire without harm.

In our last we alluded to the fresh impulse being given to mining in our gold and silver bearing States and territories. It seems that new discoveries of value are being made in them which will materially increase their resources. Thus we find from our latest California advices that petroleum has been discovered in nearly all the counties along the coast except San Francisco, viz., in Los Angelos, Santa Barbara, Santa Cruz and Santa Clara, and as well also in the rising States of Nevada and Oregon. More than this large deposits of platinum have been discovered near Virginia City in the same State, a valuable mineral out of which the Russians have at times manufactured coin, and which is in considerable quantities imported for particular purposes in the arts, into the United States from abroad. Here we have a new element of value to reckon in our teeming resources. And what perhaps is still more interesting is the fact, that the salt deposits in Nevada are now ascertained to be inexhaustable, and it is quarried out in large blocks like ice and enters largely into the operations of the smelters of silver ore. It is also curious to note that the increase of silver as compared with gold is going on at an unexpected rate, and thus equalizing the value of the two metals, in which many political economists began to fear a dangerous inequality. The following table supports the statement, as regards the production of the Pacific Coast:

	Silver.	Gold.	Total.
1860	$80,397	$37,711,842	$37,802,539
1861	2,275,256	33,604,276	35,879,532
1862	6,247,074	31,302,804	37,549,878
1863	12,488,738	27,060,127	39,546,865
1864	15,797,585	24,332,505	40,130,090

Surely we may with unalloyed thankfulness recognize the goodness of that overruling power which is constantly opening to us such vast resources, which has so signally preserved us from so many dangers, and which offers us so many inducements to retain his protection. Truly he who brought us here will sustain us.

The news by the last arrivals from abroad in relation to our National securities continues favorable. On the 6th inst., U. S. 5-20s were quoted in London at 66, and American securities generally were in favor and demand. With the vast change effected in public opinion abroad, by our recent uninterrupted successes and the total breaking up of the Confederacy, our financial condition is more fairly appreciated. The facts are too palpable to be any longer resisted, and those like Mr. Gladstone, and we are sorry to perceive how this statesman was misled, who thought they were witnesses of the birth of a new Nation, find it only the abortive deception of false appearances. We shall have no further trouble from abroad as to our position and means. Here at home the greatest cheerfulness prevails financially. Governments are steady and in high favor. No doubt the large sums now disbursed by the Treasury in answer to the requisitions of the navy and war departments will largely go into the new loan. Gold fell on Tuesday to 129¾ notwithstanding a considerable amount has been shipped within a week past. Much of this has unquestionably gone as dividend remittances to parties who have no occasion to employ their funds here. Money continues very plenty, but will probably find full employment. The Southern trade is being rapidly re-opened, and lines of steamers are being placed everywhere on the old Coast routes. There is without doubt a vast field of enterprise offering to Northern capital, which it will with its usual foresight and activity at once occupy. We notice that the splendid large steamer, the *Guiding Star*, is to commence running to Europe, probably to inaugurate a new Atlantic line, and we wish the owners all success. Is it not time that the Navy Department should move as it has promised to do, in the plan of using our surplus steamers in the carrying of our ocean mails. We have the vessels which will otherwise be unemployed, and the seamen and officers ready and anxious for the service, which can be performed cheaply and expeditiously, thus restoring our commerce and adding in many ways to our revenue. It is very strange that the Press does not take a more lively interest in this subject.

Railway securities are looking up, the leading companies showing a large increase in their receipts the last month, with the prospect of a fine business the coming season. Indeed in all directions there is every appearance of business on a large scale, and the re-establishment of the railways in the South will of itself give large employment to numerous branches of production and industry.

The exports from this port for the week ending May 16, exclusive of specie were $2,229,028. The balance in the Sub-Treasury on Tuesday was large, to wit., $44,193,557 06.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois Canal bonds 1860, 86; North Carolina 6s, 65; Louisiana 6s, 60; Connecticut 6s, 97; Illinois Coupon bonds, 95; Milwaukee and St. Paul 1st mort., 75; Norwich and Worcester R. R., 85; Wyoming Valley Coal, 40; Cary Imp., 17½; Ninth National Bank, 107; Am. Ex. Bank, 114; St. Nicholas Bank, 100; Bank of Commerce 106; Bank State of New York, 115; Importers' and Traders' Bank, 106; Metropolitan Bank, 123; Mer. Ex. Bank, 100.

Philadelphia.—Westchester 7s, 100; Reading 6s, 1843-'80, 96; Allegheny Co. coupon 5s, 73; 10th and 11th streets R. R., 45; 13th and 15th streets, 19; West Philadelphia R. R., 63; City 5s, 86; New Creek Coal, 1½; Big Mt., 3¾; Girard Bank, 49½; Mechanics' Bank, 28; Corn Ex. Bank, 57; Bank of North America, 189; Farmers' and Mechanics' Bank, 120; Bank of Kentucky, 100; Allegheny River Oil, 1; Atlas, 1½; Bruner, ⅝; Big Tank, 1¼; Bull Creek, 1; Cherry Run, 2¼; Corn Pl., 2½; Caldwell, 3⅛; Crescent, ½; Continental, 1; Curtin, 8; Densmore, 1⅜; Dalzell, 4¾; Duncard, 1; Egbert, 2⅜; Excelsior, ⅛; Eldorado, ¾; French Creek, ¾; Howe's Eddy, ⅛; Junction, 4; Jersey Well, 1½; Keystone, 1¾; Maple Shade, 15⅛; Mingo, 2⅞; McClintock, 2½; McElheny, 3¼; McCrea, 1; Noble, 2½; Olmstead, 1⅝; Oil Creek, 4; Organic, ½; Perry, 1½; Royal, 1; St. Nicholas, 2⅜; Story Farm, ⅞; Sunbury, ⅝; Sugar Dale, 2⅝; Tarr Home, 4⅜; Tionesta, ¾; Walnut Bend, 3½. The latest quotations are: City 6s, 91½@92; do., new, 93@94¾; State 5s, 89@90; do., coupon, 90@93; do., 6s, W. L., 101@101½; Phila., Wil. and Balt., 60½; Reading, 46¾@47⅞; do., 6s, 1870, 91@93; do., bonds, 97@97; Camden and Amboy, 127½@128; Penn. R. R., 53½@54; do., 1st mort., 102½@103¼; do., 2d mort., 99@99¼; Little Schuylkill R. R., 31@32½; Morris Canal, 81@87; do., pref., 115@120; do., bonds, 90@96; Wyoming Valley Canal, 59@59½; do., 6s, 90@95; Susquehanna Canal, 8¾@9; do., 6s, 48@50; Sch. Nav., 20@24; do., pref., 26¼@26¾; do., 6s, 1882, 79@79¾; Union Canal bonds, 18@20; Delaware Div. Canal 30@32; do., bonds, 95@95; Elmira and Williamsport, 29@30; do., pref., 46¼@46½; do., 7s, 1873, 91@98; do., Chattle 5s, 65@80; Long Island R. R. 6s, 85@85; Lehigh Coal and Navigation, 59@60; North Pennsylva-

nia, 24@25; do., 6s, 85@85¼; do., 10s, 103@106; Philadelphia and Erie, 19⅞@20½; do., 6s, 92½ @98; Minehill, 56@57; Catawissa, 11½@12; do., pref., 25¼@26; Lehigh Valley, 63½@64¾; do., bonds, 96¾@97; Fifth and Sixth streets, (horse,) 40@45; Second and Third, 74@75; Race and Vine, 7½@8; West Philadelphia, 62@64; Spruce and Pine, 20@22; Green and Coates, 30@ 35; Chestnut and Walnut, 43@44; Arch, 9@11½; Thirteenth and Fifteenth, 18@19; Girard College, 20@26; Tenth and Eleventh, 44½@46; Norristown, 56¼@56½.

Boston.—Boston and New York Air Line 6s, 46; Rutland and Burlington 1st mort., 60; do., 2d mort., 15; Vermont Central 1st mort., 73; Eastern R. R., 6s, 1874, 95; Northern (Ogdensburg) 2d mort., 23; Pittsfield and North Adams R. R., 85; Nashua and Lowell R. R., 113½; South Shore R. R., 6; Maine 6s, 1882, 93¾; Massachusetts 5s, 1894, gold, 97¾; do., 1872, 106; Connecticut 6s, 97¾; Boston 6s, 1874, 100; Portland 6s, 1870, 90½; Chicago 7s, sewerage, 1888, 99¾; Albany 6s, 1872, 99; Boston 5s, 1882, gold, 99⅞; Boston Water Power Co., 39¾; Waverly Co., 3½; Cary Imp. Co., 17½; Brookline Land Co., 2⅝; Union S. S. Co., 118; Belmont Coal, 7; Mammoth Vein Coal, 15⅛; Gilberton Coal, 51; Macomb Lead, 1½; Rocky Mt. Gold, 18½; Pittsfield Iron, 3¾; South Boston Gas, 100¼; Boston Gas, 735; Lowell Gas, 117½; Cambridge Gas, 97¼; Chelsea Gas, 90; Columbian Bank, 113; Market Bank, 99¾; Pawner's Bank, 95¼; National Bank, 99; Tremont Bank, 109; Webster Bank, 106; Traders Bank, 90; Bank of North America, 98; Shoe and Leather Dealers Bank, 122⅜; Eliot Bank, 108; Shawmut Bank, 99¾; Massachusetts Bank, 129; Bank of Redemption, 103; Revere Bank, 117¼; Old Boston Bank, 75; Merchants' Bank, 108¾; Fanuel Hall Bank 116¾; Acton Mining Co., 50c.; Albany and Boston, 22; Boston, 1⅞; Bay State, 14; Copper Falls, 18½; Dana, 1½; Huron, 42; Humboldt, 2½; Hancock, 7½; Manhattan, 2⅜; Madison, 3; North Western, 3¼; New England, 87½c.; Pontiac, 1¾; Star, 3; Superior, 5½; South Side, 2.

Baltimore.— George's Creek, 102½; Atlantic Coal, 1.05; Springfield Mining Co., 1.00; Deep River, 0.10; Gardner Hill, 0.85; Maryland, 0.50; Penn. Oil, 0.85; Laurel Cannel Coal and Oil Co., 4.50; N. W. Va. 2d mort., 94; Franklin Bank, 12¼; Union Bank, 71. The latest quotations are: Balt. and Ohio, 106@107; do., 6s, 1867, 99@100; do., 1875, 101¼@101⅞; do., 1880, 101¼@101⅞; do., 1885, 99¾@100; Northern Central, 43@ 45; do., bonds, 1885, 81@90; N. W. The Cotton Question.

Our readers will have noticed that we have frequently drawn their attention to the subject of cotton. This product of our country is a very large and valuable one, so much so as to have been made almost the entire support of the financial system of the Confederates. It had so long and so completely been supreme in foreign markets, that it was believed to exercise an Imperial influence, and to be so indispensable to the prosperity of the manufacturers of England and France, that it could control the political policy of those countries; and bring it into *rapport* with the rebellion. And if there had been no blockade, or if it had been on so weak a scale as to have permitted the exportation of the article at pleasure, there is little doubt but that the means derived from it would have procrastinated the struggle and led to the equipment of whole fleets of piratical vessels, in the easy ports of willing neutrals. But all this is changed, and the cotton which was to build up the confederacy remains to benefit the Union, and some of us from the first have always so thought and so spoken.

American cotton is the best and cheapest in the world, and costs less to transport it from the fields where it is raised, to the looms where it is woven, than that of Egypt or India, or Brazil. It therefore is about to resume its customary importance and all for our benefit as of yore.

In sevepral previous articles we have considered the probable consequences of this state of things on the financial affairs both of England and our own country, and our opinions have been sustained by those of our most experienced and reflecting men, as by those of British writers who have had the courage to look the future in the face. We have therefore not at all been surprised at the publication of a letter addressed to John Bright, Esq. by a gentleman of Boston, supposed to be Mr. Atkinson, whose speculations on this same subject have attracted deserved attention at home and abroad. With regard to the actual amount of stock in this country, remaining within reach, he says:

"The most reliable estimate which I have been able to obtain comes from an English agent of a Boston cotton house, who landed at Matamoras about six months since, travelled as a neutral through Texas and Western Louisania, down the Red river to New Orleans, and who has obtained information from the interior of Alabama and Mississippi. His estimate was that there were in the South, on the 1st of January, 1865, not less than 2,500,000 bales of baled cotton and a very large quantity of loose cotton, piled up in gin houses and sheds, certainly sufficient to make good any damage upon the baled cotton, and to give an available stock of 2½ million bales of sound cotton."

He also says that he believes "a very considerable crop of cotton has been made in every year, since the war began, in theTrans-Mississippi department;" and upon this estimate he is guiding the cotton mills under his management and control.

Next taking from the London *Economist* its estimate of the quantity on hand in England, the quantity on hand in the South, and then deducting the consumption in the North, with the probable production in this country in 1866, to wit., 800,000 bales, and he comes to the conclusion that there will be left without counting the East India production, as much as 1,500,000 bales, "a supply more than equal to the capacity of all the spindles in Europe." From these premises he infers a decline in the price and a loss to English holders of cotton of $150, to $200,000,000 in the present year. Also a further decline in the price to about 10 cts pr lb., and a crash among the cotton spinners and the holders of their fabrics.

When the news of the assassination of the President reached England, there was a slight rally in the price of about 2 cts pr lb. probably under the idea that our affairs were thereby placed in a critical condition, so much so as to prevent our entry upon a permanent condition of peace. A few days later news however would have convinced the speculators in cotton, as well as those in every other American product, that this country does not owe its greatness to any one man, or any set of men and that its institutions rest on the broad basis of popular support reverenced and maintained by the people themselves. The machinery of our Government is kept in motion by the ever flowing current of a broad and mighty stream, and no drops that fall from it in its course, affect the direction or power of its volume. It is a pyramid not resting on its apex but its base, and these are the monuments which defy time and the elements. So, those operators or manufacturers who have anticipated that the production of cotton was likely to be permanently checked in this country by reason of the rebellion or the consequences of the rebellion have gone astray in their calculations widely, and the year 1866, will see the cotton yield going on with even new force. Northern capital and free labor will be applied in a more intelligent manner than has yet been witnessed under the slave system, and where the experiment has already been made in places protected by our arms, even under the greatest disadvantages, it has been demonstrated that a crop can be made at greater profit than under the old system. We expect to see, aided by the characteristic energy of the North, the South will in a few years resume its importance as a producer of cotton and be superior in the foreign market. With increased production will come increased imports and the comforts of life will be desired and enjoyed by a large class of people who have lived hitherto in comparative indigence. The cotton product of the South has enriched the planters while the poor whites have been left in ignorance and poverty, but under the new system, their labor will not only become honorable but competative and profitable.

It will not take many years to alter the whole arrangements of Southern society and to place it on a better footing than ever. And in that light cotton which hitherto has been the badge of slavery and the symbol of oppression, will be the honorable product of free labor, and a boon to the world instead of a sorrow.

☞ A correspondent informs us that Mr. Nathan Smart, has taken the contract for the St. Stephen's Branch Railroad, and that he will commence operations in the course of ten days. The contract is based on the survey of Mr. Buck.

Journal of Railroad Law.

NEGLIGENCE.—PLAINTIFF HELD TO OBSERVANCE OF ORDINARY CARE.—ONUS OF PROVING NEGLIGENCE.—REASONABLE CARE DEFINED.—COURT NOT BOUND TO CHARGES AS REQUESTED BY PARTY ON FACTS ASSUMED TO BE TRUE, WHEN THEY ARE DISPUTED.

The recent case of McTighe against the Pennsylvania Railroad Company, on error to the Court of Common Pleas of Allegheny County, Pennsylvania, was an action brought to recover damages for an injury done to plaintiff's person by the negligence of the defendants in permitting freight cars to stand upon the public street.

The material facts of the case were these: On the day the plaintiff was injured, three or more of defendants' freight cars were permitted to stand on the defendants' track on the north side of Liberty street, in the city of Pittsburg, Pennsylvania, from a point near Wayne street, along in front of warehouses occupied respectively by Messrs. Heyl, McCargo, Galway, and others. This track runs parallel with and twenty feet distant from the curb in front of these houses. From the inner rail to the middle of the gutter the distance is seventeen and a half feet, and from there to the curb it is two and a half feet, in all twenty feet. The cars were standing there without any motive power attached for sometime before as well as after the plaintiff was injured. One of the witnesses testified that they stood there while he hauled three loads away from one of the houses abovementioned.

The plaintiff backed his dray into McCargo's, at right angles with the pavement, and after loading four or five barrels of whiskey, took his position at the left side of his horse's head, with his left hand on the bridle, his right hand on the end of the left shaft, and his back toward the cars in the street. In this position he started to pull out to the right, down the street. When he had turned about half round, he came in contact with one of the cars, and immediately thereafter was struck on the side by the end of the left shaft, just below the left arm pit, receiving then and there the injury on which the suit was founded. The defendants counsel requested the Court to charge the jury, among others, as follows:

1. That the burden of proof, in this case, is upon the plaintiff to show that he used that degree of care and prudence which was necessary to have prevented a collision with the cars; and that he must show affirmatively that no negligence on his part contributed to produce the injury.

2. That it being uncontroverted in this case that the plaintiff at the time he started his horse and dray from the pavement, was upon their left side, with his right hand on the left shaft, and his left hand holding the bridle, and his back turned towards the cars, and being so placed, he moved backwards until he came to them, and was injured, these acts in law constitute negligence, and the Court is requested so to charge the jury, and by reason thereof the plaintiff cannot recover.

3. That when an obstruction is placed in a public street, not dangerous *per se*, to persons passing along the same, and a person comes against it in the day time and receives injury, he cannot recover against the wrongdoer, without showing affirmatively that he used that amount of care which was required in the peculiar circumstances of the case, to pass by it, and that having used the same he was nevertheless damaged, and such is the law applicable to this case.

The Court below declined to charge as requested, these three propositions of defendants; which was the error assigned here by them, after a verdict and judgment for plaintiff. The opinion of the Supreme Court of that State, was delivered by

THOMPSON, J.—In Beatty *vs.* Gilmore, 4 Harris, 463, the plaintiff in error, who had been defendant below, complained of the Court for charging that the *onus* of showing the exercise of proper diligence and care was not on the plaintiff, but that the want of it lay upon the party averring it. In regard to that this court said, "it was perhaps of little consequence whether in this particular the Court was right or wrong, since the plaintiff's fall into the area was witnessed by many persons who testified to the incidents attending it, and thus enabled the jury to ascertain whether the accident was fairly ascribable to his inexcusable carelessness." Notwithstanding this, the Court however, affirmed the ruling of the Court below under the circumstances of that case.

What was said there is very applicable to the case before us. The accident occurred in the day time, and was seen by witnesses who described all the particulars of it. From these facts a jury would be able to say whether or not the plaintiff was guilty of inexcusable negligence. Nor was this all; the defendant gave all the evidence he could of negligence on the part of the plaintiff, and thus the question was fully raised, and put to the jury under instructions by the Court, that if there was negligence on part of the plaintiff which contributed to the disaster, he could not recover. We need not trouble ourselves, therefore, with the question upon whom the *onus* rested of disproving or proving negligence. I have no doubt there may be cases in which the plaintiff's case would be incomplete without proof of care: such for instance, as where a prescribed mode of doing an act was required out of which the injury sprung, or where a party should leap from a train of cars to avoid a collision, on well grounded apprehension of it; in such, and in many other cases which might be imagined, it would doubtless be necessary to cover the whole ground in chief, necessary to entitle the plaintiff, *prima facie*, to recover. But if a party omit this, where it is not necessary to aver it in the complaint and the other side do not choose to demur, or go to the jury on the want of such an element, but assume the burthen of proof, he could not non-suit the plaintiff for want of it or ask a Court to do more than to submit the question to the jury whether, from all the evidence, the plaintiff himself had been guilty of negligence or not. All this occurred, and was so dispensed in the Court below.

The assignments in error are three in number, and are rather as to what was omitted to be said by the learned judge in answer to certain points, than to what was said in his general charge, and in answer to numerous other points. We will consider the first and third assignments together. In the first the complaint is, that the Court refused to affirm that "it lay upon the plaintiff to show that he used that degree of care and prudence which was necessary to *have prevented a collision with the cars* (of the defendants,) and this he must show affirmatively; and that *no* negligence on his part contributed to produce the injury." As to the last clause of the sentence, we refer to what has been already said as to the *onus* of proving care and diligence. It is manifest that there was no error in refusing to affirm this point, because it asserted an unreasonable standard of care, viz., such as was necessary to *escape injury altogether*. If such had been affirmed to be the rule, the very act of collision would have been proof of negligence, a thing which was to be determined from the whole evidence, under proper instructions as to the duty of the plaintiff to be ordinarily careful and prudent, and the question of negligence under the circumstances on part of the defendants.

The burthen of complaint contained in the third is much the same as that of the first, viz., that the Court refused to charge that the obstruction being "in a public street and not dangerous *per se*, if a person comes against it in day time, and receives injury, he cannot recover against the wrongdoer without showing affirmatively that he used that amount of care which was required under the peculiar circumstances of the case, to pass by it, and having used the same is nevertheless damaged." Ordinary care is all the law requires of any one passing along a street or highway; and that is defined to be "such as a prudent and reasonable man under the circumstances would exercise." (4 Watts, 390.) Undoubtedly ordinary care, under one state of circumstances, might not accurately define the ordinary care necessary in others. It is a relative idea. What is ordinary care in circumstances of difficulty and danger, is a more active and acute attention to the means of safety than where no dangers are reasonably to be apprehended; so that wherever the rule, as in this case of ordinary care is administered, it has reference to the situation of the party, and the object occasioning the injury. This is always so understood by the jury. But it would be going a long way beyond this to require the plaintiff to show that he exercised that degree of care which was necessary to *pass by* the obstruction in this case. When an impediment is open and notorious, every one is bound to exercise just so much care and circumspection as upon a reasonable calculation of the chances will safely carry him by it, and if injured by something unforeseen, and not within such reasonable calculation, he is entitled to be compensated if his injury results from the negligence of others. The rule asserted would require an infinitely higher degree of vigilance than this, and the Court properly refused to assent to it.

It must not be understood that because one party may be negligent, others may be negligent also, and throw all the blame and consequences upon him. When a highway is obstructed, the passer along it is bound to the observance of ordinary care, that is, such care as a reasonably prudent man would exercise to preserve himself and property from injury; just the same degree, but heightened in intensity, as would be observed in ordinary circumstances.

The second assignment of error requires but little notice; it assumes facts which were controverted. We have often held that in such circumstances a party, in order to obtain instructions on a given hypothesis, must state the facts

hypothetically. That was not done here, and it was not error, therefore, to refuse to charge as requested.

I confess I can hardly see how a jury, carefully considering all the facts, should have come to the conclusion they did in this case; but as the law was properly administered on the trial, we have no power over the finding of the jury, and must affirm the judgment.

Judgment affirmed.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of April, compared with the same period last year, were as follows, viz:

	1865.	1864.
Freight	$429,001 42	$376,423 40
Passengers	277,081 32	188,398 32
Express matter	13,071 00	5,200 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	4,045 29	3,035 95
Total	$738,107 36	$588,066 00
Increase		$150,041 36

Earnings from Jan. 1, to April 30:

1865	$3,005,646 27
1864	1,947,266 51
Increase	1,058,379 76

The earnings of the Chicago and Alton Railroad for the month of April, 1865 $263,148 00
Corresponding month of previous year 162,723 00

Increase $100,425 00

The earnings of the Toledo and Wabash Railroad for the month of April, 1865 $144,001 00
Corresponding month of 1864 123,987 00

Increase $20,014 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of April, 1865, were $106,689 00
Corresponding month of previous year 140,418 00

Decrease $33,729 09

The earnings of the St. Louis, Alton and Terre Haute Railroad for April, 1865, were $169.299 00
Corresponding month of previous year 157,785 00

Increase $11,514 00

The earnings of the Chicago and Northwestern Railway for April, were:

	1864.	1865.
Passengers	$142,633 81	183,116 90
Freight	264,785 83	273,285 71
Express	4,228 40	5,734 66
Mail	5,313 63	5,622 51
Miscellaneous	4,401 37	.....
Total	$421,363 04	467,709 78
Increase (11 per cent)		$46,346 74

From June 1, 1864, to April 30, 1865, (11 months) the earnings were $6,234,479 02; against $4,214,977 30, in the corresponding period of the previous year—an increase of $2,019,501 72, or 47-92 per cent.

The earnings of the Michigan Central Railroad for the month of April, 1865, were $337,240 00
Corresponding month of previous year 338,275 00

Decrease $1,035 00

The earnings of the Erie Railway for April, 1865, were $1,472,119 94
Corresponding month of 1864 1,099,507 57

Increase $372,612 19

Railroad Earnings--Weekly.

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending May 7, were:

	1865.	1864.
Passengers	$2,503 59	$2,479 60
Freight	9,825 46	6,518 02
Express	162 80	104 16
Mail	296 58	296 58
Total	$12,788 43	$9,398 36

Receipts from January 1 to May 7:

1865	$160,119 48
1864	156,355 71
Increase	$3,763 77

The earnings of the Chicago and Northwestern Railway for the 1st week of May, are $115,418 54
Corresponding week of 1864 97,384 72

Increase $18,033 82

The earnings of the Grand Trunk Railway for the week ending May 6, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$40,808 00
Express, freight, mails and sundries	2,976 00
Freight and live stock	84,690 00
Total	$128,474 00
Corresponding week, 1864	108,551 00
Increase	$19,923 00

The earnings of the Michigan Central Railroad for the 1st week in May, 1865, were $74,093 48
Corresponding week of previous year 58,285 00

Decrease $15,808 48

The earnings of the Chicago and Rock Island Railroad for the first week in May, 1865, were $49,629 00
Corresponding week of previous year 37,672 00

Increase $11,957 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of May, 1865, were $79,039 00
Corresponding week of previous year. 64,167 00

Increase $14,872 00

Lake Superior and Mississippi Railroad.

An act to execute the trust created by the act of Congress entitled "An act making a grant of lands to the State of Minnesota to aid in the construction of the railroad from St. Paul to Lake Superior," approved May, 5 1864, and to grant the said lands to the Lake Superior and Mississippi Railroad Company, and to amend and continue certain acts in relation to said railroad company, was approved by the Governor on the 23d of February.

SEC. 1 transfers the land grant, amounting to ten sections per mile to the company. Section 2 provides that when the company shall have completed and equipped ten miles, and for each ten miles thereafter so completed, it shall be entitled to seven sections per mile of swamp lands; and for each completed twenty miles it shall be entitled to ten sections of Congressional lands per mile; with a proviso that the company shall not be entitled to any lands until ten miles of said road are graded and cars running thereon from the head of Lake Superior. Section 3 obliges the company to have twenty miles of their road completed by the 4th of July, 1868, and the whole line by July 4th, 1870. Section 4 requires the company to deposit with the Treasurer of the State twenty thousand dollars on or before the 1st of July next, to be forfeited if it fails to complete the road. Section 5 authorizes the company to make and negotiate its mortgage bonds. Section 6 grants the right to select the swamp lands. Section 7 requires that said company shall transport all cars, freights and passengers delivered to it for such purpose by any connecting company, and shall have the right and privilege of transporting or having transported its cars, freights and passengers over the road of any connecting company, upon the same terms as are provided in the act of Congress granting the lands. Section 8 authorizes the company to construct a telegraph along its road, and to transmit messages for the usual fees. Section 9 authorizes the present board of directors to increase their number to twelve. Any citizen of the United States may hold the office of director, and their meetings may be held in or out of the State.

Opening Communication with the South.

The Post office Department having re-opened the offices in the following places, mails are being dispatched to them: Richmond, Va.; Petersburg, Va.; Wilmington, N. C.; Charleston, S. C.; Savannah, Ga.; and Mobile, Ala. The Mississippi river mail has been re-established, and operations are afoot to organize the mail service throughout the rebel States as rapidly as measures can be devised for the purpose. Southern merchants are buying to a considerable extent in the northern cities. Farmers are resuming their agricultural pursuits in the South, in hopes of raising crops this season. Telegraphic communication has been re-opened from Cairo, Ill., to Nashville, Tenn., after a suspension of nearly a year. Simultaneously the Mobile and Ohio Railroad has been repaired to Moscow, Ky., and trains are running on it again. The work of reconstruction will doubtless soon be completed on this great railway through Kentucky and Tennessee to Corinth, Mississippi.

Long Island Railroad.

On the new branch of the Long Island Railroad, leading from Mineola to Glen Head, about two miles from Glen Cove, a station has been experimentally established between Roslyn and Glen Head, at the entrance of Robert Seaman's lane. Here the trains will stop both in going to New York and in returning.

☞ The transfer books of the Cleveland and Pittsburg Railroad Company will close on the 20th inst., and reopen on the 1st day of June next at the American National Bank, at which place they will thereafter be kept.

☞ An effort is being made to consolidate the Cumberland Valley and Franklin Railroad Companies. A meeting of the stockholders of the first named company will be held in Chambersburg on Wednesday, the 31st inst., to consider the matter.

☞ The entire length of the railroad between Vera Cruz and Mexico will be 315 miles, the highest summit level 8,300 feet above the sea, being double the height of any other railroad in the world; it will have an incline of 23 miles and a grade of 212 feet per mile, on which the curves have a radius of 500 feet. There is one bridge to built 290 feet high, besides several tunnels, &c.

☞ An arrangement has been invented in Philadelphia to prevent horse cars running over anybody. The inventor attached it to a car, and then laid down on the track, and was thrust aside without injury.

☞ The James River and Kanawha Canal has been opened to Columbia, Va.

Buffalo and Washington Railroad.

AN ACT for the consolidation of the Buffalo and Allegany Valley Railroad Company with the Buffalo and Washington Railway Company.—Passed April 14, 1865; three-fifths being present.

The People of the State of New York, represented in Senate and Assembly do enact as follows:

SEC. 1. The Buffalo and Allegany Valley railroad company, by a vote of its directors, may consolidate with the Buffalo and Washington railroad company, by and with the consent of the directors of said last named company; and the name of the said consolidated company shall be "The Buffalo and Washington Railway Company."

SEC. 2. No suit at law or proceeding now pending, in behalf of or against the said Buffalo and Allegany Valley railroad company, shall be abated or in any manner affected by said consolidation.

SEC. 3. All debts, claims, contracts and rights of action existing against or with or belonging to either of said corporations at the time of their consolidation under this act shall be and become a debt, claim, contract and right of action against, with and belonging to the said consolidated company, and said corporation and all its rights, franchises and property, shall be subject to and be liable for the payment and fulfillment thereof, and the holders thereof shall be entitled to have, collect and enforce the same in the same manner and to the same extent and effect as if said debt, claim, contract, or right of action had been incurred or created by or with said consolidated company; and all actions and proceedings thereon or therefor may be brought and maintained against or by said consolidated company in its corporate name.

SEC. 4. This act shall take effect immediately.

☞ A dispatch from Newbern, N. C., says that the Wilmington and Weldon Railroad is now in operation. Trains are running daily on the road. Trains are also running through from Morehead City to Raleigh, Salisbury, Charlotte, Danville and Richmond. Mails will now go through to these points; also telegraphic dispatches. Gen. Schofield has extended the use of the railroads in this State to refugees, rebel soldiers and citizens of North Carolina who desire to return to their homes, which privilege they gladly accept. Union meetings are being held all over the State.

La Crosse and Milwaukee Railroad.

Gov. LEWIS has appointed STODDARD JUDD, Esq., as Receiver of the La Crosse and Milwaukee Railroad Company, under an act of 1864, providing that if the receiver, manager or superintendent of the road did not pay over twelve per cent of the gross earnings of the road as a sinking fund for the redemption of the farm mortgages, the Governor was to appoint a Receiver. Of course the legality of the act will be tested.—*Milwaukee Wis.*

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.
PAID IN CAPITAL.....$1,000,000.
DESIGNATED DEPOSITORY of the UNITED STATES
AND AUTHORIZED AGENT OF THE TREASURY.
No. 5 NASSAU ST., Feb. 17, 1865.
This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates with a paid-up Capital of $500,000, and has been in successful operation since that period.
Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, together with a portion of their correspondents, being persons of well-known standing and large pecuniary means, have become the owners of most of its Capital Stock, and assume its control and management, Mr. C. V. CULVER retaining all his interest, and accepting the Vice-Presidency.
The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.
The Bank is now prepared to open accounts with depositors.
Collections made through all parts of the country on the most favorable terms.
The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.
C. N. JORDAN, Cashier. 3m-8

CHICAGO AND NORTHWESTERN RAILWAY CO., April 27, 1865.

New York, Saturday, May 27, 1865.

Liabilities of Railways as Carriers of Passengers.

The proposition that a railroad company is bound to carry every passenger who presents himself, is perhaps somewhat too large. Although there are some cases which go to the length of affirming this proposition, it must be taken with exceptions. There may be reasonable objections to the proposed passenger. He must be in a fit state of sobriety, health, and conduct, so as not to be obnoxious to other passengers. But although the company is not bound to carry a person who is deseased to an extent to be dangerous, or who is drunk or insane, or persons of notoriously bad repute or character, they cannot expel him, after having received his fare and admitted him as a passenger, unless he is guilty during the journey of some flagrant impropriety of conduct. (Compton *vs.* Braithwaite, 8 Jur., 875, Pendergast *vs.* Compton 8 C. and P. 45.) In like manner, if the passenger was a pickpocket, or belonged to the swell mob, he could not be expelled so long as he was not guilty of any impropriety after the journey commenced, but a passenger is bound to submit to all reasonable regulations, which are adopted for the convenience, comfort and safety of the passengers. And as passengers are bound to obey the orders and regulations of the company, unless they are oppressive or grossly unreasonable, whoever goes on board a train, under ordinary circumstance, impliedly contracts to obey such regulations, and may justly be refused a passage, if he wilfully resists or violates them. (Story on Bailments § 591.)

The refusal may be upon the ground of inability to carry.

But Chief Justice Redfield remarks that it must be an extreme case, to justify an absolute refusal to carry a passenger, since it could scarcely be supposed ever to occur that a railway, in any sense properly equipped, for the purpose of carrying passengers and freight, should not be able to meet all emergencies in some way.

But it said in an English case, where the company had issued an excursion ticket, stipulating to run trains in a given mode, that they could not excuse themselves by showing the carriages were all filled. The learned judge said, "They should have made it a condition of their contract that they would not carry unless there was room." (8 Eng. L. and Eq. R. 362.

CARRIAGES AND STATIONS MUST BE SAFE.

Railway companies, in addition to warranting their carriages being in a safe and fit condition for the journey, are also liable for the consequence of permitting the road-bed or rails and ties to be in an unsafe condition for the purpose of travel, thus where a tie was broken, or a rail split, or a bridge broke down and a passenger was injured, the judge will leave it to the jury to say whether the tie or rail or bridge had been laid or constructed and maintained with sufficient skill and care, and of reasonable proper strength and good timber, having regard to the purposes for which it was made.

They must also manage and light their several stations and depots with proper care, and are liable if any accident happen to a passenger from neglect of this duty. But in order to make them liable, it must be shown that they have left their premises in such a state as to be likely to endanger the safety of others. (Martin *vs.* Great Northern R. R. Co., and see 27 Law of C. P., 39.)

GOVERNMENT OF STATIONS.

The company has full power to regulate the government of their stations and grounds, and may exclude therefrom persons who persist in violating the regulations prescribed for their conduct, and thereby annoy passengers or interrupt the officers and servants of the company in the discharge of their duties. Thus, where the entrance of hotel runners into a railway station, to solicit the patronage of passengers, produces such an effect, they may be excluded from coming within the station; and if, after notice of a regulation to that effect, they attempt to violate it, and after notice to leave, refuse to do so, they may be forcibly expelled by the servants of the company, using no unnecessary force. But a superintendent cannot remove a person from the station and grounds of the company, merely because such person, in the judgment of the superintendent, and without proof of the fact, violated the regulations of the company or conducted himself offensively towards the superintendent. (Hall *vs.* Power 12 Met., 482.)

In The Commonwealth *vs.* Power 7 Met., 596, Justice Shaw says: "the opening of depots and platforms for the sale of tickets, for the assembling of persons going to take passage, or landing from the cars, amounts, in law, to a license to all persons *prima facie*, to enter the depot, and that such entry is not a trespass; but it is a license conditional, subject to reasonable and useful regulations, and, on non-compliance with such regulations, the license is revocable, and may be revoked either as to an individual or as to a class of individuals, by actual or constructive notice to that effect."

In the former case, it was said that if a person is removed for an alleged violation of the regulations of the company, and it is finally shown that he did not in fact violate any of such regulations, he may recover damages of the person removing him, or by whose order he was removed, notwithstanding such person acted in good faith. And in such case, it is not competent to show that the plaintiff had been guilty of former violations of other regulations of the company.

LIABILITY FOR DELAYS IN STARTING OR ARRIVAL OF TRAINS.

It is a well known rule that a common carrier is liable for any delay in the transportation of merchandise; and by analogy, it would seem that railways should be liable for not delivering pas-

engers within the stipulated time. Where time tables and advertisements are issued by companies stating that a train will start at a particular time, they thereby place themselves under a contract to start such train, and carry all persons who present themselves as passengers; and if they omit to run the train, and a person who intended to be a passenger thereby proceeds to the station for that purpose, and tenders his fare, and incurs inconvenience or other extra expense in getting to his destination, they are responsible to him for a breach of their contract. And if such time tables or advertisements be issued and continued by the company, knowing that the train will not start, this is a false representation on their part, for which they are liable to the party deceived. (Denton *vs.* Great Northern Railroad Company, 5 E. & B., 86.) And where a railway train was hired for an excursion by a society, and the tickets were sold and distributed by the society's secretary, from whom the plaintiff purchased his, it was held that these facts constituted the plaintiff a passenger. (5 Exch., 789.)

In the case of Hamlin *vs.* Great Northern Railway, 88 Eng. L. & Eq., 335, the plaintiff took passage in a train, which was advertised to go through the same night to the point of his destination, by connecting with the trains of another company. It proved on arriving at the point of connection that the other train had left. The plaintiff was compelled to stay over night, and proceeded the next morning, having to purchase a new ticket for the remainder of the route, and did not arrive till one o'clock the next day. When he took defendants' train, he paid for and took a ticket through, and by the time tables advertised in defendants' office, he should have arrived at his destination 9.30, P. M., having taken the train at 2 P. M.

The plaintiff might have accomplished his journey that night, by taking a special conveyance and hiring a boat to cross the Humber, but he slept at a hotel and proceeded the next morning by the public conveyance, but arrived too late to meet his customers according to appointment, and was obliged to hire conveyances to see some of them elsewhere, and was detained several days waiting for the market day to see others. It was held that he was only entitled to recover his hotel expenses and the railway fare the next day, and was not entitled to recover for any damage whatever in consequence of not reaching his destination, according to defendants' undertaking. This case seems to have taken rather an extreme view of the rule of damages on this subject. The very least the defendants could have expected to pay for the breach of duty should have been, it would seem, the expense of a special conveyance through that night. The rule here adopted seems to be almost equivalent to a denial of all beneficial redress in such cases. For it is scarcely to be supposed, that actions would ever be brought to recover such insignificant damages. It is quite supposable that one might suffer very serious loss in consequence of such a failure to arrive in time, and if an action is maintainable, it should not be made a terror by attaching to it a rule of damages, which will render it as expensive to the plaintiff, as to the defendants, who are solely in fault. It seems also at variance with some former decisions in the English Courts. *Martin*, Baron, who tried the case at *Nisi Prius*, seems to have placed it upon the ground, that the defendants, having no knowledge of plaintiff's business or its necessities, could not fairly be supposed to have undertaken to indemnify him against this loss. But the learned judge conceives the defendants may stand upon the terms of their contract. And if the plaintiff, instead of remaining over night, had gone forward the same night, as he might have done, and as by the contract he was entitled to do, the defendants would have been liable for the additional expenses. This may perhaps, be the more just and practicable rule, in cases where the party had ample time to proceed by express, in season for his appointments. But if, instead of doing so, he delays for the next train, and thereby suffers damage beyond what would have been necessary to defray the expense of going forward according to the contract, we see no reason why the company should not, at all events, bear that portion of the loss, which was necessarily incurred, in consequence of their breach of contract. (*See Redfield on Railways*, 343 *note*.)

We are not aware that railway companies have been, in this country, subjected to many suits of this character, but in England such suits are not uncommon. It is, however, entirely competent for the company to make a special contract by a proper notice that the company will not be responsible for the due arrival of trains. But the rule remains that a passenger is entitled to be carried from the usual place of taking up to the usual place of setting down, and the carrier cannot at any intermediate place, refuse to proceed, the undertaking to carry to the journey's end being absolute. (Dudley *vs.* Smith, 1 Campb., 167.) The company is bound to convey with reasonable expedition, and if its course of business is inconsistent with that, it is no answer to an action against it for damages arising from delay, that it carried at the ordinary rate in which it conducted its business. (Blakemore *vs.* Lancashire and Yorks Railway Company, 1 Fost. & Fin., 76.)

The most important case in this state is Weed *vs.* The Panama Railroad Company, (17 N. Y., 362.) In that case, it was proved that in August, 1854, the plaintiffs, (a husband and wife,) were passengers on a train of cars of the defendant from Obispo to Aspinwall, about thirty miles distant. The train proceeded about seven miles on the route to a place called the Barbacoas Switch where it was detained during a night, and did not reach Aspinwall until the afternoon of the day following. There were about four hundred passengers on the train, who remained in the cars during the night from inability to procure other accommodations. The weather was stormy, and the wife was taken sick in the night and experienced great suffering; and evidence was given tending to prove that in consequence of the detention, her health was greatly and permanently injured. The ground of the defence was that the detention of the train was the wilful act of the conductor, done without the authority or approval of the company.

The Court held that this was no defence.

The Court says: "the obligation of the defendant was to carry the passenger to the place of destination with all reasonable diligence and dispatch, but the conductor stopped the train on the route unreasonably, in known disregard of his duty; the defendants did not send forward as it was their duty to do, providing another conductor if that was necessary, and that was negligence of the defendants. It must be assumed in the absence of any finding or even proof to the contrary, that it was practicable for the defendants to forward the train without injurious delay."

Chicago and Rock Island Railroad.

		375,289 94
Balance unappropriated net earnings.		$680,959 80

Compared with the year 1863–'64, the gross earnings of 1864–'65 show an increase of $1,215,516 02; with an increase in operation expenses of $427,220 26—making the increase in net earnings $788,295 76. The increase in gross expenditures over the preceding year was $541,408 07.

The Company have retired and cancelled $16,500 of their Income Bonds during the year, and have the sum of $55,228 16 in the hands of the Trustee, principally invested in United States securities, which will be more than sufficient to retire those now outstanding.

Referring to the previous report, it will be seen that this Company made a contract with the Mississippi and Missouri Railroad Company, agreeing to advance to that Company the sum of $500,000, and at the date of the last annual report of this Company, the sum of $116,250 has been made on

that account, leaving the sum of $383,750 to be paid during this fiscal year, which has been paid, and the advance, as agreed upon, now stands at $500,000.

The Directors having provided sufficient land, and new equipment to meet the increased traffic, and paid for the same out of the earnings of the Road, and the Road and its equipment being in thorough repair, have deemed it due to their Stockholders to increase the semi-annual dividends, and accordingly declared a semi-annual dividend of 5 per cent., free of United States Government Tax (amounting to $315,789 47,) payable 10th April, 1865.

There has been expended upon the road, properly chargeable to construction, $82,552 34; of this amount, $14,362 06 is included in the items of repairs; the balance, $68,190 28, is charged to extraordinary repairs. In addition to the above there have been 1,333 feet of pile and trestle rebuilt at a cost of $7,289 26.

The new materials placed in the track during the year have been: 45,610 new ties; 500 tons new rails, purchased the previous year; 3,066 tons re-rolled rails; 75,000 lbs. spike at 8c.; 248,996 lbs. fish plates, at 8.18c.; 65,740 lbs. bolts for do., at 11.58c.; 5,936 lbs. cast chairs at 6.50c.; and 7,201 wrought chairs, at 8.97c. The value of the above materials is stated at $230,146 44. There have been laid with re-rolled rails 32.8 miles; with new rails, 5.3 miles, and 1.2 mile new side track—in all 39.3 miles. There have been 15,101 rails repaired in the company's shops, at a cost of $14,530 61. Average cost per rail, 96.22 cents.

The company have 59 engines, which are generally in good repair. Two of this number are in service of Illinois River Railroad Company. Five have been changed to coal burners, rebuilt with new copper fire boxes.

The number of miles run by locomotives with passenger trains was 347,586; with freight trains, 783,056; with wood and gravel trains, 82,012—total, 1,212,654. The average cost per mile for each locomotive, including repairs, fuel, engineers and firemen, oil, waste and tallow, is 33.11 cents, against 21.15 cents the preceding year, an increase of 11.96 cents.

The entire cost per mile of operating the road, including new work, lands, new equipments, construction repairs and taxes, is $8,979 36.

Gross earning per mile of road	$14,734 17
Net " " "	8,312 06

The proportion of expenses to earnings, including new work, lands, new equipments, etc., is 60 94 per cent. Less new works, etc., 43.58 per cent.

The whole amount of freight transported over the road during the year was 945,113,938 lbs., an increase over last year of 60,085,248 lbs. The number of loaded cars was 56,723: going west, 24,015; going east, 32,708. Tons carried one mile, 63,413,831. Average earnings per ton per mile, 3.50 cents.

The number of passengers carried over the road was 463,866, of which 461,166 were 1st class, 1,378 2d class, and 1,322 emigrant. Number of through passengers, 70,234; way do., 393,632. Number going east, 236,012; do., west, 227,854. Number carried one mile, 29,888,967. Number of soldiers, included in the above, 52,749; of these, 32,345 went east, and 20,404 west. Average rate per mile per passenger, 3.41 cents; do., not including soldiers, 4.12 cents. Rate per mile for soldiers, 2.03 cents.

The number of pounds transported over the Mississippi Bridge for the year was 300,002,716—going west, 137,687,631; east, 162,315,085. Number of loaded cars passing east, 9,913; west, 10,109—total, 20,022. Foot passengers going east, 58,371; west, 57,384—total, 115,755. Number of boats passing the draw going north, 162; south, 167; barges, going north, 125; south, 110. Total number of rafts, 296.

President.—CHARLES W. DURANT.

Vice President.—JOHN F. TRACY.

Directors.—T. C. Durant, F. H. Tows, D. Dows, C. W. Durant, E. W. Dunham, I. C. Sturges, Geo. T. M. Davis, H. Kennedy, C. Durant, New York; B. P. Learned, Albany; John F. Tracy, Chicago; R. A. Forsyth, Newburgh; E. Cook, Davenport, Iowa.

Treasurer.—E. W. DUNHAM.

Secretary.—FRANCIS H. TOWS.

Superintendent.—W. L. ST. JOHN.

Waverly Land Co.

The annual meeting of the stockholders of this company was held in Boston on the 1st inst. The report of the Treasurer shows a balance of cash on hand, May 1, 1865, $1,027 85. The following officers of the company were elected for the ensuing year:—Directors, F. F. Raymond, Jacob Hittinger, R. E. Demmon, Gustavus Farley, W. A. Saunders, W. C. Durant, D. L. Demmon; Clerk and Treasurer, D. L. Demmon.

Oswego and Rome Railroad.

We learn from the Oswego *Paladium*, that "this road will be pushed rapidly forward to completion. A contract will be at once entered into for the iron, which can be procured now at a reduction of from $30 to $40 per ton below the price of material last season. The amount saved to the Company by waiting for a decline in this article, is, in the aggregate, about $150,000—a result that attests the wisdom of the directors in submitting to the delay. The work of grading, constructing bridges, culverts, &c., is all done, and the ties purchased and delivered at convenient points for laying. The iron will be forwarded by the more expeditious conveyance of steamer to Albany, and rail to Richland Station. With everything in readiness, the rails can be laid, at the rate of three-fourths of a mile per day."

☞ The N. O. True *Delta* says that the New Orleans and Jackson Railroad will soon be opened to the public. Capt. E. A. Morse is rapidly repairing the destroyed bridges at Manchac, the South Pass Bridge, 1,200 feet long, being already completed; and the one at the North Pass, 600 feet in length, will be finished in a few days. There are also about two miles of trestle work to be constructed, but after this is completed there will be nothing to do but repair the track on solid ground, which will be very rapidly done. We may expect within a week or ten days to hear that the road is in running order at least to Jackson.

Railroad Earnings--Monthly.

The earnings of the Cleveland and Toledo Road for the month of April, 1865, were	$179,162 00
Corresponding month of previous year	156,027 00
Increase	$23,135 00

Interest and Dividends.

The Vermont and Canada Railroad Company have declared a dividend of 4 per cent. payable, less the government tax, on the 2d of June, at St Albans, Vt., and 38 Court street, Boston.

☞ The route of the proposed New York, Northern and White Plains Railroad, as laid out through Greenfield, N. Y., and Ridgefield, Brookfield and Danbury in Connecticut, has been accepted by the Railroad Commissioners. Work on the road will begin in about a month.

☞ A meeting of the friends of the Western Maryland Railroad was held in the Court Hall on Friday afternoon last. As the war is now over we hope that the people of Hagerstown and the county at large will awake to the importance of having direct railroad communication with Baltimore. It will attract men of capital and enterprise to the place and infuse a new spirit into the people and give an impetus to business which will be felt throughout every class of community.—*Hagerstown Herald.*

☞ The Legislature of Illinois, at its late session, passed an act incorporating the St. Louis, Vandalia and Terre Haute Railroad Company, and lately a meeting of the corporators was held at Vandalia, at which the whole line was represented and the initiatory steps for organization and the commencement of the work were taken. The public will bear in mind that this road is laid out on the line of the great Cumberland road, and passes through a district of country which is unsurpassed in agricultural wealth.

☞ The Turkish Government contemplates building a gigantic railway—one which is to traverse the whole of European Turkey from the Adriatic to the Black Sea, and by a branch to the Archipelago. Aviona is the starting point, Adrianople the centre, and Varna and Enos the extreme points.

Railroads of the State of New York.

Wm. B. Taylor, State Engineer and Surveyor, submitted to the Legislature, March 24, 1865, the Annual Report on Railroads of the State of New York, as prepared by S. H. Sweet, late Deputy State Engineer and Surveyor, for the fiscal year, ending Sept. 30, 1864, from which the following is taken:

The number of companies that filed their report as required by law for the year 1864	116
The number of companies organized under the General Railroad Act, which are exempt from making annual reports to this department	9
The number of roads in operation, that are required by law to make annual reports to this department	59
The number of roads in operation using horse-power, that are required by law to make annual reports	20
The number of companies organized during the year	43

ABSTRACT OF THE REPORTS OF THE RAILROAD CORPORATIONS, FOR THE YEAR ENDING SEPT. 30, 1864.

STOCK AND DEBT.

Roads Operated by Steam.

Amount of capital stock by charter and acts of the Legislature	$78,600,900 00
Amount of capital stock subscribed for	93,799,407 76
Amount of capital stock paid in by last report	79,586,535 84
Amount of capital stock now paid in	92,967,484 83
Amount of funded debt as by last report	65,715,775 19
Amount now of funded debt	64,640,431 53
Amount of floating debt as by last report	652,076 55
Amount now of floating debt	1,253,852 46
Total amount now of funded and floating debt	65,894,283 99

Roads Operated by Horse-power.

Amount of capital stock by charter and acts	$20,928,000 00
Amount of capital stock subscribed for	12,365,650 00
Amount of capital stock paid in by last report	7,967,023 00
Amount of capital stock now paid in	11,246,785 00
Amount of funded debt as by last report	2,395,850 00
Amount now of funded debt	5,165,000 00
Amount of floating debt as by last report	173,115 54
Amount now of floating debt	397,837 63
Total amount now of funded and floating debt	5,562,837 63

COST OF CONSTRUCTION AND EQUIPMENT.

Total cost of construction and equipment of roads using steam-power	$144,264,165 78
Total cost of construction and equipment of roads using horse-power	16,194,727 29

CHARACTERISTICS.

Roads Operated with Steam.

Length of roads in miles	2,821 18
Length of roads laid	2,511 28
Length of double track, including sidings	1,131 26
Length of branches laid	494 68
Length of double track on same	21 43
Length of equivalent single track	4,158 65

Roads Operated with Horse-power.

Length of roads in miles	307 84
Length of roads laid	161 13
Length of double track, including sidings	108 66
Length of branches laid	2.16
Length of double track on same	.25

BUSINESS ON THE YEAR.

ROADS OPERATED WITH STEAM.

Passenger Business.

Number of passengers, all classes, carried in cars	14,192,056
Number of miles traveled by passengers, or number of passengers carried one mile	615,925,820
Average rate of speed of ordinary trains, including stops	Miles. 20.86
Average rate of same when in motion	25.48
Average rate of speed of express passenger trains, including stops	25.44
Average rate of same when in motion	29.53
Average weight, in tons, of passenger trains, exclusive of passengers and baggage	80.20

Freight Transportation.

Number of tons carried in freight trains	8,143,562
Total movement of freight, or number of tons carried one mile	1,013,126,964
Average rate of speed of freight trains, including stops	Miles. 11.43
Average weight of same when in motion	14.80
Average weight, in tons, of freight trains, exclusive of freight	147.50

ROADS OPERATED WITH HORSE-POWER.

Number of miles run by passenger cars	14,990,067
Number of passengers, all classes, carried in cars	83,510,850
Maintenance of way:	
Allotted to passenger transportat'n.	$3,126,352 41
Allotted to freight transportation	5,866,203 32
Other costs not allotted	580,728 76
T'l cost of maintenance of roadw'y.	$9,573,284 49
Roads operated with horse-power.	$68,790 72
Cost of operating:	
Allotted to passenger transportation	$4,075,180 57
Allotted to freight transportation	7,857,896 16
Other costs not allotted	166,866 45
Total cost of operating roads	$12,099,943 18
Roads operated by horse-power	$2,034,882 65

EARNINGS AND PAYMENTS.

EARNINGS.

Roads Operated with Steam:

From passenger business	$13,991,956 67
From freight business	26,348,334 65
From other sources	1,466,813 02
Total earnings	$41,807,104 34

Roads Operated with Horse-power:

From passenger business	$3,909,490 95
From other sources	99,287 68
Total earnings	$4,008,778 63

PAYMENTS OTHER THAN FOR CONSTRUCTION.

Roads Operated with Steam:

For transportation expenses	$29,193,748 82
For interest	4,509,182 58
For dividends on stock	5,687,200 48
Amount carried to surplus fund	1,021,510 86
Total payments	$40,411,642 74

Roads Operated with Horse-power:

For transportation expenses	$3,478,379 64
For interest	204,498 83
For dividends on stock	386,288 49
For payments to surplus fund	48,385 19
Total payments	$4,117,592 15

ACCIDENTS.

Roads Operated with Steam.

Number of passengers killed	90
Number of passengers injured	117
Number of employes killed	78
Number of employes injured	31
Number of others killed	117
Number of other injured	33
Total number killed	285
Total number injured	181

Roads Operated with Horse-power.

Number of passengers killed	8
Number of passengers injured	33
Number of employes killed	3
Number of employes injured	2
Number of others killed	11
Number of others injured	25
Total number killed	22
Total number injured	60

DEDUCTIONS FROM THE FOREGOING RESULTS.

If we exclude the city roads, we have as follows:

Average number of miles traveled by each passenger.....	43.39
Av. number of passengers in each train	85.80
Average number of miles each ton of freight was transported.....	124,41
Av. number of tons in each freight train	88,12
Aggregate movement of passenger trains is equivalent to passage over the road.....	2,867 times.
Aggregate movement of freight trains is equivalent to passage over the road.....	4,568 times.
Average number of trains passing daily over the road, about	20½
Average cost, per mile of road, for maintaining roadway.....	$3,812 12
Average cost, per mile of road, for repairs of machinery	2,459 73
Average cost, per mile of road, for operating road	4,818 23
Average cost, per mile of single track, for maintaining roadway	2,302 02
Average cost, per mile of single track, for repairs of machinery	1,485 55
Average cost, per mile of single track, for operating road.....	2,909 59
Average sum received for carrying one passenger one mile	2.27 cents.
Average sum received for transporting one ton of freight one mile....	2.60 cents.
Average number of miles travel for each passenger killed	6,843,620
Average number of miles of travel for each passenger either killed or injured.....	2,975,487
Average number of passengers carried for each one killed.	157,689

Average expense is 69.83 pr. ct. of all the earnings.

COST OF TRANSPORTATION, AND EXPENSES ON GROSS EARNINGS.

Deductions from the report of several of the principal companies, showing 1st. Average sum received per ton per mile on freight; 2d. Average cost per ton per mile for transporting freight; 3d. Per centage of transportation expenses to gross earnings.

Name of Road.	Average per ton per mile. Received for transporting. Cents.	Cost of transporting. Cents.	Per cent. of transportation expenses on gross earnings.

The following table shows the date when the several railroads of this State were opened for public travel:

	Miles op'd each year.
In 1831. The Mohawk and Hudson, 17 miles.	17
In 1832. The Saratoga and Schenectady, 22 miles, and 1 mile of the New York and Harlem	23
In 1833. 1 mile of the New York & Harlem.	1
In 1834. The Ithica and Owego, 29 miles, and 2 miles of the New York and Harlem	31
In 1835. The Rensselaer & Saratoga, 25 miles	25
In 1836. The Utica and Schenectady, 78 miles	78
In 1837. The Tonawanda, 44 miles; the Lewiston, 3 miles; 15 miles of the Long Island, and 2 miles of the New York & Harlem ..	64
In 1838. The Hudson and Berkshire.....	31
In 1839. The Syracuse and Utica, 53 miles, and 2 miles of the New York & Harlem ..	55
In 1840. None.	
In 1841. 46 miles of the New York and Erie and 5 miles of the Long Island.....	51
In 1842. The Albany and West Stockbridge, 33 miles. The Auburn and Rochester, 78 miles; the Schenectady and Troy, 21 miles; 10 miles of the Long Island, and 6 miles of the New York and Harlem	153
In 1843. The Auburn and Syracuse, 26 miles; the Attica and Buffalo, 31 miles, and 7 miles of the New York and Erie	64
In 1844. 52 miles of the Long Island, and 12 miles of the New York and Harlem	64
In 1845. The Cayuga and Susquehanna, 29 miles; the Buffalo and Niagara Falls, 23 miles; the Troy and Greenbush, 6 miles. and the Skeneateles and Jordan, 5 miles..	62
In 1846. 8 miles of the New York and Erie .	8
In 1847. 25 miles of the New York & Harlem	25
In 1848. The Saratoga and Whitehall, 40 miles; the Oswego and Syracuse, 35 miles; 140 miles of the New York and Erie, and 29 miles of the New York and Harlem....	244
In 1849. The Chemung, 17 miles; 59 miles of the New York and Erie, and 75 miles of the Hudson River.....	151
In 1850. The Northern (Ogdensburg,) 118 miles; the New York and New Haven, 14 miles; 78 miles of the New York and Erie; 18 miles of the Watertown and Rome, and 69 miles of the Hudson River.....	297
In 1851. The Canandaigua and Elmira, 47 miles; 128 miles of the New York and Erie, and 52 miles of the Watertown and Rome.	227
In 1852. The Buffalo and State line, 69 miles; the Troy and Boston, 26 miles; the Plattsburg and Montreal, 23 miles; the Sixth Avenue, 4 miles; 51 miles of the New York and Harlem; 20 miles of the Watertown and Rome; and 44 of the Buffalo, Corning and New York.....	237
In 1853. The Albany Northern, 33 miles; the Troy and Bennington, 5 miles; the Troy Union, 2 miles; the Canandaigua and Niagara Falls, 99 miles; the Buffalo and New York City, 91 miles; the Rochester, Lockport and Niagara Falls, 77 miles; the Sackett's Harbor and Ellisburgh, 18 miles, and 46 miles of the Buffalo, Corning and New York	371
In 1854. The Syracuse and Binghamton, 80 miles; the Flushing, 8 miles; the Brooklyn City, 17 miles; and the Third Avenue, 4 miles	109
In 1855. 26 miles of the Black River and Utica, and 30 miles of the Pottsdam and Watertown	56
In 1856. 9 miles of the Black River & Utica, and 24¼ miles of the Pottsdam and Watertown	33¼
In 1857. 2 miles of the Brooklyn City, and 21 miles of the Pottsdam and Watertown....	23
In 1858. 11 miles of the Buffalo, New York and Erie	11
In 1859. The Genesee Valley, 15½ miles; the Ninth Avenue, 3½, and the Broadway Railroad (Brooklyn,) 4½	23½
In 1860. The Atlantic and Great Western in York, 49 miles; the Staten Island, 13 miles; 4 miles of the Brooklyn Central and Jamaica; 5 miles of the Brooklyn City, and one mile of the Ninth Avenue	72
In 1861. 4 miles of Brooklyn City, and 5 miles of the Warwick Valley	9
In 1862. Coney Island and Brooklyn, 10½ miles; 5 miles of the Brooklyn City and Newtown; 17½ miles of the Rome, Watertown and Ogdensburg, and 5 miles of the Warwick Valley.....	38
In 1863. Albany and Susquehanna, 35 miles; Brooklyn, Bath and Coney Island, 4 miles; Forty-second street and Grand street ferry, 7 miles; Rochester City and Brighton, 6½ miles; Utica City, 2; Van Brunt street and Erie Basin, 1½ miles	56
In 1864. Albany and Susquehanna, 1 mile; Broadway and Seventh Avenue, 8 miles; Brooklyn, Bath and Coney Island, 2½ miles; Central Park, North and East River, 19 miles; Forty-second street and Grand street Ferry, 1 mile; Long Island, 5½ miles; Harlem Bridge, Morrisania and Fordham, 5 miles; Troy and Cohoes, 3½ miles; Utica City, 2 miles.....	47½

☞ The Orange and Alexandria Railroad is being rapidly put in running order. The Bull Run bridge has been completed, and the trains will, it is said, in a very few days run regularly to Warrenton Junction. The Virginia Central Road is also being repaired as rapidly as possible, and in a short time railroad affairs will be in *statu quo ante bellum.*—*Alexandria Journal.*

American Railroad Journal.

Saturday, May 27, 1865.

Stock Exchange and Money Market.

We occasionally observe a real or pretended alarm among some of our financial editors as to the probability of a *stringent* Money Market. All these fears originate in the interest of the Stock Market, and are raised for a purpose. Even Mr. McCulloch is complimented on his careful regard for the market, for his great desire to prevent this stringency, and the promptness with which he disburses the money he receives, in discharge of the public indebtedness. All this is simply ridiculous. Mr. McCulloch is a thoroughly practical and conscientious financier, the first man in fifty years who at the head of the Treasury has really understood the real character of his trust, the real office of money, the real purpose of the Department, and the real duty it imposes upon its head. His able management of the State Bank of Indiana during the crisis of a specie suspension, when other State and local institutions tumbled all about him, was but a type of what he will yet accomplish in his present position. It is not out of regard to the Money Market or the stock operators of this city that he disburses so freely. He does not sympathise with bulls or bears, with longs or shorts, but has an honest desire to pay the creditors of the Government, to liquidate and discharge all outstanding claims, and to get a good balance sheet as soon as possible. Mr. McCulloch has said that until he was Secretary of the Treasury he was never dunned for a bill in his life. And he is not likely to be much longer in a position to be dunned by any one as he is paying off as rapidly as possible every demand on the Treasury. A Secretary always occupies an unpleasant position in one respect, he cannot prevent expenditure. The calls from the navy and war departments for the last year have been enormous. Considerations of economy are often lost sight of there, under the emergencies which are continually pressing upon them, and very often imaginary as the event proves. No matter for that, the requisitions are made, and the Secretary has to find the money, run the gauntlet of public animadversion on his loans, and to feel the responsibility of popular criticism.

There is every appearance of a permanent improvement in Railway securities, and that there is good reason for it, is evident from the increased monthly earnings of the principal roads. Our readers would do well to look at our table of earnings for the last few months. With scarcely an exception the amounts of receipts have largely increased, and now as expenses must decline, as currency appreciates, or in other words as labor and materials are getting cheaper every day, the profits of these companies must now go on increasing rapidly, and place them in a permanently prosperous condition.

We have noticed several heavy charges of late in various publications with regard to combinations in some leading railway stocks, to depress them for example to 46, and then raise them again to upwards of 70. Gross deception and corrupt management are charged upon certain individuals connected with these companies, and if these charges are untrue they should be repelled. Men of wealth who use their vast means to rob the public, are but rogues after all, and though they may meet with an outward show of respect, are really execrated by the people. Persons holding Erie for example, should see they have an honest management, and they need have no further fear about their investment. Nothing but absolute knavery and gross mismanagement can break down such a grand line as that, which with its feeder the Atlantic and Great Western brings the great west by the shortest route to this city.

The stringency in the Money Market so frequently deplored as approaching, is not likely to occur, in fact it is impossible, when our paper currency is still reckoned altogether at 900 millions, when large balances no longer required for military contracts must rest awhile until new employment is found for them, and while the yield of our gold and silver mines is on the increase. So far from this, it is the opinion of many reflecting persons that the rate of interest is likely to fall per-

manently to a low figure, say 3 and 4 per cent., and keep there as it does on the continent. Again we must remember that our banking system is already a most extensive one, and to make money, banks must be active; the power of expansion most of our institutions not only fully understand but eagerly exercise.

The following is an official statement of the number and circulation of the banks now in operation under the National system, and we do not perceive any signs of a stringency here:

States.	Banks.	Total circulation.
Maine	42	$3,091,660
New Hampshire	25	1,497,000
Vermont	17	1,865,700
Massachusetts	176	31,513,730
Rhode Island	21	1,317,950
Connecticut	48	6,848,500
New York	172	19,461,750
New Jersey	25	2,736,720
Pennsylvania	182	25,100,590
Maryland	7	1,427,500
Delaware	3	287,500
District of Columbia	6	748,400
Virginia	2	181,500
West Virginia	4	263,000
Ohio	125	10,545,570
Indiana	60	5,048,430
Illinois	64	5,285,260
Michigan	22	1,201,000
Wisconsin	27	1,017,000
Iowa	32	1,302,400
Minnesota	8	951,250
Kansas	1	49,000
Missouri	7	825,830
Kentucky	8	555,200
Tennessee	4	360,640
Louisiana	1	180,000
Nebraska Territory	1	27,000
Mississippi	1	
Colorado Territory	1	
Total	1,092	
Opened and wound up	3	
Total in active operat'n.	1,089	$123,690,080

When similar institutions are established in the Southern States we shall have a further considerable increase in the circulation. There has been quite a difference of opinion in regard to the recent decision of the Secretary of the Treasury as to the third issue of the 7-30s. It has been said it was not worth while to have suddenly checked the popular current, which had set in so grandly; that the saving of interest resulting from the option was not so much of an object, as the entire and certain relief of the Treasury from the further want of money, and that it was not advisable to incur the risk of disappointment for a possible advantage. Eminent and most loyal financiers, men of the type of T. W. Olcott and others like him, doubted the expediency of the measure. But there are always two sides of a question. Mr. McCulloch is perfectly competent to give reasons for the faith that is in him, and we have not the least doubt as to what would be and what really is the explanation of his late decision. We will even venture to put into his mouth what would most probably be his reply to any one who should ask him for his reasons.

"The worst that can be said in regard to this option is, that it makes the notes equivalent to an 8-23 gold bearing 6 per cent. bond. At the present time when the war is near a satisfactory conclusion, and the credit of the Government is so firmly established, I shall be greatly disappointed if I shall be unable to borrow two hundred millions of dollars on a 6 per cent. gold bearing security. I have really no apprehension with regard to such a security. And as it will require some little time for parties who have loaded themselves with the 7-30s to distribute their surplus, heavy and rapid subscriptions to the new series were not expected. I anticipated the present stagnation which would have occurred no matter on what terms I might have offered the present series. Happily the Treasury is in a condition to wait. I even do not desire that the new series should be rapidly disposed of, I have no immediate use for the money." This is undoubtedly the view Mr. McCulloch would take of the subject, and this his strong position, and should we be correct in our supposition, it will be seen that he is fully justified in the course he has taken. With an overflowing Treasury, everybody paid, and the army soon to be from his abundant means, there was no good reason for rushing two hundred millions more on the public before they had digested their last hasty meal. More than this, these two hundred millions would have been unavoidably left for a long time unused in the National Bank depositaries, and would have gone out as loans on interest on call, or on short dates to swell the profits of these institutions, while the Government would have had to pay interest for funds it could not use. Certainly in this light Mr. McCulloch has shown himself the wiser man and the best manager after all. It is quite a blow to cut off a 7-30 interest, no doubt, from the grasp of the capitalists who like that style of investment, but they have already made enormously out of the public funds, that they must be content with less profits in this direction for the present, or else hold on contentedly for a rise in the premium, which will soon be at hand, or turn their attention to other securities which have been somewhat thrown in the shade by the Nationals. Now that we have come out splendidly from the late contest these are unquestionably to assume hereafter the place of first favorites with all who seek permanent and undisturbed income.

The simplicity and certainty of government loans make them always desirable. When the interest is once agreed on, it is paid. All banks, railways, and other local and private companies and institutions are liable to abuse, mismanagement, defalcation, disorder and losses, no matter what rate of interest or dividends they propose to pay, or for a time may pay. There is an uncertainty ever attending them. Corruption, extravagance, ignorance, want of skill is continually detected in their management, and their history is rarely without the record of sudden disasters, but a Government Stock, when the Government itself is sound, is almost beyond the reach of accident. Most certainly it has always been so with our own, and no one doubts that it will be so again.

Upwards of two millions of specie have been exported the last week. As our imports have for some time been at a low figure, we attribute this export to the single cause of its being for dividends on the securities held abroad, and this shipment will but confirm the confidence of our faithful foreign friends on the continent who were not afraid of us, when the British Press maligned our cause, depreciated our resources, and denied our solvency. When they pocket our shining eagles, they will have palpable evidence that not a feather in their wings has been plucked.

The opening of the Southern ports to trade by proclamation is announced. We do not yet fully appreciate the importance of this measure. It will bring out of the South every surplus pound of cotton, rice, sugar and tobacco, in exchange for the necessaries of life, which we shall send it, and especially agricultural implements, railway equipments and furniture. We also look to a pretty active demand for negro labor based on wages, for the negroes are not coming north, for climatic reasons. And they are now every where warned by their northern friends, by Government agents and officers, and as we see by Chief Justice Chase at one of the great gatherings of these persons, that if they do not work they must starve. We think they will soon understand this generally and act accordingly. Wherever they have done so, as along the Southern coasts where they have been occupying land for their own account they have been doing well and accumulating money. They also are showing an eager disposition to learn to read and write, and after a time they may be qualified to enjoy the elective franchise.

Between the 1st and 19th inst., 52 merchant vessels have cleared from this city for Southern ports, with valuable cargoes, and if the blockade runners could make money with their occasionally successful trips, we do not see why our shippers may not with a legitimate trade.

Foreign exchange has advanced, our exports having been light of late, and our canal receipts not yet being regular. As the crops every where are reported to be unprecedented in character, we shall have freights in abundance before the year is closed.

Money is plentiful. Gold has advanced a trifle, but should it be attempted to put it up again, Mr. McCulloch has only to cancel a few millions of greenbacks, and the operators will be foiled, and they had better take this probability into their calculations. They have no more confederate money to work with, no more disasters to help them, they must be careful or they will be swept by the board.

The exports for the week ending May 28d were $1,953,356 exclusive of specie. The balance in the Sub-Treasury on Tuesday was $47,602,467.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Third National Bank.

The capital of this Bank is now one million of dollars, and by a recent arrangement, Messrs. WINSLOW, LANIER & Co., Messrs. CULVER, PENN & Co., and their friends, have become its proprietors. These houses are well known for their large pecuniary means and financial experience. They have adopted the plan of allowing 4 per cent. on deposits of banks and bankers, rendering accounts monthly. This is a new feature in the system of banks with subscribed capital, and is a desirable one for those who keep accounts as depositors, and do not use all their balances rapidly. This bank is a Government agent, and does a general collecting business.

Langdon Rolling Mill Company.

This company, established close to the city on Spuyten Duyvil Creek, is now prepared to furnish new iron rails for our railways, and re-roll those that are worn. Its proximity to New York must give it great advantages, and is a convenience to dealers in the way of easy transportation by water and rails.

☞ MR. H. J. MESSENGER, advertises that Government and Railway securities are to be had on favorable terms at his Banking House, 139 Broadway. He receives subscriptions to the 7-30s, allows 4 per cent on balances, that may be checked for at sight, and receives accounts generally from individuals and banks. Mr. Messenger is a gentleman well known and highly esteemed.

☞ We would call the attention of our readers to the card of W. R. TRAVERS & Co., Stock and Bond commission brokers, 19 William street, who have associated with them JOHN D. PRINCE, and are prepared to execute all orders with promptness and good judgment.

The American Bell Company.

This company with a capital of $50,000 is engaged in the manufacture of the celebrated steel composition bells, in all varieties and weights and adapted to churches, academies, factories, steamboats, railroad engines and stations, plantations and farms. The rotary clapper is also applied by them to these bells if required, by which fracture is entirely prevented. We have read their pamphlet on the subject, and from its explanations it is evident they are intelligent manufacturers and may defy competition. Their work is superior, the tone brilliant and the price moderate.

☞ ALEXANDER MCALISTER, for many years cashier of the Quinnipiack Bank of New Haven, Conn., has resigned his financial post, and has entered into the manufacturing and Railroad supply business, under the firm of RADLEY, MCALISTER & Co., at 162 Greenwich street, N. Y., having purchased the interest of E. R. Bennet.

☞ The double track on the Camden and Amboy Railroad has been completed from Camden as far as Burlington, and has been in use for some time. The road is graded to White Hill, just below Burlington, and it is thought that before the close of summer, the double track will be completed from Jamesburg to South Amboy. The new road from Jamesburg to Dean's Pond will be finished and in running order by the 1st of August.

East India Railways.

Our readers must have been aware from what we have heretofore published on the subject, that the East India Railway system is one projected and being carried out on a magnificent scale, and is making the East Indies the most valuable of all the British possessions. A work has recently been published by Mr. James Graham of Glasgow, which gives the best and most intelligible account of these railways, of any within our knowledge. The following is a synopsis of the entire system taken from his work. It is now twenty years since the first East India Railways were proposed, but only fourteen years since their construction was undertaken. The East India and Great Indian Peninsula was projected in 1845, and commenced in 1850 on the latter line between Bombay and Callian. In 1851 the Engineers of the Raneegunge Branch of the former broke ground. The works proceeded slowly until 1858, and the reason for this was the impediments occasioned by Government supervision at home and in India over the lines in which it had given a guarantee, the natural difficulties of construction, the Sepoy mutiny and other causes. After 1858 the works proceeded more rapidly, and in 1864 there were 2,867¾ miles open to traffic, against 436 in 1859.

The Government of India gave its support to two descriptions of lines, trunks and feeders, and this consisted of a qualified guarantee of interest upon capital and a direct annual subsidy, both for a certain term of years. The companies enjoying the guarantee are the East Indian, Great Indian, Madras, Bombay, Baroda and Central India, Scinde, Punjaub, Delhi, Eastern Bengal, Great Southern of India, Calcutta, South Eastern and the Indus flotilla. These are all trunk lines. The companies subsidized are the Indian Branch and the East Indian tramway, both of which supply feeders to the main lines.

The principle on which the Government guarantee is granted, for 99 years from date of the contract is rather involved, but is based on the amount of profit at which a line is worked. If the net profits do not exceed the amount of guaranteed interest, the Government pays the latter, debiting the company with the sum less the amount of net profits handed over, this balance being expected to be recovered from the company out of future profits.

If the line earns more than the guaranteed interest, then the surplus is divided between the Government and the company, and the balance goes to the credit of the company for future emergencies.

When the whole amount of the paid guaranteed interest is liquidated by the company, then the whole amount of future profits go to the company, and these are not intended ever to go beyond 10 per cent. and may be so restricted. If the company works its line at a loss, the Government deducts the net loss from the amount required to pay the guaranteed rate, and the shareholders receive proportionably less dividend. If a company gets tired of its contract, on six months' notice it may surrender its line to the Government if in good working order, which will repay all authorized sums expended subject to deduction of unsatisfied claims against revenue, which will of course include any outstanding balance of dividends paid in advance and simple interest thereon.

On the other hand, the Government may at any time within six months after 25 years from the date of the contract, or within six months after 50 years from the same time become owners of the line. The price in either case will be the mean value of the stock or shares for three years, previous to the 25 or 50 years as the case may be.

The Government also reserves the right in case of the failure of the guaranteed railway to raise the amount of authorized capital, to terminate the interest of the company refunding the capital left, after deducting for outstanding debts and liabilities.

At the expiration of 99 years from the date of each contract, if the line is neither bought by the Government or relinquished by the company, the line reverts to the former, but the rolling stock is paid for at a valuation.

If the Government becomes a purchaser instead of paying the gross price, it may pay by annuity running to the end of the 99 years.

These East India Railways are free from parliamentary expenses, get their right of way cheap, and are facilitated by banking facilities, but on the other hand are subject to the disadvantage of having home supervision, subjected to the cost of the sea transportation of materials from Europe, and the heavy expense of working with European employees in a hot climate. They have generally been constructed within the estimates. The traffic is increasing, but to prove entirely remunerative enough to reimburse the guarantees, double tracks will generally be required at the cost of from 10 to 15,000 dollars per mile.

On the lesser and lighter lines an annual subsidy has latterly been granted, equal to about 2½ per cent., for 20 years.

Some parts of this financial system might possibly be well adopted in our new States which will require assistance in the construction of future lines.

Railroad Earnings.--Weekly.

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending May 14, were:

	1865.	1864.
Passengers	$2,418 23	$2,244 75
Freight	8,107 28	7,106 55
Express	162 80	104 16
Mail	296 58	296 58
Total	$10,984 89	$9,752 04

Receipts from January 1 to May 14:

1865	$171,104 87
1864	166,107 75
Increase	$4,996 62

The earnings of the Chicago and Northwestern Railway for the 2d week of May, are $125,934 81
Corresponding week of 1864 94,600 50

Increase $31,334 31

The earnings of the Grand Trunk Railway for the week ending May 13, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$87,870 00
Express, freight, mails and sundries	4,086 00
Freight and live stock	85,527 00
Total	$127,483 00
Corresponding week, 1864	104,652 00
Increase	$22,781 00

The earnings of the Michigan Central Railroad for the 2d week in May, 1865, were $84,702 22
Corresponding week of previous year 63,016 07

Decrease $21,686 15

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of May, 1865, were $76,308 00
Corresponding week of previous year. 57,832 00

Increase $18,476 00

The earnings of the Chicago and Rock Island Railroad for the second week in May, 1865, were $49,987 00
Corresponding week of previous year 38,835 00

Increase $11,152 00

The earnings of the Toledo and Wabash Railroad Company for the first half of May, 1865, were $66,676 00
Corresponding week of previous year. 50,954 00

Increase $15,722 00

Financial Condition of the State of Missouri.

It is well understood that previous to the war the State of Missouri had before it a brilliant future with a single exception of the great drawback—slavery. This kept the character of labor down, when free and intelligent labor was so necessary to develope its agricultural, mineral and commercial resources. The City of St. Louis most eligibly situated and commanding the river trade of the vast interior bade fair to become one of the very largest cities in the Union, for it concentrated enterprise, capital and *opportunity*. On the outbreak of the rebellion Missouri was so fully appreciated as an important State, and the key of the great West, that the most desperate efforts were made to drag it into the Confederacy and hold it there. It has therefore until quite lately been the scene of much bloodshed and violence, and the finances and business of the State have been thrown into complete disorder and confusion. The payment of interest on the public debt has therefore been suspended ever since 1861, and it has now become the duty of her people to repair their financial misfortunes, and upon this they have vigorously entered. A new constitution has been passed which contains the most stringent clauses in relation to the State debt, and it will doubtless be adopted. We deem the following provisions of this new constitution of such importance as to be put on record:

Sec. 13. The credit of the State shall not be given or loaned in aid of any person, association or corporation; nor shall the State hereafter become a stockholder in any corporation or association, except for the purpose of securing loans heretofore extended to certain railroad corporations by the State.

Sec. 15. The General Assembly shall have no power, for any purpose whatever, to release the lien held by the State upon any railroad.

Sec. 16. No property, real or personal, shall be exempt from taxation, except such as may be exclusively for public schools, and such as may belong to the United States, to this State, to counties, or to municipal corporations within this State.

At the convention assembled to frame this constitution, ordinances were passed in relation to railroads, in the following words:

Sec. 1. There shall be levied and collected from the Pacific Railroad, the North Missouri Railroad Company, and the St. Louis and Iron Mountain Railroad Company, an annual tax of 10 per centum of all their gross receipts for the transportation of freight and passengers (not including amount received from, and taxes paid to the United States) from the 1st of October, 1866, to the 1st of October, 1868, and fifteen per centum thereafter, which tax shall be assessed and collected in the county of St. Louis, in the same manner as other taxes are assessed and collected, and shall be appropriated by the General Assembly to the payment of the principal and interest now due, or hereafter to become due, upon the bonds of the State, and the bonds guaranteed by the State, issued to the aforesaid railroad companies.

Sec. 2. A like tax of fifteen per centum shall be assessed and collected from the Hannibal and St. Joseph Railroad Company, and from the Platte County Railroad Company, whenever default is made by said companies, or either of them, in the payment of the interest or principal of the bonds of the State, or the bonds guaranteed by the State, issued to said companies, respectively, which tax shall be assessed and collected in such manner as the General Assembly may by law direct, and shall be applied for the payment of principal and interest of said bonds as the same may become due and payable.

Sec. 3. The tax in this ordinance specified shall be collected from each company hereinbefore named only for the payment of the principal and interest on the bonds, for the payment of which such company shall be liable, and whenever such bonds and interest shall have been fully paid, no further tax shall be collected from such company; but nothing shall be received by the State in discharge of any amounts due upon said bonds except cash or other bonds or obligations of this State.

Sec. 4. Should either of said companies refuse or neglect to pay such tax, as herein required, and the interest or principal of any of said bonds or any part thereof remain due and unpaid, the General Assembly shall provide, by law, for the sale of the railroad and other property, and the franchises of the company that shall be thus in default, under the lien reserved to the State, and shall appropriate the proceeds of such sale to the payment of the amount remaining due and unpaid from said company.

SEC. 5. Whenever the State shall become the purchaser of any railroad or any other property or the franchises, sold as hereinbefore provided for, the General Assembly shall provide, by law, in what manner the same shall be sold, for the payment of the indebtedness of the railroad company in default; but no railroad or other property or franchises purchased by the State shall be restored to any such company, until it shall have first paid in money, or in Missouri State Bonds, or in bonds guaranteed by this State, all interest due from said company; and all interest thereafter accruing shall be paid semi-annually, in advance; and no sale or other disposition of any such railroad or other property, or the franchises, shall be made without reserving a lien upon all the property and franchises thus sold or disposed of, for all sums remaining unpaid; and all payments therefor shall be made in money, or in the bonds or other obligations of this State.

It was also declared by the 6th section of the same ordinance that the

"General Assembly shall provide, by law, for the payment of all State indebtedness not herein before provided for; and for this purpose a tax of one quarter of one per centum on real estate, and other property and effects subjected to taxation, shall be assessed and collected, and shall be appropriated for the payment of all such indebtedness that may have matured, and the surplus, if any, shall be set apart as a sinking fund for the payment of the obligations of the State that may hereafter become due, and for no other purpose whatever."

It will thus be perceived that with commendable zeal, the people of Missouri have determined on thorough taxation to discharge their obligations. Church property hitherto exempted to conciliate certain powerful religious interests, and worth $35,000,000 will now have to pay its share of taxes, and 20,500,000 acres of land belonging to private owners have also hitherto escaped taxation. No doubt a vast portion of property has been thus left untouched. With regard to the plan proposed for obtaining revenue from the railways, we learn that the finance committee recommend that the railroads of the State be allowed to increase their fare to five cents per mile, or 20 per cent., and be required to pay the State, a tax of 16 2-3 per cent. on the gross earnings, from all sources. The railway companies owe the State, for bonds loaned to them on a mortgage upon their roads, about $23,000,000, and some $5,000,000 of interest thereon. The proceeds of the proposed tax of one-sixth of their gross earnings are to be allowed and applied as *payments* on the debt due by the railroad companies to the State. This tax alone will soon yield a sufficient sum, it is believed by the finance committee, to meet the interest on the State debt. The unpaid interest on the bonds amounted to 25½ per cent. on the first day of this month. This it is proposed to convert into principal, to bear the same rate of interest as the original bonds. Others of the States whose interest payments have been suspended during the war will, in time, it is presumed be taking similar measures for the restoration of their credit.

The obligations and debts of the State are in one form classed as follows:

1. The direct Public Debt, as follows:

Bank of Missouri Bonds	$402,000
Union Military Bonds	1,771,080
Defence Warrants	244.279
Militia service due	1,000,000
Loan to Gov. Gamble	150,000
Total	$3,998,300

Covered by	
Claim on United States Government	$4,000,000
Bank stocks worth	1,200,000
Total	$5,200,000

NOTE.—The claim on the Federal Government was fully recognized by the last Congress in the Deficiency Bill, but the bill, covering numerous other appropriations, failed by the disagreement of the two Houses at the last moment *not* on this particular item.

2. The Railway Debt, already provided for by the companies to which the State Bonds were issued:

Hannibal and St. Joseph	$3,000,000
Platte County	700,000
Total	$3,700,000

3. The Railway Debt in default since 1861, of two classes, the first provided for by the ordinance of the Convention taxing gross earnings from October, 1866, *ten per cent.*, until October, 1868, and thereafter *fifteen per cent.*, to pay the arrearages of interest and further secure the principal. The second is provided for by a specific tax of one-fourth of one per cent. a year on the $480,000,000 of the taxables of the State of every class, *without exception*, equal to $1,200,000 a year.

1..Pacific road, main line	$7,000,000
1..North Missouri	5,000,000
1..Iron Mountain	3,000,000
Provided for by ordinance	$15,000,000
2..Pacific S. W. Branch Bonds	*4,500,000
2..Cairo and Fulton	500,000
Together	$20,000,000
Arrearages of interest on all	5,008,240
By ordinance and direct taxation	$25,008,240

* Indorsed by the State.

In another form the indebtedness of the State appears as follows, to provide for the payment of which the recommendations of the finance committee were adopted:

Bonds issued for State purposes	$602,000
State bonds issued to railroads (including guaranteed bonds)	23,701,000
Revenue bonds, issued in 1861 (nine per cent.), now due	431,000
Interest due on bonds issued to railroads (January 1, 1865,)	5,008,240
Money borrowed by Governor Gamble to purchase arms	150,000
Amount of defence warrants outstanding December 1, 1864	244,279
Amount of Union military bonds outstanding December 1, 1864	1,771,030
Amount due militia for active service estimated by Governor Hall	1,000,000
Total	$32,907,549

The general debt of the State, after deducting $28,709,240, the principal and interest of the railway debt, is only $4,198,309, which includes the following items, less interest as these are now due:

Balance of bonds due issued for State purposes	$402,000
Revenue bonds issued in 1861	431,000
Money borrowed by Governor Gamble.	150,000
Defence warrants	244,279
Union military bonds	1,771,030
Due militia for active service (estimated)	1,000,000
Total	$3,998,309

The following are the principal provisions of the new Constitution of the State of Missouri, which is to be voted upon on the 6th of June:

1. The constitution, in its first sentence, recognizes our dependence as a people upon Almighty God, the Sovereign Ruler of nations for our State Government, our liberties, and our connection with the American Union.

2. Declares Missouri a Free State forever.

3. Establishes the equality of all men before the war.

4. Prohibits legislation interfering with the personal rights of men on account of their color.

5. Asserts that all government, of right, originated from the people, is founded upon their will only, and is instituted solely for the good of the whole.

6. Affirms that the people of Missouri are a part of the American nation.

7. Declares that Missouri shall ever remain a member of the American Union.

8. Asserts the paramount allegiance of every citizen of Missouri to the Constitution and Government of the United States.

9. Excludes from the ballot-box and from office, traitors, rebels, rebel sympathizers, guerrilla marauders, bushwhackers, and their aiders and abettors.

10. In like manner, excludes Knights of the Golden Circle, Sons of Liberty, and O. A. K.'s.

11. In like manner, excludes those who fled the State to escape the draft.

12. In like manner, excludes those who enrolled themselves as disloyal, or as Southern sympathizers, to avoid militia duty.

13. Provides for an efficient registration of voters, thereby securing the exclusion of illegal votes.

14. Removes the rule requiring treason to be proved by at least two witnesses, and leaves it to be proved as any other crime.

15. Invites immigration from Europe, by extending the elective franchise to those persons of foreign birth, who have, more than one year before an election, declared their intention, according to law, to become citizens of the United States.

16. Forbids private, local and special legislation, which for thirty years has cursed this State, and brings the State under a uniform system of general law.

17. Prohibits lotteries.

18. Forbids the Legislature making compensation for emancipated slaves.

19. Forbids the Legislature removing the county seat of any county, unless, at a general election, two-thirds of the voters of the county vote for it.

20. Shortens the term of office of the Governor and other State officers at the seat of Government, (after the present term,) to two years.

21. Establishes intermediate appellate courts between the Circuit Courts and the Supreme Court, without increased expense to the State.

22. Stops the creation of corporations by special acts, with enormous and dangerous powers, and require all corporations to be formed under general laws.

23. Prohibits the creation, renewal, or extension of the charter of any bank of issue.

24. Protects the interests of the people by imposing upon stockholders individual liability for the debts of corporations; and so insures a more honest and faithful management of those institutions.

25. Secures an efficient system of common schools for the free education of the children of the State.

26. Restores to the rank and file of the militia the privilege of choosing their own company and regimental officers.

27. Removes the injustice to the masses of the people, of enormous exemptions of property from taxation.

28. Forbids the loan of the credit of the State to any company or corporation.

29. Prohibits the Legislature authorizing any county, city or town to become a stockholder in, or to loan its credit to, any company or corporation, unless with the assent of two-thirds of the qualified voters.

30. Forbids the release of the State's lien upon any railroad.

31. Gives increased facilities for its own amend-

ment, and allows the people a direct vote upon every amendment proposed.

32. Provides for calling a convention to revise and amend the constitution, whenever the people, being authorized by law to vote upon the question, shall vote in favor of it, *and not otherwise.*

☞ The company chartered at the last session of the Legislature, with the title of the Perkiomen Railroad Company, has been organized by the election of the following officers:—Hon. A. D. Markley, President; D. M. Casselberry, Secretary; A. B. Longaker, Treasurer.

☞ The land grant to the State of Minnesota, of the 3d March, 1857, provided for the construction of three main line railroads and two branch roads. Under this grant there has been certified to the State for railroad purposes 1,608,599 acres of public lands.

☞ The Saint Andrews *Standard* says:—"The contract for building the St. Stephen Branch Railway was signed on Monday. W. M. Buck, Esq., has been appointed Engineer of the road."

☞ A dispatch dated San Francisco, May 23, states that a large force of laborers is at work on the line of the Western Pacific Railroad, which is the connecting link of the California and Pacific Railroad between Sacramento and San Francisco.

☞ The Central Pacific Railroad Company announce that they have received the instalment of government bonds on the first thirty-one miles of their road, amounting to nearly a million and a quarter of dollars.

☞ The New York Central Railroad Company are constructing an embankment of earth to take the place of the bridge or trestle work on the Niagara Falls division of their road from Smith street, Rochester, to the Erie Canal.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITARY of the UNITED STATES AND AUTHORISED AGENT OF THE TREASURY.

No. 25 NASSAU STREET, CORNER OF CEDAR, May 2, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates, with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, their correspondents, together with Messrs. CULVER, PENN & CO., and their friends, being persons of well-known standing and large pecuniary means, have become the owners of its Capital Stock.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors, and will allow four per cent. interest to Banks and Bankers on their credit balances, rendering accounts current monthly.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.
C. N. JORDAN, Cashier.

American Railroad Journal.

New York, Saturday, June 3, 1865.

Payment of the Public Debt.—American Finance.

It has been thoroughly proved by our staticians and political economists, that the public debt of this country, even if it should finally amount to three thousand millions, will not only be paid, but that if our population, resources and gains should increase in the same ratio the next decade that they have done during the last, the burthen will be comparatively a light one. At various times we have also shown this to be absolutely certain on those conditions by the figures themselves. We have also shown that on the ordinary course of events a large diminution of the public debt will occur from the surplus revenue on the present basis of taxation in the loyal States alone, and also that this surplus can be largely increased by the amount which will come in from the Southern States in the ordinary way, and especially if an excise duty be laid upon cotton of even a few cents per lb. We have also expressed the opinion that the funded debt which will have a permanent form will be much less than three thousand millions, inasmuch as nearly five hundred millions exist in the shape of legal tender, which will inevitably fall into the Treasury in the shape of taxes within a few years, and if there be the expected surplus they can be canceled. Be this as it may, there appears to be a growing disposition in the public not to await any slow process of redemption, but to take hold of the National indebtedness in a vigorous way, and after an American fashion end it.

Some months since we alluded to this project, which first saw the light in New England, where it was discussed with considerable animation and brought forth propositions from its friends of the most liberal character. One gentleman in Boston offered to subscribe $200,000, and others followed promptly with large sums. The Philadelphia papers advocated the plan with spirit, and this JOURNAL gave it its encouragement. The London *Times* Money Editor, always unfriendly to our financial system, commented on it with some surprise if not alarm. It has since however, been evidently in a dormant condition, until the *Herald* revived it and to the astonishment of every one not only advocated it, but announced an actual subscription as pledged by a few persons to the extent of $550,000. We could add that a friend and subscriber of the JOURNAL offered a few days after its comments on the subject to give for himself and a friend $20,000 to this object; another gentlemen of high official position has said he will give one-third of his estate whatever it shall prove to be. And if this spirit generally extends, there is no telling what may come out of it. On Thursday morning last subscriptions to the extent of 298 shares had been pledged, amounting to $2,980,000. The proposition as it is advocated in the *Herald* is that 150,000 persons shall be found who shall average $20,000 each, and that where parties are not rich enough to give this sum individually, they shal combine to make it up and call it a share. And so the matter now stands. Of course it seems hardly probable that so grand a scheme can succeed, and yet it is quite possible. It is not more difficult than the war has been, it does not require more sacrifices than the war has required, it is not beyond the means, nor opposed to the wishes or interests of the country. Its accomplishment would be one of the greatest triumphs which the world has ever witnessed, and would raise this Nation to the highest pinnacle of grandeur and glory. Nor would it be much of a sacrifice on the part of those who are able to subscribe liberally to do so, nor even for those in moderate circumstances to contribute. The amount of taxation which the rich will have to meet for many years, might well be anticipated by a smaller sum now, and there are many of those who think so. The estate which pays, or the manufactory which pays from $20 to $100,000 a year, and will have to pay it for many years to come would make a good operation by compromising for a moderate portion of that sum to be paid within a reasonable time.

It would even be a good thing for parties able to do so to give half their incomes at once to exonerate their estates in future. The real question to be determined is how many persons in the United States are able to give $20,000 each. At the office of the Internal Revenue at Washington this question could be easily determined, and the fact ascertained one way or the other would settle the policy of the attempt definitively. We therefore propose that some such competent persons as Lorin Blodget or Dr. Elder should undertake the inquiry and let the public know as soon as possible, how many hundred thousand persons there are in the country, who might be reasonably supposed able to give $20,000 each, or what other sum, and when we know this, and know it satisfactorily, an united and patriotic effort might thenceforth be made with very good hopes of success.

Dalton and Jacksonville Railroad.

Already we perceive that enterprise is beginning to look southward for new fields of operation. There is almost a continuous route from this city to New Orleans, with the exception of a short gap between Dalton and Jacksonville, which but for the war would have long since been filled up. The route is as follows: by the way of Philadelphia, Baltimore, Washington, Gordonsville, Lynchburg, Bristol, Knoxville, Dalton, Rome, Jacksonville, Selma, Meridian and Jackson, Miss. We understand that a large majority of the stockholders in the original company are Northern men. We publish a letter from GEO. WADSWORTH, C. E., formerly engaged in the work, which gives so full an account of it that it is unnecessary for us to extend our own remarks:

For the American Railroad Journal.

New York and the Gulf Cities.

Now that the war is over and the reconstruction of railroads in the South fairly commenced, it is important that New York should be connected with the Gulf Cities by the shortest and most practicable route. It may not be generally known to the business men of the northern cities, that with the old roads repaired, an *all-rail* communication may be had with Mobile and New Orleans nearly on a direct line, by the grading of 57 miles of very light road bed, and the laying of 101 miles of track in Georgia and Alabama. The work referred to is from Dalton to Rome, 40 miles, (of which 16 miles has been graded,) and from Rome to Blue Mountain, (10 miles south of Jacksonville,) 61 miles, of which 28 has been prepared for the superstructure. This work was in good progress before the war commenced, but was suspended. The Alabama portion was resumed under a Confederate appropriation, it being deemed of military importance, but was abandoned without accomplishing very much. The heaviest part of the work was done in 1859–'60, and the remaining 57 miles, which will be made chiefly from side excavations, are light embankments. The route abounds in timber, (or did before the havoc of war,) and everything convenient for rapid construction. The gradients of this road are easy and the alignment is excellent. The track laying southward from Dalton and Rome may be commenced simultaneously so soon as the cross ties and iron are delivered, and men enough may be put on the work to complete it in a few months of a favorable season.

From New York to New Orleans by Lynchburg, Dalton and Jacksonville, the distance is 1,455 miles, while by Chattanooga and the Memphis and Charleston Railroad, the next shortest route, it is 1,495. A saving of 40 miles.

From New York to Mobile by the Dalton and Jacksonville, it is 1,311 miles. (By Richmond, Augusta and Montgomery, 1,385—74 miles saved.) This distance will still be reduced by 90 miles on the completion of the Selma and Gulf Railroad, making the whole way but 1,220 miles, and the shortest line that can be had between the two cities.

The Dalton and Jacksonville road connects Selma, which is the head of low water navigation of the Alabama River, and will be a focal point of the Southern railroads, with Chattanooga and Knoxville, and thus with the whole chain of Tennessee and Virginia Railroads. These connecting roads are first class roads and have of themselves all been good paying investments, and with this last link completed, their business must be greatly increased, for they will become great *through carriers* and able to compete successfully with all other lines.

Here then we have a *great diagonal route* passing through the interior of the Southern States with its ramifications reaching into all parts of the Union. Its ultimate extensions will be eastward to the Gulf of St. Lawrence, and westward to the Pacific. Thus encompassing the continent with its iron bands, and becoming the great highway of Nations, and an axis of the world's commerce.

Geo. Wadsworth, C. E.

May 25th, 1865.

Michigan.—Its Debt and Resources.

The debt of the state at this time is $3,541,149, having been increased during the war $1,122,000. The revenues derived from direct and specific taxes show a rapid increase in wealth:

In 1842 the tax of 2 mills produced			$58,296 07
In 1852	"	2 55-100 "	110,000 00
In 1865	"	2 73-100 "	470,000 79

while the specific taxes increased from $3,852 in 1842 to $160,510 in 1864.

In 1840, the population	was		212,267
In 1850,	"		397,965
In 1864,	"		803,714
The production in 1840 of		wheat, bush.	2,157,108
"	"	wool, lbs.	153,375
"	"	hay, in tons	130,805
"	"	sheep	99,518
"	"	cattle	185,190

In the census taken by the state in June, 1864, the following reports were made:

Raised in 1864, of	wheat in bush.		9,687,627
"	"	wool, lbs.	7,294,934
Made	"	lumber, feet	684,646,636

Second track	456,102 06	
		682,512 43
Leaving balance to credit of revenue October 31, 1864		$1,168,532 05

The details of the new work above alluded to are as follows:

New track	$14,193 62
" fences	1,844 37
" locomotives	101,646 80
" passenger cars	62,681 88
" freight "	147,566 91
" stations, buildings, etc.	97,709 93
Real estate purchased	6,533 72
	$432,177 23

The new equipment added to the stock consisted of 8 locomotives, 13 passenger and 230 freight cars. Twenty-six and a quarter miles of second track had been laid, and the Susquehanna Bridge had been prosecuted without intermission. Five of the most difficult of the thirteen piers required had been completed, and the foundations of the sixth were in a state of considerable forwardness. The masonry of the eastern abutment had been brought almost to the level of the bridge seat, and considerable progress had been made upon the foundations of abutment at the western shore. A large part of the material for the remainder of the masonry, together with the iron for the pier casings had been prepared and ready for use at the resumption of work in the spring. The piers yet to be built will rest on a foundation of ledge, where the deepest water is but 26 feet, but little less than half that of those completed last year. The Delaware Railroad has earned $52,613 51 more than in any preceding year, and has produced a net profit to this company of $46,976 18, besides $100,000 estimated as the value of its joint traffic. The New Castle Improvement has been completed.

The company have 49 locomotives (8 of which are in use on the New Castle and Wilmington, New Castle and Frenchtown, Delaware, Eastern Shore, and Junction and Breakwater Railroads;) 68 first class and 4 second class passenger cars; 2 refreshment, 2 hospital, 18 baggage and mail, 7 platform cars for crates, 1 paymaster's, 1 special, and 6 express cars—making in passenger department, 109; in freight department, 948; in road department, 88—total, 1,145.

The number of miles run by engines with passenger trains was 456,446; with freight trains, 282,892; with gravel and other trains, 41,299—total, 780,587; of which 653,040 were run by coal burning, and 127,497 by wood burning engines.

Number of passengers carried, 1,351,416; of which 332,783 were through, and 1,018,633 way.

Number carried one mile, 63,560,832; of which 32,612,734 were through, and 30,948,098 way. Number carried north, 34,014,661; do., south, 29,546,171.

Tons of freight carried, 240,298; of which 107,606 were through, and 132,692 way. Of the through freight, 25,235 tons were moved northward, and 82,371 southward. Of the way freight, 51,537 tons were moved northward, and 81,155 southward. The total tonnage northward was 76,772; do., southward, 163,526. Number of tons carried one mile northwardly, 4,749,308; do., southwardly, 11,668,942—total, 16,418,250.

☞ The great tunnel on the Pittsburg and Steubenville Railroad, two thousand feet long, is just finished. Trains will be running in a few weeks.

Southern Penn. and Connellsville R. R.

The Engineers on the eastern end of this road are now making the necessary surveys between Chambersburg and Bedford. They have completed their labors between the latter place and the summit of the Allegheny mountain. It will take at least two months to complete the survey to Chambersburg, and until this is finished it is not expected that anything will be done in the way of putting the road under contract. We had thought, in all probability, the short distance between this point and Mount Dallas, would have been put under contract immediately upon the opening up of Spring, but the Company have determined otherwise. It must be evident to the Company that Bedford, until the completion of the work, will be one of the most important points along the road. The completion of the Bedford railroad, by this Company, at an early moment, would remove all the doubts of those who have persistently asserted that the road would never be put under contract, and that the Pennsylvania Railroad only desire to occupy the route to exclude any other enterprising company which might desire to build a great rival road.

The Pittsburg and Connellsville Railroad Company have made "slight objections" to the building of this proposed enterprise, the merits of which will be argued before the Hon. Judge Grier on the 20th of June next, in the Circuit Court of the United States, to be convened at Williamsport.—*Bedford Inquirer.*

Central Pacific Railroad.

While the work of wharf building, etc., is progressing satisfactorily at this end of the Pacific Railroad, that of grading and track-laying is advancing rapidly in the mountains. The bridge at Newcastle Gap, about a thousand feet long and sixty feet high, has been completed several weeks, and another, of nearly equal dimensions, a few miles further on, is now finished. At what is known as "the big fill," some three hundred and fifty men, with thirty carts and thirty-five wagons, are at work, and the embankment is nearly completed. This embankment is a thousand feet long and fifty-three feet deep in the centre. It is nearly completed, and in a few days the men will be sent "to the front" to commence operations at a new locality. The Bloomer cut, twelve hundred feet long and sixty-three feet deep, completed several weeks since, presents two walls composed almost entirely of cobble stones, as solidly embedded in cement as though they had been placed there by the hammer and trowel of the mason. The grading from Newcastle to Clipper Gap, a distance of twelve miles, is so nearly completed that there will be no impediment in the way of the track-layers. The iron is laid about a mile and a half beyond Newcastle, and will extend to Auburn station within ten days. By or before the 15th of June it will reach Clipper Gap. This point is located forty-three miles from Sacramento. It is the intention of the company to lay out a town at that locality by the time the cars reach it. Beyond that point three or four camps of workmen are located, who are employed at the deepest cuts and the heaviest fills. One of these is stationed at "Wild Cat Summit," a region of country where one would expect to find wild cats much more numerous than locomotives, and wild Indians in lieu of civilized Chinamen. The company has now employed about two thousand hands, two-thirds of whom are Chinamen. Many of the men use wheelbarrows, where they can be employed to advantage, while at other points some two hundred horses and carts and about fifty double teams are kept busy. One difficulty is experienced by the company, which could scarcely have been anticipated—that of scarcity of material for building the road. A glance at the towering hills would lead the observer to a different conclusion, but at many points where high and long embankments are required the soil is but from one to two feet deep, and is difficult to obtain. Consequently many acres are scraped over and much of the earth has to be hauled a long distance. In several instances costly bridges have been built where embankments would have been prepared had earth been abundant and easy of access. At the upper end of the line workmen are engaged in cutting red fir to be used for bridges and tresle-work. This wood, sawed by mills now nearly completed, will be used for railroad ties after the supply from Mendocino, now on hand, is exhausted. Recently several lodes of valuable lime stone have been discovered, and Holmes & Co. have made arrangements for building kilns along the line of the road for supplying the San Francisco market. The managers of the road feel confident that they will run their first engine to Illinoistown (ten miles beyond Clipper Gap) by the first of October next. It is now certain that "faith can remove mountains," and especially, if properly backed up by Sacramento energy and gold coin, by blasting powder and the pick and shovel, by hundreds of horses and thousands of workmen, as is the case in the present instance. Therefore as the necessary iron lays on the levee and the ties are piled up at Roseville to extend to Illinoistown, we conclude that the promise will be fulfilled.—*Sacramento Union, May 1.*

Long Island Railroad.

The earnings of this road for the year ending March 31, 1865, were $570,922 67; and the expenses $221,764 66—leaving net profits, $349,158 01. The road is represented by the following securities: bonds, $919,000; stock, $2,987,000—total $3,906,000. The financial statement of the company for the year ending March 31, 1865, was as follows:

Cash on hand April 1, 1864		$95,927 57
Receipts from passengers		386,206 61
" freight		183,531 86
" mails		8,424 81
" miscellaneous		26,759 39
		$666,850 24
Expenses operating road		$221,764 66

Cash balance		107,418 32
		$666,850 24

Oil City Horse Railroad.

Oil City is fast becoming famous for the energy and spirit of its citizens. A horse railroad between that city and Plummer is now in process of construction, and will be finished at an early day. One hundred cars and an equal number of trains have been ordered, and ere long wading in the mud will be remembered among the "things that were."—*Pittsburg Chronicle.*

Racine and Mississippi Railroad.

We learn from G. A. Thomson, General Manager of the Racine and Mississippi Railroad, that this road will be extended from Savanna to Rock Island by the 1st of October—thus bringing the valuable coal fields of Illinois into direct communication with Southern Wisconsin. The distance is 52 miles, 26 miles of which are already completed. When Milwaukee finishes its line to Burlington, we shall have a direct road, of 200 miles to the valuable coal fields of Illinois. Cheap coal would be of immense value to the future growth of Milwaukee. In view of the extension of the Racine road to Rock Island, the completion of the short line to Burlington, assumes an importance to every interest in our city—not inferior to that of any other line ever projected from Milwaukee. We further learn that there is no probability of the Racine road being sold to the Chicago and Northwestern. The latter has as large a load as it can carry. The decline in price of iron will enable the Racine road to complete its extension of 26 miles at a cost not exceeding $18,000 per mile.—*Milwaukee, Wis.*, May 20.

Journal of Railroad Law.

MEASURE OF DAMAGES FOR LAND TAKEN BY RAILROAD COMPANY.—PROPER SUBJECTS OF COMPENSATION.—VIEWER, WHEN A COMPETENT WITNESS ON TRIAL IN COURT.

The late matter of Dorlan against The East Brandywine and Waynesburg Railroad Company, on error to the Common Pleas of Chester County, Pennsylvania, was an appeal from the assessment of damages made by a jury appointed on the petition of the defendants, to appraise the damages occasioned by the construction of their road through the lands of the plaintiff.

The issue was framed upon a declaration in trespass, filed by Mr. Dorlan as plaintiff, and a plea of—not guilty, filed by the railroad company as defendants.

Damages were claimed for the land taken by the company, and for an alleged injury done to plaintiff's farm, buildings, paper-mills, and water-power, by the construction of the defendant's railroad.

Under the ruling of the court below, there was a verdict and judgment in favor of the plaintiff for one thousand dollars.

A writ of error was then sued out by the plaintiff, who assigned for error among others which will sufficiently appear in the opinion of the court, the following matters, viz:

7. In admitting the following testimony on the part of defendants: "It was proposed to ask the witness, if the company offered to plaintiff to make a siding and stopping place on his premises. This was objected to, because it was a mere offer, not accepted by them, and no security for its performance."

8. In admitting in evidence the draft exhibited to the witnesses, for the purpose of showing that the road was located as originally projected at the time spoken of by two of the witnesses, and proved by them. The reception of this draft was objected to as forming part of the same kind of evidence objected to when they were offered.

10. In charging the jury, among another charge which sufficiently appears in the opinion, as follows: "The plaintiff has called various witnesses engaged in the paper-making business, to show the value of this power in that particular branch of trade, by increasing the machinery. That we do not consider a true test of the damage done. It is rather speculative and fanciful. Perhaps by the time new works were built, or the present enlarged, the business would so far change that a heavy loss would follow its pursuit. The true criterion for your guidance is the actual market value of the unoccupied power for ordinary purposes. What will it bring in the market to grind flour, saw boards, weave and spin or full cloth, drive a tilt-hammer, make paper, or for any other purpose to which such power is ordinarily applied."

11. In charging the jury as follows: "The plaintiff's witnesses in fixing their estimates of damages, predicate much on the danger to the property from fire. This we instruct you is a wrong *datum*, and no damage can be allowed from such supposed danger."

12. In charging the jury as follows: "There has been a further claim for damages, which has entered largely into the estimates of many of the witnesses, formed on the inconvenience of passing from the house to the mill, the spring, and other portions of the property, across the track of the railroad, and the detention and danger from passing trains. We are of the opinion, and instruct you as we did a jury in Patton *vs.* N. C. R. R. Co., already cited, that this is *damnum absque injuria*, for which nothing is to be paid or demanded. If this is improper or unlawful detention, an action will lie for the injury. If none other than that which arises from a careful use of the road, the party put to inconvenience must bear it for the general public good."

13. In charging the jury as follows: The danger to children and other members of the household, in passing over the railroad, and to trains on the farm, horses hitched in the vicinity of the house and mill being frightened by passing trains, constitute another item of claim for damages, and has been estimated by some of the plaintiff's witnesses.

"This does not come within the objects for which the company is bound to pay damages. The supposed injury or inconvenience is imaginary and speculative. A great public improvement is neither to be prevented nor impeded, lest some passing train might be frightened or horse carelessly left by the owner in the vicinity of a highway, should break his bridle."

14. In charging the jury as follows: "You will perceive, after going through all the items of claim, that the estimates of many of the witnesses furnish no proper data by which you can assess the damages. They are predicated on false premises, and embrace much for which nothing can be allowed. You must make your calculations on those matters which we have instructed you are admissible, and leave out all others."

The other facts appear in the opinion of the Supreme Court of that State, which was delivered by

STRONG, J.—The exceptions urged here all relate to the matters proper to be considered in estimating the damages sustained.

From the evidence it appears, that upon the plaintiff's land there is a water power, partly improved, by which his mills are driven. It is the Marsh creek. Across this creek, at some distance above its point of discharge into the Brandywine, a dam has been erected from which the water has been conveyed by a race to the mills. When the railroad was located all the power was not used by the plaintiff, and some of the witnesses testify that since the construction of the road it cannot be, because the race has been contracted and rendered incapable of being widened. It is not alleged that it is now insufficient to convey all the water that he can use at his present mills, but that the power is greater than his use, and that it has been diminished by the works of the defendants, and partially rendered incapable of being used hereafter. For all injury done to this unused water-power, the plaintiff was allowed to recover compensation. But the plaintiff complains that he was not allowed to show how the unused water-power was injured. He proposed to prove by a witness, that by shortening the race, the power at the mill could be increased, and he offered to ask the witness what increase of power would be gained by having the race reduced to one-third its present length. This the court overruled, and correctly. The proposition, as explained when it was made, contemplated a contingent alteration of the creek by the erection of a new dam further down the stream than the site of the present one. It could have referred to nothing else. It was not, however, any unused water-power on Marsh creek below the present dam of which the witness had spoken, and which was asserted to have been injured. There is no proof in the case that there was any such, or if there was, that it had been damaged by the railroad. The damage was altogether to the power gathered by the present dam, and to the race leading the water from that. To the ascertainment of this, or to its measurement, an injury into the extent of the power that might be gained by erecting a new dam further down the creek, and by constructing a new and shorter race from it to the mill, was altogether irrelevant. And clearly it was inadmissible, as a basis for an additional dam. It was theoretical and speculative; a fanciful attempt to ascertain what would be the extent of the power, if certain supposed alterations were made, and if a considerable sum of money were devoted to its improvement. This disposes of the 1st and 2d assignments of error.

The next relates to the admission of evidence that the defendants had offered to restore a spring, re-build the spring-house, and blow out part of a rock which impeded the path to the spring, so as to remove the inconvenience of access to it, which the construction of the road had caused, and that the offer was declined by the plaintiff. It is an exception of very little importance. Even if the evidence should not have been admitted, which we do not say it was harmless, especially as controlled by the court in the charge to the jury. They were told that notwithstanding the offer, as the work was never done by the company, the injury complained of was a proper subject of compensation.

The next three assignments relate to the examination of Isaac S. Miller, a witness called by the defendants. He was one of the original viewers chosen to assess the damages, and he had examined the property after the road had been located, and partially if not entirely graded, and after the alterations had been made in the race. It had been pointed out to him where the road was to be made, and this had been done when the plaintiff and the officers of the road were present. After he had stated these facts, the plaintiff objected to his testifying what was pointed out to him as to where the road was to run and the line was to be constructed, and objected also to his testifying how the premises were damaged, before he had been cross-examined respecting the mode in which his opinion was formed; the object of the proposed cross-examination being "to show that he had formed his opinion as a juror to assess damages, and had embodied it in a report after hearing evidence." It is sufficient to say of these assignments, that the proposed cross-examination was out of time. That the witness had been a viewer was no reason for rejecting his testimony, especially as he was cautioned that he must speak from his own knowledge, and not give any opinion founded upon the testimony he had heard as a viewer. That the road was not completed when his examination was made, might detach from the value of his opinions, but it furnished no reason for excluding them. There was no pretence that the location of the road had been changed after

it was pointed out to the witness in the presence of the parties.

The 7th and 8th assignments are very important, and they require no more than the remarks that they are not sustained.

The remaining exceptions are to the charge. We do not propose to discuss them at length. We think the instruction given to the jury was in every particular accurate. They were told that the injury to surplus water-power not now in use, was a legal ground of claim, not by fixing on it a fanciful or speculative value, derived from the supposed advantage of the plaintiff's enlarging his present business by building a new dam, widening races, erecting new paper-mills, or enlarging the machinery so as to increase the business, but the actual market value of the power. Its market value for any useful purpose to drive any kind of machinery which it was capable of driving, not what could be done with it if used in some supposed way, or after imagined improvements had been made. All this was in strict accordance with the rules for the assessment of such damages which have always been held by this court. Every other portion of the charge to which exception has been taken, is fully vindicated by the principles laid down in Patton *vs.* The Northern Central Railroad Company, 9'Casey, 426.

Judgment affirmed.

Western Maryland R. R.

We have received the reports made by Joseph H. Gitt, Esq., and his co-laborer, Mr. Faul, of the different routes for the extension of the Western Maryland Railroad from Union Bridge, the present terminus, to Hagerstown, Washington county. All the routes examined are difficult, owing to the mountains, ridges and hills which have to be crossed, but the surveyors have finally agreed upon a location. The whole distance, as projected, from Union Bridge to Hagerstown, is 43¾ miles. The road will run a little north of west from Union Bridge, along the line of Pipe Creek to Mechanicstown, in Frederick county, crossing the Monocacy River upon a substantial structure. Near Mechanicstown, the route strikes off in a more northerly direction to Sabillaville, and thence generally in a southwest course to Hagerstown, winding around the spurs of the Catoctin and South Mountains. Hagerstown will be entered on the south side, near the pike leading to Williamsport, and Antietam Creek will be crossed near Cook & Stonebraker's paper mill. The whole cost, exclusive of the right of way, was estimated, when the report was made, at $1,250,-432; but it is probable that the cheapening of labor and materials, which is likely to ensue, will considerably reduce this estimate. The projected line runs through one of the best producing sections of the State. Large portions of Carroll, Frederick and Washington counties, and of southern Pennsylvania, heretofore isolated, will be brought in close relations with the commercial entrepot of this State, and in addition to this advantage for a market, considerable enhancement in the value of lands might naturally be expected to ensue. The enterprise is one which, upon various considerations, seems worthy of the support of all the interests involved.—*Baltimore Sun.*

☞ We are reliably informed that Mr. Livesey, who represents British capitalists, is on his way back from England, having completed arrangements to accept the proposals of the Nova Scotian Government for extension of railways from Windsor to Annapolis, and from Truro to the New Brunswick frontier; and from thence to the New Brunswick line, by way of Dorchester, under the subsidy act of our Legislature. The work is to be commenced immediately, and pushed on with despatch.—*St. John News.*

Scale in Boilers.

As Incrustation is the sole cause of the destruction of boilers, we do not see why owners do not employ some means to obviate the evil. The thickness of an eggshell between the water and the iron compels the use of 15 per cent. more fuel to generate steam; and as a crust, one-fourth to one-half inch is no uncommon occurrence, the immense waste of fuel, and the more rapid burning of the iron, are readily seen. Repairs and the fuel wasted, might both be saved if the boilers were kept clean, as iron cannot burn with water next it whatever may be the outside temperature. Boilers using pure water have been run over thirty years without one dollar of repairs; hence will be seen the advantages and necessity of preventing scale. The item of stopping works "to scale boiler" is no inconsiderable amount; the apparent loss of the day is trifling, but in large establishments, where large capital is idle; the men off on a frolic, not to turn up when wanted, should induce every mill-owner to save this lost day, which need occur but once in six or twelve months if no scale formed. Boilers in New York are cleaned but once a year, the water being pure enough to incur no risk of burning from incrustation formed in that time; boilers elsewhere could be run as long if kept free from scale. We, therefore, urge that some means be adopted to prevent scale, and as the powder invented by Mr. Winans, has proved a reliable and uninjurious article for this purpose during the last ten years, and so many recommend it, we are confident it will save time and money where scale exists.—*Scientific American, March* 18, 1865.

We copy the above, it being particularly applicable to Managers of Locomotives. Many hundreds of dollars would be saved in repairs alone, if this article of Mr. Winans, so long used and so favorably known, were more constantly employed. At an expense of 10 cents a day, 300 to 500 dollars in repairs, and as much more in fuel would be saved each year. Mr. Winans has had it in constant use 10 years on several of the best Roads, and on all with the greatest satisfaction. We refer to his advertisement on another page.

Re-opening Southern Lines of Communication.

The Richmond *Republic* says that all of the most important of the Southern Railroads have been repaired and put in running order. The Virginia Central is running from Richmond to within a few miles of Charlottsville. The Danville railroad is run by the company from that point, through Greensboro, Salisbury and Charlotte, to Columbia, South Carolina, and the United States government is rebuilding that part of the line between Danville and Richmond, and the Fredericksburg and Alexandria road to Washington.

General Schofield has rebuilt and is now running the North Carolina road from Newbern, through Raleigh, to Greensboro. General Gillmore is running the South Carolina railroad westward from Charleston to Midway, and eastward from Augusta to Aiken, leaving only about forty-five miles to be repaired. This will be finished in a fortnight, thus completing the line of communication to Columbia and Atlanta, Georgia. The line from Atlanta to Chattanooga will be finished by June 1, and the line between Columbus and Montgomery will be finished by the same time. The Gulf railroad, from Savannah westward, is intact. Large numbers of laborers are already at work on the Mobile and Ohio road.

The James river and Kanawha canal is to be thoroughly repaired and put in working order. At a meeting of the board of directors held yesterday, it was determined to employ at once four hundred laborers and fifty mechanics, and begin the repairs immediately. As the company is without means, the United States government, with marked liberality, has agreed to furnish the necessary sations, tents, boats and materials, and guarantee the payment of the wages, thus leaving no room for doubt as to the payment of those who are willing to earn a livelihood.

Western Maryland Railroad.

On the 12th of May a meeting of the committee to solicit stock subscriptions to this important enterprise, was held at the court-house in Hagerstown. The president of the road, Col. Robert Irwin, and Jos. S. Gitt, Esq., the chief engineer, were in attendance. A number of the friends of the enterprise were also present on the occasion. Col. I., by request of the committee, made a few remarks in regard to the progress and prospects of the road, and its proposed extension, and demonstrated, beyond the possibility of doubt, that the road would be built to this place if our people would only do their part. The road as far as made is already a paying institution, and when continued to this point and our agricultural and mineral wealth is fully developed, it will be a better paying concern. These facts Col. Irwin fully established, and his remarks were always to the point and highly satisfactory. From Mr. Gitt the committee received much valuable information in regard to a better explanation of the different routes surveyed by him in the proposed extension. The obstacles in the completion of this road are of the most trying character, but Mr. Gitt has fully demonstrated the practicability of the mountains being crossed and the road built. The meeting appointed Mr. C. Artz to canvass the county to obtain subscriptions to secure the proposed extentension of the road.—*Hagerstown Mail.*

Delaware, Lackawanna and Western R. R.

AN ACT to authorize the Delaware, Lackawanna and Western Railroad Company to purchase and hold in the city of New York in this State, such real estate as they may require for office purposes. Passed April 13, 1865:

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Sec. 1. It shall be lawful for the "Delaware, Lackawanna and Western Railroad Company," a corporation of the commonwealth of Pennsylvania, to purchase and hold such real estate, in the city of New York, in this State, as they may require for office purposes, provided that the value of such real estate shall not exceed the sum of two hundred thousand dollars, and that the same shall not be used for storage or other than office purposes.

Sec. 2. This act shall take effect immediately.

Copper Product of the Portage Lake District.

The Portage Lake *Mining Gazette*, of April 15th, gives the following statement of the copper produced by the mines of the Portage Lake District for the quarter ending March 31, 1865:

	Tons.	Lbs.
Quincy	217	153
Pewabic	171	550
Franklin	160	1,475
Huron	137	1,385
Isle Royale	83	1,013
Grand Portage	74	277
Arcadian	2	.....
Total	847	853

Sault Ste. Marie Canal.

The following is the Superintendent's report of the number of vessels, sail and steam, that have passed through the canal, with the tonnage of each, and their total tonnage:

	1863.		1864.	
	Vessels.	Tonnage.	Vessels.	T'ge
Sail and steam	1,257	507,434	1,414	571,438
Sail vessels	954	307,142	1,405	342,438
Sidewheel steam's	176	129,179	153	98,926
Propellers	129	71,113	213	130,074

The amount received from tolls in 1864, was 34,287 31; receipts from other sources, $1,427,-34; total receipts, $35,714 65.

American Railroad Journal.

Saturday, June 3, 1865.

Stock Exchange and Money Market.

The surrender of Kirby Smith and his forces beyond the Mississippi, settles the question of peace throughout the country. Up to the last moment possible, there were those at home and abroad who expressed the fear, if they did not cherish the hope, that the rebels would continue to hold out. An evening journal of this city predicted in carefully guarded language, that it might be years before our triumphs would be complete, and named five hundred millions of dollars as likely to be added to our present national debt. Such statements to affect the Money and Stock Market were as baseless as most others that have proceeded from the same quarter during the war, and doubtless owe their origin to the same motives. Such writers are neither taught by history nor inspired by patriotism. They belong to a class of persons known as the "Architects of Ruin," whose only role in life is to pull down and not build up. We do not envy them their feelings when they see that this country has been not only too strong for them, but their friends in the South. The only resource left them now is to damage the credit and decry the means of the country; to raise alarm and doubt as to the end of our financial difficulties; to attack the Treasury especially, at every opportunity; and to give a handle to our foreign enemies for every weapon they may invent to damage American securities. But we are equal to the financial, as we have proved ourselves superior to the military difficulty.

The debt of England in 1816 was about equal to one-half the property of the United Kingdom. Ours at 3,000 millions, if it prove so much, is not one-half of the annual profits of the loyal States alone; and yet there are those who pretend to believe that we are not able to discharge it. And our ratio of increase is on a larger scale than that of any other country in the world, and its elements are of a more diverse character. England can expect nothing more from her lands and soil, or from her coal mines, or from her spindles even, than she gets now. On her beer and spirit drinkers the Chancellor of her Exchequer builds his hopes of future solvency, while her East India possessions are kept along by such resources as the duty on opium with which she poisons the Eastern world. Here we do not expect to remain nationally solvent by the vices of our own or any other population. Our broad acres, our gold and silver mines, our lead, iron, copper, coal and cinnabar, our cereal and commercial crops in countless profusion, our flocks and our herds upon a thousand hills, our various climates, our rivers and lakes, our rapidly increasing population, and our ingenious, inventive and untiring industry adapting itself to every opportunity, directed by universal education and intelligence, are ample securities for the fulfilment of our public engagements. If any other evidence of our financial power was wanting, we might give it still in another form; the ease with which we gather coin, and the indifference with which our people take its large exportation. Be our system good or bad in the eyes of foreigners, we can certainly claim that what disturbs their markets has little effect on ours. A stone thrown in a small puddle will make large waves and disturb its quiet; but here it has no effect at all, for the extent of the surface, and the depth of the reservoir, make too large a volume to be seriously disturbed.

We were much struck by a very recent article in the London *Daily News*, entitled "Trade and Finance," which bears directly on this subject, and shows there is all the time in England, and especially now, a constant danger and uneasiness in the Money Market, arising in our opinion from trivial causes, and which show something wrong *au fond* of their whole commercial system. The article commences with the following statements:

"On the 25th April the Money Market seemed to be in an unusually favorable position. The general terms for discount were easy at 3¾ to 3⅞ per cent., or a fraction below the bank *minimum*, and the supply of unemployed capital appeared to be so much more than sufficient to meet the demand as to warrant the expectation that a

further reduction in the rate—lowered less than a month previously—would speedily be adopted. The produce markets had improved, and trade was assuming larger proportions in the manufacturing districts. The apprehension of further mercantile failures had consequently to a great extent subsided. Consols were at 91¼, and in almost all other descriptions of securities there was an increased feeling of confidence and readiness to buy at higher prices. Looking at our foreign commerce, the Board of Trade returns showed that although the exports for the first quarter of the year were 35,635,707*l.* against 36,667,381*l.* in 1864, still the shipments for the month of March alone were 13,770,154*l.* against 13,555,674*l.* in the same period of 1864, and 10,217,473*l.* in 1863. The virtual termination of the war in America also promised to give an increasing impetus to commerce. The forthcoming budget, if not actually known to be favorable, was generally calculated to exhibit a considerable surplus, although, perhaps, less than the reality has subsequently shown. With all these encouraging elements in view, while the Bank was augmenting both its stock of bullion (by the last return it was 14,974,010*l.*, an increase on the week of 36,631*l.*,) and its reserve, the addition to which was nearly 300,000*l.*, carrying it to 8,607,950*l.*, what ground of uneasiness could possibly exist? In a few days, however, the aspect of affairs has undergone A TOTAL CHANGE."

And what do our readers suppose was the cause of this "total change." The *News* finds it in the withdrawal, on the 26th of April, of one million and a half of dollars from the Bank of England, and on the 30th, of eight hundred and seventy-five thousand more, with one million more for the Turkish conversion loan, about to follow. Yet says the *News* these withdrawals raised the rate of bank interest from 4 to 4½ per cent., and "*created a general sense of insecurity* if not uneasiness." It also inquires *naively:*

"Whether it is necessary for the safety of the country that we should be exposed to a small *semi-convulsion* whenever we lend for a time a few hundred thousand pounds in gold, is a question to which there can be only one answer."

"It must seem strange to foreigners," says the *News*, "that England, the richest country in the world, cannot afford to lend a sum of less than a million without the risk *of a general disturbance of her commerce*, but the fact remains—that if a loan, however small, is made in one particular form there is always the *possibility of such a result.*"

These are curious confessions indeed. The sudden withdrawal of not quite three millions from the metallic currency of England disturbs her commerce, excites alarm, "unsettles many branches of business," and actually endangers the safety of the country!

Contrast this with the condition of our own. During the war we have parted with tens of millions annually, without saying a word against the movement. Last week nearly three millions were shipped from this city without the least disturbance. If the premium rose a trifle in consequence of the circumstance, it fell again. The interest of money did not advance, money itself was none the scarcer, nor was there a check we have heard of to any branches of industry, nor was there the slightest alarm in commercial circles.

What is the explanation of this? Simply that we are after all the most natural country, stand upon the largest and securest base, and have perfect confidence in ourselves and in our mines, manufactures, commerce, agriculture; we know we are advancing with gigantic strides, and every step we take forward is secure; we follow no class, we think for ourselves, and our people not only think but act. Our notions are continental, and millions disturb us not. Our mountains in the West are full of silver and gold. We expect to draw from them every possible supply we shall ever need; and in short we look with perfect indifference on any temporary call for the precious metals, no matter how large or how sudden, and feel that our permanence will remain unshaken. These are the feelings of the Americans as a nation; they are justified by past events, and will be more than justified by the future. The people of the Old World do not understand how liberty, free institutions, education, and an unsurpassed soil and climate are working together in the United States to elevate, dignify and enrich the human race.

We gave last week our idea of the motives which induced the Secretary of the Treasury to change the character of the third issue of the 7-30s. We believe public opinion, with "a sober second thought," has taken sides with him. Peace established, the credit of the country confirmed, the Treasury amply supplied with the funds for all immediate wants, and a heavy balance on hand rendered it quite unnecessary to press the market with the new loan. And particularly under these circumstances, when the subscriptions received would have laid for some time unused in the National Bank depositaries, it was not necessary that the people should be paying a high interest for money to be at the same time used by these depositaries and loaned out for their own benefit. The fact is that the new subscriptions are coming in quite as fast as is required; indeed faster than they can yet be used.

The importations at this point since the 1st of July, 1864, exclusive of specie, to the 27th of May, 1865, have been $144,010,936—against same time 1864, $205,099,999—a decrease of $61,089,063.

A writer in a Philadelphia cotemporary, in treating of our imports as a source of revenue, points out the fact that to trust to importations alone for revenue, calling the tariff an average of 30 per cent., would be to admit goods to the extent of a thousand millions a year to get 300 millions duty, and this would be our destruction. No doubt whatever that if we received any such amount of foreign goods, if we could possibly consume them, we should break down in a very brief period. There is no danger that American importers would be so insane as to buy them, or receive them on their own account. But we must remember that this country is full of European agents, who are continually having large consignments of foreign goods, often the mere surplus and an inferior surplus of their fabrics, and these are forced off by auction at any price. There is no country in the world where goods can be sold so rapidly as in the United States. We are great consumers of luxuries, as well as necessities. It is curious to notice the cargos of the Liverpool ships coming to this port. In the Liverpool *Journal of Commerce*, of the 13th ult., now before us, we find under the head of exports to New York, on the 8th of May, the following items: tow, and flax yarns, flax, timber, hosiery, blankets, seeds, parchment, floor cloth, marble tables, 50 cases of *sausage skins*, carpets, skivers, chandeliers, steel nails, scythes, steel ware, pig iron, &c.

We must confess we do not think our countrymen are in the least obliged to send abroad for any of these articles, especially "sausage skins," yet they come here, are sold here, and go back in the shape of gold. Our cotemporary thinks if we returned to specie payments at once, all our Banks, would be at the mercy of the foreign merchants. And very possibly they might be. England is very careful while talking of free trade to lay very heavy duties on some of our staples, and tobacco especially. The cheapness of labor in England will always give her an advantage over us, if we fully adopt her theory of free trade; and our manufactures could not stand her competition. At present the grain market is not in our favor. Instead of furnishing her 50 per cent. of her grain, as formerly, we do not supply her of late with more than 6 per cent. of what she consumes. We certainly have great need of care and watchfulness in the management of our trade with her, whatever may be her wishes on the subject.

The customs received in this port since the commencement of the fiscal year to the 27th of May instant have been $53,095,773; and the amount of interest paid out during the same period by the Government, $32,743,011.—And it may be observed that there were still three days in the month for further receipts.

The gold imported from California since July last has been $15,304,088—being an increase of imports against the same time in 1864 of $5,537,544.

Mr. Stewart senator from Nevada calculates that our gold and silver products from our states and territories, will yet amount to five hundred millions per annum.

Of the movement to pay off the National debt, which appears to be going on in good faith, we have expressed our views in another place. That good come will out of it in some shape or other we do not doubt. The movement itself is a remarkable one. It is possible of success, it remains to be seen whether it will succeed.

Government stocks continue very steady at the quotations, and the leading railways are quite firm.

We notice that the National Bank of this city is about to come into the National system. Its President, Mr. Gallatin, has hitherto been considered unfriendly to the measure, but as he is a Banker always with honest and profound convictions, we consider his adoption of the National system a very marked adhesion and worthy of being recorded. We hope that the illustrious name of Gallatin will not be left out in the new arrangement, but make a part of its new title.

We cannot help noticing the attempts kept up in certain financial quarters through the press, and in portions of their columns not supervised by the Editors themselves, to continue if possible the distrust in the monetary condition of the country, which the successful termination of the war was fast dispelling. Thus we are told of the great drain for specie going on and to continue, of the light receipts of specie at this port, the inadequacy of the supply from California, and the very small amounts in the possession of the Banks of the country, and at the same time we are warned that our exports are falling off.

Now what is the fact in a few words. The deliveries of gold from California at this point since July, 1864, to May 27, was $15,304,088, against $9,766,544, in the same period of time the previous year.

The exports of specie for the same period were $17,872,294 less than the corresponding time the previous year, and our exports excluding specie for the same time were $47,193,787 more than they were the preceding year, being in the total $192,707,306. On the other hand, the total amount of foreign goods, entered direct, taken out of bond and free goods in 1864-'65 was but $120,420,382, of which $17,713,399 were exported! On this showing the balance of trade has been more than 70 millions of dollars in our favor, and yet in the face of these facts certain financial editors are doing their best to represent the country as being in a most critical and alarming position. We have no patience with such ignorance, or such malevolence which ever it may be.

Money is easy at 6 per cent. with frequent transactions at 5 on Government securities. The stock market is generally firm and without excitement.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Ashtabula and New Lisbon Railroad Company, have resolved to employ more laborers, and push on their road to completion.

Cape Cod Central Railroad.

The Directors have decided to issue the stock which was left unsubscribed for when the road was built to Hyannis, about 670 shares, to the present stockholders, at the par of 60 per share, in the proportions of one share of this stock for fifteen shares now held by the stockholders. The stockholders are to have from the 15th of June to the 6th of July to take it, and what then remains will be sold at public auction, at the annual meeting of the stockholders on the 12th of July. The proceeds will be applied to pay, as far as it goes, the bonds of the company, due Sept. 1, 1865. No more bonds will be issued, and the small floating debt of less than $50,000, which will arise upon payment of the bonds, can be retired in two years without disturbing dividends. A dividend of $2 per share to stockholders of record, June 14, 1865, has been declared.

English Cast Steel Files.

W. & S. Butcher, import directly from Sheffield, England, full assortments of cast steel files of their own, and also those of Goodlad's manufacture. Those who want a first class article will do well to call at 54 Beekman street.

☞ Chas. Congreve & Son, 8 Broad street, New York, advertise in another page, that they are prepared to contract for manufacturers in England and Wales for rails, and all descriptions of Merchant Iron to be shipped from English or Welsh ports. The return of Peace will give a new impetus to railway construction, and these importers appear ready to meet the demand.

Marietta and Cincinnati R. R.

The work of completing the Marietta and Cincinnati Railroad through to Wheeling will soon be commenced. The independent line from Cleveland to Cincinnati will be finished in about four months it is thought. The Riloba tunnel, 1,600 feet through, is nearly finished. The road is very good and in many respects improved.

Platt County Railroad.

The Leavenworth *Conservative* of the 7th ult., says that the work of extending this road to Leavenworth is being vigorously prosecuted, with a force of 150 men busily employed. There is every reason to believe this important work will be completed by the 1st of October next. The company are using every effort to accomplish that end.

Pacific Railroad.--Eastern Division.

The Union Pacific Railroad is now finished and in operation from the Missouri and Kansas State line to Lawrence, a distance of forty miles. When this part of the road is accepted, the company will be entitled to draw from the National Treasury the sum of $16,000 per mile ($640,000,) and have vested in it the title to 6,400 acres per mile for each mile completed, equal to 256,000 acres of Government lands. The work will then be pushed forward beyond Lawrence in the direction of the Pacific Coast.

☞ The proprietors of the principal stockyards of Chicago have resolved to stop all business on Sunday, except receiving such as may arrive on that day. The Eastern roads having resolved to ship no stock on Sunday, the dealers at Chicago have addressed a circular to the Southern and Western roads inviting them to do likewise.

Railroad Earnings.—Weekly.

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending May 21, were:

	1865.	1864.
Passengers	$2,315 56	$2,447 15
Freight	10,633 90	10,280 30
Express	162 80	104 16
Mail	296 58	296 58
Total	$13,408 84	$13,128 19

Receipts from January 1 to May 21:

1865	$184,513 21
1864	179,235 94
Increase	$5,277 29

The earnings of the Michigan Central Railroad for the 3d week in May, 1865, were...$102,917 48
Corresponding week of previous year.. 66,420 18

Increase $36,497 31

The earnings of the Chicago and Rock Island Railroad for the third week in May, 1865, were $50,493 00
Corresponding week of previous year.. 43,441 00

Increase $7,052 00

The earnings of the Grand Trunk Railway for the week ending May 20, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$41,211 00
Express, freight, mails and sundries	4,636 00
Freight and live stock	77,646 00
Total	$122,893 00
Corresponding week, 1864	102,350 00
Increase	$20,543 00

The earnings of the Chicago and Northwestern Railway for the 3d week of May, are.$115,424 39
Corresponding week of 1864 ..... 105,933 54

Increase (8.96 per cent) $9,490 85

For the three weeks ending May 21, 1865, the earnings were $356,777 74, against $297,918 76—an increase of $58,858 98, or 19.76 per cent.

From June 1, 1864, to May 21, 1865, (11 months and 3 weeks,) the earnings were $6,591,904 67, against $4,512,896 06 for the corresponding period of the previous year, an increase of $2,079,008 61, or 46.07 per cent.

Northern Central Railway.

The ordinance providing for an adjustment of all matters of dispute between the city and the Northern Central Railway, which has been before the City Council for several weeks, received the sanction of both branches, and will be of effect as soon as approved by the Mayor and accepted by the company. If the Canton extension is not completed by the 1st July, 1868, the company is obligated to pay $2,000 monthly for the space of two years thereafter, and after the expiration of these two years the further sum of $3,000 monthly, until it is completed, the said payment so to be made to be regarded as liquidated damages, and not by way of penalty.—*Balt. Sun*, May 19.

Southern Telegraph Lines.

The Mobile *News* of the 6th ult., says that city was then in telegraphic communication with Columbus, Miss., and Gainesville, Ala., and the lines to New Orleans were rapidly approaching completion. A dispatch to the *News*, dated Columbus, Miss., May 5, says: "The lines are working on the Mobile and Ohio Railroad as far north as Baldwyn, thirty-one miles south of Corinth. On the Southern road, from Meridian to Clinton, thirty-five miles from Vicksburgh. On the New Orleans and Jackson road, from Canton, Miss., to Amite, sixty-eight miles from New Orleans. On the Mississippi Central road, from Canton to Holly Springs. On the Grenada and Memphis road, from Grenada to Senatobia, forty miles from Memphis. We also have a line from Osyka, Mississippi, to Clinton, Louisiana, and Woodville, Miss."

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JANUARY 31, 1865.

The receipts on capital account have been reduced during the last half year by 72,680*l.* being the amount of the six per cent. bonds, for 72,700*l.*, which became due and were paid of in October, 1864, less 19*l.* received on new shares paid up in full, leaving the total receipts on 31st January, 1865, 5,145,675. The aggregate expenditure to the same date amounted to 5,092,186*l.*, leaving a balance to the credit of capital account of 53,489*l.*

The outlay on capital account during the half year consists of new sidings, &c., at sundry stations—fish jointing six miles of rails—proportion chargeable to capital of the amount expended in rebuilding in stone and iron four wooden bridges between Hamilton and London, and making up embankments, &c., at new bridges over the Cove of the River Thames west of London, and over the River Nith west of Paris—extension of line into the city of Toronto—new station and grain store at Dundas, and coal and timber wharf at Hamilton—laying water service in station yard at Hamilton—new engine shed and engineering workshops at Hamilton, machinery and steam hammer for rolling mill, &c., amounting altogether to 18,181*l.*

The revenue account for the past half year is as follows:

Gross receipts		£312,729
Working expenses, including maintenance of way, taxes, insurance, and rent of suspension bridge		137,437
Balance		£175,292
From this there is to be deducted—		
Interest on Government loan	£17,499	
Interest on company's bonds, &c.	33,360	
Loss on the conversion of American currency	74,502	
Renewals of rails, sleepers, brid's	31,139	
		156,500
Balance from the half year's working		£18,792
To this has to be added—		
Loss by exchange over estimated last half year on the American currency unconverted at Bank of Commerce	£8,415	
Surplus from last half year	10,961	
		19,376
Leaving a surplus of		£38,168

From which the directors recommend a dividend at the rate of 2 per cent. per annum. This will absorb 35,598*l.*, and leave a balance to be carried to the credit of the current half year of 4,570*l.*

In the past half year gold quotations have ranged between 185 and 259¾. The monthly averages have been 226⅞, while the average purchases made by the company have been at 205½. The reduction, therefore, of the available balance by the conversion of American funds into gold amounts for the past half year to 74,502*l.* It is proper to observe that owing to the temporary inability of the New York Central to forward all the through freight brought to Suspension Bridge, which is not paid for until finally delivered, a larger amount than usual appears in the balance sheet at the end of the half year as outstanding and due to the company on traffic account. The greater part of this amount is receivable in American currency, and a loss will accrue upon its conversion which will be charged to next half year's revenue. The increase in the value of stores on hand may be attributable in a great measure to the augmentation of price, when purchased with American currency. The instructions of the board to the executive are to purchase stores either in Canada, or the States, or in England, on the most advantageous terms, irrespective of the currency in which payment is made. The following table places in comparison the receipts and expenses of the last five half years:

	Receipts.	Expenses.	Per ct.
January, 1863	£309,304	£136,199	44.03
July, 1863	293,067	136,270	46.50
January, 1864	301,634	135,878	45.05
July, 1864	314,939	140,188	44.51
January, 1865	312,729	137,437	43.95

The working expenses of the last half year are 43.95 per cent. of the aggregate receipts as compared with 44.52 per cent. on the preceding half year, and 45.05 per cent. of the corresponding half year, thus showing a reduction of 0.56 per cent. on the previous half year, and 1.10 per cent. on the corresponding half year.

It is gratifying to observe that during the past half year there has been an increase in pasengers compared with the corresponding half year of 12,269 in number and 22,521*l.* in amount. But the freight traffic shows a falling off to the extent of 53,268 tons, and 13,455*l.*

Friendly relations with all the American lines have been maintained, and the best possible feeling continues to exist; but owing to border difficulties the United States Government instituted a passport system at the close of the last year, which, to a great extent, put a stop to the through passenger traffic between the eastern and western States of America, *via* Canada. It has also lessened considerably the local passenger business between Canada and the States. But the directors have now the satisfaction of stating that by proclamation from the Department of State at Washington, dated March 8th, this restriction has been removed.

The working of the New York Central in connection with the Great Western has for the last two months been most satisfactory; a temporary stoppage of through freight, as well as of through passengers, has been the consequence.

For several years past the Great Western has been tenant of the Grand Trunk at an inconvenient temporary wooden passenger station in Toronto. But the corporation of the city of Toronto have granted to the Great Western and Northern the free right to build a single or double line along the entire length of the esplanade fronting Lake Ontario, and parallel with the Grand Trunk, which practically places the railway in juxtaposition to all the wharves and principal warehouses in the city of Toronto. The grant made by the city has enabled the company to select a more eligible and central site at the foot of Yonge street for general station purposes, and arrangements have accordingly been made for its purchase on very favorable terms.

The directors are happy to report that arrangements have been entered into with the Erie and Niagara, by which running powers over that line on terms to be mutually agreed, or failing agreement, by arbitration, have been secured for twenty-one years. This railway runs from Niagara to Fort Erie on the Canadian shore, opposite Buffalo, and will be worked by the Great Western during the first twelve months after its completion, under a guarantee which secures the company from loss. By this railway the Great Western, without incurring any responsibility, will have the advantage of a direct line to Buffalo of the same gauge as its own, and will secure a connection at Buffalo with both the New York Central and New York and Erie. The line is expected to be completed by the ensuing autumn, when the Great Western route between Buffalo and Detroit will be twelve miles shorter than by the Buffalo and Lake Huron route.

The report of the engineer shows the continued improvements which are being made in the permanent structure and condition of the railway. The rolling mill has proved its usefulness to the company in the large economy already effected in

the cost of re-rolling, and in the superior quality of the rails. The rolling stock has been thoroughly maintained; extensive renewals have been made; yet the aggregate expenditure of the two departments for the half year (locomotive and carriage) has been reduced.

The Commercial Bank of Canada has appealed to the Judicial Committee of Privy Council against the judgment of the Court of Error for Upper Canada. The appeal is expected to be argued at an early date.

The traffic of the Detroit and Milwaukee continues to be steadily developed, the earnings for the year 1864 having been as follows, compared with those of 1863:—

	1864.	1863.
Gross receipts	$1,323,402	$1,026,059
Working expenses	884,758	621,034
Surplus	$438,644	$405,024

The ordinary interest charges, amounting to $399,967 have been paid out of the surplus of last year, and the balance, together with the balance remaining from the previous year, has been applied in necessary outlay for construction and renewal purposes. It will thus be seen that no portion of the arrears of interest due to the Great Western has been discharged.

Commerce of New York.

The following from the *N. Y. Shipping List*, will show the number of arrivals of merchant vessels at this port from foreign ports, from January 1, to December 31, 1864, inclusive, the class of vessel, and their nationality as represenied by their flag:

Nationality.	Steamers	Ships.	Barques.	Brigs.	Schrs.	Total.
U. S. of America.	126	319	357	427	451	1,860
Great Britain	226	159	432	869	610	2,296
Bremen	4	33	67	17	..	121
Italy	..	3	42	54	1	100
Denmark	..	..	26	53	14	93
Hamburg	24	18	23	15	3	83
Russia	18	12	21	5	..	56
Netherlands	..	6	21	18	10	55
Prussia	..	5	32	16	1	54

Hayti	1	..	..	..	..	1
Total	408	603	1,143	1,584	1,106	4,844

The following table shows the arrivals at thi Port, in 1864, of vessels engaged in the Coastwise Trade, including transports and prizes:

Steamers	1,274
Ships	90
Barques	142
Brigs	254
Schooners	6,221
Whole number as above	7,981
Which, added to the foreign	4,844
Make a total for 1864	12,825
Whole number 1863	13,104
Decrease	279

	Foreign Arrivals. Total of all Classes.	Coastwise Arrivals. Tot. of all Classes.
1864	4,844	7,981
1863	5,082	7,984
1862	5,458	7,148
1861	5,095	6,977
1860	4,424	8,415
1859	4,027	7,809
1858	3,483	7,243
1857	3,902	6,097
1856	3,809	6,109

Quicksilver Mining Co.

The receipts of Quicksilver from the New Almaden Mine, during the first quarter of 1865, were as follows:

In January, flasks	3,768
In February, flasks	3,512
In March, flasks	3,427
Total, first quarter, flasks	10,705
Against same period last year	8,062
Increase this year, flasks	2,643

We are informed that a large reserve of ore remains on hand at the mine, and that the product of the New Almaden is likely to increase during the ensuing Summer. The following are our exports of Quicksilver for the quarter ending March 31:

To China, flasks	3,500	To Japan, flasks	..
To Peru "	2,000	To Victoria "	3
To Chili "	1,100	To N. York "	3,000
To Mexico "	1,425		

The April product, reported to the New York Office by telegraph, is 4,500 flasks.—*San Francisco Shipping List.*

Harrison's Steam Boiler.

An Important Invention.—Mr. Joseph Harrison, Jr., of this city, is having constructed near the U. S. Arsenal, on the Gray's Ferry road, an extensive foundry, designed for the making on a large scale of an improved steam generator of his own invention, which, from present appearances, seems destined ere long to effect a complete revolution in steam-making apparatus. Using a material heretofore almost entirely discarded, for the purpose, Mr. Harrison has quietly pursued this matter for many years, bringing to his aid all the experience of a long business life. He now feels confidence in submitting it to the public as possessing essential advantages over anything in use. Some of the qualities of this novelty may be mentioned, to wit, entire safety from explosion, great reduction in first cost and cost of repairs—it being afforded at a less price than the least effective boilers now used, with an efficiency in evaporation, and an economy of fuel equal to the very best; great diminution of space occupied, facility of cleaning and of transportation. Many of these boilers are at work in this city and vicinity. There is nothing which more concerns the safety of the public in large manufacturing cities, than the absolute security of steam boilers from explosion. If Mr. Harrison's invention secures this, it will be conferring upon the public one of the greatest possible advantages, considering the number of steam boilers now in use in Philadelphia.—*Phila. Ledger.*

Northern Central Railway.

Mr. W. B. Wilson, Superintendent of Telegraph, Northern Central Railroad, informs us that the work of laying the double track on that road, from Baltimore to Sunbury, is being pushed forward with energy and dispatch. An additional twelve miles will be opened shortly, and the balance within twelve months. The track and equipments of the road are in the best order, and trains running with great regularity.—*Harrisburg Union.*

☞ The work on the new track of the Troy and Boston Railroad Company which is in course of construction in Troy, is progressing quite rapidly.

☞ At the recent annual meeting of the Stockholders of the New York and New Haven Railroad Company held at New Haven, the following resolutions were unanimously adopted:

Resolved, That the resolution passed by the Board of Directors, October 24, 1863, proposing a compromise with the holders of the so-called spurious stock, claimed under fraudulent certificates issued by Robert Schuyler (giving one share of genuine stock for two shares of the spurious stock), is just in its conception, and is hereby approved by this meeting.

Resolved, That the appeal taken by the Directors from the general term of the Supreme Court for the City and County of New York to the Court of Appeals for final decision in the matter of the spurious stock still unadjusted, is also approved by this meeting.

The unadjusted spurious stock amounts to about $800,000.

Sale of the Prussian State Railways.

We learn that the Prussian Government, following the example of Austria and Italy, contemplate the sale of the state railways of the country, and that proposals will shortly be made on the subject. It is a somewhat curious fact that, while a strong party in England are insisting so strongly on the advantages which would accrue to the public from the state becoming the owners of railways in that country, those continental Governments who have had the most experience of the working of the system of state railways are at present taking steps to free themselves from the responsibilities which they have undertaken, and to follow the course adopted in England of leaving such matters in the hands of private enterprise. In Pennsylvania, the State found it to its interest to dispose of its public works to private Companies.

☞ Over $1,500,000 worth of the railroad bonds issued by the city of Pittsburg, and upon the greater portion of which suits had been brought, have been compromised and have either been exchanged for the new compromise bonds, or are in course of transfer. Negotiations for the exchange of a large portion of the balances are also under way, so that in a short time there will be but few of the old bonds outstanding.

Albany and Susquehanna R. R.

The work of tunnelling the hill in Colesville has now been steadily progressing for more than a year, and the distance to which it is carried at this time is between 600 and 700 feet. The whole length of the tunnel is about 2,000 feet, so that a little less than one-third of the distance has been opened. If labor shall become sufficiently cheap by next autumn, work in other places in this county will be commenced. As to the other end of the road, hopes are entertained of pushing it to Oneonta this year.—*Binghamton Republican.*

Mahoning Railroad.

The Board of Auditors have just finished the appraisal of the property of the Mahoning Railroad Company. For the year 1864 the appraisal presented a total of $1,675,227. This sum multiplied by five and increased by the addition of $58,000, gives an aggregate of $8,434,185, which is the present appraisal. $50,000 were added for local improvements in the vicinity of Cleveland, and $8,000 for the same in Portage county.—*Cleveland Herald.*

Metropolitan Railroad.

The surveys for this railroad to Washington are being made under the superintendence of Mr. James S. Randolph, the engineer of the Baltimore and Ohio Railroad Company.

Boston and Lynn Railroad.

The earnings of this road for the first four months of 1864 and 1865 have been as follows:

	1864.	1865.
January	$7,716	$7,973
February	7,261	7,886
March	8,757	10,336
April	9,145	11,002
	$32,879	$37,197
Increase four months		$5,318

☞ The Petersburg and Weldon Railroad has, we understand, been turned over to the company by the United States authorities. It is understood that an application therefor was made to General Halleck several days since. The Board of Directors held a meeting yesterday afternoon to take some action on the matter. We have not ascertained what they did. Many miles of the road will have to be rebuilt, and one or more important bridges constructed before the road can go into operation. The Southside and Norfolk roads will, probably soon be turned to their respective companies.—*Petersburg Express.*

European and North American Railway.

The revenue and expenses of this road for the year ending October 31, 1864, was as follows:

Revenue:

From passengers	$64,292 52
" freight	71,999 74
" mails and sundries	8,765 60
	$145,057 86

Expenses:

Locomotive power	$33,691 99	
Merchandize & passenger cars	22,008 64	
Maintenance of way and buildings	26,295 04	
General charges	21,634 45	
		103,630 12
Net revenue		$41,427 74

The Union Telegraph.

Philadelphia, May 29.—The Western Union Telegraph Company's lines are now in full communication with Memphis, Vicksburg, Mobile and New Orleans, and are receiving and sending private messages to those cities.

☞ A "mineral railroad" is projected from Athens, Ohio, to Columbus, to pass through Nelsonville, Logan and Lancaster.

W. & S. BUTCHER,

SHEFFIELD, ENGLAND,

No. 54 Beekman St., New York.

Have received by recent importations a full assortment of BUTCHER'S CAST STEEL FILES. Also, WM. GOODLAD'S CAST-STEEL FILES. 6m-22

James I. Shipman,

CIVIL ENGINEER, No. 35 Ann street, New York.

TRANSFER OFFICE OF THE CHICAGO AND NORTH-WESTERN RAILWAY CO., No. 8 Wall st., NEW YORK, May 17, 1865.

THE BOARD OF DIRECTORS has this day declared A SEMI-ANNUAL DIVIDEND for the six months ending June 1, 1865, of THREE AND ONE-HALF PER CENT. on the Preferred Stock of this Company, payable (less the Government tax) at this office on and after the 20th day of JUNE next to all holders as shown by the Company's books at the close of business on the 10th day of June.

The books for the transfer of Preferred Stock for the above dividend will be closed on the afternoon of the 10th, and will reopen on the morning of the 21st of June.

The books for the transfer of both the common and preferred stocks for the Annual Meeting to be held in Chicago on the 1st of June next, will be closed on the afternoon of the 20th of May, and reopen on the morning of the 3d of June.

By order of the Board of Directors.

PARKER HANDY, Vice-President.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL ..... $1,000,000.

DESIGNATED DEPOSITARY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 25 NASSAU STREET, CORNER OF CEDAR, May 2, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates, with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, their correspondents, together with Messrs. CULVER, PENN & CO., and their friends, being persons of well-known standing and large pecuniary means, have become the owners of its Capital Stock.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors, and will allow four per cent. interest to Banks and Bankers on their credit balances, rendering accounts current monthly.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.

C. N. JORDAN, Cashier.

European and North American Railway.

The report of E. R. Burpee, Civil Engineer on the survey of a line of railway from St. John, New Brunswick, to the boundary of Maine through the Douglas Valley, has just been published. The route is surveyed from the station of the European and North American Railway at St. John either through Portland to the suspension bridge where it crosses the St. John River, or through Carleton to the main line West of the bridge. It reaches the American boundary on the St. Croix River, a distance of 88¼ miles.

The estimated cost from the suspension bridge at St. John to the American boundary, is $2,750,000, or a little over $30,000 a mile, which is considerably less than the average cost of most lines on the continent. The report claims that the country is very favorable, the grades light, and the length of curved line only 25 miles. After leaving the St. John River, the country traversed is mostly on the heads of the streams, thus diminishing the amount of bridging. In the estimate for the line through Portland, the most important item of expense is the proposed suspension bridge over the St. John. By law the roadway must be seventy-five feet above high tide, which requires a span of 620 feet, about 200 feet less than that of the suspension bridge at Niagara. The cost is estimated at not over $200,000. By building abutments from extreme low water on either side, the span may be reduced to 500 feet, at which length a tubular or girder bridge is practicable.

The report tells us that while the New England roads cost an average of 44,000 per mile and the Nova Scotia railways about $50,000, this road from St. John to the boundary of Maine can be constructed in a superior manner at a cost of only $30,000. The conclusions of the engineer are certainly very favorable to the construction of this link in the proposed enterprise of the great European and North American Railway, which is to connect Boston with Halifax by a continuous line of rail, seven hundred and six miles long.

Chicago and Northwestern Railway.

The earnings of this road for the years ending May 31, 1864 and 1865, have been as follows:

	1863–'4.	1864–'5.
Passenger	$1,321,819 32	$2,162,377 37
Freight	3,193,419 62	4,449,387 79
Express	54,972 48	83,372 50
Mail	62,551 94	67,840 05
Miscellaneous	49,044 04	41,053 04
Total	$4,681,807 40	$6,804,030 75

Increase $2,122,223 35, or 45.33 per cent.

☞ The annual meeting of the Portland, Saco and Portsmouth railroad company was held at North Berwick, Me., on the 5th inst. From the report it appears that the receipts for the fiscal year ending May 31, 1865, were $450,421 60; and the expenses $213,454 45—leaving net earnings $236,767 15.

On the subject of the stipulation in the contract with the Boston and Maine and Eastern Railroads to pay rent in gold or silver coin of the currency of the United States, the report stated that the Boston and Maine road has proposed to pay one per cent. semi-annually, in addition to three per cent. stipulated, from May 1, 1863, to December, 1864, provided the Boston and Maine road is relieved of all liability, "If any such there be," to that date, to pay in gold or silver; but that deeming it a question purely for the action and decision of the stockholders, the Directors submitted the matter for such action as the stockholders should deem proper.

A resolution was then offered that the proposition of the Boston and Maine Road, which would give to the stockholders of this road about $32,000, should be accepted, which was carried.

On the vote for Directors, all the ballots were for the following gentlemen, to wit: Ichabod Goodwin, Geo. M. Browne, Israel M. Spelman, Charles E. Barrett, Geo. W. Burleigh, Nathaniel Hooper, Stephen W. Bullard, and the same were declared unanimously elected.

Experiment with Steel Shot.

Some experiments recently tried in England to determine the value of steel shot as projectiles, resulted as follows: the shot were fired at 5½ inch rolled plates, supplied by the Millwall Iron Co., the plates were fixed vertically, without backing, against a wooden frame. The greatest amount of penetration was obtained by Sanderson, Brothers & Co., viz: 3,275 inches. The shot were 8 inches in diameter.

☞ The Russian railway between the Black and Caspian seas, is progressing rapidly—20,000 forced laborers being employed. It is to be finished next year.

Pittsburg, Ft. Wayne & Chicago Railway.

The Pittsburg, Fort Wayne and Chicago Railway Company, is a consolidation of three companies, viz: the Ohio and Pennsylvania, the Ohio and Indiana, and the Fort Wayne and Chicago Railroad Companies.

The *Ohio and Pennsylvania* Railroad Company was chartered in Pennsylvania April 11, 1848, and in Ohio February 14, 1848. Construction was commenced July 4, 1849, and the road completed in sections as follows: Pittsburg to Rochester, July 30; to Clark's Summit, October 22; to Enon Valley, November 19, and to Palestine, December 8, 1851; to Columbiana, January 3; to Alliance (13 miles east of which had been opened November 27, 1851), January 6; to Massillon, March 11, and to Wooster, August 10, 1852; and to Mansfield, April 8, and to Crestline, April 11, 1853. The charter authorized a road to the Indiana line, but the company determined to stop at this point (Crestline), and the remainder of the road in Ohio was built by the Ohio and Indiana Company. The cost, earnings and expenses from July 30, 1851, to August 1, 1856, had been as follows:

Fiscal Terms.	Cost of Road.	Miles of Road.	Gross Earnings. Passenger.	Freight,&c.	Total.	Operating Expenses.	Earnings less Exp.	Dividends.
1851 (5 mos.)..	$2,177,116	62	$30,074	$2,269	$32,343	$14,259	$18,084	....
1852	4,206,811	134	231,081	84,037	315,118	142,133	172,985	....
1853	4,990,291	187	476,067	191,937	668,004	301,639	366,365	7½
1854	5,248,419	187	684,755	426,871	1,111,626	541,871	569,755	7
1855	5,887,490	187	644,850	331,474	976,324	449.553	526,771	4
1856 (7 mos.)..	6,079,931	187	337,517	259,816	597,333	307,819	289,514	....
5 years	$28,590,098	944	2,404,344	1,206,404	3,700,748	1,857,274	.....	....
Average	4,765,016	157⅓	480,868	259,281	740,149	371,455	.....	....

Interest was paid on share capital during the progress of construction. The dividend on the average capital of the last four years was about 6 per centum. The total length of the Ohio and Pennsylvania Railroad was 187 miles of which 49 miles were in Pennsylvania and 138 miles in Ohio.

The *Ohio and Indiana* Railroad was chartered in Ohio March 28, 1850, and in Indiana January 15, 1851. The company was organized July 4, 1851, and the road placed under contract January 28, 1852. Construction was commenced in the spring of the same year; and the road completed in sections as follows: from Orestline to Forest, January 18, to Delphos, June 10, and to Fort Wayne, November 1, 1854. The cost and business of the road during its seperate existence was as follows:

Fiscal Periods.	Cost of Road.	Miles of Road.	Gross Earnings. Passenger.	Freight,&c.	Total.	Operating Expenses.	Earnings less Exp.
1854 (11 mos.)	$2,786,793	67	$79,429	$37,450	$116,879	$71,848	$45,031
1855	2,963,259	131	148,316	98,863	247,179	196,857	50,822
1856 (7 mos.).....	3,432,053	131	64,029	39,664	103,693	93,907	39,786
2½ years.....	$7,985,110	329	$291,774	$175,977	$467,751	$332,612	$135,139
Average	2,661,703	109	116,709	70,391	187,100	133,045	54,055

No dividends were paid on the share capital. Of the total length of the road 138 miles, about 112 miles are in Ohio, and 19 miles in Indiana.

The *Fort Wayne and Chicago* Railroad was chartered in Indiana April 8, 1853, and in Illinois February 5, 1853. Construction was commenced in the summer of the same year. The section from Fort Wayne to Columbia 20, miles, was opened for business January 23, 1855. The work westward of Plymouth had been suspended since July 1, 1854, and only that portion between Plymouth and Columbia was being prosecuted at the period of consolidation. The road was finally completed to Chicago January 1, 1859. Of the total length of this road 147 miles, 134 miles were in Indiana, and 13 miles in Illinois.

At the time of the consolidation the stock, funded debts and floating liabilities of the several companies were as follows:

Capital Stock—Ohio and Pennsylvania	$2,651,030	
" " Ohio and Indiana	1,504,377	
" " Fort Wayne and Chicago	1,787,484	
		$5,942,891
Funded Debt—Ohio and Pennsylvania	$4,091,000	
" " Ohio and Indiana	1,702,000	
" " Fort Wayne and Chicago	1,204,000	
		$6,997,000
Floating Debt—Ohio and Pennsylvania	$398,126	
" " Ohio and Indiana	341,050	
" " Fort Wayne and Chicago	312,760	
		$1,051,936
Total stock and liabilities of the three companies		$13,991,827

The relations of the several companies to each other as stock and bondholders at the date of consolidation were these:

The Ohio and Pennsylvania Company held—		
Ohio and Indiana Railroad Stock	$100,000	
" " 2d mortgage bonds	100,000	
" " 3d " "	205,000	
Fort Wayne and Chicago Railroad Stock	100,000	$505,000
The Ohio and Indiana Company held:—		
Fort Wayne and Chicago Railroad Stock		213,650
The Fort Wayne and Chicago Company held:—		
Ohio and Pennsylvania Railroad Bonds	$100,000	
Ohio and Indiana Railroad Stock	16,750	
" " " unsettled account	15,000	131,750
Total interchanged stock, bonds, etc.		$850,400

This sum, exclusive of interest, was merged, thereby reducing the capital stock and debt of the new company by the same amount; but rendered nugatory by the addition to the capital stock account of the company of 20 per cent. premium allowed on the stock of the Ohio and Pennsylvania Company, and 6 per cent. on that of the Fort Wayne and Chicago Company, the object being to equalize said stocks. Purchases were subsequently made from several of the shareholders of the Ohio and Pennsylvania Company who had protested against consolidation to the extent (at par) of $125,850, thereby saving the premium of 20 per centum.

The amounts expended on the several roads at the time of consolidation were:

Ohio and Pennsylvania Railroad	$6,186,088
Ohio and Indiana Railroad	3,432,053
Fort Wayne and Chicago Railroad	1,916,704
Total cost on consolidation	$11,534,845

At that time the number of locomotives and cars constituting the rolling stock of the several roads was as follows:

	Locomotive Engines.	Cars. Pass.	Freight.	Total.
O. & P. R. R.	51	53	608	661
O. & I. R. R.	13	18	245	263
Ft. W. & C. R. R.	6	..	12	12
Total	71	71	865	936

The Fort Wayne and Chicago Company had also assets, besides what was represented in the work done amounting to $1,430,000 which passed to the consolidated company.

The consolidation of these companies was authorized by the legislatures of the four states which the line of road traverses, viz: of Pennsylvania, April 16, 1856; of Ohio and Indiana by their respective General Railroad Laws; and of Illinois, February 28, 1856. The Articles of consolidation, dated May 6, 1856, were agreed to, by the Ohio and Pennsylvania Company, June 2; by the Ohio and Indiana Company, June 24, and by the Fort Wayne and Chicago Company, June 12 of the same year; and the consolidation was perfected, August 1, 1856, on which day the new company assumed possession of the joint property.

At the period of consolidation the road was in operation from Alleghany City, Pa., to Columbia, Ind., 388 miles. It was opened to, Plymouth November 10, 1856, to Rock Island Junction, November 29, 1858, and to Chicago, January 1, 1859. The bridge over the Alleghany River was completed, September 22, 1857, and for the first time trains entered the city of Pittsburg, the old eastern terminus of the road having hitherto been on the west side of the river.

The consolidation of the three companies accomplished its object so far as unity of action was concerned but failed to secure all the means needed for the proper completion of the road. The company to forward its plans executed a general mortgage of the whole property, January 1, 1857, subject to existing mortgages for $10,000,000 in 7 per cent. bonds. Of this amount $3,500,000 were termed construction bonds and were set aside to complete the road into Chicago, and $6,500,000 were termed redemption bonds, held by trustees and set apart as a timely provision by sale or exchange, for the funded debt of the company.

Financial embarrassment, however, had attended the company from the outset and led to various expedients for relief. The coupons due in October 1857 were not paid, and in the following month the company suspended payment on its floating debt. To relieve the position and to allow the earnings to be applied to the discharge of current liabilities, the bondholders consented to fund the coupons falling due to April 1859, into 10 per cent. five years bonds dated April 1, 1858. This plan was only partially carried out, and default was again made on the interest falling due July 1, 1859. Under these circumstances, the road was now placed in the hands of a receiver, excepting that portion lying in the state of Pennsylvania which had previously been placed in the hands of a sequestrator on the of suit local creditors.

The relief sought by these measures was not attained, and it was soon seen that the temporizing would only hasten the impending ruin. To meet

these circumstances a plan of reorganization was proposed and adopted by the several parties in interest. This plan provided for the sale of the road and the formation of a new company for which the proper legislation was obtained and to which the road was to be conveyed by the purchasers, and the several kinds of indebtedness or liabilities of the three original companies to be funded anew.

It is a matter of historical interest to have the proper financial statement of affairs at this period to fefer to. We have therefore given it in full as an appendix to this article.

The refunding of the stock, debt and liabilities of the company under the agreement before spoken of provided for new issues as follows, viz:

1*st mortgage bonds*, $5,250,000. These bonds were issued in exchange for the first bonds of the old companies, with their coupons, at their nominal value; the new bonds to bear interest from Jan. 1, 1862 at the rate of 7 per cent. payable semi-annually, in six classes, one class on the first of each month; the principal redeemable July 1, 1912, and after July 1, 1866 at the option of the company. The holders of these bonds are entitled to vote at stockholder's meetings every $200 as one vote.

2*d mortgage bonds*, $5,100,000. These bonds are like the previous series, but interest not to commence before April 1, 1862. For this class of bonds were exchanged the second and third, and construction bonds of the old companies and of the Pittsburg, Fort Wayne and Chicago Co., etc.

3*d mortgage bonds*, $2,000,000. These bonds entitle the holders to 7 per cent. after April 1, 1862 payable out of such balance of net earnings as may remain after paying the interest and sinking funds previously provided and maintaining the road. The holders are entitled to one vote for each $100 held by them. Recently the interest on these bonds is made payable semi-annually. All debts not included in the 1st and 2d series to be exchanged into this third series.

The *share capital* of the new company was limited to $6,500,000 unless by permission of the 1st and 2d bondholders. This was ontained in 1864, (April 7,) the issue for 1864 being limited to $3,500,000 with the stipulation that the proceeds be applied only to construction and equipment.

The property was sold and purchased by the agents of the company Oct. 24, 1861, and subsequently conveyed by them to the company, which had re-organized under the legal provisions and agreements, the details of which are given above.

Under agreement the Pittsburg, Fort Wayne and Chicago Railroad and the Cleveland and Pittsburg Railroad are operated conjointly, the gross earnings (each company paying its own expenses) being divided in the proportion of 73½ per cent. to the former, and of 26½ per cent. to the latter. The Pittsburg, Fort Wayne and Chicago Company also receives $85,000 from the C. and P. Company for the use of the portion of their line between Pittsburg and Rochester.

The condition of the railroad and equipment at the end of the fiscal years 1862, '63 and '64; together with the operations, earnings, etc., of the company for the same years are embraced in the following statistical summary:

SCHEDULE OF ROLLING STOCK.

Dividend No. 4 paid January, 1865, out of income of 1864								204,265	2½

The earnings and expenses for 1856 are for 5 months only, viz., from Aug. 1, to Dec. 31.

To comprehend more fully the development of the company's property, the annual increase of earnings should be compared with the increase of capital invested. The amount of capital at the close of each year since the consolidation has been as follows:

	Shares.	Bonds.	Floating.	Total.
1857	$5,258,837 66	$7,371,000 00	$1,418,922 09	$14,048,759 75
1858	5,288,950 27	8,453,000 00	889,159 88	14,631,110 15
1859	5,351,761 84	8,289,500 00	1,916,517 04	15,557,778 88
1860	5,481,869 32	9,306,485 00	1,612,754 22	16,401,108 54
1861	5,480,865 54	9,660,825 00	1,860,430 87	17,002,121 41
1862	6,500,000 00	12,935,173 00	.....	19,435,173 00
1863	6,500,000 00	12,935,173 00	.....	19,435,173 00
1864	8,181,126 00	12,657,000 00	.....	20,838,126 00

In the floating debt are included coupons past due and unpaid—1858, $9,341; 1859, $252,150; 1860, $912,677, and in 1861, $1,591,212.

The reports of the company will be found in the AMERICAN RAILROAD JOURNAL, as follows: Report for 1856, Vol. 30, p. 587; for 1857, Vol. 31, p. 578; for 1858, Vol. 32, p. 330; for 1859, Vol. 33, p. 391; for 1860, Vol. 34, p. 377; for 1861, Vol. 35, p. 406; for 1862, Vol. 36, p. 406; for 1863, Vol. 37, p. 436 and 472, and for 1864, Vol. 38 p. 322.

APPENDIX.

The financial condition of the company on which the provisions (referred to in a former paragraph) were predicated is shown in general account as made up December 31, 1861, as follows:

Capital Stock		$6,249,432 81
Funded debt, ($10,264,995 00.) viz:

Bessemer Steel.

The process of manufacturing iron known as the Bessemer process was patented as long ago as 1856, but it is only recently that its value has been generally acknowledged. It is now adopted largely in England and on the continent, and has found its way into this country. In the conversion of the original ore into iron it is claimed for it that it secures a complete combustion of the carbon, and produces metal free from cinders, oxide and other extraneous matter, and when converted into steel it is found to have the greatest tensile power, to be free from flaws, and to have enormous strength. This article is now extensively used in Great Britain for tyres, rails, axles, connecting rods, crank pins, plates, shafting, and in fact every article requiring strength and homogeneousness of material. It has already reached a production of 100,000 tons per annum, and there is every evidence that its production is increasing very largely in Great Britain, on the continent, and now in the United States. Messrs. Winslow, Griswold and Holley, of Troy, N. Y., who have commenced the manufacture of this material in the United States, have issued the following circular:

"TROY, N. Y., April 15, 1865.

Having commenced the manufacture of cast steel under the Bessemer patents, we are now prepared to furnish railway tyres without welds, rails, axles, piston and connecting rods, crank pins, boiler and ship plates, shafting, cannon and projectiles, bars and rods, spring steel, forgings to shape, ingots, and machinery castings to pattern, of this material, up to 5,000 pounds weight. Preparations are making to produce masses of 25,000 pounds weight.

This manufacture, developed by Mr. Bessemer in 1856, has already reached a production of about 100,000 tons per year in England and on the continent, and is largely superseding wrought iron for the purposes named above. Railway companies like the London and Northwestern, and and Iron Works like the Ebbw Vale and Dowlais, have erected apparatus to produce 200 to 500 tons each per week. Bessemer Steel has more recently been used in the United States, in the form of axles, rails and plates.

The grand advantage of this material over wrought iron, especially in large masses, is its perfect *homogeneity*, the absence of welds and consequent imperfections, such as the lamination of rails, blisters in boiler plates, and cold shuts in heavy forgings.

Its *tenacity* is double that of wrought iron, considering the abovementioned and unavoidable defects of wrought iron in welded masses. In the bar, it is one half greater than that of wrought iron, or from 90,000 to 120,000 lbs. per square inch, according to the degree of carbonisation required for different purposes.

The nature of the Bessemer process renders the product more *uniform* than wrought iron can be, in all its qualities.

The *stiffness* of this steel, proportionate to its tenacity, adapts it to girder and ship building, and peculiarly fits it to resist compressive as well as tensile strains, as in piston rods.

While the *elasticity*, and hence the safe working load of the lowest steel is much greater than that of wrought iron, its *ductility* is equal to that of the best wrought iron. Two-inch bars may be bent double when cold, under the steam hammer. This property insures its safety in the form of axles and tyres.

The *hardness* of the material, as well as its homogeneity, increases its durability in the form of rails, guns, and parts subject to abrasion.

This steel is peculiarly adapted to plates requiring intricate *flanging*, and subjected to the immediate *contact of fire*. For a given strength it may be thinner than wrought iron; it does not blister, and the carbon in it protects it against corrosion.

We are also prepared to grant licenses, upon reasonable terms, for the manufacture of Bessemer Steel in the United States, and to furnish working drawings for the necessary plant and machinery.

We are aware that there are other claimants for this process of making steel, but we have purchased the Bessemer patents and erected works, after a legal investigation which satisfies us that these other claims are not well founded, and that both the process and the machinery necessary to practice the process successfully, are the inventions of Mr. Bessemer.

And we take this opportunity to caution all persons who are desirous of entering upon the manufacture of steel by this process, that should they employ it under cover of alleged rights of any parties, other than ourselves as the assignees in the United States, of Mr. Bessemer, we shall hold them legally responsible to us in damages."

We make the following extracts from the London *Engineer* of March 31st:

We are in a position to give some particulars as to the results already attained in the use of Bessemer metal for rails, ships' plates, etc., and these, it will be seen, are such as to leave no doubt of the vast importance of this material for the purposes of the engineer and constructor. In the year 1861 the London and Northwestern Railway Company purchased 500 tons of rail blooms from Messrs. Bessemer & Co., and when rolled into one of these, taken at random, was put down in a part of the line near Camden Town, where the traffic was unusually heavy. The wear of the contiguous iron rails and that of the steel rail was carefully noted by order of the Board of Directors. On the application, in 1864, of a gentleman interested in the subject, the following particulars were kindly furnished him:—The rail was laid down May 9th, 1862, and when examined in September, 1864, "there were little signs of wear." 8,000 goods trucks pass over this rail in twenty-four hours, and it is estimated that 7,000,000 trucks passed over it in the two years and four months covered by the report. The neighboring iron rail, also put down new on the 9th of May, 1862, was turned in July; new rail September 9th, 1862, turned November the 6th; new rail January 6th, 1863, turned March 1st; new rail April 29th, turned July 3d; new rail September 29th, turned December 16th; new rail February 16, 1864, turned April 12th; new rail August 6th, still down at the date of the report. So the Bessemer rail had nearly worn out both sides of seven rails. The steel rail, it is since understood, is still in use, in good condition, and without having been turned. Here if ordinary rails are worth £7 per ton, the Bessemer rail would be worth very much more than £50. The traffic through the Crewe station is, it is well known, very great. Formerly the iron rails were worn out there in four months, each side of the rail giving two months wear. The station was laid throughout, November 10th, 1861, with steel rails rolled by the company from ingots made by Messrs. Bessemer & Co. None of these rails have yet been turned, and it is understood that they appear likely to go two years more before even the first face is worn out. Here the comparison with iron would appear to be something like twenty or more to one.

Ships' Plates.—In the case of ships' plates, Messrs. Jones, Quiggin & Co., of Liverpool, employed Bessemer cast steel almost exclusively in their ships built in 1864, and they have used large quantities of it since 1860. This firm last year launched twelve sailing ships and eleven steamers, the frames of which were puddled steel and the plates of Bessemer cast-steel. The plates are, on the average, five-eighths as heavy as iron used in like vessels, the saving in weight being, of course, added to the useful burden of the vessel on a given draught. Among the steamers will be recognized the names of the well-known blockade runners: the Colonel Lamb and Hope, each 281 feet long, with 350 horse engines; the Rasine and Raiby, 260 feet long, with 300 horse engines; the Cora Bellt, Wasp and Hornet, each 250 feet long, with 220 horse engines; and the Lynx, Fox, Bat and Owl, varying from 532 to 771 tons.

Fine Tools.—Messrs. Benjamin Hick & Sons, of Bolton, employed Bessemer tool steel in their works for some years, and, we believe, are still using it of their own make—they have become licensees some time since.

Interest and Dividends.

The Lehigh Coal and Navigation Company will pay a dividend of $2 50 per share, free of tax, on demand.

The Little Miami railroad company have declared a dividend of five per cent., free of United States Tax, payable on the 5th inst.

The coupons of the Toledo, Peoria and Warsaw railway company will be paid at the office of Messrs. Tanner & Co., No. 50 Wall street, less U. S. Tax, on presentation.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railroad fo the week ending June 2d, 1865, was as follows:

Passengers	$26,732 69
Freight and live stock	27,948 22
Mails and sundries	2,603 24
Total	$57,184 15
Corresponding week of 1864	52,008 83
Increase	$5,175 32

The earnings of the Grand Trunk Railway for the week ending May 27, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$46,170 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	67,154 00
Total	$177,360 00
Corresponding week, 1864	109,273 00
Increase	$8,087 00

The earnings of the Chicago and Rock Island Railroad for the fourth week in May, 1865, were | $77,151 00
Corresponding week of previous year | 68,615 00
Increase | $8,536 00

The earnings of the Chicago and Northwestern Railway for the 4th week of May, were | $212,126 08
Corresponding week of 1864 | 163,095 93
Increase (30.06 per cent) | $49,030 15

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending May 31, were:

	1865.	1864.
Passengers	$4,017 32	$3,808 78
Freight	22,068 11	16,780 62
Express	297 80	104 16
Mail	296 58	296 58
Total	$26,679 81	$20,940 14

Receipts from January 1 to May 31:

1865	$211,193 02
1864	200,176 08
Increase	$11,016

American Railroad Journal.

Saturday, June 10, 1865.

Stock Exchange and Money Market.

We are gravely informed by a cotemporary that we have three hundred millions of bonds abroad, and in the event of their sudden return "we should be entirely bankrupt, the specie in the loyal States hardly exceeding forty-six millions." If this last statement be true, and the avalanche should come, we presume there would be no buyers for gold, for we should have no gold to pay for them; they would be unsaleable and remain in the hands of the foreign holders. The reshipment of bonds to this country either through fear or design, does not compel us to buy them any more than any other commodities which foreign dealers send to this country on which to raise money. The presumption is therefore a very violent one and evidently forced. On the contrary such is the growing feeling abroad in favor of this country, we believe while a spirit of speculation or of enmity might throw a portion of those bonds upon our market, especially if the Bank of England should get frightened at losing two or three millions of coin very unexpectedly, as we are told it occasionally is, yet the great majority of the foreign holders who like good investments and are able to hold them can have no such views, but will not only continue to retain them, and pocket their interest but "cry for more." The great political and financial stability of this country, and its Government can no longer be denied or even fairly disputed, and its indirect if not direct influence will be felt more than ever throughout all European financial circles. But suppose quantities should be thrown by design upon this market. The same authority in the same article from which we have already quoted assures us, that "*the supply of cash gold is abundant, and it is generally lent without interest,*" a fact that shows it is plentiful among the dealers in this commodity.

Besides the event of a return of three hundred millions at one time is impossible, such a transaction has never yet been recorded in all commercial history, and would in the very act upset all commerce and endanger the property itself. We would ask whoever heard of three hundred of millions of any kind of property being suddenly moved from one country to another? And taking the worst view of it we may, it is clear if we have sold three hundred millions of dollars of bonds to foreigners, we have received the proceeds for them and could repay them in some merchantable and paying form. We are not at present liable for more than the interest. This has been promptly paid and will continue to be. We therefore dismiss the idea of our being "entirely bankrupt," we do not believe we have lost the money we have received for these bonds, but that it remains here in some tangible form ready for legitimate and honest use, whether in active trade or appearing in some new form. On the contrary, we think the fear on the other side will eventually be that we shall be too ready to pay these off, and that interest will cease too soon. The fact is that the whole amount of the bonds held abroad is only about 100 millions, and therefore the whole argument tumbles to the ground.

But we have another class of alarmists who are equally at fault; those who presume to talk about repudiation. If this doctrine was carried into the private affairs of these persons, we know no one who would be a greater loser than the erratic agitator who for political objects, no other, has absurdly promulgated it. The immense fortune of Mr. Wendell Phillips for example, might soon melt into thin air, if his own principles were applied to himself, and if his debtors should act under his own teaching. What the effect of such language may be in England, where everything is seized upon to damage the credit of our National securities we cannot yet foresee, but here it is set down as the raving of an impracticable and unphilosophical zealot whose egotism is supreme, whose dogmas are heterodox, and whose ultra opinions will never be listened to by the intelligent people of this country. Repudiation is no word to be tolerated in these United States, and he who has dealt most largely in this as well as other discreditable doctrines, stands before the

world this day in a most humiliating attitude. If Mr. Phillips is the real friend of immediate and universal suffrage among the blacks, he has damaged their case most materially by coupling it with repudiation. Our foreign readers may rest assured that we are going to conduct our financial affairs in the soundest and most unexceptionable manner, after our old fashion, and that we shall set the old world an example in this as well as in many other things they will do well to follow. We mean to pay our National debt, principal and interest. If we could devise the right method of doing so at once, the people would eagerly adopt it. There is but one feeling on this subject throughout the country, and something will yet come out of it, of this we feel assured.

Our last advices from Europe are to the effect, that our securities are again advancing in London the most unfriendly Bourse in Europe. We notice how every unfavorable rumor is caught up there to produce a decline in the price and to favor their own 3 per cents, to alarm capital out of its present tendencies, and to sow distrust in the public mind. It is really amusing to see how in the face of repeated contradictions of such statements by the occurrence of actual events themselves, every, even the slightest fictions are seized and reproduced on the London Exchange. We were to have eternal war, the South would never yield, the guerillas were to increase and multiply, and finally Texas the last ditch, was to be impregnable and would be never abandoned. All this has proved to be moonshine, the thinnest, most unsubstantial. We wait with some feeling of the ludicrous to see what will be the next device when they hear that even Texas has caved in.

Since our last we have received the official statement of the Secretary of the Treasury of the extent and character of the National indebtedness, and we give it in full in another place. It is up to the 31st of May, as late as it was possible to give it, and the following is the recapitulation of his statement:

	Amount outstanding.	Interest.
Debt bearing interest in coin	$1,108,113,841 80	$64,480,489 50
Debt bearing interest in lawful money ..	1,053,476,371 04	60,158,384 52
Debt on which interest has ceased	786,270 09	.....
Debt bear'g no interest	472,829,270 57	.....
Totals ..	$2,635,205,753 50	$124,638,874 02

LEGAL TENDER NOTES IN CIRCULATION.

	Amount.
One and two year 5 per cent. notes...	$50,856,380
United States notes, old issue.....	472,663
United States notes, new issue.....	432,687,966
Compound int. notes, act of March 3, 1863	15,000,000
Compound int. notes, act of June 30, 1864	160,143,620
Total	$659,160,569

The sum total is $2,635,753 50, from which we must deduct the amount on which interest has ceased, $786,270 09, and that which bears no interest, $472,819,270 57—total, $473,615,540 66. And our actually funded debt is $2,161,590,212.84. We have always contended and still contend that the legal tenders or non-interest paying debt will never have to be funded, that they will continue to be useful and in demand until they are absorbed in the internal revenue receipts which are large and increasing, and that as the premium on gold is generally on the decline for commercial reasons, their absorption and cancellation will be an easy task for the Treasury. This funded debt is therefore what we have chiefly to keep in view in the future, and while it is in fact so much capital, a bond of union also, and a good medium for the exchanges of other values, it is not half the debt of England, with much more real security and positive and increasing resources of every known description. A country that adds 12 per cent. a year in a decade to its profits, and nine thousand millions to its capital during the same period, need not feel at all alarmed at the prospect of being called into pay 2,000 millions within even a brief period. We shall not call upon more than one generation of our people to help us in discharging our obligations, though if we followed the example of other nations we might easily do so. There is no people on the globe more opposed to National indebtedness than ours, and twice we have liberated ourselves from it by payment in full. This we shall do again.

The gold market is quite tranquil. The rates remain about as they were with a tendency downward. The recent sale of 8,000 bales of cotton by the Government at fair prices all taken it is supposed on foreign account is equivalent to bringing about two millions of exchange into the street, and gold accordingly declines, but it is further stated that the Government is now in possession of 350,000 bales obtained through the late successes of our army in the South, which will be in the market as soon as practicable, and will produce aalmost eighty millions in gold which may finally come in payment from the other side. In addition as restrictions in the cotton trade have been taken off, and the cotton regions particularly upon and beyond the Mississippi are now allowed to profit by the remission of restrictions the movement is already commenced on a large scale. We hear from Memphis, by way of illustration, that the supplies of cotton coming into that place already are assuming a marvellous extent. It is also announced that the demand for the long wanted and useful manufactures of the North is not only enormous, but can be met only by equally enormous quantities of the staple. So that it is now estimated that the quantity still there is double of the previous calculations, and this will all come into the hands of the North and West in return for their indispensable products. We may give one fact to show how this is working. All the furniture manufacturing houses in this city are nearly denuded of their stocks by the Southern demand, and the orders they have on hand task all their skill and capital to execute. It will thus be seen that the Money Market of New York will keep right by the force of events, and as our imports continue light, we see nothing like a convulsion or drain of specie in the present or in the future. We have an internal trade of which our official statistics take no account. The commerce between the States is greater in value annually than that of England with the whole world. Political economists do not generally think of this. They look principally at the condition of our foreign commerce, but do not consider what an enormous exchange is going on among ourselves.

This is the secret of our great prosperity, and really makes us independent of the world. Another fact it is well enough to mention in reference to the strength of our financial position in respect to foreign connections. We learn that there are millions of pounds of the best tobacco ready for market in the South, which the war has prevented from being sent out of the Country, and this too we shall feel in the future of our foreign exchange. At Lynchburg in Viriginia alone, the quantity on hand is represented as being enormous. We cannot therefore indulge in the luxury of grief, as is the habit of some of our cotemporaries. On the contrary we see the silver (and gold) lining of the clouds that so lately lowered upon us, and look for a long career of National prosperity.

The money market wears a cheerful look, it is cheap as ever. Enterprise in the right direction is in no danger of any want of means, and if we look at the traffic on our railways, and the steady increase of their earnings, we see that the world is more astir than ever. If there is any want of confidence in railway shares, it is mainly to be attributed to the manner in which they are manipulated by their Managers for stock jobbing purposes, and we are happy to perceive where the symptoms of this are unequivocal, the public withdraw their confidence from them, and they are left in the hands of those who have made them the instruments of speculation.

Some of these manipulated companies are now scarcely quoted any more in the street, and ought not to be. On the other hand the best managed companies are entirely beyond the reach of these operators, being in the hands of steady holders who are satisfied with their property. We suppose that on the return to the old state of things we shall see great steadiness in railway securities, where good management is understood to be the rule, and also the exception. We are pleased to record a marked improvement in Railway shares, with the prospect of a further advance, as may be demonstrated from the operations of the past week.

Government securities are in good demand, notwithstanding the 3d series of 7-30s remains for subscription. It is filling up as rapidly as is desirable, and may be set down as averaging a million and more a day. The "option" of the Secretary appears now to have been a prudent arrangement on his part, and opposition to it has mainly died away. It is said in some circles that further loans may yet become necessary, but we do not see it. If the army and navy expenditures are cut down as fast as it is supposed they are and will be, we shall not only not want any more loans but will have an annual surplus of from 60 to 100 millions. So prevalent is this conviction that already it is proposed that our taxation shall be reduced as early as possible at least one third. And no doubt at the next session of Congress which we think, and have long thought will be necessary at an earlier period than that fixed by the Constitution, the proposition for this reduction may be introduced.

Money continues easy and has been loaned at even 3 per cent. on good security.

The balance in the Sub-Treasury on Tuesday

was $41,433,465 40. The delivery of the notes of the 3d series of 7-30s has commenced, and is attended with increased activity in the subscriptions.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Insurance against Accidents.

Our readers will find in another place the advertisement of the New York Accidental Insurance Company, which has a capital of $250,000 fully paid up, and its place of business at 141 Broadway. Among the names of the Officers and Directors we find those of persons of the highest standing in this community. This idea of insuring against accidents has been successfully adopted for many years in England, and the system has been found not only beneficial to the public, but remunerative to the companies. This New York Company has already acquired such a hold on the public favor that it has issued policies to the extent of a million of dollars, and among the assured are many of our most prominent citizens.

The premiums are small, but the advantages are large. In case of death, or incapacitation for business by accident, whether in home or foreign travel, in ordinary or diversified pursuits, the parties insured by this Company may secure ample remuneration for their families or themselves. We do not doubt but that this Company will become a popular one, and be of great public and private utility.

Raritan and Delaware Bay Railroad.

We invite attention to the advertisement of this company in another column. The route is very pleasant in summer, being down the Bay and through the Pines of Jersey, within the cooling influence of the sea breeze nearly the whole distance. There is less dust than by any other route, while the cars are new, clean and comfortable, and the time but five hours—being the shortest, cheapest and best route across the State for passengers going from New York to Camden.

Toledo, Peoria and Warsaw Railway Co.

At the annual meeting of the Toledo, Peoria and Warsaw Railway Company, held in Peoria, May 16th, 1865, the following gentlemen were elected directors for the ensuing year:

Charles L. Frost, of New York; John B. Brown, of Portland; E. Weston, H. G. Marquand, Zeno Secor, Jas. W. Smith, of New York; and Wm. H. Cruger, of Peoria.

And at a subsequent meeting of Directors held in New York, on the 26th ult., the following gentlemen were elected officers for the ensuing year: Charles L. Frost, President; Wm. H. Cruger, Vice-President; D. W. McWilliams, Treasurer; Thos. H. Williams, Assist. Secretary.

Trial of a Steam Passenger Car.

A "Dummy Engine" enclosed in a compartment of an elegant car, filling a space not much larger than that of the platform occupied by the driver of horse cars, made a trial trip in Chelsea recently, on the Lynn and Boston Horse railroad. The trip was highly successful. The engine was built at an expense of $6,000, and weighs five tons. The Lynn and Boston Railroad Co. intend to use the "dummies" on the journey to Lynn.

☞ J. F. D. Lanier, Esq., has been elected a director of the Erie Railway Co., to fill a vacancy.

☞ The certificates of stock of the Pittsburg, Fort Wayne and Chicago Railway Company, are hereafter to be registered at the Third National Bank, corner of Nassau and Cedar streets.

Cleveland and Pittsburg Railroad.

The earnings of this road for five months, viz: December 1, 1864, to May 1, 1865, were $1,013,617 62, against $883,537 34 in the corresponding period of the previous year—an increase of $130,080 28. The following is a statement of receipts and expenses for fiscal year 1864, as per the annual report:

Gross receipts		$2,512,315 50
Operating expenses		1,505,636 54
		$1,006,678 96
Lease of track	$8,5000.00	
P. F. W. & C. div. of earn'gs.	102,689.51	
		187,689 51
		$818,989 45
Interest on bonds		289,109 71
		$529,879 74
Dividends in April, 1864.	$159,253 00	
Dividends in Oct., 1864.	161,355 00	
		320,608 00
		$209,271 74

Railroad Earnings--Monthly.

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of May, 1865, were.....$353,194 00
Corresponding month of previous year 267,126 00

Increase..... $86,068 00

For the first quarter of the present fiscal year, the earnings have been $1,132,761, against $936,-231 in she corresponding period of the previous year—an increase of $196,530.

The earnings of the Chicago and Rock Island Railroad Company for the month of May, 1865, were.....$227,260 00
Corresponding month of previous year 198,679 00

Increase..... $28,581 00

The earnings of the New York Central Railroad for the month of May 1865, were $1,204,435
Corresponding month of previous year. 1,004,435

Increase $200,000

The earnings of the Chicago and Northwestern Railroad in May 1865, were.....$568,903 82
Same period last year..... 466,830 10

Increase (21.86 per cent.).....$102,073 72

The earnings of the Michigan Central Railroad for the month of May, 1865, were....$401,455 65
Corresponding month of previous year 271,552 73

Increase.....$129,902 92

Journal of Railroad Law.

EXEMPTION OF COMPANY FROM LIABILITY FOR ACCIDENTS UNDER SPECIAL AGREEMENT.

The case of the Indiana Central Railway Company against Mundy, decided in the Supreme Court of Indiana, is interesting as illustrating the liability of a railway company for accidents after a contract with the passenger that the latter assumed all risk of personal injury.

The action was brought by Mundy against the company to recover damages for an injury received by him while riding upon a train of cars of the defendant, through the alleged carelessness of the agent of the company. Verdict and judgment for the plaintiff.

The facts are briefly these: the plaintiff shipped on board the defendant's cars at Indianapolis, a steam fire engine, to be transported to Richmond, on which he paid the freight. He also, being desirous of accompanying the engine, with his assistant, procured from the company without further consideration than the freight on the engine, a pass, in the following terms, viz:

"Conductors: Pass free, F. Munday & S. Wicks from Indianapolis to Richmond.

J. S. NEWMAN,
Pres't Ind. Central Railway Co.

(Turn over.)"

On the back of which were printed the following words: "It is agreed that the person accepting this ticket assumes all risk of personal injury and loss or damage to property whilst using the same on the trains of the company."

About the time the train on which the engine was placed was about to start, the plaintiff entered a passenger carriage which was attached to the back end of the train, having inquired and being told that that car was going to Richmond. The train started with the carriage which the plaintiff had entered attached. The train proceeded a short distance when an employee of the company told the plaintiff to get into the car ahead if he was going in that train. The plaintiff went from where he was then standing to get his carpet bag, &c., and went out upon the platform of the car and stepped with one foot across upon the car ahead, but before he could get across upon the other car as directed, the passenger car slackened its speed and separated from the other, the pin or bolt connecting them having been withdrawn without the plaintiffs knowledge, and the plaintiff fell upon the track between the cars, and was run over and severely injured by the passenger car. The car was thus detached by an employee of the company for the purpose of leaving it.

A new trial was asked on the ground that the verdict was not sustained by the evidence, and because the Court erred in giving the fifth, sixth and eighth instructions, and in qualifying the fifth instruction asked by the defendant, as will be hereafter stated.

These several instructions were as follows:

No. 5. "The endorsement upon the pass given to the plaintiff cannot relieve the railroad company from responsibility for injuries sustained by the plaintiff in consequence of gross negligence in running and managing the train.

No. 6. "The endorsement upon the pass cannot relieve the railroad company from responsibility for injuries sustained by the plaintiff, in consequence of the gross and wilful negligence and mismanagement of the agents of the company in running and arranging the train.

No. 8. "The endorsement upon the pass given to the plaintiff cannot be construed as stipulating for wilful misconduct, gross negligence, or want of ordinary care in the running and management of the train by the agents of the company; if it were competent for the company to stipulate for the gross negligence of her agents it could be done only in terms that would leave no doubt as to the meaning of the parties."

The fifth instruction asked by the defendant is as follows:

If the jury find from the evidence that the plaintiff received from the defendant the pass set out in the third paragraph of the complaint, and in the defendants answer indorsed on the back as therein stated, and the plaintiff could read the same, said pass and condition amounted to a contract between the plaintiff and defendant, which it was competent for the parties to make, and the defendant would not be liable for the injuries received by the plaintiff while he was riding upon said train and using said pass. "This charge was given," but the Court added at the end, "except for wilfully gross negligence on the part of the defendant."

WORDEN, J.—Counsel have discussed the question whether a common carrier can by contract exempt himself from liability for the consequence of his negligence. We shall not, in the present case decide that question, it being unnecessary to do so. We may remark, however, that the authorities upon the point seem to be conflicting. In a late case in New York it was held that such a contract with a gratuitous passenger was valid. Wells *vs.* The New York Central R. R. Co., 24 N. Y., 181; *vide* also Perkins *vs.* same, *i. d.*, 196. It is thought that the weight of American authorities is the other way, but we pass this point without expressing any opinion upon it either way.

We go back to the terms of the pass or contract in question. By that the plaintiff "assumed all risk of personal injury and loss or damage to property whilst using the same on the trains of the company." Without undertaking to determine precisely what risks the plaintiff assumed by this contract, we think it clear, under the authorities, that he did not assume any risks arising from the gross negligence of the servants of the defendant in running the train. It may be that there is no foundation for the classification of the degrees of negligence as "slight," "ordinary" and "gross," and we should say negligence without the epithet "gross." *Vide* the cases above cited from New York, also Story on Bailment-Sec. 17 and note.

The following authorities on the construction of the contract seem to us to be in point and decisive. New Jersey Steam Navigation Company *vs.* Merchants Bank, 6 How. U. S., 344. There one Harnden had shipped goods with a carrier to be transported. The Court say (p. 383,) "The special agreement in this case, under which the goods were shipped, provided that they should be conveyed at the risk of Harnden; and that the respondents were not to be accountable to him or to his employers in any event for loss or damage. The language is general and broad, and might very well comprehend every description of risk incident to the shipment. But we think it would be going farther than the intent of the parties upon any fair and reasonable construction of the agreement, were we to regard it as stipulating for wilful misconduct, gross negligence, or want of ordinary care, either in the seaworthiness of the vessel, her proper equipments and furniture, or in her proper management by the master and hands. * * * * If it is competent at all for the carrier to stipulate for the gross negligence of himself and his servants or agents in the transportation of the goods, it should be required to be done at least in terms that would leave no doubt as to the meaning of the parties."

In that case the language of the contract was much broader than in the case at bar. There it was not only stipulated that the goods should be at the risk of Harnden, but it was further agreed that the respondents were not to be liable in any event for loss or damage. In Wells & Tucker *vs.* The Steam Navigation Company, 4 Selden, 375, it was held that where a boat was to be towed "at the risk of the master and owners," the contract had reference to the perils of navigation not arising from the gross negligence of the contractor. That a stipulation in a contract to exempt from gross negligence must be specific and distinct. It will not be implied from a clause containing a general expression which might otherwise be construed." To the same effect is the case of Wright *vs.* Gaff, 6 Ind., 416. There a flat boat was to be towed at the risk of the owner. It was held that the steamer towing the boat was liable for gross negligence.

The above cases in Howard and Selden are approved in Perkins *vs.* N. Y. Central R. R. Co., *Supra* p. 206. *Vide* also Penn. R. R. Co. *vs.* M'Closky's Adm'r, 23 Penn., 526.

The contract in question not exempting the railroad company from gross negligence, but little more need be said in the case. We have not examined the charges given at the instance of the plaintiff very critically, though in the main they

appear to be correct; but if they were not altogether accurate, they were set right by the sweeping charge given at the instance of the defendant, with qualification appended by the Court. By this charge the Court told the jury that, under the contract the defendant would not be liable "except for wilfully gross negligence on the part of the defendant." Of the charges, taken all together, we think the defendant has no just ground of complaint.

On the evidence we cannot disturb the judgment.

Finances of Ohio.

From the Report of the Commissioners of the Sinking Fund, we learn that the total funded debt of the State, Nov. 15, 1864, was...$13,500,751 47

During the six months there has been redeemed of the foreign loan of 1860	$436,169 02	
Of the domestic loan of 1863, (all)	4,000 00	
		440,169 02
Outstanding May 15, 1865		$13,060,582 45

The existing funded debt of the State consists of the following loans:

FOREIGN DEBT.

Loan of 1860, 6	per cent.	interest	..	$705,336 55

East Boston Land Co.

The annual report of the Directors of the East Boston Land Company, shows sales of land during the past year to the amount of $12,491, reducing the net indebtedness of the company to $28,867. The report states that there is an improved state of feeling in reference to the property of the company in the Island ward. The following directors were chosen for the ensuing year:—J. S. Farlow, H. P. Cushing, S. Pierce, T. B. Hall, J. C. Delano, J. Noble, C. Allen Browne, E. A. Kelley, John Pearce.

☞ The Kennebec and Portand railroad company have leased the Somerset railroad for 20 years, at $36,000 a year; and it is expected before the expiration of the lease measures will be taken

by which the two roads may be consolidated. The road and bridges are fast being put in good repair.

NEW YORK

Accidental Insurance Co.,

No. 141 Broadway, New York,

FOR INSURING AGAINST ACCIDENTS of all KINDS.

CAPITAL, - - - - $250,000.

PRESIDENT: WILLIAM A. BAYLEY.
SECRETARY: EDWARD GREENE.

SIMEON BALDWIN, Chairman Executive Committee.
EDW'D W. LAMBERT, M. D., Consulting Physician.
SAMES W. ALEXANDER, Attorney.
HENRY A. BILLS, General Agent.

The business of this company is the insuring against accidents of all kinds, whether by travelling or otherwise.

Annual premium on $10,000, without compensation, $30; with compensation of $50 per week in case of injury, $50. Smaller amounts insured at corresponding rates.

A person insured against death only secures to his family the sum for which he insures if he is killed, provided the death occurs within three months from date of the injury.

IF AGAINST DEATH WITH COMPENSATION,

the injured secures the amount for which he insures to his family in the event of death; and in case of personal injury the amount stipulated until he is able to attend to his affairs, or until twenty-six weeks.

GENERAL ACCIDENTS,

include the Travelling Risk, and also all forms of Dislocations, Broken Bones, Sprains, Bruises, Cuts, Gunshot Wounds, Burns and Scalds, Bites of Dogs, Assaults by Burglars, Robbers or Murderers—the action of Lightning or Sun-Stroke; the effects of Explosions, Floods and Suffocation by Drowning or Choking; where such Accidental Injury is the cause of Death within three months of the happening of the injury, or of total disability to follow his usual avocations.

INDUCEMENTS:

The rates of premium are very low.

No MEDICAL EXAMINATION IS REQUIRED, and those who have been rejected by Life Companies in consequence of hereditary or other diseases can effect insurance in this Company at a very small cost.

No better or more satisfactory use can be made of so small a sum.

CHEAP AND PLEASANT

SUMMER TRAVEL.

RARITAN AND DELAWARE BAY R. R.

NEW YORK TO CAMDEN.

FROM PIER 3, N. R., DAILY, at 11 A. M., connecting with trains for Red Bank, Long Branch, Manchester, Tom's River, Barnegat and Tuckerton.

And 4.15 P. M., for Highlands, Middletown, Red Bank Shrewsbury, Eatontown, Ocean Port, Branch Port, Long Branch, Shark River, Farmingdale, Squamkum, Bergen, Manchester and Tom's River. Fare to Long Branch, $1.

The splendid Steamer JESSE HOYT will leave as above, daily, at 11 A. M., for Camden direct, through in 5 hours. Fare $2; Excursion tickets, good for three days, $3 00.

From Camden take the West Jersey Railroad for Cape May and all parts of West Jersey.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITARY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 25 NASSAU STREET, CORNER OF CEDAR, May 2, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates, with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, their correspondents, together with Messrs. CULVER, PENN & CO., and their friends, being persons of well-known standing and large pecuniary means, have become the owners of its Capital Stock.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors, and will allow four per cent. interest to Banks and Bankers on their credit balances, rendering accounts current monthly.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.
C. N. JORDAN, Cashier.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO R. W. COMPANY, PITTSBURG, May 31, 1865.

REGISTRATION OF STOCK.—Notice is hereby given that, in accordance with an order of the Board of Directors, the THIRD NATIONAL BANK OF THE CITY OF NEW YORK has been appointed Registrar of the stock of this company, and will be prepared to act as such on and after June 2, prox., at which time new certificates will be issued by the Transfer Agents at New York, Messrs. WINSLOW, LANIER & CO., No. 52 Wall street, and countersigned by the Registrar, either to the present or future shareholders, in exchange for those then outstanding. 2t-23 G. W. CASS, President.

New York, Saturday, June 17, 1865.

☞ By referring to the advertisements of Messrs. FOWLE & Co., in another column, it will be seen that they have for sale 2,000 tons railroad iron 50 and 56 lbs. per yard, shortly to arrive. Messrs. FOWLE & Co., are prepared to contract for the Earl of Dudley's celebrated Round Oak Iron for Flats, Rounds, Squares, Half Rounds, Ovals, Convex and Bevilled Iron, Angle Iron, T Iron, Boiler Plates, Sheets, Strips and Hoops, delivered f.o.b. in Liverpool.

Vermont Central and Vermont and Canada Railroads.

The trustees and managers of these roads have published a statement, giving the earnings and expenditures for the fiscal year ending November 30, 1864, from which we make the following extract:

The gross earnings were		$1,413,970 51
Ordinary expenditures..	$966,328 39	
Extraordinary " ..	238,900 00	
		1,205,228 39
Net earnings		$208,752 12

The extraordinary expenditures comprise the cost of 4 new locomotives, $60,000; 6 new passenger cars, $20,400; 65 freight, 10 stock and 50 platform cars, $98,500; iron from Swanton Branch, $60,000—Total as above, $238,900.

The litigation which for many years has embarrassed the property has been adjusted, and the rights of all parties settled by a permanent decree of the Court of Chancery in Vermont.

An arrangement has also been concluded by which the past due rents of the Vermont and Canada were reduced in amount, and then funded and made a part of their capital stock. The capital stock of this Company was thus increased from $1,348,500 to $2,000,000.

This arrangement also provided, that sufficient of the income of the property, after the payment of the accruing rents to the Vermont and Canada Company should be appropriated to the construction of "the Swanton Branch," (an extension of the Vermont and Canada road from Swanton to Canada line,) and that to the extent of $250,000 of such expenditure, stock of the Vermont and Canada Company should be issued and distributed to the holders of the first mortgage bonds, which would thus bring the permanent capital of this Company up to $2,250,000.

This arrangement was afterwards confirmed by a decree of the Court of Chancery in Vermont.

In pursuance of this decree, stock of the Vermont and Canada Company has been distributed to the holders of the first mortgage bonds to the amount of $140,000, and the residue, $110,000, remains to be distributed.

The following statement exhibits the amount of the several securities in their priority, as determined by the decree of the court, viz:—

Capital stock of the Vt. & Canada Co.	$2,250,000	Int. 8 p. c.	$180,000
1st mort. bonds....	2,000,000	Int. 7 p. c.	140,000
2d mort. bonds....	1,500,000	Int. 7 p. c.	105,000
	$5,750,000		$425,000

This statement excludes the interest unpaid on the first and second mortgages, which if required to be paid, would change the result. Whether an arrangement will be made between the first and second mortgage bondholders, by which the accrued interest can be funded or otherwise disposed of, is a subject upon which the Trustees and Managers have no authority to speak. But they suggest that the interest of the property can best be promoted by a spirit of harmony among all the parties.

Since 1860, the branch into Burlington, through what is known as the "sand bank" has been fully completed, including the wharves and buildings at Burlington. The "Swanton Branch" has also been completed during the past season so as to admit of the passage of trains. This road connects at the boundary line in the town of Highgate, with the Montreal and Vermont Junction Railroad, just completed, and a shorter and more direct route to Montreal is thus secured.

A favorable connection is also made at Montreal with the Grand Trunk Railroad, for Western and Upper Canada business, having the advantage of the Victoria Bridge for crossing the St. Lawrence River, and securing to the Vermont Central line, one of the best all-rail lines between the West and the seaboard.

The business of the road has shown a steady and healthful increase for the past six years, except for the year 1861, the first year of the war, when the earnings were largely reduced. This increase may reasonably be expected to continue, unless prevented by a general disturbance of the business of the country. More business has offered than the road had capacity to do, and it has only been by taxing its equipment to its utmost limit that it has been enabled to accomplish what it has. With the addition now being made to the equipment, we believe that with a prosperous condition of the country, the income of the road can be largely increased.

The following statement will show the comparative increase of business since 1859:—

Jan. 1, 1859, to Jan. 1, 1860, earnings.	$733,358 71
" 1860, to Jan. 1, 1861, earnings.	812,194 08
" 1861, to Dec. 1, 1861, 11 mos...	692,755 58
Dec. 1, 1861, to Dec. 1, 1862.....	853,165 54
" 1862, to Dec. 1, 1863.....	1,039,927 25
" 1863, to Dec. 1, 1864.....	1,413,979 51

The Committee chosen by the bondholders to inspect from time to time the accounts of the Trustees and Receivers, and audit them, make a report, in which, after warmly commending the system of keeping the accounts of the Road, they proceed to give the result of their examination of the accounts of the Trustees. We give the following extracts:

Gross earnings of the road, from July 1, 1861, to June 1, 1862, 11 months	$731,417 73
June 1, 1862, to June 1, 1863, 1 year	941,045 59
June 1, 1863, to June 1, 1864, 1 year	1,227,807 35
June 1, 1864, to Dec. 1, 1864, 6 mo'ths	798,385 08

Besides paying the rent due to the Vermont and Canada Railroad Company, as it has accrued, there has been paid from the accumulated net earnings and other sources, the cost of

Burlington Branch, and improvements at Burlington	$377,032 55
Towards construction of Swanton Br.	220,760 16
	$597,792 71

The full cost of the Swanton Branch will be not less than $300,000, though only $250,000 of Vermont and Canada stock was appropriated by the decree for this purpose, and consequently the balance of the cost will have to be paid out of the net earnings of the roads, with no stock to repre-

sent this balance, unless provided for hereafter. This branch, ten miles in length, extends the Vermont and Canada road to Canada line, in the town of Highgate, and there connects with a new road, twenty-two miles in length, built in Canada, called the Montreal and Vermont Junction Railroad. The extension, and the new road in Canada, will enable trains going out of the Boston and Lowell depot in the morning, to enter Montreal over the Victoria Bridge in the evening, and trains leaving Boston in the evening to arrive in Montreal the next morning, without in either case changing cars, and connecting, at the latter city, with the Grand Trunk Railroad, west.

In conclusion, the Committee would say, that there seems to be no reason, why the traffic of our road should not steadily increase in the future, as it has in the past. The only embarrassment in the way of the Managers, which they find, indeed to be serious, is to provide the additional means required, to do the constantly increasing business. Much has been added, in years past, to the rolling stock, but it is still altogether inadequate for present wants. We need, to-day, twenty more engines, and cars to correspond, and if we had them could probably run up the gross receipts of the road this year towards $2,000,000.

Journal of Railroad Law.

NO ONE LIABLE TO A RAILROAD COMPANY FOR PREVENTING THEM FROM BUILDING A TRACK WHERE THEY HAVE NO RIGHT.

Railroad companies are not infrequently found laying their tracks upon land where they have really no right, under the supposition that they have it. This occurs sometimes from a misapprehension of the facts, and sometimes from erroneous impressions as to the law. In the case of the Bangor and Millford Railroad Company against Smith, the Supreme Court of Maine held that such attempts may be resisted by any person, without liability to the trespassers.

The plaintiffs in that case undertook to construct a branch track of their railroad across the public highway to Old town. The defendant, with others denying the right of the plaintiffs to construct the branch track as claimed by them, interfered and prevented the laying down of the same. For this interference the plaintiffs have brought a special action on the case, setting forth their right to construct such branch track and the doings of the defendant, by which they were prevented from constructing it.

The plaintiffs introduced evidence to prove and the witnesses testified, that at the time alleged in the writ, the plaintiffs were proceeding under the direction of their President, to build or construct a branch track of their road over the land of Samuel Veazie, in Old town, with his consent, he being at the time President; that while so engaged on the land of said Veazie, this defendant, with a large number of other men, resisted their further proceedings, and continued their opposition so long that they finally abandoned their work and never afterwards resumed it.

It also appeared from plaintiffs' testimony that their intention at the time was to construct a track across the public highway on a curved line, such as this court, in this case have decided (407 Maine 34) they had no right to construct, that the only purpose of the persons so engaged was to extend the track across the road, and the only object of the defendant and other citizens of Old town, was to resist the laying across the road; that no question was made at the time, whether they were on Veazie's land or not, and that plaintiffs object was not to build merely on Veazie's land to the street, unless the track could be carried across said street, which the defendant as a citizen of Old town, resisted.

Nothwithstanding the decision, the plaintiff now claim damages for being prevented from building said road or constructing the track upon the said Veazie's land, although they had no right to continue it across the road, the track in such case being capable of being used as a side track.

The presiding judge being of opinion that the action could not be sustained to recover such damages, the case was taken from the jury and continued, on report, with the agreement that if the action cannot be sustained, a new suit is to be entered, otherwise, the action should stand for trial.

The plaintiffs moved for leave to amend their writ, if, under the foregoing facts, any action can be sustained, so as to make it conform to their rights.

The opinion of the court was delivered by APPLETON, J. as follows:

When this case was before under consideration, the court ruled that the plaintiffs, not having brought themselves within the provisions of the law could not legally construct the branch track in the way and manner proposed by them.

The branch track described in the plaintiffs' writ, and to which all the evidence relates, crosses the public highway. The branch is an unit. The plaintiffs were desirous of and had commenced building the track as a whole, the writ alleges no intention of building a part of the same. They were undertaking to build the branch track. They had no right to do so. Undertaking, what by law they were not authorized to do, and what, if done, would have been the proper subject for an indictment, they were prevented by the defendant from executing their unlawful purpose.

The action, then, is one in which the plaintiffs' claim damages because they were prevented from doing an illegal act, and for which, if done those engaged in its commission would have been criminally punishable. It is difficult to perceive how the prevention of an offence constitutes a cause of action on the part of the would-be offender, who is interfered with in the commission of his intended offence. It is still more difficult to understand how any damages can have been sustained by reason of such interference. But it is insisted that the defendant's interference took place before the plaintiffs reached the highway over which they were about laying their track. But this does not alter the case. The branch track would be utterly useless if it were not laid its whole length. The plaintiffs had no intention of laying it a part of the way. The grievance complained of is the not being permitted to lay the branch track, not an useless portion of the same. The defendant had no objection to the laying of part of the track so long as it did not interfere with the public highway; and the case shows that the building of the track across the highway was the sole matter in dispute.

The plaintiffs' writ, coupled with the facts admitted in the case, negatives the plaintiffs' right to recover. It alleges that the track in question was "legally and properly located and established by consent of the owner of the land over which it was so established and laid out, and fully confirmed and approved by the Commissioners of Penobscot county, in a proper and legal manner." But it has been determined that the track in controversy has not been legally located and established, and that the plaintiffs had no legal right to construct the same as they proposed to do.

The claim for damages set forth in the second count is, that "by reason of such unlawful proceedings of the defendant as aforesaid, the plaintiffs have wholly lost all right and power to hold said road, and are therefore without right and power to finish said road, and to enjoy the benefits thereof; but on the contrary are daily ever since, and ever must be hereafter, subjected to great additional expense and trouble, as well as dangor, to pass their cars and trains from the mills on their track, and thus to Bangor," &c. In the first count, the damages are set forth as having arisen from the defendant's "having prevented the plaintiffs' resuming and finishing said track until the full time had expired within which the plaintiffs had right or authority to complete or construct said road," &c. The damages are alleged to follow from an interference by the defendant with the plaintiffs, in the enjoyment of certain rights, particularly that of building the branch track. But as the plaintiffs had no legal right to construct and complete the branch track, as they claimed to do, they cannot have sustained any loss from that special cause, and having lost nothing, they have set forth no ground for awarding damages to them. * * * *

The prevention of the doing an unlawful and unauthorized act does not, *per se*, constitute a good case of action on the part of the would-be and incipient wrongdoer, and that is the whole of plaintiffs' case.

The plaintiffs were therefore non-suited.

Toledo, Peoria and Warsaw Railway Co.

This company closed its fiscal year on the 14th ult. The Secretary's report made up to 1st inst. shows the following results compared with the year 1863–'64:

Gross earnings for the year ending June 1, 1865	$489,874 30
Gross earnings for the year ending June 1, 1864	312,395 04
Gain in 1864–'65	$177,479 26
Total earnings as above	$489,874 30
Operating expenses, and road and bridge repairs	278,924 58
Net earnings	$210,949 72
Paid six months' interest on $1,876,000	48,160 00
To credit of income account	$162,789 72

Equipment placed on the road from income acc'nt and sale of bonds, viz:

116 Box cars cost	$114,000 00	
Less due on same	30,000 00	
		$84,000 00
10 Coal cars		8,000 00
8 Passenger cars		14,250 00
160 Tons iron for new track to Destilleries and shops in Peoria		19,200 00
3 New locomotives	$59,000 00	
Less am't due on same	4,190 00	
		54,810 00
Brick round house and machine shops in Peoria		26,000 00
		$206,260 00

Length of road from State line to Peoria 111 miles.

Rolling stock on hand, June 1, 1865:	
15 Locomotives (5 new,) value	$225,000 00
201 Freight cars (116 new)	150,000 00
66 Flats and cattle (22 new)	52,000 00
6 Passenger cars	25,000 00
3 Baggage cars	3,000 00
5 Conductors cars	9,000 00
Value	$464,000 00

BONDED DEBT AND STOCK.

Total bonded debt	$1,600,000 00
Issued to date	$1,376,000 00
On hand belonging to the company to complete equipment	209,000 00
Due assignees C. S. & Co.	15,000 00
	$1,600,000 00
First preferred stock	$1,700,000 00
Issued to date	$1,621,783 80
On hand belonging to the company 782 shares	78,216 20
	$1,700,000 00
Second preferred stock	$1,000,000 00
Issued to date	$904,472 61
On hand belonging to the company 955 shares	95,527 39
	$1,000,000 00
Common stock authorized	$1,700,000 00
Issued to old shareholders of Peoria and Oquawka R. R. Co.	427,700 00
On hand belonging to the company 12,723 shares	1,272,300 00
	$1,700,000 00

Total bonds and stock issued:

1st mortgage 7 per cent. bonds	$1,376,000 00
Due C. S. & Co. assignees	15,000 00
	$1,391,000 00
1st preferred stock	$1,621,783 00
2d "	904,472 00
Common stock	427,700 00
Total amount of bonds and stock issued	$4,344,955 00

The above company was originally the Eastern Division of the Peoria and Oquawka Railroad Company, commencing at the State Line of Illinois, and running west to Peoria, and was reorganized by act of the Legislature of Illinois in 1863.

For reasons of difficulties with contractors the corporation was placed into the hands of Charles L. Frost, Edward Weston, and H. G. Marquand as Trustees, by mutual consent of the bondholders and contractors, and was foreclosed under the several mortgages, and was purchased by the Trustees for the benefit of parties in interest in the old company.

Principal and interest in all the indebtedness was allowed. New first mortgage bonds were issued for first mortgage indebtedness, and first preferred shares were issued for 2d mortgage bonds.

Second preferred shares were issued for contractors claims, and common stock for the original subscribers to the old company.

The company now own the following bonds and stock of the company for the purpose of purchasing additional equipments, and for building the road to Warsaw under the charter of the Mississippi and Wabash Railroad Company, which corporation is to be amalgamated or consolidated with this company, viz:

1st mortgage bonds	$209,000
1st preferred stock	78,000
2d "	95,000
Common stock	1,272,300

Distance from State Line to Peoria .... 111 miles.
From Peoria to Warsaw and Keokuk .. 116 "

Whole length will be ..... 227 miles.

The road west of Peoria is built and running from Warsaw to Carthage 18 miles, and more than 70 miles of the road between Carthage and Canton is now graded and ready for the ties and iron.

Vigorous efforts will be made the coming year to complete the road to Canton in Fulton Co.

The line runs through the most densely populated, agricultural region of Illinois, and forms in connection with the Toledo and Wabash Railroad Company, a direct line from Lake Erie to the Mississippi River, and comes into direct competition with the Chicago and Burlington Railroad Company for the Eastern business from Southern Iowa and Mississippi River, as it will shorten the line to Warsaw and Keokuk some 100 miles. Arrangements are being made to open a direct line from New York and Philadelphia to Peoria and Warsaw *via* Fort Wayne by the New Jersey Central and Pennsylvania Central Railroad Company, which will save some 12 hours in time to Peoria.

When the line is completed to Warsaw it will connect with the Alexandria and Bloomfield Railroad at Warsaw, and the Iowa and Missouri State Line Railroad to Nebraska City, forming a continuous line from New York, to connect with the "Central Pacific" to Fort Kearney; and from Keokuk it connects with the Keokuk, Des Moines and Minnesota Railroad which is now in operation to within 20 miles of Des Moines, and to which place it will be completed this year without doubt.

The Iowa and Missouri Railroad under the efficient management of E. Robinson, Esq., President, has already some 70 miles of road graded, and there appears to be a determination on the part of the people on the line to open this great highway to the Gold Region and to California before any other road in Iowa is completed to Omaha, to connect with the Union Pacific Railroad Company.

The Patent Laws.

The constantly increasing difficulties and injustice that occur both to the public and Patentee through either an actual or supposed use of a patented article, seem to demand some change in respect to the rights of Patentees and particularly to the public. Under the present system of the Patent Office, patents are issued without limit, the Patentee is guaranteed the entire monopoly; and being usually an uneducated and poor man, and elated with a prospective fortune or reward, relying with faith upon the wording of his letters patent, he devotes his entire attention and expends his last dollar for the purpose of putting his improvement before the public. This done, others adopt the plans and use them; they are duly notified of the infringement, but pay no attention. When applied to for damages or reward, deny the validity of the patent, and tell the Patentee to sue. This resort to law is well, provided both parties occupy equal grounds. The Patentee, poor, must farm out his patent to a Solicitor, who either compromises the claim for a song, or else, fatigued by the active defence, abandons the cause to give attention to something more profitable, and the patent dies a national death for want of means to prosecute the parties using it. In fact the Patent Office encourages the genius of our countrymen, promises protection in securing a monopoly, but through a desire to please the applicant by issuing patents too freely, has brought the public to disregard and treat with contempt its opinions as to the validity of a Patent it issues. Patentees decry the way in which they are encouraged by the Patent Office, to exhibit their improvements with an idea that they are to be protected, and are so robbed; while on the other hand the public denounce the Patentee as a black leg, of levying black-mail, etc., etc. Any one who has had experience in matters relating to Patents and the office, will admit the truth of the above. No nation has made greater advancement than the United States in the arts, and this is of course from our native talent which for what it has and will yet do, demands a better protection and security in reaping a reward for its labor, which in no country has been more denied than with us. The majority of our Patentees are denounced as black legs. Indeed, my experience with this class of men through a long and extensive practice in the Patent Laws has brought one rather to advise a client to abandon the idea of securing a patent; for too often have I seen them after raising the means at a sacrifice of their family comfort, fail even to receive back as much as was necessary to pay the required office fees; while their improvements are in use by the rich and unappreciating public. Then, on the other hand, the office has issued so many invalid patents, and our courts are called upon to try causes arising under these, thereby expending our public money in suits which with some alteration might be avoided, and the time saved our crowded courts in examining these questions, which time is so much required for matters more particularly pertaining to their duties. A change is demanded, as well by the general public as Patentees, and the public welfare; and with a united action of those who appreciate the necessity of a revision of our Patent Laws and the mode of issuing them, this can be effected to the general benefit of all classes, and especially Railroad Companies who have by our present system, both done and received injury. I earnestly invite the support and co-operation of all interested in the subject, and would like to have them exchange their opinions and suggestions upon this subject with me by letter or otherwise. With a unity of action we can in the next Congress have these faults corrected, and accomplish an end equally good as any improvement which claims therefor Letters Patent. Communications on the subject will receive prompt and grateful attention by

Yours Respectfully,

OCTAVUS I. NORRIS, At'ty at Law.

Lancaster Pa., June 14, 1865.

☞ The construction of the St. Louis, Vandalia and Terre Haute Railroad is still in agitation, but the progress of the preliminary work is not very rapid.

Philadelphia and Reading Railroad.

In the AMERICAN RAILROAD JOURNAL of 21st January, we gave the President's Report in full. In the present instance we select several important tables referring to the years ending Nov. 30, 1863 and 1864 respectively, and append a general statement of the cost, earnings and dividends since the completion of the road in 1842–'3.

ROADWAY.

Extent of roadway operated by the company in the years 1863 and 1864:

Railroads Operated.	Miles of Track. 1863.	1864.	M. of Sidings. 1863.	1864.	Total. 1863.	1864.
Phila. and Reading	198.50	198.50	63.61	80.51	262.11	279.31
Willow street	3.50	3.50	0.54	0.54	4.04	4.04

1863	25,469,544	6,252,902	2,916,159	3,336,743	889,030	7*
1864	25,469,544	9,269,341	4,961,190	4,923,151	2,618,129	15*

* Paid in stock.

In consulting the above tables it will be found that the coal tonnage varied scarcely at all in 1863–'64. The transportation earnings from coal in 1864, however, show an increase of 50 per cent. over the previous year, and in this item alone added nearly two and a half million dollars to the general revenue.

MINING STOCKS—GOLD, SILVER, COPPER, IRON, LEAD, ETC.

Saturday, June 17, 1865.

Stock Exchange and Money Market.

The great resources of this country are beginning for the first time to be fully appreciated. We really appear to have been in the dark not only about our future, but even the present. As these resources have been doubted by foreign observers, we have the more studied and explained them until we have demonstrated with success, our entire ability to meet our National obligations. That this has been the result of the discussion is evident from the eagerness with which our stocks have been taken on the continent, and from their present demand even in the unfriendly Exchange of London. The truth is we may venture upon comparison with any European Nation in almost any form of production; in some as in mining for silver and gold, we have no competition whatever.

But in our agriculture we are also greatly advanced, and with an illimitable area of soil, a most salubrious climate and unsurpassed fertility we may look forward to general superiority. And even now in some of the results of agricultural pursuits we are quite in advance of some of the principal countries in Europe. Let us apply this postulate to the case of France. Let us take the live stock of that Country, and see how it compares with our own. The French people are industrious, and till their soil with skill and assiduity. The Government of the present day has done a vast deal to encourage the farmers great and small, by the establishment of Fairs and by the distribution of rewards for successful industry. We learn from an agricultural paper, the *Journal de la Ferme* the following facts as to the number of cattle in France.

Of oxen, cows, horses and donkeys there are 14,800,000.

Of sheep, pigs and goats 39,800,000 and of dogs which seem worthy of being enumerated 2,200,000. Our last census informs us that in 1860 there were in the United States.

Working oxen and other cattle	16,787,479
Milch cows	8,668,265
Horses	6,089,942
Asses and mules	1,116,533
Sheep	22,342,537
Swine	32,497,811

Dogs with us are not used for the draught as in France and are never considered worthy of the notice of census takers. But it will be seen by the enumeration, that our working oxen and other cattle are more numerous by almost two millions than all the oxen, cows, horses and donkeys in France together. That our sheep and swine are fifteen millions in excess of all the sheep, swine and goats of the Empire and that our horses are six millions in number alone, and may be estimated as being double in number to that of France. Now as live stock bears a direct proportion to the value of the fields and farms on which they are raised, we may safely reckon that our own, where cattle are raised are more valuable than the French in about the same proportions. And yet France is a rich Country, and has recovered herself from whole generations of bloody and expensive wars both at home and abroad.

There is another interesting comparison that may be made with regard to the area of cultivation, that is worthy of consideration, and this too on the basis of agricultural power. Let us take England for our illustration. This country by itself or as England proper, contains about 50,000 square miles, and it was said by one of her poets "that every rood of ground maintained a man." Taking this standard, that of acres, population and production as going together, we find that we have 25 states and territories containing more square miles than all England, 9 states and territories with more square miles respectively than all Great Britain, and a half dozen with areas twice and thrice greater, and half a dozen more nearly of the same area. Nothing can therefore prevent our final superiority as an agricultural nation, if we were to be nothing else. It is no boast to say this, it is the truth, "only this and nothing more." Let those who from abroad look at this Country of ours, contemplate the future by the light of the present, and perhaps their opinions will become of more value than they have bee

Our advices from London, as late as the 30th ult., are that sales of United States securities for account of the German and Dutch holders had ceased, and that the disposition to realise had been changed to one for further purchases. The London market has been purposely disturbed to prevent any large demand for them. Stories of difficulties with our Government about the Alabama, assurances from such journals as the *Index* and *Herald*, that the war was to be continued by the Texas rebels, and various other statements have been put forth to impair confidence in our National securities. The London *Daily News* admits that British capitalists are getting tired of Consols and 3 per cent. interest, and they have accordingly declined to a price much below that of former years. By-and-bye they will become satisfied as to our stability and ability, and they will then rush into competition for our bonds. We look therefore for an advance, just as soon as they can be made to understand and appreciate our strength, and such an advance as will produce further orders. As it is, it is a curious spectacle, that our securities in the face of the subscriptions to the 3d series of 7-30s, now going on, bring a better price here than in England, and that our market readily absorbs all that may be sent here. It shows our confidence and our ability at the same moment, and is anything but injurious to our credit.

Gold has advanced during the past week, and having left the 30s is now ranging among the 40s using the parlance of the street. While we see no legitimate cause for the rise, commercially speaking, there are causes which in a sensitive market will have due effect. New York has a perpetual committee of foreign agencies in session, representing great financial houses throughout Europe, and they are sharp and vigilant over the interests of their principals. The interests of these principals is to make as much money as possible out of this Country, and to leave no stone unturned under which or on which a little moss may be gathered.

Now if there is a small profit in sending home the 5-20s for conversion into gold it is sure to be done. Thus while rumors, exaggerations, predictions and impressions have been actively made use of to lower the rates on the London Exchange, the difference in the New York market has allowed the opportunity of realising 2 or 3 per cent. profit by sending these securities here for sale. It is worthy of particular notice that while it appears that on the 3d June the 5-20s were quoted at 66 in London they were selling in Frankfort for 70 the same day, a difference of 4 per cent. Yet the English holders do not care to sell in Frankfort to make the 4 per cent. there, but with wonderful impartiality prefer to make their profit out of the Americans, and request remittances in our favorite double eagles for which they are willing to allow ½ per cent. extra over other coin. We think we see in such operations as these, something more than the ordinary purpose of business, something of the old feeling of hostility which marks all the policy, and all the financial schemes of our commercial rival.

An evening cotemporary asserts that a wholesale system of buying gold, or rather borrowing it on the basis of bills of exchange lodged as security is practised in this city, and that the very Banks which are depositaries of the Treasury are engaged in these transactions or rather are parties to them, a most unjustifiable and unpatriotic abuse of a public trust which calls for the immediate interference of the Secretary of the Treasury. It is said the recent sharp rise in gold which has been engineered in this way has, however, wiped out all the profits of these very transactions, and that they cannot be carried on any further at present with success. We see no reason whatever for this rise, in the actual condition of our imports which continue to be on a very moderate scale.

Perhaps the real reason for it may be in the increase during the last month of the total of the funded debt, and the statement that our army is to be kept up to 170,000 men, in our judgment without the least necessity. If the war department and the navy department continue their enormous expenditure, no Secretary of the Treasury, not even Mr. McCulloch the ablest and most popular officer in that department we have had for fifty years, will be able to make any reduction in our debt or taxation. The President must see to this without delay, or we shall fall into great financial difficulties.

It would appear from the week's returns of the associated banks to the 10th of June inst., that their specie reserves have decreased $2,865,928, about the amount of the recent shipments. This also shows an average decrease in the amount still held, and while at the same time that in the Sub-Treasury is $1,000,000 above its average. It also appears that the stock of gold on deposit in the Bank of New York, and from which are almost entirely drawn the sums daily used in the street, stood on the 10th of June at $5,765,617, being a decrease of $1,634,050 from the balance of the previous week. At the same time the associated banks show an increase of legal tenders to the extent of $5,136,390. Exchange has advanced, as might be expected if the operations already alluded to are going on to the extent indicated. These bills of exchange hypothecated as the basis of loans must be provided for whether at a loss or gain. There is no advantage in remitting money to the other side in the face of the recent reduction of the rate of interest by the Bank of England. It is not necessary to remit large sums for commercial indebtedness for none such exists to any extent. There may be orders for goods for the Southern markets to some amount, but until the South gets a currency, or its surplus cotton to the Seaboard, it will be a risky business to import much for that trade. Indeed we learn that already at Savannah, Charleston, Richmond and New Orleans, the supply exceeds the demand and large sacrifices have been submitted to, to convert goods into money. On the whole then we think the present flurry in the gold market is not to lead to anything permanent.

Our latest foreign advices are also to the effect, that heavy failures continue to take place abroad. The London *News* says, "the heavy losses in cotton and *produce* must yet inevitably bring many more houses to the ground." There is evidently an uneasy feeling in that quarter, and apprehensions of commercial disasters yet to come. Looking again to our own affairs we are astounded at the latest advices from our mineral States and territories.

A discovery of a new form of ore in Nevada is announced to produce $10,000 to the ton, and the mineralogists say it is what is known in South America as Arquerite, so called from Arqueros in Chili, the place where it is found. The South American deposit is stated by Dr. Thompson to contain of silver 86-5, and mercury 13-5, which varies a little from the proportions observed in Nevada. This ore is treated by subjecting it to the retort only, the mercury being volatilized and the silver remaining behind. The site of this new ore is in the green ledges of the Pine Mountain district. So in the prominent leads of Montana the average yields per ton of ore are between $121 to $448. The Colorado mines are also doing well, and even the copper ores which have been sent to Europe for smelting are paying many of them 100 per cent. over all expenses. In view of these facts we need not be disturbed at the departure of gold for Europe, even in considerable quantities. There is plenty more where that came from, and we hope that capital will not be slow in applying itself to the production of the precious metals which are lying in our western mountains in amounts not to be calculated.

The Money Market continues to be plentifully supplied at low rates. Its effect on prices is not to be traced in the usual way. Many articles are cheap, and others remain high. There has been a decline in some kinds of provisions, particularly those that are abundant and of a perishable nature, and the Government cattle contracts for army beef have been recently made at a very large decline from former prices.

Railway shares are improving and the market for them is buoyant. Meantime it will be perceived that the earnings of the principal companies are increasing and look very favorably for the stockholders. A large advance on present prices is confidently predicted in the street. Our exports for the week ending June 13, were $2,105,979, showing a considerable increase from the previous week.

Government bonds are not very active, but have slightly improved. The balance in the Sub-Treasury on Tuesday was $40,594,788. The subscriptions to the new series of the 7-30s are coming in rapidly, and at a rate fully equal to the expectations of the Treasury.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Ohio 6s, 1875, 96¾; N. Y. Schoolcraft and Three Rivers R. R.

We learn that the Schoolcraft and Three Rivers Railroad of Michigan, running from White Pigeon on the Michigan Southern Railroad to Constantine, Three Rivers, and Schoolcraft, 24 miles, will soon be completed, the iron having been secured by purchase recently in this city, under the energetic action of Mr. Ransom Gardner, formerly of Detroit, who is constructing the entire line. It is expected that the road will be opened by 1st October. This will be an important feeder to the Michigan Southern Railroad.

Albany and Susquehanna R. R.

Mr. George S. Skinner, the newly appointed Superintendent of the Albany and Susquehannah Railroad, will enter upon his duties on the 15th instant. The cars commenced running to Richmondville on the 8th inst. The track is now being laid to Worcester, Otsego Co.

☞ Thomas Dodamead has been appointed, by the Board of Public Works, general superintendent of all the railroads in Virginia. James L. Morrow, late superintendent of the Greensboro' road, has been appointed superintendent of the Richmond and Danville railroad.

☞ The Oswego *Palladium* says that "the Catskill, Schenectady and Utica Railroad has been bought by the New York Central, and the citizens of Syracuse are not in with the purchase. The project of a railroad from Syracuse to Utica, therefore, to connect with the Catskill, Schenectady and Utica Railroad, has been abandoned."

☞ The Jeffersonville Railroad is to be extended to Albany, Ind., and the work will be commenced as soon as the right of way is secured.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railroad for the week ending June 9th, 1865, was as follows:

Passengers	$27,290 62
Freight and live stock	26,494 25
Mails and sundries	2,139 34
Total	$55,924 21
Corresponding week of 1864	52,871 41
Increase	$3,052 80

The earnings of the Grand Trunk Railway for the week ending June 3d, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$46,355 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	64,535 00
Total	$114,926 00
Corresponding week, 1864	111,125 00
Increase	$3,801 00

The earnings of the Michigan Central Railroad for the 1st week in June, 1865, were.. $76,309 00
Corresponding week of previous year.. 62,077 71
Increase $14,231 29

The earnings of the Chicago and Northwestern Railway for the 1st week of June, were. $159,545 98
Corresponding week of 1864 129,443 88
Increase (23.26 per cent) $30,102 10

The earnings of the Chicago and Rock Island Railroad for the first week in June, 1865, were $86,629 00
Corresponding week of previous year.. 56,989 00
Increase $29,640 00

The earnings of the Chicago and Alton Railroad for the 1st week in June, 1865.. $75,336 00
Corresponding week of previous year. 41,623 00
Increase $33,713 00

The Michigan Southern road earned the first week in June, 1865 $83,021 00
Corresponding week of 1864 67,193 90
Increase $15,828 00

Central Railroad of Georgia.

The Directors of the Central Railroad Company, having taken the oath of allegiance, by order of Maj.-Gen. Gillmore, have been placed in possession of the road and its property, subject to the control and use of the military authorities, when necessary, while remaining here. We understand that there is a favorable prospect of the road being put in running order again, as soon as practicable, as the company propose instituting vigorous measures at once for its repair.—*Savannah Herald.*

Western and Atlantic R. R.

This, one of the most important railroads in Georgia, connecting as it does the Great West with the Atlantic coast, is fast progressing to completion. From Chattanooga it is now in running order to Cartersville, a distance of eighty-eight miles. Fifty miles more, and the whole road will be completed to this point. The large force now at work on the unfinished part of the road warrant us in stating that the whole road will be in running order in the space of three or four weeks.—*Atlanta Intelligencer.*

Oil Creek Railroad.

Extensive preparations are being made to complete the Oil Creek Railroad as far as Petroleum Centre, by August or September next. We are informed that 360 men are to be put on the work this week. This will be alike gratifying to the people of Titusville and Petroleum Centre and the travelling public. The work should never have been suspended.—*Titusville Petroleum Reporter.*

☞ The following gentlemen were elected directors of the Chicago and Rock Island Railroad for the ensuing year: Thomas C. Durant, Francis H. Tows, David Dows, C. W. Durant, E. W. Dunham, Thomas S. Sturgess, Clark Durant, John F. Tracy, Oliver Charlick, Wm. F. Havemeyer, Wm. Whitewright, Jr., John P. Yelverton.

☞ We see it stated that the steamer Sioux City has taken up the Missouri river 180 tons of iron for the track of the Union Pacific Railroad.

Muscogee Railroad.

We learn that the work of repairing this road, between Columbus and Fort Valley, is being prosecuted with energy. Six bridges in all were destroyed, the only one of magnitude being that over Flint River. For this point a new structure, already framed, has been purchased and will be put up at once. Two of the small bridges have been repaired and the work is going ahead on others. It is confidently expected that the whole line will be in working order by the 1st of July.—*Macon Telegraph.*

From the New York Tribune.

A Revolution in Mining.

Gold and Silver are very good things to have, provided they can be used; but Robinson Crusoe would have gladly swopped his lump of the yellow ore, a lump as big as his head, for its weight in tenpenny nails, simply because it was useless for his purposes. Gold and silver whether in big lumps or little, add nothing to the wealth of a country, beyond a certain point, if to bring them nto use costs more than they are worth. Our mineral wealth, enormous as it is, has these limits: first, that only a certain portion of it can be made available because of the cost of separating the precious metals from the ore; and, secondly, that a still larger portion is of no value, since they cannot be separated at all. Any process which shall cheapen the extraction of gold and silver from their ores, will add immensely to our national means, and if it can effectually unlock those that are not now reached at all, a new source of wealth is opened to us of incalculable value. Dr. J. C. Ayer, the well-known chemist of New England, has recently hit upon a method of disintegration and desulphurization of ores, which, if it does all that is promised of it, will make not only the fortune of those who are connected with him in the ownership of the patents, but add largely to the wealth of the Nation itself. If this method shall prove successful we are about to witness a revolution in mining which will so add to our National resources as to make not only the payment of the public debt an easy matter, but which will influence the commerce of the world.

It is claimed for this new process that it is effectual in the disintegration and desulphurization of rock and ores by the application of liquid or liquid solutions while in a heated state. The rock or ore is rendered soft and friable and may be easily reduced to powder, while the volatile metals are, at the same time, expelled and the base metals oxydized. This leaves the gold and silver free for amalgamation.

By the ordinary method of grinding and stamping rock, the gold therein contained is so comminuted, that a large portion of it eludes the mercury and is lost. However finely the rock be pulverized, it is found under the microscope, to be merely split into pieces or chips of stone, each of which contains gold within itself, beyond the reach of mercury, and which is, of course, lost. In the one case the metal is lost because it is itself ground and reduced too fine to be obtained; in the other, because it is not released at all. No successful method of overcoming these difficulties has hitherto been discovered, and, consequently, under the system of extraction now in use, miners only get about one-third of the gold therein contained.

Dr. Ayer's process appears to obviate these difficulties, for while it aggregates the precious metals into globules, by the natural action of heat, it destroys the molecular adhesion of the integral particles of the stone, rendering it friable like chalk. It, in fact, disintegrates the rock into its atoms, so that it may be easily rubbed up into powder. So effectual is the atomic separation that flint glass, or the hardest quartz or agate is made to absorb water like a sponge. Hence it is claimed that ores, treated by it, yield nearly all the precious metals they contain (over 90 per cent.) for the usual means of extraction. The process not only destroys the rock without dividing the gold and silver, but also expels, by chemical action, any volatile metals, such as arsenic, antimony or bismuth, whose presence forbids amalgamation by mercury; while, if sulphurets are present, the oxygen of the decomposed water, used in the process, unites with the base metals, which remain as oxydes, and the sulphur, uniting with the hydrogen, goes off in clouds as sulphureted hydrogen. Hence mines that have been abandoned because they could not although rich be profitably worked, for any of the above reasons, may now afford a munificent return, and even the "tailings" of the working mines yield more gold than has hitherto been obtained from the mines themselves by the old method. Highly sulphureted ores are frequently among the richest that are found, but they have been nearly worthless, in consequence of the insuperable difficulties of extracting the metals from them. Now those difficulties appear to be wholly removed—difficulties which have locked within the rocks an untold amount of bullion. The great points gained, then, are:

1. The integral separation of stone into its atoms, which grinding, stamping or pulverizing, can but imperfectly accomplish.

2. Desulphurization of sulphureted rocks and ores, and their purification from contaminating metals.

3. Expulsion of the volatile metals.

4. Oxydization of the base metals and separation therefrom of the precious metals held in combination.

And, these points gained, it is estimated that the process will yield a working average, say, from eighty to ninety per cent. of the precious metals contained in any kind of rock or ore, and not less than twice as much as is obtained by any method now in use. But beside this there is an immense saving in the expense of mining, as the costly machinery and power for stamping are dispensed with, and the apparatus required is cheap, and may be built anywhere. The following estimate is made:

The average cost of stamping machinery at the mines is $1,000 per stamp. (One stamp can pulverize about one ton per day.)	
The average cost of machinery to stamp 100 tons per day	$100,000
The average cost of furnaces to disintegrate and desulphurize 100 tons per day	20,000
Saving by this process of capital invested for 100 tons per day	$80,000
Assuming that 100 tons of ore are worked daily, containing $100 per ton, they would yield by the stamp process, say 30 per cent.	3,000
The same amount by this process, say 80 per cent	8,000
Daily difference in favor of this process.	5,000

Thus, on an amount of 100 tons per day, there is not only the saving of $80,000 in the first investment, but also a daily saving of $5,000 in the yield.

The results arrived at so far have been attained through a course of careful experiments upon considerable quantities of rock, and to the perfect success of these Dr. Hayes, the State Assayer and Mineralogist of Massachusetts, Professor Silliman of Yale College, and Professor Torrey, U. S. Assayer of the Mint in this city, testify in the most unqualified manner. Whether the same results will be reached by practical application of the process on a larger scale at the mines, remains, of course, to be seen. So great is the confidence felt in it, however, among capitalists and practical men, that a company has been formed in this city, under the title of the "Chemical Gold and Silver Ore Reducing Company," of which Major-Gen. Butler is President, and other substantial men Trustees.

At their office, No. 64 Broadway, they offer their discovery to the public, and their stock and royalties for sale.

The subject is attracting, we understand, a good deal of attention among those interested in mining. Its importance can hardly be over-estimated, if no unforeseen obstacle shall be developed in the practical operations of the process.

If this invention can accomplish what appears to be fairly claimed for it, viz., that it more than doubles the yield of the precious metals from ores, at a reduced cost of extraction, then it is not a wild prediction that within five years our mining interests will have so extended and developed themselves that this increase alone upon their product will pay the interest of our National debt. By one of the singular coincidences which seem too pertinent for chance. Petroleum came in when cotton failed to balance our exchanges with the world; and may we not reverently believe that the unlocking of the exhaustless treasures which our rocks contain, when we are called to pay the immense cost of eradicating our great National sin, is the timely gift of an overruling Providence. Surely our history is showing that, with Nations as individuals,

> "There's a Divinity that shapes our ends,
> Rough hew them as we will."

New Jersey Railroad and Transp. Co.

The annual meeting of the stockholders of this company was held in Jersey City on the 7th inst. The first business transacted was that of organization, which resulted in the selection of Hon. Joseph D. Randolph as chairman, Messrs. John P. Moore, of New York, and Wm. Edgar, of Rahway, Vice Presidents, and Messrs. H. J. Southmayd, of Jersey City, and W. D. Chetwood, of Elizabeth, Secretaries. From the report of the directors, which was read by F. Wolcott Jackson, Esq., Superintendent, we learn that the capital stock of the company remains the same as for the previous year. The funded debt was reduced $7,500, and a floating debt of $145,000 was incurred. An additional track from New Brunswick to the junction with the Camden and Amboy Railroad, a distance of three and one-third miles, has been laid, completing the double track over the road, and bridges for the whole length of the line, except at the Passaic bridge crossing in Newark. New car shops have been erected in Jersey City, to replace those destroyed by fire at East Newark. An engine house, capable of containing twenty-four engines, has also been erected at Jersey City, on property purchased during the year. Nine first class locomotives have been purchased, and added to the equipment, and eighteen superior passenger cars ordered, of which twelve were contracted for with builders in Jersey City and Philadelphia, and six to be built in the company's shop. The whole number should be delivered by the 1st of July. The large expenditure required for the improvements already completed consumed all of the net proceeds of the road for the year, and in addition thereto $145,900, constituting the floating debt. In order to provide for these improvements, it was deemed advisable to increase the capital stock of the company, and application was made to the Legislature for authority to do so, which was granted, and the company has now the authority to increase its capital to $6,000,000. It is proposed to increase the capital to $5,000,-

000 at this time by the issue of stock to be apportioned to the holders of stock on 20th June next, and in calling in an instalment of 50 per cent. on the same on the 1st of July. The remainder of the authorized capital will be issued as from time to time the improvements contemplated are made.

The receipts of the road show an increase over those of 1863, as follows:

From passengers	$240,164 52
From freight	52,683 21
And a decrease from miscellaneous sources of	15,841 15

The expenditures increased for the same period as follows:

Maintenance of road, bridges & buildings	$47,849 04
Repairs of locomotives and cars	22,277 56
Fuel	55,889 74
Operating the road and transporting passengers and freight, including office expenses	68,278 20
Taxes and transit duty	23,540 11

The receipts for the past four years from freight being as follows:

1861	$81,097 31	1863	$161,530 86
1862	110,392 94	1864	214,214 07

The amount paid in taxes, dividends and interest to the State was $68,066 67, and in taxes to the United States, $54,591 17; not including the taxes on the ferry and turnpikes and that paid as taxes on purchases through manufacturers.

The revenue of the road hitherto has been mainly derived from its passenger business, but the income from the transportation of freight has increased since 1860, so that the percentage of the whole business is now nearly 14 per cent. against about 9 per cent. for that year.

The increase is largely owing to the advantages of transportation through by rail, without breaking bulk between points of receiving and delivering, thereby ensuring greater despatch, diminishing the expenses of frequent handling and lessening the liability to loss or damage.

The road has been maintained in proper repair by relaying the same with 1,000 tons of new rails, and by puttting in 28,000 ties, equivalent to a renewal of the whole line in about nine years.

The whole property of the company is now covered by insurance to the value of $50,000, under what is termed a "floating policy."

Nearly four million passengers were transported last year, making a total of about fifty millions who have passed over the road without loss of life or limb to any in the cars. The attention of travelers should be called to this fact, and they should be impressed with the importance of obeying the rules of the company in order to insure their own safety. The report was, upon motion, referred it to the appropriate committee.

The committee appointed to examine the report of the directors, reported that they found the same to be correct, and offered a resolution that it be adopted. They also recommend the employment of returned and disabled soldiers, as the country owed them a heavy debt of gratitude for our present glorious peace. The committee also offered a resolution of thanks to the directors for their careful administration of the affairs of the company, and also to the employes of the company for faithful services.

The following gentlemen were elected directors for the ensuing year: Dudley S. Gregory, Henry R. Remsen, Hamilton Fish, Abram O. Zabriskie, Geo. R. Chetwood, Ferdinand Suydam, Alfred L. Dennis, Martin A. Howell, Nehemiah Perry.

Railroad Earnings--Monthly.

The business of the Illinois Central Railroad for the month of May, 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold	9,381.97 for	$99,263 12
Acres Int. Fund Lands sold	360.00 for	5,634 00
Acres Free Lands sold	1,089.80 for	12,439 55
Total sales during month of May, 1865	10,831.77 for	$117,336 67
To which add Town Lot Sales		3,553 50
Total of all		$120,890 17
Cash collected in May		$115,339 92

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$165,254 67
do.	Freight	269,991 10
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	8,000 00
Total Receipts in month of May, 1865		$454,604 10
Total Receipts in month of May, 1864		406,372 66
Increase		$48,231 44

From January 1 to May 31, 1865, the earnings have been $2,607,142, against $2,034,420 in 1864—an increase of $572,722.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of May, compared with the same period last year, were as follows, viz:

	1865.	1864.
Freight	$315,102 36	$333,755 64
Passengers	253,312 34	170,051 00
Express matter	13,936 34	5,200 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	3,978 25	1,836 25
Total	$601,237 62	$525,751 22
Increase		$75,486 40

Earnings from Jan. 1, to May 31:

1865	$3,565,576 90
1864	2,473,017 73
Increase	1,092,559 17

The earnings of the Cleveland and Pittsburg Railroad for the month of May, were $215,568 64
Corresponding month of 1864 203,514 31
Increase $12,054 33

The earnings of the Chicago and Alton Railroad for May, 1865, were $312,316 00
May, 1864 178,786 00
Increase $133,530 00

From January 1 to May 31, 1865, the earnings have been $1,378,110, against $792,721 in 1864—an increase of $585,389. The receipts for military transportation in 1865, not included in the above, were $439 59 against $621 26 last year, decrease $181 67.

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of May, 1865, were $146,943 40
Corresponding month of previous year 186,747 16
Decrease $39,803 76

The earnings of the Toledo and Wabash Railroad for the month of May, 1865 $138,738 00
Corresponding month of 1864 127,010 00
Increase $11,728 00

The earnings of the Michigan Central Railroad for the month of May, 1865, were $401,455 65
Corresponding month of previous year 271,552 73
Increase $129,902 92

For the year ending May 31, 1865, the earnings were $4,143,481, against $3,434,549 in 1864—an increase of $708,832.

The earnings of the Rome, Watertown and Ogdensburg railroad for May, were $91,172 12
Corresponding month of 1864 72,452 41
Increase $18,719 71

For three months ending May 31, 1865, the earnings have been $248,043 63, against $202,-010 05 in 1864—an increase of $46,032 58.

The earnings of the Hudson River Railroad for the month of May, 1865, were $351,759 00
Corresponding month of previous year 281,759 00
Increase $70,000 00

The earnings of the Erie Railway for the month of May, 1865, were $1,339,279 87
Corresponding month last year 1,072,293 02
Increase $266,986 35

The earnings of the Marietta and Cincinnati Railroad for the month of May, 1865... $73,841 96
Corresponding month of previous year 83,964 80
Decrease $10,122 84

THE CHEMICAL GOLD AND SILVER ORE REDUCING COMPANY,

Assignees of the newly-patented process for the cheap reduction of Rock and Ores without Machinery.

NEW YORK

Accidental Insurance Co.,

No. 141 Broadway, New York,

FOR INSURING AGAINST ACCIDENTS of all KINDS.

CAPITAL, - - - - $250,000.

PRESIDENT: WILLIAM A. BAYLEY.
SECRETARY: EDWARD GREENE.

SIMEON BALDWIN, Chairman Executive Committee.
EDW'D W. LAMBERT, M. D., Consulting Physician.
JAMES W. ALEXANDER, Attorney.
HENRY A. BILLS, General Agent.

The business of this company is the insuring against accidents of all kinds, whether by travelling or otherwise.

Annual premium on $10,000, without compensation, $30; with compensation of $50 per week in case of injury, $50. Smaller amounts insured at corresponding rates.

A person insured against death only secures to his family the sum for which he insures if he is killed, provided the death occurs within three months from date of the injury.

IF AGAINST DEATH WITH COMPENSATION,

the injured secures the amount for which he insures to his family in the event of death; and in case of personal injury the amount stipulated until he is able to attend to his affairs, or until twenty-six weeks.

GENERAL ACCIDENTS,

include the Travelling Risk, and also all forms of Dislocations, Broken Bones, Sprains, Bruises, Cuts, Gunshot Wounds, Burns and Scalds, Bites of Dogs, Assaults by Burglars, Robbers or Murderers—the action of Lightning or Sun-Stroke, the effects of Explosions, Floods and Suffocation by Drowning or Choking; where such Accidental Injury is the cause of Death within three months of the happening of the injury, or of total disability to follow his usual avocations.

INDUCEMENTS:

The rates of premium are very low.

No MEDICAL EXAMINATION IS REQUIRED, and those who have been rejected by Life Companies in consequence of hereditary or other diseases can effect insurance in this Company at a very small cost.

No better or more satisfactory use can be made of so small a sum.

CHEAP AND PLEASANT

SUMMER TRAVEL.

RARITAN AND DELAWARE BAY R. R.

NEW YORK TO CAMDEN.

FROM PIER 3, N. R., DAILY, at 11 A. M., connecting with trains for Red Bank, Long Branch, Manchester, Tom's River, Barnegat and Tuckerton.

And 4.15 P. M., for Highlands, Middletown, Red Bank Shrewsbury, Estontown, Ocean Port, Branch Port, Long Branch, Shark River, Farmingdale, Squamkum, Bergen, Manchester and Tom's River. Fare to Long Branch, $1.

The splendid Steamer JESSE HOYT will leave as above, daily, at 11 A. M., for Camden direct, through in 5 hours. Fare $2; Excursion tickets, good for three days, $3 00.

From Camden take the West Jersey Railroad for Cape May and all parts of West Jersey.

TRANSFER OFFICE OF THE CHICAGO AND NORTH-WESTERN RAILWAY CO., No. 8 Wall st.,
NEW YORK, May 17, 1865.

THE BOARD OF DIRECTORS has this day declared A SEMI-ANNUAL DIVIDEND for the six months ending June 1, 1865, of THREE AND ONE-HALF PER CENT. on the Preferred Stock of this Company, payable (less the Government tax) at this office on and after the 20th day of JUNE next to all holders as shown by the Company's books at the close of business on the 10th day of June.

The books for the transfer of Preferred Stock for the above dividend will be closed on the afternoon of the 10th, and will reopen on the morning of the 21st of June.

The books for the transfer of both the common and preferred stocks for the Annual Meeting to be held in Chicago on the 1st of June next, will be closed on the afternoon of the 20th of May, and reopen on the morning of the 3d of June.

By order of the Board of Directors.

THIRD NATIONAL BANK OF THE CITY OF NEW YORK.

PAID IN CAPITAL.....$1,000,000.

DESIGNATED DEPOSITARY of the UNITED STATES AND AUTHORIZED AGENT OF THE TREASURY.

No. 25 NASSAU STREET, CORNER OF CEDAR, May 2, 1865.

This Bank was organized under the National Banking Act, in June last, by Mr. C. V. CULVER and associates, with a paid-up Capital of $500,000, and has been in successful operation since that period.

Its paid-up Capital has now been increased to $1,000,000, and, by a recent arrangement, Messrs. WINSLOW, LANIER & CO., of this City, their correspondents, together with Messrs. CULVER, PENN & CO., and their friends, being persons of well-known standing and large pecuniary means, have become the owners of its Capital Stock.

The managers of this Bank are, and for many years have been, in close and extensive business relations with Banks and Bankers in all parts of the country, and their experience and fidelity to the interests intrusted to their care need no recommendation.

The Bank is now prepared to open accounts with depositors, and will allow four per cent. interest to Banks and Bankers on their credit balances, rendering accounts current monthly.

Collections made through all parts of the country on the most favorable terms.

The Bank is an accredited Agent of the Government, and will give particular attention to the purchase of all Government Securities, and will discharge all business intrusted to its care promptly and without cost to its correspondents. J. F. D. LANIER, President.

C. N. JORDAN, Cashier.

Is now paying its Second Annual Dividend of 7 per cent. free of Government tax. The Capital of the Bank is to be increased to three millions, the new subscriptions to which are now nearly completed. The deposits of the Bank on the morning of May 2, were nearly fifteen million dollars

3m-19 HENRY A. SMYTHE, Esq., is the President.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

New York, Saturday, June 24, 1865.

Legality and Effect of Regulation of Railroad Companies as to Passengers.

The safety and convenience of passengers as well as the interests of the company itself, demand the adoption and observance of rules and regulations for the guidance of its servants and the conduct of passengers. So long as such rules are just and reasonable, do not infringe the charter of the company, and do not conflict with the law of the land, they are binding.

The degree of care, circumspection and diligence required of railroad companies, implies, as is said by the court in one case, a degree of authority little less than absolute, in the direction and management of the trains in their progress over the road, and in regard to the time and manner in which passengers shall enter and depart from, and the condition upon which they shall remain in, the cars. (Hibbard *vs.* N. Y. and Erie R. R. Co. 15 N. Y. 454.) Such regulations as will enable a railroad corporation to execute its difficult and responsible duties, insure the comfort and safety of its passengers, and protect itself from wrong and imposition, it has an undoubted right to prescribe, provided such regulations are reasonable and just.

It has a right to require that passengers shall preserve order; that they shall be seated, and not stand up in the passage-way or upon the platforms; and that they shall abstain from any act which tends to impede or interrupt the conductors and managers in the transaction of their business. A railroad company has also a right to prescribe how and at what place the passengers shall pay their fare or passage money, and what shall be the evidence to the conductor that such money has been paid, and of the passenger's right to ride upon the train. It may also require passengers to accept tickets temporarily, to exhibit them from time to time upon the request, and for the information, of the conductors; and to redeliver those tickets before leaving the cars. And regulations of this nature, which are necessary to insure the safety of the passengers themselves as well as to insure the payment of the regular fare, may be enforced by such reasonable means as the company may have at its command; for, without some measure of power to give them effect, such regulations would be of little avail. (Commonwealth *vs.* Power, 7 Mitc., 596; Hall *vs.* Power, 12 Id., 482; Hibbard *vs.* N. Y. and Erie R. R. Co., 15 N. Y. 455.) Thus in the last of these cases, the New York and Erie Railroad Company made a regulation requiring passengers to exhibit their tickets whenever requested by the conductor, and directed the ejection from their cars of those who should refuse to do so. The court held the rule to be a reasonable and proper one, and a passenger who refuses to comply with it, forfeits his right to be carried further, and may be rightfully ejected from the cars.

In the English case of Chilton *vs.* The London and C. Railway Co., 16 Mees. and W., 212, the passenger had lost his ticket, and the company detained the passenger. It was held that the bye law of the company providing that in default of the production of the ticket, the passenger should be liable to pay, for the whole distance that the train had traveled was repugnant to the common law, and the company was held liable in damages for detaining a passenger under such circumstances.

In this state, in the case of the People *vs.* Caryl, 3 Parker, 326, the court held that a conductor might eject a passenger from a car, not only for misconduct which was such as to disturb the peace and safety of the other passengers, but as well for noisy and disgraceful conduct, such as grossly profane or indecent language. So he might for refusal to give up his ticket, on being requested by the conductor to do so, in accordance with the reasonable regulations of the road; and on a trial of the conductor for assault and battery, by reason of such ejection, the conductor might prove such regulations in justification of his conduct.

In another case, the company by its printed rules, prohibited its engineers from allowing any one, not in its employ, to ride upon the engine, and the plaintiff, though informed of the rule, prevailed on the engineer to admit him, and he rode upon the engine without the knowledge of the conductor, and paying no fare, it was held that the engineer's consent conferred no right, and that the plaintiff could not recover damages of the company for injuries sustained while riding in that place (Roberston *vs.* N. Y. and Erie R. R. Co. 22 Barb., 91).

The question is often raised, whether a certain regulation is reasonable and proper. We have already above given several cases in which the court has passed upon the reasonableness of certain regulations. The following are other cases. A regulation requiring passengers to surrender their tickets during the trip was held a reasonable one in the case of the Northern R. R. Co. *vs.* Page, 22 Barb., 130; and in the case of Beebe *vs.* Ayers, 28 Barb., 275, it was held to be a reasonable regulation that passengers choosing to stop and lie over must procure their tickets to be so indorsed as to make them a voucher for the conductor having charge of a subsequent train.

The New York Central Railroad is bound by the statute (Laws of 1857, 488) to keep its ticket offices open for one hour previous to the actual departure of each train, irrespective of the time tables for such departure. And in case the ticket office is not thus kept open, a passenger who applies for a ticket, while the office is closed, cannot be charged extra fare for want of a ticket under a regulation of the company. (Barb. 353.) In the same case, afterwards taken to the court of appeals, the court held that the conductor had no right to demand and receive the five cents in addition to the usual rate of fare. (26 N. Y. R. 523.)

In a recent case in Vermont, (Stilphin *vs.* Smith,

29 Vt. R.) it was held that railway companies have the power to make and enforce all reasonable regulations, in regard to the conduct of passengers and to discrimate between fares paid in the cars and at the stations, and to remove all persons from their cars, who persist in disregarding such regulations, in a reasonable manner and proper place although between stations.

But this may be controlled by general legislation of the state. And when a statute gives a railway company power to remove those who violated any of the bye-laws or regulations of the company from their cars, at the regular stations, this was held in the last case, to carry all implied prohibition from removing such persons at other points. So in a case in New Hampshire (Hilliard *vs.* Goold, 34 N. H. 230) it was held that where a railroad company establish and give notice of a discrimination between the amounts of fare paid at the station and in the car, a passenger who refuses to pay the additional sum in the car, may be ejected by the conductor, using no unnecessary violence. So in Connecticut where a passenger refused to surrender his ticket in exchange for a check according to the rules of the company, and without such surrender left the car, he was liable for the fare for the distance traveled by him, and the court say, the conductor might eject him, upon his refusal. (Crockey *vs.* New London &c. 24 Conn., 249.)

"GOOD FOR THIS TRAIN ONLY."

It has been held that a regulation requiring passengers to go through, in the same train, and that if one do not, requiring fare for the remainder of the route, is valid. (Cheney *vs.* Boston and Maine R. R. 11 Met., 121.) In this case, the passenger, when he bought his ticket, did not know of the regulation, but was informed of it in the cars, and his money offered to be refunded, deducting what he had traveled; but he refused to make the arrangement, and demanded his ticket, in exchange for the check which had been given him marked "good for this trip only." He stopped by the way and went on the same day in the next train; and when he presented his check it was refused, and fare demanded, which he was obliged to pay. The court held the passenger could not recover the money of the company, and that it made no difference whether the plaintiff were aware of the regulation or not, at the time he purchased his ticket. He was bound to inform himself, or accept of the ticket, for what it entitled him to demand, by the rules of the company. A similar result is arrived at in a late case in New Jersey, Slate *vs.* Overton 4 Zab. 434. In Pier *vs.* Pinel 24 Barb 514, a case in this state, where a person was put off the cars of a railway company, for refusal to pay fare, having, and offering to the conductor a ticket of the company, dated a few days before, and marked "good for this trip only," but unmutilated, as was the practice of the conductors upon that road, where a ticket had been used; it was held that the ticket was *prima facie* evidence that the holder had paid the regular fare for it, and of his right to be transported, at some time, between the places specified, on some passenger train; and if unmutilated, the presumption was, that it had never been used, and that it imposed upon the company the duty to so transport the holder.

It was also held that the endorsement, "good for this trip only," had reference to no particular trip, or any particular time, but only to some one continuous trip. That the passenger might demand a passage, as well on a subsequent day as the one upon which the ticket bore date and was issued. "This decision seems to us not precisely to meet the whole question involved in the case, that is, whether such a regulation, as was claimed to be evidenced by the ticket, and the endorsement, was a valid and binding regulation. There can be no doubt such a regulation exists upon many of the roads, in this country, and that such a ticket is understood, by the community generally as entitling the holder only to a passage on that day, at most, if not on the very next train.

We very readily perceive that the form of the ticket is susceptible of the construction put upon it by the court. But we are satisfied, that is not the intention of those who issue such tickets, or of those who buy them, as a general thing, we should have been gratified to see the main question grappled with.

We do not intend to intimate any question of the general soundness of the views expressed in this case, upon what we regard as the true construction of the ticket. We are inclined to think they are sound. For it seems to us to be contrary to the first principles of justice and equity, that if the passenger is, for sufficient cause delayed, or hindered from going, according to his expectation at the time he pays his fare, that he should thereby lose all benefit of the payment when he also desires to go. The company may not be bound to refund the money, but they are certainly bound, upon general principles, to allow the holder of the ticket the benefit of his unused portion of it, deducting of course any loss or inconvenience to them by reason of the contract not being carried into effect, according to its terms. And any regulation of the company, which should deprive the passenger of this benefit would operate a forfeiture, which no court of justice will favor where the passenger is not in fault. It seems, in principle, to be controlled by the rule of law applied to work done upon the company's road but not according to the contract, and which nevertheless the company are benefitted by, to a certain extent. In such cases the company must pay for the work at its value to them, that is, deducting all losses, in consequence of it not being done as stipulated."

PUBLICATION OF RULES AND REGULATIONS.

It is necessary that the company's rules and regulations adopted for the conduct of passengers, should be so conspicuously posted or otherwise be made known to the passenger, that the latter could not reasonably plead ignorance of them. On a breach of a rule by a passenger, it is the duty of the conductor or other officer to inform the passenger thereof, or to bring it in some way to his notice. If after such notice, the passenger persists in his conduct, the officer of the company may take such action as the rule of the company requires.

MANNER OF EJECTING A PASSENGER.

In complying with the commands of the company to eject a passenger for his breach of the regulations of the road, a conductor is bound to use no unnecessary violence, and he is liable to an action for any brutal assault upon a passenger. The conductor or other officer of the company in ejecting a passenger, is protected so far only as he acts within the strict letter of his authority; and only so far as his acts were necessary to eject the passenger.

In regard to the place of putting a passenger off a train, some of the states have provided by statute that the passenger shall be put off, when necessary, at stations only, or within a short distance of a dwelling house.

In Illinois, a passenger refusing to pay his fare on a railroad train may be ejected at any usual stopping place, but not elsewhere. (Chicago &c. *vs.* Parks, 18 Ill., 460).

In New York, the statute provides that "if any person shall refuse to pay his fare, it shall be lawful for the conductor of the train, and the servants of the corporation to put him and his baggage out of the cars, using no unnecessary force, at any usual stopping place or near any dwelling house, as the conductor shall elect, on stopping the train." But it has been held under this statute, that when a train has been stopped for the purpose of putting out a passenger who refused to pay his fare, the right of the conductor to put him out was not taken away by his then offering to pay the fare. (People *vs.* Idlson 3 Parker, 234.) But, as before remarked, a conductor is responsible for any excess or improper kind of force, even in the lawful expulsion of a passenger.

☞ The Morris and Essex Railroad Company are making arrangements to change the location of their principal offices from Newark to the depot buildings at Hoboken. The superintendent and assistant superintendent are already at Hoboken, and in a short time the treasurer, freight agents, etc., will be there also.

Lehigh Coal and Navigation Company.

The shipments of coal by canal for the years ending December 31, 1863 and 1864, were as follows:

	1863.	1864.
Shipped at Mauch Chunk	458,939	446,718
" East Mauch Chunk	240,618	311,369
Total, tons of 2,240 lbs	699,557	758,087

—showing for 1864 an increase of 58,530 tons over the shipments of the previous year. During the year, the rates of toll on coal were advanced from one cent and a quarter per ton per mile to one cent and a half, and afterwards to one cent and three-quarters per ton per mile.

The distribution of coal carried on canal was as follows:

	1863.	1864.
Consumed on the line of the Lehigh Canal	114,164	93,039
Passed into the Morris Canal at Easton	208,396	194,096
Passed into the Delaware Division Canal	376,996	470,952

The coal that passed into the Delaware Division Canal divided itself thus—

Consumed on the line of the canal	24,419	27,426
Entered the Del. & Raritan Canal.	196,559	241,201
Reached tide-water at Bristol	156,017	202,325

The total amount of freights of all kinds (tons) carried on the canal is shown in the following table:

	Ascending.	Descending.	Total.
1864	122,521	739,162	861,683
1863	145,677	800,539	946,216
Inc. in 1864	23,156	61,377	84,533

The Lehigh and Susquehanna Railroad, over

which no through trains had been run since the flood of 1862, there being no improvement to connect with at White Haven, was re-opened at the end of June 1864, to be worked in connection with the Penn Haven and White Haven Railroad, just then finished and since incorporated with the Lehigh Valley Railroad. It has been in constant operation since then, and the business offered has been vastly in excess of the supply of cars. The freight transported over it, and the Nanticoke Railroad, which connects with it, and is leased to the company, was as follows, viz:

	Going North.	Going South.	Total.
Coal	18,195.00	94,979.65	113,174.65
Flour	.....	31.85	31.85
Lumber	246.60	9,987.35	10,233.95
Iron	550.00	.....	550.00
Merchandi'e	20.90	103.50	124.40
Total tons	19,012.50	105,102.35	124,114.85

The coal going north, 18,195 tons, was transported from the planes to the Wyoming Canal.

The number of passengers carried was 18,566 of which 17,694 were through and 872 way passengers.

The yield of the companys coal mines for the years 1863 and 1864 was as follows;

Mined on Company's account—	1863.	1864.
Panther Creek, Summit, and Old Tunnel Mines	380,303	379,727
Mined under leases from Company—		
East Lehigh Mine	30,387	.....
Room Run Mines	80,166	92,738
Tamaqua Mines	25,816	32,685
Old heaps	588	12,030
Total tons	517,259	517,180

The yield of 1864 was sent to market over the following lines:

	via Lehigh Canal.	*via* Lehigh Valley R. R.	Otherwise disposed of.
Panther Creek, &c.	347,982	25,096	6,649
Room Run	86,706	5,656	376
Tamaqua	32,685	....	....
Old heaps	12,030	....	....
Total	479,403	30,752	7,025

The earnings and expenses for 1863 and 1864 compare as follows:

	1863.	1864.
Rents and sales of real estate	$25,880 48	$25,299 80
Sales of Contingent Fund Securities	.....	29,526 40
Coal sold, including mine rents	759,679 61	960,325 22
Tolls on Canal, less expenses of collection	346,728 89	497,820 15
Tolls and transportation on Railroad including car service.	20,405 17	47,610 45
Total earnings	$1,152,694 15	$1,560,582 02
State Tax on capital stock	$7,439 85	$17,131 80
Balance of interest account	121,670 09	119,928 47
Cost of repairs and improvements	.....	101,245 06
Total expenses	$129,109 94	$238,305 33
Net earnings	$1,023,584 21	$1,322,276 69
Add balance to credit of profit and Loss Jan. 1	2,176,109 69	3,821,840 18
	$4,199,693 90	$5,144,116 87

Which is chargeable with repairs, &c., rendered necessary by the great freshet of 1862	$229,056 72	$.....
Dividends and tax	148,797 00	357,880 79
Capital stock for the conversion of the 36,060 shares of scrip, by decree of the Supreme Court in March 1864, at $50 per share	.....	1,803,000 00
	$377,853 72	$2,160,880 79
Balance to credit of profit and loss, Dec. 31	$3,821,840 18	$2,983,236 08

The following exhibits the financial condition of the company at the end of the years:

	1863.	1864.
Capital stock	$2,479,950 00	$4,282,950 00
Loans (funded debt)	2,786,681 92	2,846,881 92
Floating debt	453,293 02	1,200,321 30
Unpaid dividends	8,621 98	16,060 07
Arrears of interest	53,123 34	51,470 38
	$5,781,670 26	$8,397,683 67
Balance to credit of profit and loss	3,821,840 18	2,983,236 08
Total	$9,603,510 44	$11,380,919 75
Canal and river improvements	$4,455,000 00	$4,455,000 00
Lehigh and Susquehanna R. R.	1,389,988 37	1,917,895 35
Real estate, mine and other lands, mine &c., and works at Phila. &c	1,729,851 91	2,072,984 50
Moveable effects: debts due, bills receivable, bonds and mortgages, etc	1,235,526 28	2,128,112 02
Contingent Fund, cost of investments including securities constituti'g the fund of $500,000 specially pledged for the payment at maturity of the outstanding balance of the loan of 1870	680,372 02	640,952 02
Cash on hand	112,771 86	165,975 86
Total	$9,603,510 44	$11,388,919 35

The indebtedness of the company at the end of 1863 and 1864 comparatively, is shown in the following summary:

	1863.	1864.
6 p. c. Loan, due Mar. 1, 1870	$2,786,681 92	$414,607 77
6 p. c. Loan, due April 1, 1884	.....	2,430,274 75
Total	$2,786,681 92	$2,846,881 92
Increase of funded debt		$60,200 00
" floating debt		747,028 28
" dividends and int. unpaid		5,785 13
Increase of debt & liabilities in 1864.		$813,013 41
Increase of stock in 1864		1,803,000 00
Total increase of debt and stock		$2,616,013 41

In explanation of the increase in the floating debt it is proper to remark that the long established terms of payment, for mining and preparing the company's coal, are one-third cash and two-thirds in acceptances at three and four months without interest. The amount of such acceptances outstanding at the end of the year 1864, was necessarily largely increased by the fact that the prices paid for mining and preparing the coal were very nearly three-fold what they were formerly.

The property and assets of the company in the meanwhile were increased by a total of $1,777,409 31 arising from the following items of disbursement, exclusive of all renewals and repairs

Lehigh and Susquehanna Railroad—	
Extensions and improvements	$527,906 98
Real Estate—	
Purchase and improvement of lands	343,132 59
Moveable Effects—	
Boats, cars, engines, supplies, coal on hand, &c.	853,165 74
Balance of cash on hand	53,204 00
Total increase of property and assets.	$1,777,409 31

The following table exhibits at one view the cost of the company's works, and the earning yearly for the last twenty years:

Years.	Cost of works, lands, mines, &c.	Gross Earnings.	Total Expenses.	Net Earnings.	Dividends.
1845.	$6,628,891	$373,896	$39,488	$334,408	..
1846.	6,821,975	488,004	73,269	414,735	..
1847.	7,017,865	575,416	102,906	472,510	..
1848.	7,160,033	473,721	102,790	370,931	..
1849.	7,172,290	575,223	83,482	491,741	..
1850.	7,188,228	607,176	179,852	427,324	..
1851.	7,182,249	645,210	248,172	397,038	..
1852.	7,142,876	722,999	153,366	569,633	6
1853.	7,015,998	804,715	134,259	670,456	6
1854.	7,116,901	1,090,652	167,136	923,516	6
1855.	7,169,727	1,019,271	209,125	810,146	6
1856.	7,241,654	864,657	237,176	627,481	6
1857.	7,263,971	593,290	127,126	466,164	6
1858.	7,228,273	595,857	92,197	503,660	6
1859.	7,228,789	672,688	97,763	574,925	6
1860.	7,288,264	753,318	83,091	670,227	6
1861.	7,357,473	528,246	201,314	326,932	6
1862.	7,454,365	307,347	123,487	183,860	6
1863.	7,574,840	1,152,694	129,110	1,023,584	6
1864.	8,445,880	1,560,582	238,305	1,322,277	10

☞ A meeting of the stockholders of the Toledo and Wabash Railway Company will be held in Toledo on the 28th inst., for the purpose of taking into consideration a contract for consolidation of the said company with the Great Western Railroad Company of 1859, the Quincy and Toledo Railroad Company, and the Illinois and Southern Iowa Railroad Company, which contract has been duly approved by the Board of Directors, and will be submitted at said meeting for approval and ratification.

☞ Telegraph communication is now open with Marquette, Lake Superior, *via* Green Bay, Oconto, Peshtigo, Menominee and Escanawba, thence along the Peninsula Railroad to Marquette, Michigan. The new line constitutes a part of the Northwestern Telegraph (formerly Wisconsin State Line.)

☞ The Cincinnati and Indianapolis Junction Railroad has just been completed and its formal opening celebrated. It extends from Connersville to Cambridge City, and traverses some of the finest agricultural counties of Ohio and Indiana.

☞ The Richmond *Times* of 17th inst., that the Virginia Central Railroad bridges over Ravenna, Moor's Creek and Mechanics River, are progressing, and hopes are entertained that the whole road will be in operation in four weeks.

☞ The Orange and Alexandria Railroad is being repaired from Charlottesville to Lynchburg. Cars are now running from the latter place to Lye River, thirty miles.

Railroads of Iowa.

The following is a comparative statement of the mileage and gross earnings of the railroads of Iowa in the years 1863 and 1864:

	1863. Miles.	1863. Earnings.	1864. Miles.	1864. Earn'gs.
Burlington & Missouri River	75	$302,314	75	$390,237
Cedar Rapids and Missouri River	84	103,062	98	236,189
Chicago, Iowa and Nebraska	82	236,400	82	425,960
Dubuque Southwestern	44	86,128	44	63,630
Dubuque & Sioux City	99	275,096	99	398,238
Mississippi & Miss.	157	318,608	157	603,209
McGregor Western	..	.....	40	51,834
Des Moines Valley	89	227,024	114	318,395
Keokuk, Mt. Pleasant and Muscatine	25	41,914	25	66,103
Total	626	$1,570,546	731	$2,553,699
" in 1863			626	1,570,546
" in 1862			579	1,109,346

Petroleum.

It is a peculiarity of the American people, that whatever their hands find to do, they do with all their might. This is a peculiarity so marked and so general that it distinguishes them from all other nations, and is the great secret of their industrial prosperity. The prosecution of the petroleum business is characterized by this trait. But a short time has elapsed since the discovery of rock oil in the United States. It was known to have existed for hundreds of years in the East Indies, but the world was but little the better for it. Naptha, as it was best known, formerly was found in Rangoon on the Irrawaddi River, and in Persia; it has been found also in Germany, and even in Derbyshire, England. But nothing of much importance has come out of it there. The naturalists and chemists believe it is the production of heat and pressure in the earth on organic matter.

At any rate when it was discovered in Pennsylvania it was not permitted to remain unnoticed. Companies were rapidly formed, locations secured, borings commenced, and at once millions of gallons were brought forth from the depths to become an article of use, merchandise and commerce. Villages and towns rose around the oil wells as if by magic. Where the capital came from was not inquired or debated, nor from whence the population sat in. The work went on.

It is well-known that oil wells had been sunk at Enniskillin in Canada West, but they were not operated with much vigor. American enterprise and capital have even there been the chief reliance; but in Pennsylvania, and latterly in Western Virginia have we seen the most remarkable results of the discoveries.

The press, always vigilant in this country on public matters, has not failed to record the history and success of most of the enterprises connected with this production, so that in this particular we should have nothing to add even if we had the space for the information, but recently attempts have been made to apply the science of statistics to this new industry, and with considerable success. In Philadelphia a large and elaborate volume has just been published giving a full account of all the known wells and companies in this country, their localities, capital, Boards of Directors and officers, and we are now able to give an abstract of them and place it on record.

The capitals of these companies vary from $5,000 to $10,000,000, many of them being well watered from the start, and making more money for those who did not bore than those who did. The dividends have ranged from 25 to 30 per cent. per annum down to nothing at all, which latter is likely to be the ruling rate with many of these companies.

At the close of the month of March last, the following statement gave a fair idea of the business and the number, localities and capital of the companies:

	No. of Companies.	Amount of par capital.
In Philadelphia	436	$230,885,000
In New York	220	214,400,000
In Pittsburg	91	22,930,000
In Boston	..	3,000,000
In Baltimore	..	2,000,000
In Chicago	..	5,250,000
In Detroit, Michigan	..	500,000
In Erie, Pa	4	*1,500,000
In Titusville, Pa.	3	*4,750,000
In Washington, D. C	2	700,000
In Indiana	7	1,780,000
In Kentucky	81	†24,000,000
In Ohio	103	25,873,500
In places not enumerated	..	7,500,000
Ninety-two companies in New York, Philadelphia & Pittsburg, whose capital is not published, estimated	..	36,000,000
Total		$580,568,500

*About. †Estimated.

It thus appears that, at the close of March, there were companies organized in the United States, the combined par capital of which amounted to over $580,000,000. At the present time, the aggregate stands, no doubt, at fully $600,000,000. The total number of companies in existence, at the beginning of this month, was 1,085, and their average par capital, $535,000.

It may be of interest here to give the following comparison of the average currency price of crude oil and refined, at New York, during 1862, 1863 and 1864:

	1862. cts.	1863. cts.	1864. cts.
Crude	20⅝	28	41⅞
Refined in bond	36⅜	44¼	64¾

The following statement shows the receipts and shipments of petroleum and its products at New York during 1864:

	Received. bbls.	Shipped. bbls.
Crude, oil	442,501	189,841
Refined	258,887	336,244
Naphtha	9,627	6,793
Tar, etc	9,096	723
Total	720,111	533,601

This comparison affords a fair indication of the proportion in which the several forms and products of petroleum are produced.

It is thus apparent that the price has actually advanced notwithstanding the great increase of production likely to be extended by the reported discovery of the oil in localities very widely separated, and in many of the Middle and Western States. Geologists are everywhere looking for the formations in which it is found, and as these are entirely independent of the coal systems contrary to former opinion, the discovery of these at an economical working depth will lead to the further prosecution of researches by adventurers.

The extensive use of the article for illumination must continue to make it one of great demand and profit. Already whale oil is almost superseded in the hot countries by the use of petroleum. A large trade in the article for South America has sprung up, and as its attendant and consequence immense quantities of lamps and chimney glasses are exported with it. American ingenuity has also been exercised to find the best kind of kegs in which it can be transported without loss, and the latest and most striking forms of these are metallic casks, which can be slung on the backs of mules to be carried from the coast over the Andes to towns in the interior. In this oil and even in its refuse, the chemists have found dormant materials for the most splendid colors. Just as out of the most ignoble substances the chemists have discovered the elements of the most delicious perfumes, so out of this greasy and stifling oil are obtained the most magnificent hues equal to the finest produced by Nature in her gayest parterres, and which transferred to silks give to the costume of our women, an unprecedented brilliancy, or the most delicate tints and shades.

Here then is another wonderful development in our country adding millions annually to its wealth in a new direction, and where least expected. If cotton ever really was King, it is nearly dethroned by this new offspring of our soil, with oily face and hands, which has sprung out of the depths of the earth, and claims his right to be henceforth considered the equal of cotton, tobacco, sugar and rice.

The great ease with which capital to the extent of six hundred millions has been raised in a short time for the production of petroleum, one-fifth of the whole National debt, is significant of the power and the growing means of the Nation.

☞ The stockholders of the Shore Line Railroad met in New Haven on the 10th inst., for the purpose of authorizing the directors to issue seven per cent. mortgage bonds to the amount of $200,000. The following resolutions was introduced and carried nearly unanimously:

Resolved, That the Directors of the Shore Line Railway be and are hereby authorized to issue bonds bearing interest at seven per cent., payable semi-annually, for two hundred thousand dollars to pay off the debt incurred by the late Trustees, and to make such further improvements and purchase such additional material as may in their judgment be necessary for the successful running of the road; and that the Directors be further authorized to secure said bonds by a first mortgage on the Shore Line Railway and all their property, rights and franchises, as provided by law; said bonds to be dated July 1, 1865, and to be payable fifteen years after date.

The following was also carried upon a stock vote, the vote standing 1,980 for and 335 against:

Resolved, That the bonds to be issued be offered in the first instance to holders of second and third mortgage bonds issued by the New Haven and New London Railroad Company, such preference to cease after the lapse of such time as the Directors shall appoint.

☞ Great efforts are being made to push forward the Grand Rapids and Indiana Railway, and the prospect is said to be encouraging.

Interest and Dividends.

The Michigan Central Railroad Company have declared a dividend of $4 per share in cash, free of Government tax, and $6 in stock, fractions to be paid in cash at par, payable July 1, in New York, Boston and Detroit.

The Boston and Maine Railroad Company has declared a dividend of 4 per cent., payable July 1.

The Boston and Worcester Railroad Company announce a dividend of 4½ per cent., payable July 1.

The Boston and Lowell Railroad Corporation will pay a dividend of 2 per cent., or $10 per share on the 30th June.

The Western Railroad Corporation has declared a dividend of 4 per cent., payable July 1.

The Eastern Railroad Company has declared a dividend of 3 per cent., payable July 1, and the Eastern (New Hampshire) Railroad one of 3 per cent., payable July 1.

The Old Colony and Newport Railroad Company has declared a dividend of $4 per share, payable July 1.

The Connecticut River Railroad Company has declared a semi-annual dividend of 4 per cent., payable July 1.

The coupons of the Central Pacific Railroad Company of California, due July 1st, will be paid by Eugene Kelly & Co., 36 Wall street.

Coupons Nos. 10, 20 and 21 of San Francisco bonds, due July 1st, will be paid by Lees & Waller.

A semi-annual dividend of three and a half per cent. on the capital stock of the Mercantile Mutual Insurance Company will be paid at their office on and after the 1st of July.

The Columbian Marine Insurance Company will pay, 1st July, a dividend of 3½ per cent.

Philadelphia and Erie R. R.

The stockholders of the Philadelphia and Erie Railroad Company will be glad to learn of the rejection by the Board of Managers on Saturday last, of the Act of Assembly, authorizing them to issue a preferred stock for an amount equal to the completion of some unfinished work on the line of road and at Erie harbor. A very satisfactory arrangement, we understand, was at the same time concluded with the Pennsylvania Railroad Company for the purchase of some of the Philadelphia and Erie mortgage bonds, which will enable the Company to finish up all its work without the issue of any of its reserve stock. Arrangements, were are informed, are made to so thoroughly stock this important thoroughfare as to enable it to meet its growing trade. The fast through-line about to be placed on the road, it is contemplated to run through to Erie in eighteen hours, connecting with a through line at Milton from New York to the West, over the New Jersey Central, Lehigh Valley, and other connecting links, thus forming the shortest route to the West from New York. The freight traffic on the Philadelphia and Erie road is large, and when met by a full supply of power and cars, as contemplated by existing arrangements, will much increase, to the advantage of the road and the northern section of the State, as well as to the trade of Philadelphia.—*Pyila. Ledger, June* 21.

☞ The value of personal property in Cincinnati in 1865 is $48,524,313, against $34,148,719 in 1864—an increase of $14,375,594. In Hamilton County, exclusive of Cincinnati, the valuation is $8,850,137, against $6,981,069 in 1864—an increase of $1,869,068. Including the city and townships, the valuation of personal property in 1865 is $57,374,450, against $41,129,788 in 1864—an increase of $16,244,662.

Receipts at Tide Water.

The quantity of flour, wheat, corn and barley left at the tide water from the commencement of navigation to the 31st May, inclusive, during the years 1864 and 1865, was as follows:

1864	51,700	2,450,400	560,400	90,100
1865	64,900	403,800	560,500	90,800
Inc.	13,200	Dec. 2,046,600	Inc. 100	Inc. 780

By reducing the wheat to flour the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows a deficiency equal to 395,520 brls. flour.

The following comparative table shows the quantity of some of the principle articles of produce left at tide water from the commencement of navigation, to and including the 31st May instant, in the years indicated:

	1863.	1864.	1865.
Canal opened—	May 1.	April 30.	May 1.
Flour, brls	130,700	51,100	64,900
Wheat, bus	2,625,600	2,450,400	433,800
Corn, bus	3,224,300	369,400	560,500
Barley, bus	46,600	98,100	99,800
Malt	.....	.....	92,100
Oats, bus	1,327,000	1,180,000	1,741,000
Rye, bus	42,800	22,500	20,800
Beef, brls	4,607	1,900	2,990
Pork, brls	124,807	11,500	6,810
Bacon, lbs.	908,700	316,600	784,600
Butter, lbs.	5,700	600	8,500
Lard, lbs	9,284,700	130,300	360,500
Cheese, lbs	325,700	.....	4,300
Wool, lbs	1,800	7,500	16,100

Leesport and Moselem Railroad.

The Leesport and Moselem Railroad Company, incorporated by the legislattre last winter, has been fully organized, and Nicholas Hunter, Esq., of Moselem Furnace, Berks County elected President. The stock of the Company has all been promptly subscribed for, and the immediate making of the road depends upon the promptness with which the bonds of the company are taken. This road will be of some importance to the interests of this region by opening a new section of country, and a more direct route to the Lehigh, and therefore commends itself to the consideration of our business community. The road commences at Leesport on the Philadelphia and Reading Railroad, eight miles above Reading, and extends to Topton on the East Pennsylvania Railroad, opening a new avenue to New York and new means for supplying local demands. The Company will issue six per cent. bonds, guaranteed by the Philadelphia and Reading Railroad Company, and receivable to the extent of 33⅓ per cent. thereof in payment for freight on merchandise passing over the Leesport and Moselem Railroad, or over this road, and the Philadelphia and Reading Railroad. As a mere investment the security of these bonds is of course undoubted, in addition to which the taking of them will insure the immediate making of this important road.—*Pottsville Miners' Journal.*

☞ At a meeting of the stockholders of the Cumberland Valley and Franklin Railroad Companies, held at Chambersburg on the 31st of May last, the agreement previously entered into between and by the boards of managers of said companies to merge both companies into one under the charter of the Franklin Railroad Company was unanimously sanctioned. One consolidated road now extends from Harrisburg, Pennsylvania, to Hagerstown, Maryland, a distance of seventy-eight miles.

☞ There appears to be but little doubt that the contemplated air line railroad from Indianapolis to Chicago will be commenced before the close of the present season.

☞ A contract has recently been completed in New York between Francisco Farraya, Consul General for the United States, representing the United States of Bogota, South America, and a firm composed of residents of New York, for the erection of a line of electric telegraph, to connect Bogota with Nare. The communication, when completed, will be from the city of Bogota, via Ambelema and Honda, along the banks of the river Magdalena, to Nare, which latter place, for some time, will remain the terminus of the wire. This is the first attempt at the introduction of the magnetic telegraph into South America, and is only the initial movement, which will probably result in connecting the States of that Republic with the United States. The new line of telegraph is to be completed and in effective working within six months from the present time. The contractors are Messrs. Davison, Styles and Woolsey.

☞ An interesting point has just been decided by the Supreme Judicial Court of New Hampshire, at Manchester, in an action brought against Messrs. Hill & Co., expressmen. It seems that a package of clothing was sent to Derry by defendants' express, which was refused by the party to whom it was sent on the ground that it was not what he bought. The cash on delivery which this party had paid was handed back and the package returned to the plaintiffs, who refused to receive it, and demanded $24 which had been paid for it but refunded by the express company's agent. The court held that the defendants were not liable, and that when a package is delivered to an express company marked "cash on delivery," the consignee is entitled to a reasonable time to examine its contents, before he makes his election to take it and pay the price.

☞ A new railroad project started in Salisbury is to link Millerton station on the Harlem road with the Housatonic at Sheffield, Mass., a distance of fifteen miles. This, it is said, would give an unbroken air line route from a point near the southern boundary of Vermont to New York, and shorten the distance to New York from Berkshire County, Mass., by 30 miles; and, moreover, Salisbury could then move the 20,000 tons of iron ore (which is now conveyed by horse power) by rail.

☞ At the annual meeting of the stockholders of the Mississippi and Missouri Railroad Company, held at Davenport, Iowa, on the 5th instant, the following gentlemen were elected directors for the ensuing year: General John A. Dix, Geo. T. M. Davis, John Elliott, Geo. H. Stanton, Jr. Blakely Wilson and David Jones, of New York; Hiram Rice, J. B. Grinnell and Ebenezer Cook, of Iowa.

☞ A project is said to be on foot to build a railroad from Holly to Monroe, Michigan, forty miles—thus connecting Saginaw and Toledo and Cincinnati.

☞ Silas Seymour, Esq., has relinquished the position of engineer of the Potomac aqueduct, for the purpose of assuming the duties of consulting engineer of the Union Pacific Railroad.

☞ It is said that John Bridgeford, of Albany, has been awarded the contract, by the Cohoes Company, for building the new dam across the Mohawk river. It is to cost $200,000.
